## Budget Message

To the Members of the Legislature of California:

Today I submit a budget for difficult times. This budget will reduce the growth in government spending below the rate of inflation and well below the limits imposed by the recently passed Gann Initiative.

This budget marks the end of the era of large State surpluses. The budget contains a reserve of \$400 million dollars in the event the State experiences a more severe economic recession than currently predicted. This leaves the State with a surplus of only \$112 million at the end of the 1980-81 budget year.

This budget meets the essential needs of the State and proposes major actions as follows:

1. Initiatives to protect California's environmental assets and to conserve energy in both the public and private sector.
2. A doubling of current funding to reduce the dangers from toxic chemicals and hazardous wastes.
3. Significant increases in the State's commitment to mass transit.
4. More than 40% increase in State funding in California's mental health programs over a two-year period.
5. A 50% increase in the State's commitment to the arts.
6. A substantial increase in the economic and employment development programs designed to increase the skill levels and job opportunities of low income and minority workers.
7. Reauthorization and expansion of the California Conservation Corps.
8. A 50% increase in the number of students to be provided service through the master plan for special education in our elementary and secondary schools.

*Edmund G. Brown Jr.*

Governor

# *The Governor's Budget*

## INTRODUCTION

The *Governor's Budget* is divided into four sections. The first is traditionally called the "A" pages and consists of summary tables and brief narrative discussing the major budgetary elements, changes, and accomplishments. Included in the "A" pages is the Governor's Message, the General Budget Summary which shows the total funds available for the past year, current year and proposed budget, and the traditional revenue and expenditure piecharts for the proposed budget.

The second, and largest section, is the individual budget presentations for each department. The presentations are arranged within eight major groupings, i.e.; Legislative, Judicial and Executive; State and Consumer Services; Business and Transportation; Resources; Health and Welfare; Education; Youth and Adult Correctional; and General Government. Each budget presentation provides past year, current year, and proposed budget information, in a program budget format with a summary by object of expenditure and highlights of significant changes or accomplishments.

The third section, called the "B" pages, provides additional fiscal information in summary schedules, e.g., comparison of revenues and expenditures for the past year, current year, and the proposed budget. The "A" and "B" pages together are published separately as the *Governor's Budget Summary*. Finally, the fourth section, which is also published separately, is the *Salaries and Wages Supplement*. This document presents the detailed data on approved staffing for State agencies.

### THE BUDGET PROCESS

The Governor's Budget is the result of a process which begins in the spring, more than one year before the budget is to be effective. The process is started when budget preparation instructions are issued by the Department of Finance to all departments. These instructions describe the Administration's guidelines related

to continuing the current level of service (baseline budget) and proposed budget changes. They are to be used by departments in preparing their budgets for submission to the Department of Finance in September and October.

In addition, the Department of Finance may initiate budget change proposals relative to a particular program or operational unit of a department. These proposals are based on special program and cost evaluations prepared by Department of Finance staff and may require a department to justify continuing a particular activity or level of service.

During the fall, each department's baseline budget is reviewed and budget change proposals are thoroughly analyzed by the Department of Finance. Conferences are held with departmental and agency representatives, the Director of Finance and the Department of Finance program budget manager to decide that a particular budget request is within the established budget guidelines. Issues outside of the established priorities are referred to the Governor's Office. When all the decisions are made, a particular budget is "closed" and it is scheduled for printing by the State Printing Plant.

With the submission of the Governor's Budget, which is required by January 10 of each year, the chairman of the Senate Finance and Assembly Ways and Means Committees each introduce a Budget Bill which contains appropriations to finance the program levels proposed in the Governor's Budget. Throughout the spring, and with the assistance of Committee Consultants and the Legislative Analyst, who prepares a detailed analysis of the Governor's Budget, the fiscal committees of each House of the Legislature hold hearings to determine if changes should be made in the Governor's Budget. At these hearings, representatives from the department whose budget is being heard, the Department of Finance, the Legislative Analyst, and the public may be called upon to provide official testimony.

Changes desired by the Administration concerning events occurring after the Governor's Budget is submitted are included in "Finance Letters" addressed to and considered by the Fiscal Committees.

In mid-May, the Department of Finance updates its estimates of current year and budget year revenues, expenditures (including any final Administration expenditure proposals) and surplus. This provides the Legislature with the most current estimate of resources that will be available for expenditure.

At the completion of all the hearings, each House passes its Budget Bill. A Conference Committee of six legislators is chosen to resolve differences in the two Bills and to incorporate a "Conference Committee Version" into one of the Bills. This Bill is then sent to the floor of each House and, if passed by two-thirds, is en-

rolled to the Governor. If it is not passed, a new Conference Committee is formed and the conference process is repeated.

Upon receipt of the Budget Bill, the Governor meets with his advisors to exercise his veto discretion, which permits reducing or eliminating the entire amount of a particular item of expenditure. The Governor then signs the Budget Bill and it becomes the Budget Act. The Legislature may then consider overriding any vetoes the Governor has made and may do so by a two-thirds vote of each House.

At this point, *most* of the operating budget of the State has been determined. However, it is not until early November that the total budget authorizations are actually known. By then, the Department of Finance has analyzed the cost impact of all other legislation which authorized additional expenditures or changed revenues for a fiscal year.

## THE BUDGET DOCUMENTS

Listed below are the key documents used in the budget process and a brief description of their purpose, originator and approximate release date.

<i>Title</i>	<i>Purpose</i>	<i>Prepared/Issued</i>	<i>When</i>
Budget Letters and Management Memos	Define current Administration guidelines for budget preparation	Governor/Department of Finance	April through December
Budget Change Proposals	Proposes and documents budget changes to maintain the existing level of service or to increase the level of service	Agencies and departments submit to Department of Finance for analysis	July through September
Governor's Budget	Governor's proposed budget for the upcoming fiscal year	Governor/Department of Finance	January 10
Budget Bill	Requests spending authorization to carry out Governor's expenditure plan (Legislative budget decision document)	Department of Finance/Legislature	January 10
Governor's Budget Summary	A summary of the Governor's Budget	Governor/Department of Finance	Late January
Budget Analysis	Analysis of the budget, including recommendations for changes to the Governor's Budget	Legislative Analyst	February
May Revision of General Fund Revenues and Expenditures	Update of General Fund revenues, expenditures and surplus estimates based on the latest economic forecast	Department of Finance	Mid-May
Budget Act	The primary annual expenditure authorization as approved by the Governor and Legislature, including a listing of Governor's vetoes	Legislature/Governor	Late June
Supplemental Report of the Committee of Conference on the Budget Bill	Contains language on statements of intent and requests for information or studies	Legislative Analyst	Early July
Final Budget Summary	Update of the individual Budget Act items with changes by the Governor's vetoes, including summary budget schedules	Department of Finance	Mid-July
Final Change Book	Update of the changes to the detailed fiscal information in Governor's Budget, in accordance with the Budget Act	Department of Finance	Late July
Summary of Revised Revenues and Authorized Expenditures	Update of revenue and expenditure estimates, including financial legislation	Department of Finance	Early November

<sup>a</sup> The General Budget Summary includes the revenues and expenditures of all state funds that reflect the cost of state government and selected bond fund expenditures. The transactions involving other nongovernmental cost funds are excluded.

<sup>b</sup> These funds are in a trust fund and reserved until appropriated by the Legislature.

<sup>c</sup> Based on historical trends, General Fund expenditures have been reduced to include Estimated Unidentifiable Savings of \$150,000,000 in the 1979-80 fiscal year and \$200,000,000 in the 1980-81 fiscal year.

<sup>d</sup> Includes \$72,290,438 reserved by the Legislature in the Budget Act of 1978 for construction of state office buildings. The original reserve was \$142.6 million, of which \$33.1 million was appropriated in the Budget Act of 1979 and \$37.2 million is proposed for appropriation in the Budget Act of 1980.

LONG-TERM OBLIGATIONS			
Amount to be provided from future revenues and school districts			\$3,767,875,842
General obligations bonds			\$6,017,865,000
Less: self-liquidating bonds			3,218,105,000
Net general bonded debt			\$2,799,760,000
Interest payable in future years			968,115,842
Net Total Long-Term Obligations			\$3,767,875,842
FIXED ASSETS			
State's Investment in Fixed Assets		\$2,833,000,000	

<sup>†</sup> The data that appears in this statement appears in the report of the State Controller for the year ended June 30, 1979.

## TOTAL STATE SPENDING PLAN

Schedule 1-C is included for informational purposes to show in one place the State's total spending plan. It provides a means of comparing the total State resources used on a year-to-year basis. In addition to the General Fund, Special Funds and Selected Bond Funds, Schedule 1-C shows expenditures from nongovernmental cost funds and Federal funds. The latter two groupings have not traditionally been included as part of State summary expenditures in Governors' budgets.

A basic premise in such a consolidation as this is that the State is the financial unit and individual funds are subsidiary units to the State. This is similar to financial units in the private sector in which diversified commercial corporations with several subsidiaries report their operation on a consolidated basis—but is a contrast to traditional governmental accounting, which has held that the individual funds are the financial units and should not be consolidated with other funds or types of funds.

The consolidation in Schedule 1-C presents some theoretical and practical problems. From a theoretical standpoint, it combines all funds and gives the illusion that spending occurs in the same manner regardless of fund. This is not the case: the General Fund, Special Funds and Bond Funds are accounted for on a modified accrual basis; the Public Service Enterprise Funds, Working Capital and Revolving Funds, Retirement Funds and Trust and Agency Funds are accounted for on an accrual basis; and the Health Care Deposit Fund and General Fund appropriations to Medi-Cal are accounted for on a cash basis.

This combination also may give the illusion that total State spending is authorized and controlled through the annual budget process. This is not the case. Each fund is created for a specific purpose and its spending is dictated based on the provision of the Constitution or Statute under which it was created. In essence, each fund is a separate fiscal and legal entity that operates under the specific legal provisions that created it. Many expenditures from funds are authorized by the Constitution or other statutes besides the Budget Act.

From a practical standpoint, Schedule 1-C is only an approximation. For example, it includes some duplicate amounts and does not include reimbursements. Some duplications are spending from the Department of General Services' Service Revolving Fund, which are also included in spending of departments, and from Workers' Compensation, Unemployment Insurance and Nondisability Insurance Benefits, which have been previously collected from State agencies. Other duplications include amounts from bond proceeds, which are included both when bond proceeds are spent and when debt service is paid, and Federal Revenue Sharing, which is included as spending from the Federal Revenue Sharing Fund and also from the General Fund when the funds are transferred to and expended from it.

Schedule 1-C does not include reimbursements received from the public or other levels of government, as these are deducted from State expenditures.

### Schedule 1-C Total State Spending Plan Governmental Cost, Nongovernmental Cost and Federal Funds (thousands)

<i>Funds</i>	<i>1978-79</i>	<i>1979-80</i>	<i>1980-81</i>
Governmental Cost Funds:			
General Fund.....	\$16,250,774	\$18,706,372	\$20,748,403

Public Service Enterprise Funds .....	1,751,539	2,167,953	2,367,202
Working Capital and Revolving Funds .....	190,390	264,084	287,907
Bond Funds—Other .....	159,066	173,856	193,840
Retirement Funds .....	1,320,007	1,444,218	1,595,170
Other Nongovernmental Cost Funds .....	1,351,748	1,653,744	1,971,185
Totals, Nongovernmental Cost Funds .....	\$4,772,750	\$5,703,855	\$6,415,304
Federal Funds .....	7,452,647	8,415,379	9,257,386
<b>TOTALS, SPENDING, ALL FUNDS .....</b>	<b>\$30,970,363</b>	<b>\$36,217,981</b>	<b>\$39,676,989</b>

The following provides supplemental detail for the significant funds and amounts which comprise the various categories of Nongovernmental Cost Funds:

(in thousands)			
Funds	1978-79	1979-80	1980-81
<b>PUBLIC SERVICE ENTERPRISE FUNDS:</b>			
Veteran's Farm and Home Building Fund of 1943 .....	\$569,827	\$853,930	\$875,239
Harbors and Watercraft Revolving Fund .....	14,374	16,245	19,251
Central Valley Water Project Revenue Fund .....	26,299	24,411	32,833
California Water Resources Development Bond Fund.....	132,107	158,724	168,244
Central Valley Water Project Construction Fund.....	11,388	64,287	45,997
Unemployment Compensation Disability Fund.....	508,599	525,475	634,318
Continuing Education Revenue Fund.....	16,341	13,984	15,211
State Compensation Insurance Fund <sup>1</sup> .....	402,361	438,800	469,000
Others (Including Toll Bridge Funds).....	70,243	72,097	107,109
Totals, Public Service Enterprise Funds.....	\$1,751,539	\$2,167,953	\$2,367,202
<b>WORKING CAPITAL AND REVOLVING FUNDS:</b>			
Architecture Revolving Fund .....	\$6,209	\$8,144	\$8,481
Service Revolving Fund .....	136,836	167,705	178,698
Stephen P. Teale Consolidated Data Center Revolving Fund.....	13,533	18,234	18,314
Correctional Industries Revolving Fund .....	20,912	23,845	26,244
Others .....	12,900	46,156	56,170
Totals, Working Capital and Revolving Funds.....	\$190,390	\$264,084	\$287,907
<b>BOND FUNDS—OTHER:</b>			
Public School Building Loan Fund.....	\$6,124	\$5,292	\$6,490
State School Building Aid Fund .....	152,942	168,564	187,350
Totals, Bond Funds—Other.....	\$159,066	\$173,856	\$193,840
<b>RETIREMENT FUNDS:</b>			
Benefits Paid: <sup>2</sup>			
Judges' Retirement Fund .....	\$16,150	\$18,057	\$20,036
Legislators' Retirement Fund .....	1,991	2,176	2,400
Public Employees' Retirement Fund .....	726,052	801,933	879,511
Teachers' Retirement Fund .....	556,065	597,963	666,720
Totals Benefits Paid .....	\$1,300,258	\$1,420,129	\$1,568,667
Support .....	19,749	24,089	26,503
Totals, Retirement Funds.....	\$1,320,007	\$1,444,218	\$1,595,170
<b>OTHER NONGOVERNMENTAL COST FUNDS:</b>			
County Funds .....	\$37,634	\$235,169	\$260,488
University Funds .....	869,857	973,440	1,068,033
Federal Revenue Sharing .....	276,200	276,200	276,200
Others .....	168,057	168,935	366,464
Totals, Other Nongovernmental Cost Funds.....	\$1,351,748	\$1,653,744	\$1,971,185

<sup>1</sup> Includes the following amounts for benefits paid which are not reflected in the Governor's Budget. Estimated by the Department of Finance based upon industry trends.

**STATE COMPENSATION INSURANCE FUND:**

Benefits Paid .....	\$336,494	\$360,000	\$385,000
Support .....	65,867	78,800	84,000
Totals, State Compensation Insurance Fund .....	\$402,361	\$438,800	\$469,000

<sup>2</sup> Includes benefits paid which are reflected only in Fund Condition Statements in the Governor's Budget.

# Summary of A-Page Highlights

The Governor's Budget has traditionally included a narrative presentation in the "A Pages" to highlight the significant issues and changes included in the detailed departmental presentations. This year special write-ups are included for a number of issues because of their impact on all Californians. These special write-ups are presented on goldenrod colored pages. The more traditional A Pages for highlighting revenues and significant budget changes and accomplishments follow the special presentations.

# *Energy Conservation/Alternatives and Resources Management*

California has established a reputation for innovation in a number of key policy areas and technologies. One such policy area is energy conservation and development in which many technological alternatives are being researched and tested in order to develop efficient, benign and renewable sources of energy. Over ninety-one percent of the State's energy needs are supplied by oil and natural gas, with oil filling almost two-thirds of these needs. Sixty-six percent of the State's electricity is generated from oil and natural gas. Twenty-five percent of the State's total energy supply comes from foreign nations (dominated by oil imports, but including significant imports of natural gas from Canada). It behooves us to strive to limit reliance on foreign energy and nuclear power and increase emphasis on conservation measures.

For a number of years, various State agencies, from the California Energy Commission and the Public Utilities Commission to the Department of General Services, Caltrans and the Office of Appropriate Technology, have been researching and testing various conservation measures and new energy technologies as an integral part of their daily operations. With the world energy situation becoming increasingly uncertain, however, the Governor has issued directives aimed at reducing electrical consumption and reliance on foreign oil. In addition, the Governor has become increasingly concerned with the

need for improved management and conservation of other natural resources.

In accordance with the Governor's directives and concerns, a number of state agencies have submitted new proposals totalling more than \$35 million. More than \$10 million is proposed from the General Fund and \$25 million from a proposed Energy and Resources Fund (ERF) to be established in separate legislation. Funds for the ERF are proposed from the anticipated increase in tidelands oil revenue as a result of deregulation of heavy crude oil prices. These proposals include both new initiatives and program expansions which either relate to the conservation and/or development of energy (totalling more than \$20 million), or to the management needs of other critical natural resources (totalling \$15 million). These proposals are in addition to support for agencies such as the California Energy Commission and the Public Utilities Commission, both of which are budgeted for expanded activities related to energy policies.

Improved energy efficiency and conservation in buildings offer the most significant opportunities for energy savings. Among the new initiatives, almost \$12 million is earmarked for such purposes. Included in this effort are an extremely efficient system for patient comfort conditioning at Napa State Hospital and a building efficiency program for Atascadero State Hospi-

tal. These projects and others were developed using a computerized, lifecycle cost analysis. A Statewide assessment team from General Services will rigorously examine future capital outlay investments for energy saving opportunities.

Non-building energy conservation measures also offer great potential for reducing reliance on imported oil. Almost \$3 million has been included in this Budget for such items as additional bicycle commuter facilities programs at Caltrans and expansion of the energy efficiency procurement program at General Services.

Cogeneration technologies provide efficient electrical generation together with the production of steam or heat. Cogeneration is a technology which offers twin advantages of using existing fuels more efficiently and decentralizing electrical power generation. As a part of the new energy initiatives, over \$2 million for cogeneration at Metropolitan, Napa and Atascadero State Hospitals is proposed.

California has led all other states in recognizing the potential of solar energy and in taking early steps to commercialize solar energy applications (including the nation's largest solar income-tax credit). Almost \$2 million has been included in this Budget for such items as solar water systems for the Resources Agency Building in Sacramento, California Highway Patrol buildings in Los Angeles and San Diego, and a Housing and Community Development labor camp. Funds have also been included for a photovoltaic peaking station for the Department of Water Resources to generate electricity and a retrofit solar program at various Department of Parks and Recreation sites.

Wind power offers the potential for cost-effective electricity from promising sites and hydroe-

lectric power offers additional opportunities as a renewable energy source. A large amount of agricultural, forestry and other biomass wastes have potential for energy conversion. Expenditures on these and other alternative technologies have been increased by more than \$1 million as an integral part of the Administration's new energy initiatives.

As a point of comparison, in the 1979-80 fiscal year, less than \$100 million (including appropriations from Chapters 161, 1123 and 1124, Statutes of 1979) will be expended for energy-related programs including energy conservation and development projects. In the 1980-81 fiscal year, largely as a result of the above-mentioned new initiatives and full implementation of legislation almost \$180 million is budgeted to be expended for energy-related programs including energy conservation and development projects.

In addition, as the State moves into a period of need for more intensive management of natural resources, more data collection is critical to planning for future programs, as is restoration and conservation of various habitats and environments. As mentioned previously, in order to meet these critical environmental needs, \$15 million is to be allocated to various Resources Agency departments from the Energy and Resources Fund (ERF). This allocation is to support programs or projects which are directed to conserve, restore, and/or enhance California's natural resources. Proposals for 1980-81 include such projects as geologic mapping and soils data collection for the Department of Conservation, reforestation of State School Lands for the State Lands Commission, and Wetlands restoration for the Department of Fish and Game.

# Tidelands Oil Income

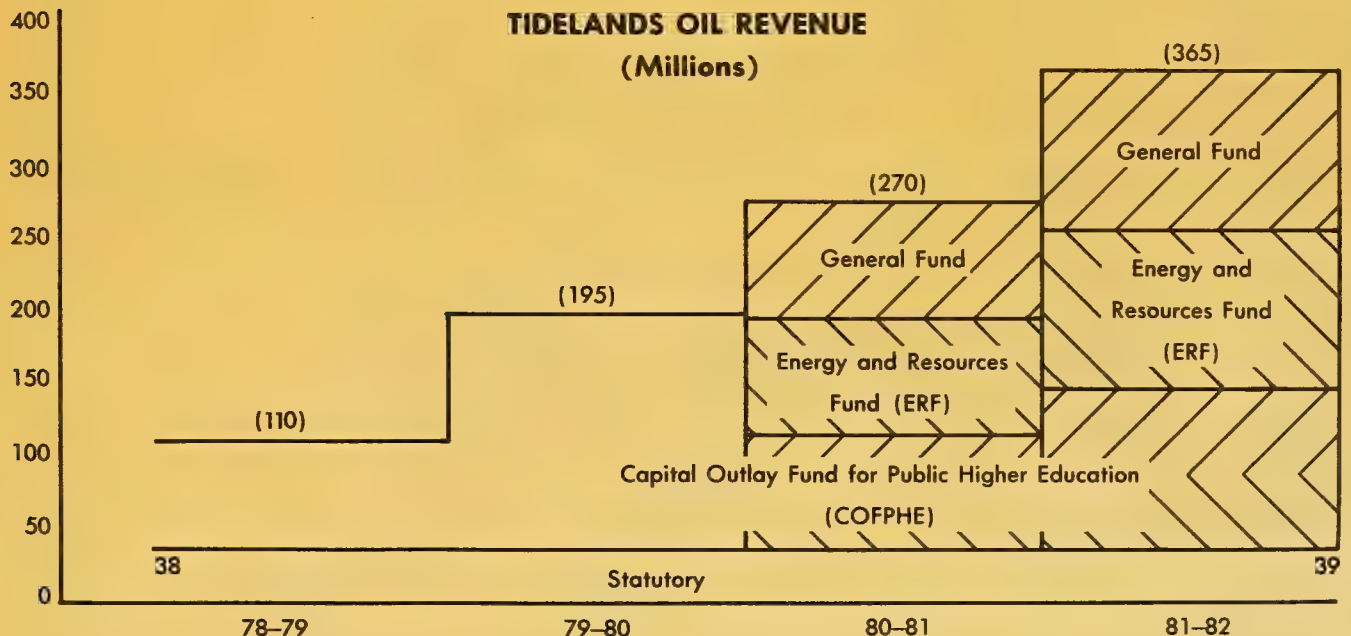

## ADDITIONAL REVENUES

The Public Resources Code presently provides for the allocation of revenues received by the State from the sale of oil produced from tidelands which are principally located adjacent to the City of Long Beach. This allocation covers the annual expenditures by the State Lands Commission and a specific amount to the California Water Fund, the Central Valley Water Project Construction Fund, and to the Resources Agency for the Sea Grant Matching Program. In 1980-81 these statutory allocations amount to \$39.2 million. All revenues remaining after these specific distributions currently are deposited in the Capital Outlay Fund for Public Higher Education which is referred to as the "COFPHE Fund". This fund has been utilized for capital construction projects in the University of California, the California State University and Colleges, the California Community Colleges, and other education agencies.

As recently as three years ago (fiscal year 1977-78), the official forecasts of revenue from the State Lands Commission indicated that new

revenues to the COFPHE fund would cease to be available by 1981-82. This forecast was based upon the then existing Federal oil pricing regulations which discouraged production in these fields. Recent changes in Federal Pricing Regulations, the rapidly increasing prices paid for crude oil and the deregulation of heavy crude oil production, is expected to increase substantially the revenues received by the State and conversely the COFPHE fund. These additional revenues are primarily based upon changes in regulations controlling oil prices rather than increased oil production and can be considered to be a wind-fall to the State.

The forecasts of future State revenues which reflect the newly enacted indexing provisions and the State expenditures which reflect the response to the enactment of Proposition 13 requires a reassessment of the needs and policies concerning the use of Tidelands income. In allocating the increased Tidelands income, a high priority must be placed on improving the use of our energy resources and conserving our natural resources.

In response to these challenges, the Administration is proposing legislation to be effective July 1, 1980, to amend the Public Resources Code (Section 6217) to provide that, after current fixed allocations are made, the remaining Tidelands Oil Revenue will be annually allocated one-third to the Capital Outlay Fund for Public Higher Education (COFPHE); one-third to a newly created Energy and Resources Fund (ERF); and one-third to the General Fund. Any expenditures from these funds will be appro-

priated through the annual Budget Bill. Based upon the mid-range forecast of revenues by the State Lands Commission, the one-third allocation proposed would distribute approximately \$77 million to each fund in 1980-81 and \$109 million in 1981-82 after the deduction of the fixed transfers.

The proposed 1980-81 Governor's Budget schedules and fund condition statements reflect the anticipated enactment of this proposal during the 1980 Legislative Session.

# Toxic Materials and Hazardous Wastes

The health and environment, of current and future generations are increasingly threatened by excessive use of chemicals—chemicals which spill forth in our water, in the workplace, on our highways, and from chemical dumps next door to homes and parks. Recent events document the pervasive danger of toxic substances in our society. In a substantial commitment of resources to reduce the danger and to secure improved control of toxic chemicals in California,

the Administration is proposing the addition of over \$6 million and 134 positions for the 1980–81 budget.

The following is a consolidated display of expenditures proposed in various program budgets intended to increase the State's effort in controlling toxic and hazardous materials in the environment. More complete descriptions can be found in the individual budgets of the appropriate departments indicated below.

<i>Program Budget</i>	<i>Description</i>	<i>1980–81 Expenditures</i>
<i>Executive</i>		
Office of Emergency Services	This office will develop emergency response plans for hazardous/toxic materials and develop and maintain a central hazardous substance information center regarding spills of toxic materials. Also included in this budget is a one-time increase of \$199,770 to purchase 30 kits of specialized equipment necessary for the proper handling of accidents involving hazardous materials. These kits will be strategically prepositioned throughout the State to provide emergency response time of one-half hour to areas of significant population and one hour to remote areas along principal routes of transportation.	\$294,932 3.0 pos.
Department of Industrial Relations	The Department will more actively pursue and eradicate problems associated with toxic substances in the workplace. This increase will permit the Department to analyze health data for the worker environment, initiate health inspections of work facilities and establish a 24-hour "hotline" for information necessary to deal with toxic spills.	\$716,487 19.0 pos.
<i>State and Consumer Services</i>		
Office of the State Fire Marshal	The State Fire Marshal's Office will develop a comprehensive statewide training program for State and local emergency personnel who are required to respond to hazardous materials incidents. Local police, firemen, and the California Highway Patrol will be included in the training.	\$317,316 3.0 pos.
<i>Resources</i>		
Water Resources Control Board	The Board will significantly increase monitoring, inspecting, regulating and enforcement activities related to the storage and discharge of toxic pollutants. The additional staff will also allow the Board to initiate testing of specified ground water basins for toxic pollutants and develop standards for siting new toxic disposal areas.	\$986,171 22.5 pos.
Air Resources Board	These additional resources will allow the Board to establish a Toxic Substance Control Program for the development of standards, regulations, and emission controls for airborne carcinogens, teratogens, and other toxic substances.	\$892,851 18.5 pos.
<i>Business and Transportation</i>		
California Highway Patrol	The Highway Patrol will implement a statewide pilot program of truck terminals inspection to determine the degree of compliance with existing regulations and laws as they relate to the transportation of hazardous wastes.	\$294,123 9.0 pos.
<i>Health and Welfare</i>		
Department of Health Services	Health Services will increase their surveillance and enforcement activities to reduce the illegal disposal of toxic wastes. In addition to increased enforcement of the laws governing the disposal of these wastes, the Department will also study alternative methods to the current practice of land fill disposal and study the short-term, as well as long-term, efforts on human health that toxic and hazardous materials can have on an individual once they have been exposed to such chemicals.	\$2,793,392 59.0 pos.
	<b>Total</b>	<b>\$6,295,272 134.0 pos.</b>

# HOUSING

Housing remains a top Administration priority. New housing initiatives are proposed and support to existing programs is continued.

Last year, the Administration proposed that \$100 million be reserved for a new program to stimulate the construction of rental housing for low and moderate income persons. The Legislature enacted the program in AB 333 Chapter 1043, Statutes of 1979 and SB 229 Chapter 1042, Statutes of 1979. This year, the Department of Housing and Community Development (HCD) will begin to carry out the program by directly purchasing equity or rights of occupancy in new rental housing developments. Lesser shares of the program's \$100 million will be used to expand the Department's deferred payment rehabilitation loan program (\$10 million) and to demonstrate new methods to help low and moderate income people become homeowners (\$7.5 million).

Too many people believe that new low-income housing must be drab and unattractive; future occupants expect it to be uncomfortable and unlivable. The Department of Housing and Community Development will sponsor a design competition to stimulate new thinking by builders and designers of affordable housing, showing that neither expectations need be true. The \$500,000 program will result in prototype designs for affordable single-family and multi-family homes in both urban and rural areas.

The Department of Real Estate (DRE) is taking two steps to speed its processing of state mandated subdivision reports. These steps will enable builders to market new homes more quickly, saving them and homebuyers millions of dollars. First, additional people have been hired to prepare the reports. Second, the Department has begun a pilot program to reduce processing time to 30 to 90 days when a builder submits a typed, completed subdivision report, ready for DRE approval.

In addition to new programs, the Administration is continuing an array of ongoing housing and community development activities. For example, the Department of Housing and Community Development's Rural Predevelopment (\$1,200,000) and Urban Development (\$750,000) Loan Funds provide direct loans to local governments, nonprofit organizations and cooperative housing corporations for the preliminary costs of developing low-income housing. Other HCD programs include technical assistance such as the California Housing Advisory Service, the revolving loan fund for rehabilitation and new construction, and the provision of seasonal housing for migrant farmworkers.

HCD, the Office of Planning and Research, and the Department of Transportation continue to monitor the disposition of surplus lands such as state hospitals and land once expected to be used for freeways so that it may be used for housing.

The Administration also continues to require localities to prepare housing elements outlining how they will use their local powers in a cooperative effort with the private sector to produce affordable housing.

The Department of Veterans Affairs continues to provide loans for home purchase or rehabilitation to California Veterans. The Administration is sponsoring legislation to place a \$750 million bond issue before the voters in June of 1980 to replenish the loan funds.

The California Housing Finance Agency (CHFA) is expanding its efforts to provide low-income housing through rehabilitation and new construction. By the end of the 1979-80 fiscal year, CHFA will have funded over 16,000 low and moderate income homes with loans in the amount of \$800 million.

The Administration recognizes that California cannot solve all of its housing problems with money. Therefore, the Administration will spon-

sore legislation aimed at solving three of the problems contributing to the shortage of new housing and high prices: 1) local zoning decisions that constrict the supply of housing, 2) legal constraints on the provision of manufactured housing, and 3) the shortage of homes located near jobs.

In addition, the Administration will sponsor legislation prohibiting localities from creating unnecessary obstacles to housing development and requiring that they zone sufficient land at adequate densities to meet the housing needs of all economic segments of the community. The Administration will also sponsor legislation requiring that the allocation of State funds for sewage treatment plants be consistent with the State's housing policies.

The shortage of housing is most severe for low-and moderate-income households. The Administration will sponsor the expansion of financing opportunities for low and moderate-income rental housing via the California Housing Finance Agency's loan insurance pool. Expansion of homeownership opportuni-

ties will be sought through legislation allowing local governments to use their bonding authority in conjunction with CHFA's Homeownership and Home Improvement Program.

Mobile homes comprise over 10% of new housing units each year and provide some of the most affordable housing in California. The Administration will sponsor legislation banning zoning discrimination against mobile homes and allowing 14-foot wide mobile homes to travel on California roadways.

Because of many local restrictions, new housing is frequently located far from the industries where new residents work. When this happens, one community receives the benefits of new taxes from industry and commerce, while another must bear the cost of providing services for the new houses. The Administration will sponsor legislation giving counties the option of pooling a percentage of sales and property taxes from new industrial and commercial growth. Pooled taxes could be distributed to cities or county areas accepting new housing.

# MASS TRANSPORTATION

The enactment of Chapter 161, Statutes of 1979 (SB 620), which provides increased funding for public transportation, demonstrated the Legislature's and the Administration's commitment to improving California's public transit system. The provisions of this statute, plus increases in other funding sources, has resulted in over a four-fold increase in State funds (from \$46 to \$192 million) available for public transportation. Efficient and effective public transit services are becoming increasingly important in our changing transportation environment because they not only can provide mobility to the transit dependent, but can ease the impact gas shortages have on local and intercity mobility, reduce energy consumption over the long term, mitigate air pollution and aid in relieving congestion on our streets and highways, by providing an attractive and reasonable alternative to the automobile.

Significant program increases include:

## *Intercity and Commute Rail*

The State will provide \$37 million to expand its program of improving passenger rail service throughout California. Included in these are:

- Expansion of San Diego to Los Angeles service from six to eight trains daily in each direction plus extension of service to Santa Barbara.
- Initiation of overnight service between Los Angeles and Sacramento via the San Francisco Bay Area and initiation of two trains in each direction between Sacramento and San Jose.
- Continuation of the San Joaquin service which provides two trains in each direction between Bakersfield and the San Francisco Bay Area; and final preparation for extension of the service to Los Angeles.
- Implementation of commute rail service between Los Angeles and Oxnard.

- Implementation of commute rail service between Los Angeles and San Bernardino/Riverside.
- Implementation of commute rail service between Los Angeles and Orange County.
- Continuation and improvement of commute service between San Francisco and San Jose.

## *Urban Rail*

The State will provide \$35 million for urban rail projects in addition to other State funds available for this purpose. Potential users of these funds include rail transit projects in Los Angeles, San Diego, Sacramento, San Francisco, Oakland, South Lake Tahoe and Santa Clara County.

## *Transfer Terminals*

- The State will develop terminals to make it easier to transfer among local and intercity bus and rail services, automobiles, taxis, bikes, air services and other modes of transportation.
- The State will provide \$1 million to encourage continuation and development of needed intercity bus services primarily to rural communities.

## *Local Transit Assistance*

- The State will provide \$45 million for operating and capital support for local transit operators throughout California, in addition to funds already being made available to them under existing programs.

## *Park and Ride Lots*

- An additional \$3 million is provided to construct 75 Park and Ride lots throughout the State.

# *ECONOMIC AND EMPLOYMENT DEVELOPMENT*

## *Office of Small Business Development*

The Office of Small Business Development has been augmented by \$2.5 million to increase the loan guarantee program which will expand the capacity of the Office to develop loans.

## *Office of Local Economic Development*

The Office of Local Economic Development has been augmented by more than \$1 million. This, along with expected Federal dollars, will provide loans and grants to develop industries which are small and/or are labor intensive. These firms have the most difficulty in achieving capitalization through banks and other traditional funding sources. The funds will be targeted into designated areas which will benefit minority employment and entrepreneur needs.

Both program augmentations will:

- add new permanent jobs
- leverage other public funds into the economy
- build upon local lending capacity
- create hundreds of construction and other temporary jobs
- provide much needed capital to small labor intensive businesses
- leverage private lending institution dollars into needy areas.

## *Department of Housing and Community Development and Department of Transportation*

It is also proposed to expand the State's current program of disposing of surplus property. Those properties which contain single family housing will be rehabilitated and sold at affordable prices based on their occupant's income. Other vacant single family homes, multi-family units and vacant parcels will be sold to the pub-

lic or to non-profit sponsors for the development of low or moderate income cooperative or rental housing. This program will be carried out with the cooperation of both the Department of Housing and Community Development and the Department of Transportation.

In addition to disposing of current surplus property, Cal Trans now owns or will acquire approximately 4,200 housing units in the Los Angeles area. The Department along with the Department of Housing and Community Development will relocate and rehabilitate or replace those units. The housing will be affordable to low and moderate income displacees. Under both proposals, resale controls would be imposed on all below-market value sales to prevent windfall profits and to ensure continued affordability to future lower income residents.

In addition to the program augmentations noted above, two significant bills passed during the 1979 legislative session which will promote economic and employment development.

## *California Worksite Education and Training Program*

The California Worksite Education and Training Act of 1979 (SB 132) is administered by the Department of Employment Development and was enacted for the purpose of integrating classroom instruction, entry and career, with worksite training in order to enhance career opportunities and career advancement for the economically disadvantaged, youth, displaced worker, structurally unemployed and persons with obsolete or inadequate job skills. California Worksite Education and Training programs will address the needs of employers for trained workers, provide marketable skills and jobs for the structurally unemployed and offer

courses for workers to upgrade their skills to obtain better paying and more responsible jobs. To develop such integrated training, California Worksite Education and Training funded programs will bring together local educational and training agencies, employers, CETA prime sponsors and employee organizations to coordinate their efforts for the above stated purpose.

The Governor's Budget established 25 positions in 1979-80 in the Employment Development Department to implement this program. These positions will continue over the next three years. The plan of expenditure is \$10 million current year, \$8 million budget year and \$7 million in Fiscal Year 1982-83.

The Employment Development Department will administer California worksite Education and Training funded programs in concert with the Department of Industrial Relations, Department of Education and the Chancellor's Office of the Community Colleges. Additionally, the Employment Development Department will be contracting with the Department of Developmental Services for the development of apprenticeship programs in either state hospitals or community settings. This is in addition to the program continued in the Department of Developmental Services for psychiatric treatment apprenticeships.

#### *Personal Income and Bank and Corporation Tax Credit*

Chapter 1182, Statutes of 1979 (SB 93) authorizes a special tax credit to employers of persons eligible for certain welfare programs. Under this bill, any taxpayer (either Corporate or non-corporate) who employs a person who is a welfare recipient prior to being hired would be allowed a credit against their income or bank and corporation tax of 10 percent of the wages paid but not exceeding \$3,000 per year. This credit would be in addition to any other deduction to which the taxpayer may be entitled and could be claimed by the same individual for two years. This bill piggybacks and strengthens Federal legislation previously passed in this area.

Other authorized programs which will continue to provide assistance to the economically disadvantaged include:

#### *Work Incentive Program*

The Work Incentive (WIN) component of the Department of Employment Development assists recipients of Aid to Families with Dependent Children (AFDC) to obtain employment.

Employable applicants/recipients of AFDC benefits must register with EDD for employment, employment related services and training. Intensified employment and supportive services are given to employable registrants in order to assist them in obtaining regular, unsubsidized employment. Coordination of employment and supportive services is facilitated by collocation of county social services staff in EDD offices.

In an effort to obtain employment for registrants and WIN participants, EDD staff contact employers to develop jobs and orient WIN participants to the local job market through job-finding workshops.

#### *Career Opportunities Development Program*

The Career Opportunities Development (COD) Program administered by the State Personnel Board operates on the basis that primary responsibility for and capacity to achieve program objectives rests with the State or local agencies that make the organizational, staffing, and hiring decisions. To facilitate participation of departments, the COD Program provides: (1) consultative and technical assistance; and (2) direct grants for developmental projects and for intensive staff support as COD coordinators.

The jobs for welfare recipients, the disabled, and other disadvantaged persons program enables the full reimbursement of employer payroll cost during the training period. The program, authorized by the Welfare Reform Act of 1971 provides: (1) inducements to employing agencies and jurisdictions to hire program trainees who complete training, and (2) facilitates the amount of quality of training by hiring groups of trainees at one time.

# *Mental Health*

The Administration is committed to establishing a comprehensive system of mental health services for those mentally disabled persons in need of such services through a support system of county mental health agencies, State hospitals and protective social services. Total State support for local mental health services have increased dramatically from \$248.7 million in 1978-79 to \$354.6 million proposed in 1980-81, an increase of \$105.9 million or 42.6 percent growth over this period.

As part of this growth, in April 1979, the Administration presented a multi-year Mental Health Initiative for a systemwide effort to improve local and State hospital services, calling for approximately \$35 million in new program funding. The most significant parts of the proposal for 1979-80 were; \$21.2 million for new 24-hour nonhospital treatment programs; a \$9 million augmentation for expansion of the Community Residential Treatment System; \$500,000 for implementation of a pilot case management system in two counties; \$250,000 to initiate five model residential treatment programs for children and youth; \$3.1 million to implement a pilot project of new clinical staffing standards in the State hospital programs for the mentally disabled at Napa State Hospital and revised staffing standards pursuant to the Department's recommendations in response to ACR 103; and \$1 million to initiate a computerized treatment/management information system at Metropolitan State Hospital. Approximately \$28 million was approved by the Legislature for Fiscal Year 1979-80.

The Administration supported legislation to encourage the use and development of local mental health services in lieu of State hospitalization. Consistent with that intent, Chapter 282, 1979 (AB 8) was signed by the Governor to waive the 10 percent county financial participation in the local mental health programs but retaining the county share for State hospital use.

In Fiscal Year 1980-81, the second year of the Mental Health Initiative, an additional \$25 mil-

lion in new local program funding is proposed for further development of nonhospital alternatives; \$250,000 to augment existing prevention services to approximately \$1 million; and \$1.4 million and 92 positions is again proposed to implement the pilot clinical staffing standards in the programs for the mentally disabled at Napa State Hospital. In addition, to keep up with the costs of inflation, \$26.2 million in new funds has been included to provide for a 9 percent cost-of-living adjustment for local mental health agencies.

The \$25 million new general funding for the budget year supports two significant policies.

1. Ten million dollars (\$10 million) is to be allocated towards enhancement of traditional nonhospital alternatives to the use of local and State hospital services. The allocation formula previously developed in consultation with the many constituency groups, Conference of Local Mental Health Directors, Citizens Advisory Council, and legislative members and staffs, was used for a one-time distribution of the 1979 appropriation and may serve to allocate the 1980 appropriation. Pursuant to existing provisions of law, the counties will develop County Short-Doyle Plans including proposals for the use of new program funds.

2. Fifteen million (\$15 million) is proposed to enhance the existing policy of deinstitutionalization and for establishment and operation of new local alternatives to direct State hospital use. For several years, the local mental health agencies have been critical of the lack of front-end funding for establishment of alternative programs to the State hospitals. This proposal provides a significant incentive to enable new programs to be started independent of transfer funding from the State hospitals. It is expected that this proposal will enable the counties to reduce the use of 600 beds in the State hospitals by year-end 1980-81. Over a three-year period (1979-80 to 1981-82), it is the goal of the Department to reduce 1,500 beds in the State hospital program for the mentally disabled.

Additionally, as the population in the State hospitals is reduced as anticipated, up to \$5.4 million would be available for transfer to mental health agencies for further augmentation of local programs.

To provide enhanced leadership, clinical expertise and support, the proposed 1980-81 budget for the Department of Mental Health includes substantial new resources. Approxi-

mately \$1.5 million (\$630,000 redirected) and 39 new positions are proposed for increased clinical expertise in the six mental health service teams, additional program positions for Short-Doyle Medi-Cal compliance and utilization reviews, an automated client information system for Metropolitan State Hospital, and evaluation staffing for the Napa State Hospital demonstration project.

# *California Arts Council*

The California Arts Council was established in 1976 to encourage the growth of artistic expression and participation at State and local levels. The 1980-81 proposed budget reflects an increase of \$4.2 million over the adjusted 1979-80 budget.

In an endeavor to broaden the delivery of arts programs in California, the Governor and the Arts Council are proposing to establish four new programs and to augment three existing activities. Implementation of a new State/Local Partnership program will fulfill a critical objective in State arts policy: decentralization of arts programming. Under this program, a \$12,000 planning grant will be given to each participating county to inventory local arts programs and develop a comprehensive plan which coordinates local arts efforts with State arts policy. Based on these plans, the Arts Council will provide additional grants totaling \$1,321,000 which will be matched by the counties on a one-to-one basis for implementing local arts programs. To facilitate this decentralization, the Arts Council plans to establish a field office in Los Angeles which will allow a higher degree of coordination between Council staff and arts communities of Southern California.

The Arts Council is also proposing a pilot cooperative grants program with the California

arts foundation community to provide direct grants to individual artists for creative projects worthy of support. Grants funding for the pilot project will be provided by the State (\$50,000), arts foundations (\$100,000), and the National Endowment for the Arts.

The Interagency Arts Program (\$272,319) will provide an important link between the Arts Council and other State agencies. This program will result in more efficient utilization of potential arts funding in other agencies by developing annual plans for interagency arts projects and providing a grants base of \$120,000.

The Council proposes to reestablish the Maestro-Apprentice Program in 1980-81. This program was initiated as a one-year pilot project in 1978 and was evaluated by the Council during the past year. The Council has determined that the maestro-apprentice interaction contributes significantly to the continuation of endangered ethnic and cultural art forms. The program is therefore offered as a permanent addition to California arts programming with an increase in the budget of \$120,000.

Existing programs which will be augmented in the Governor's 1980-81 budget are grants for local arts organizations (\$1,075,000), research to develop alternatives in education (\$150,000), and grants administration and informational services (\$189,166).

# Proposition 4

California voters approved a constitutional amendment on November 6, 1979 which placed a limit on the year-to-year growth in tax supported appropriations of the State and most individual local governments.

## *Basic Provisions*

The amendment provides firm direction to the various governments in California that the growth in tax supported programs from 1978-79 forward cannot exceed the growth in the United States Consumer Price Index (CPI) and population. However, if the growth in CPI exceeds the growth in California per capita personal income, the change in income is used.

The limit for each year is calculated from the allowable appropriation level not the actual appropriations. Government therefore does not have to spend tax dollars up to the limit.

The amendment provides that in any year when revenues exceed appropriations, the excess revenues must be returned within the next two years. However, the amendment allows appropriations into reserves in one year for expenditure in future years as long as the appropriations are within the limit. The expenditure of those appropriations in future years does not count as an appropriation subject to limit in the year of expenditure. This allows State and local government to provide for future needs.

Programs financed from fees and user charges which cover the cost of services can be excluded from appropriations subject to limitation.

State legislative mandates on local governments which require a new program or a higher level of service for an existing program must be reimbursed by the State. The following mandates are exempt from reimbursement by the State:

1. Legislative mandates which are requested by the local agency affected.
2. Legislation which defines a new crime or changes an existing definition of a crime.
3. Legislative mandates enacted prior to January 1, 1975 or executive orders or regulations which initially implemented legislation enacted prior to January 1, 1975.

The amendment excluded the following appropriations to facilitate implementation.

1. Debt service—Debt service is defined as any appropriation required to fund existing or legally authorized debt as of January 1, 1979 and bonded debt approved thereafter by a vote of the people.
2. Appropriations required to comply with mandates of the courts or the Federal government.
3. Special districts in existence on January 1, 1978 which did not as of the 1977-78 fiscal year levy a property tax in excess of 12½ cents per \$100 of assessed value.
4. Special districts currently existing or created in the future by a vote of the people which are totally funded by fees and service charges.

The limit may be adjusted by a vote of the people. The adjusted limit is in effect for four years only. After that period, it must be reenacted or the adjustment is no longer in effect. In addition, the governing body of any government entity may declare an emergency and exceed the limit. If an emergency is declared, the appropriation limits within the next three years must be reduced to prevent an aggregate increase in appropriations resulting from the emergency.

The intent of Proposition 4 is clear, i.e., the growth of government must be limited to the change in price and population. While the intent is clear, the amendment does leave certain areas open to interpretation and definition.

The following represents the Administration's recommendations concerning implementation of the amendment. The following general principles have been followed in establishing the recommendations for implementation:

- Implementation and administration should be understandable.
- Subventions for State programs should not affect local discretion.
- Legislation should be enacted only where required.
- The impact on funding relationships of programs jointly financed by State and local government should be minimized.

## ***The Base***

The amendment provides that the State appropriations base shall exclude "subventions for the use and operation of local government."

It is proposed that the State base include payments made to local governments for specific programs. This assumes that if the State funds a program, it has control over that program.

This will place relatively equal restraint on State and local spending under the limit. State funded programs which are administered locally would be subject to limitation at the State level because the Legislature determines the size and scope of those programs. They decide if these programs will be expanded, reduced or eliminated. Under this proposal, the State would retain funding for all programs in its base except the following:

- Shared Revenues
  - Liquor License Fees
  - Highway Properties Rental Receipt
  - Off-Highway License Fees
  - Vehicle License Fees
  - Cigarette Tax
  - Highway Carriers' Uniform Business Tax
  - Motor Vehicle Fuel Tax
  - Financial Aid to Local Agencies
  - Tideland Revenues
- Tax Relief Subventions
  - Personal Property Tax Relief
  - Homeowners' Property Tax Relief
  - Open Space
  - Payments for Local Government for Sales and Property Tax Revenue Loss
  - Substandard Housing
  - Senior Citizens' Property Tax Deferral Program

These subventions provide funding to local government for general purposes. The one exception, motor vehicle fuel tax, is constrained by the Constitution not the Legislature. The funds must be used for maintenance and operation of public streets and roads.

## ***K-12***

It is proposed that State subventions for K-12 school districts be divided with a portion subject to appropriation limit at the State level and a portion subject to limit at each school district.

The State has augmented the basic K-12 edu-

cational program through a series of rather prescriptive "equalization" formulas designed to quickly bring the State into substantial compliance with the *Serrano* court mandate. In view of the degree of control which rests with the State over these and other categorical program expenditures, it is proposed that responsibility for expenditures above the basic program level be placed with the State, and will therefore be a part of the total appropriations limited at the State level.

Local school districts are responsible for making available to all children a basic level of education. This basic program level is proposed to be subject to limit at each school district.

## ***Community Colleges***

It is proposed that State subventions for community colleges be treated similarly to subventions for K-12 districts. The portion of State support dedicated to expenditure equalization will be placed, along with State-supported categorical programs, in the State base. The remainder of community college subventions will augment local revenues and be subject to limitation at each community college district.

## ***Fee and User Charges***

The amendment allows programs supported by fees and service charges to be excluded from the limit.

It is proposed that the State include appropriations from fees and user charges in the State appropriations base and consider them as proceeds of taxes. They comprise less than 3 percent of State appropriations in the base year. Including them in the base would eliminate the need for costly administrative and accounting procedures.

## ***Population***

The amendment provides that the limit shall be adjusted for changes in the cost of living and population. It also specifies that population shall be revised to reflect the decennial census conducted by the U.S. Department of Commerce. It is proposed that population lagged to the preceding year be used for the State. Thus the population base figure would be July 1, 1977 and the population used to calculate the 1980-81 limit would be July 1, 1979. This would avoid the

problem of projecting population. For population changes in any particular year, the most current estimates for both years would be used.

### ***Cost-of-Living***

#### ***Consumer Price Index***

The amendment provides that the cost-of-living factor shall be the Consumer Price Index for the United States (U.S. CPI) as reported by the U.S. Department of Labor, unless the percentage change is greater than the percent change in California per capita personal income. It is proposed that U.S. All Urban Consumer Index be used to compute the limit. This index reflects a larger population than any other U.S. CPI. The preceding calendar year should be used for calculating the limit. This is consistent with the method used to calculate population growth.

#### ***Per Capita Personal Income***

The percent change in California per capita personal income must be used if it is less than the change in U.S. CPI. It is proposed that the California per capita personal income as calculated by the U.S. Department of Commerce be used. The preceding calendar year number should be used to derive the change, the same as for CPI.

### ***State Mandated Programs***

It is proposed that reimbursements for State mandates be included in the State base. The amendment does not appear to require reimbursement for mandates enacted prior to its effective date (July 1, 1980). However, mandates enacted between January 1, 1975 and July 1, 1980 are subject to reimbursement under current statute (SB 90) and if the Legislature provides reimbursement for their cost they should be in the State base.

### ***Excluded Revenues***

The limit applies only to appropriations that are from taxes. The following receipts are proposed to be considered as nontax proceeds.

- Federal funds including Federal Revenue Sharing

- Oil and Gas revenue
- Sale of State property
- Unclaimed Property proceeds

If any 1978–79 appropriations were made from these specific sources, the 1978–79 appropriation level was reduced accordingly.

### ***Local Government***

#### ***Population***

For the 1980–81 year, it is recommended that population change pursuant to Section 2227 and 2228 of the Revenue and Taxation Code be used. This would be the change from January 1, 1978 to January 1, 1980 and would be available on May 1 of 1980.

July 1 population estimates for cities and counties are not currently estimated. It is recommended that July 1 populations be estimated beginning July 1, 1980 and for 1981–82 and thereafter be used for calculating the limit.

#### ***Fees and Charges***

The treatment of fees and charges by individual local governments presents a difficult problem. The diversity in both size and programs of the various local governments make it difficult, if not impossible, to establish a procedure which would treat all local governments fairly.

In light of this problem, it is proposed that each local government entity determine how to treat fees and user charges. Under the amendment, in order to maintain proper citizen contact with the local government process, it is also proposed that specific notice and hearing be required before implementation of any plan concerning the treatment of fees and charges.

### ***Administration***

The following chart and supporting table illustrate the 1978–79 base year adjusted by 24.2 percent for price and population; and the proposed budget appropriations for 1980–81. The 1980–81 appropriation proposal of \$15,970.6 is \$788.9 less than the appropriation limit of \$16,759.5.

# STATE APPROPRIATIONS SUBJECT TO LIMITATION

(General and Special Funds)

(billions)

**Table 1**  
**STATE APPROPRIATIONS SUBJECT TO LIMITATION**  
**COMPARISON OF PROPOSED 1980-81 BUDGET TO 1978-79 BASE YEAR**  
(Millions of \$)

	1978-79 <sup>1</sup>	1980-81 <sup>2</sup>
TOTAL STATE OPERATIONS.....	\$4,181.8	\$5,510.4
Exclusions from Limitation:		
Debt Service .....	185.8	220.2
TOTAL STATE OPERATIONS SUBJECT TO LIMITATION .....	\$3,996	\$5,290.2
TOTAL LOCAL ASSISTANCE.....	\$14,430.3	\$18,010
Exclusions of Appropriations in Local Government Base:		
School Apportionments <sup>3</sup> .....	4,127.2	5,479.2
Aid to Local Government.....	1,600.8	2,070.2
Other exclusions:		
Federal Revenue Sharing.....	276.2	276.2
Total Exclusions .....	\$6,004.2	\$7,825.6
TOTAL LOCAL ASSISTANCE SUBJECT TO LIMITATION .....	\$8,426.1	\$10,184.4
TOTAL CAPITAL OUTLAY.....	\$1,133.4	\$568.5
Exclusions:		
Capital Outlay Fund for Public Higher Education .....	61.5	72.5
TOTAL CAPITAL OUTLAY SUBJECT TO LIMITATION .....	\$1,071.9	\$496
TOTAL APPROPRIATIONS SUBJECT TO LIMITATION IN STATE BASE.....	\$13,494	\$15,970.6

<sup>1</sup> Includes 1978-79 Budget Act appropriations, financial legislation enacted in 1978-79, and continuing appropriations.

<sup>2</sup> Appropriations from General Fund and Special Funds per Schedule 3 (see pages B-4 to B-15).

<sup>3</sup> When combined with estimated local resources of \$2,508 million in 1978-79, and \$2,233 million in 1980-81, appropriations subject to limit at the school district level will grow from approximately \$6,635.2 million in 1978-79 to \$7,712.2 million in 1980-81, or 16.2 percent over the two year period.

# Local Government Fiscal Relief

In June 1978, California voters approved Proposition 13, which reduced property taxes more than fifty percent. This has forced a critical reevaluation of the activities that government has been performing.

Following the passage of Proposition 13, the Legislature enacted a one-year local fiscal relief and property tax distribution package which provided about \$4.4 billion to cities, counties, special districts and schools in 1978-79.

In 1979, a long-term local financing measure was adopted which provided funding for city, county and special district services from the property tax by shifting a portion of this tax base from schools. This new property tax will increase along with the growth in assessed value. The State increased its financial assistance to school districts to replace the shift in property

tax. The State cost of local fiscal relief is estimated to total \$4.9 billion in 1979-80 and \$5.4 billion in 1980-81.

The following table provides a summary of a portion of local revenues before and after Proposition 13. The local government information base is not current enough to provide a complete description of the full fiscal effect. It is hoped that in the future, more timely and more relevant local government fiscal information will be available. Assembly Concurrent Resolution 51 of the 1979 Session provides the first step in improving the process. This resolution calls for a review of the current reporting system for cities. Though limited to cities, the review will provide a base for adjusting the reports made by other local governments.

**SUMMARY OF LOCAL REVENUES BEFORE AND AFTER PROPOSITION 13  
INCLUDING THE PROVISIONS OF AB 8**  
(Dollar amounts in millions and expenditures per ADA in dollars)

<sup>1</sup> Property tax revenue includes reimbursement for the Homeowner's and Business Inventory Exemptions; and excludes voter approved debt service levies and collections for redevelopment agencies.

<sup>2</sup> Includes only unrestricted revenues.

## THE DEFLATOR

Chapter 282 (AB 8) and Chapter 1161 (AB 1019), Statutes of 1979, provide that the amount of local fiscal relief would be reduced under certain circumstances. This reduction would be activated if the Commission on State Finance estimates on June 10, 1980 that General Fund revenues and transfers, plus beginning surplus for 1980-81, are below \$20.6 billion (a figure established in AB 8) by more than \$100 million. The \$20.6 billion does not include revenue derived from the increase in the bank and corporation tax rate provided by Chapter 1150, Statutes of 1979 (AB 66). The Legislature may by concurrent resolution prior to June 30, 1980, prevent the Deflator from being implemented.

If the Deflator is activated, fifty percent of the shortfall below \$20.6 billion would be reflected in an across-the-board percentage cut in school district revenue limits. The remaining fifty percent would be reduced through subventions to cities, counties and special districts for the Homeowners' Exemption, Business Inventory, Open Space, Cigarette Tax and Vehicle License Fees. These reductions would be made in proportion to the assistance provided in Chapter 282.

The following is a summary of the funds which are subject to reduction:

	1980-81 (millions)
<i>Subventions:</i>	
<i>Cities, Counties and Special Districts</i>	
Homeowners' Exemption .....	\$213
Business Inventory.....	290
Open Space.....	14
Motor Vehicle License Fees .....	670
Cigarette Taxes .....	83
Total .....	\$1,270
<i>K-12 Schools</i>	
Derivation Amounts .....	\$5,592
<i>Community Colleges</i>	
Derivation Amounts .....	1,055
Total, Including Schools .....	\$7,917

Using the standard economic forecast, it is estimated that General Fund revenues and surplus available for appropriation during 1980-81 will be \$21,029 million which is \$429 million more than the \$20.6 billion level which is re-

quired to prevent activating the Deflator. This excess revenue is less than 2.3 percent of State revenues. If these collections are adversely impacted because of a more severe economic slowdown or as a result of the passage of a tax reduction initiative, the Deflator will be activated. It would be prudent for all elements of local government and school districts to be aware of the uncertainty about the future and to take it into consideration in carrying out their management and planning responsibilities.

For each fiscal year after 1980-81, Chapter 1161, Statutes of 1979, requires that the \$20.6 billion figures be adjusted to reflect changes in the California Consumer Price Index (CPI), plus the estimated percentage change in California population as presented in the Governor's Budget. If the \$20.6 billion is adjusted to reflect CPI and population, the 1981-82 amount is estimated at \$23.4 billion which is 13.4 percent greater than 1980-81.

The Legislature may want to review the 1980-81 base level (\$20.6 billion) because a preliminary review of 1981-82 revenues and beginning surplus would be below the \$23.4 billion level and the Deflator would be activated for 1981-82. The base level contains a larger beginning surplus than the 1981-82 year because expenditures will exceed revenues in 1980-81. Thus even if revenues are sufficient in 1981-82 to fund the full provisions of AB 8, the Deflator would be activated unless a concurrent resolution prevented it.

## AID TO COUNTIES

The long-term financing plan for counties provided in Chapter 282, Statutes of 1979 (AB 8) combines an increase in the counties' share of the property tax. This legislation also provides permanent funding by the State for certain health and welfare program costs.

### *General Revenue*

A long-term funding source for counties was provided effective in 1979-80. The county "base" property tax allocation is increased by the amount of 1978-79 block grant, adjusted for changes in the State funding of certain health and welfare programs. This amount is shifted from the schools' share of the property tax. The bill also provided a one-time reduction of busi-

ness inventory reimbursements to counties in 1979–80 of \$17.4 million.

### *Health and Welfare*

A permanent change in the funding provisions of health and welfare programs jointly financed by State and local government was made.

a. *Medi-Cal*

The total cost of this program was permanently assumed by the State, as it was in 1978–79. Prior to Proposition 13, the county cost was a function of assessed value.

b. *SSI/SSP*

The State permanently relieved counties of their share of the Supplemental Security Income/State Supplementary Program (SSI/SSP). This is the same provision as in 1978–79. Prior to Proposition 13, the county share was a function of assessed value.

c. *AFDC Grants*

The total non-Federal costs of the Aid to Families with Dependent Children (AFDC) program was assumed by the State in 1978–79. The new funding relationship provides that the State shall pay 89.2 percent of the non-Federal costs of AFDC grants and special needs. Prior to Proposition 13, the State paid 67.5 percent of the non-Federal costs.

d. *AFDC Administration*

In 1978–79, the State assumed 100 percent of the non-Federal county costs of administration of the AFDC program. Chapter 282 returns to the pre-Proposition 13 funding ratio of 50 percent-State and 50 percent-county of the non-Federal costs.

e. *AFDC Boarding Homes and Institutions (BHI)*

The funding relationship for BHI established in 1978–79 was continued. The State will assume 95 percent of the non-Federal costs through December 31, 1983.

f. *Food Stamp Administration*

In 1978–79, the State assumed the total cost for Food Stamp Administration. Effective in the current year, the State will pay 50 percent of the non-Federal administrative costs of this program. Prior to Proposition 13, the total county costs were

limited to \$21.5 million annually.

g. *Child Support Enforcement Program*

In 1978–79, the State discontinued the child support incentive payment because it assumed 100 percent of Child Support Administration. The administrative costs of the program were returned to counties, but the incentive payment was increased to 15 percent, up from the pre-Proposition 13 level of 12.75 percent until January 1, 1981 when it returns to 12.75 percent.

h. *County Health Services*

The State began partial funding of County Health Service costs in the current year. The State will pay each county \$3 per capita plus 50 percent of the remaining county costs for health services within specified limits.

i. *Other Provision*

The State assumed 84 percent of the county administrative costs of the Aid to the Potentially Self-Supporting Blind (APSB). The State also assumed the total cost of Aid for the Adoption of Children (AAC) and the Work Incentive Program (WIN).

### **AID TO CITIES**

Chapter 282, Statutes of 1979 (AB 8) provided a long-term funding source for cities effective in the current year. The city “base” property tax allocation is increased by an amount equal to 82.91 percent of the 1978–79 block grant amount. This amount is shifted from the schools’ share of the property tax. The bill also provided a one-time reduction of business inventory exemption reimbursement to cities in 1979–80 of \$21 million.

### **AID TO SPECIAL DISTRICTS**

A long-term funding source for special districts was provided effective in the current year. Each county will establish a Special District Augmentation Fund. An amount equal to 95.24 percent of the combined “block grant” amounts of all special districts in each county will be transferred from the schools’ property tax and placed in this fund. The County Board of Supervisors will allocate this fund to special districts in the county.

## **AID TO EDUCATION**

### ***K-12***

Chapter 282 provides that the 1978-79 revenue for school be increased by an average of 8.6 percent for the 1979-80 fiscal year. The adjustment for declining enrollment was retained for the current and budget year. Districts were guaranteed a 2 percent increase in total resources over the prior year.

For 1980-81, inflation adjustments will range from \$85 to \$150 per ADA dependent upon the district's 1978-79 base revenue limits. In addition, the bill creates several new State programs to fund Capital Outlay for K-12 school districts.

Details on the funding of school districts are presented in the Department of Education budget.

### ***Community Colleges***

Chapter 282 provides for the recalculation of 1978-79 Community College revenue bases, which are then equalized and inflated an average of 8.9 percent for the 1979-80 fiscal year. Growth in Community College ADA over the 1978-79 level is funded at two-thirds the statewide average revenue per ADA, and loss in ADA over the 1978-79 level is deducted at two-thirds the statewide average revenue per ADA. Special allowances are provided urban and small rural colleges to compensate for excess costs. For 1979-80, each district is guaranteed at least a 4 percent, but no more than 8 percent, increase in total revenues. For 1980-81, the statewide inflation increase is 7 percent or the California Consumer Price Index increase for calendar year 1979, whichever is smaller.

Details on Community College funding are presented in the Board of Governors of the California Community Colleges Budget.

# Cost-of-Living Increases

## LOCAL ASSISTANCE PROGRAMS

With the increased State-aid to local governments, local assistance expenditures now comprise nearly 80 percent of the total General Fund budget. Any cost-of-living increases proposed for these local government programs, therefore, have a significant impact on the State budget. This budget proposes about \$1.4 billion for cost-of-living increases for local government.

As noted in the following chart, most cost-of-living increases are required by existing law. Nearly \$1.2 billion General Fund is required to provide a full statutory increase for Health and Welfare and Education local assistance programs as prescribed in current law.

While some State programs have cost-of-living increases mandated by statute, many local assistance program increases are discretionary. Traditionally these increases have reflected a relationship to salary increases granted to State employees. Some 30 different local assistance programs are proposed for discretionary cost-of-living increases at a combined General Fund cost of nearly one-quarter of a billion dollars. Programs proposed for discretionary cost-of-living increases are similar in nature to those programs which are statutorily mandated for annual increases. The statutorily indexed programs tend to force cost-of-living adjustments for the other local assistance programs.

In addition to being listed below, these increases are explained in more detail elsewhere in this budget.

### PROPOSED GENERAL FUND EXPENDITURES COST-OF-LIVING INCREASES FOR LOCAL ASSISTANCE PROGRAMS (In Thousands)

## AUGMENTATION FOR EMPLOYEE COMPENSATION

The Employee Compensation budget is a vehicle for funding salary and benefit increases for all State employees.

### *Proposed Accomplishments*

The transition to a collective bargaining system is underway but actual bargaining possibly may not occur in time to impact this budget. Therefore, lump sum appropriations amounting to \$427.2 million have been included for the 1980-81 fiscal year for all State employees as follows:

General Fund.....	\$280.7
Special funds .....	70.8
Nongovernmental cost funds .....	<u>75.7</u>
Total .....	\$427.2

Funds will be allocated from these items to support salary and benefit increases, as well as, any other changes in terms and conditions of employment.

Other compensation improvements that are provided for in departmental budgets total \$65.6 million. These include \$57.6 million for the approximately 40 percent of State employees who are eligible to receive merit salary adjustments.

Expenditures in 1980-81 for currently authorized staff benefits (not including merit salary adjustments) for civil service and related employees will be approximately 31 percent of salaries and wages before any new salary increases or benefits are enacted. Additionally, the equivalent of 13 percent will be provided in the form of vacation, sick leave and holidays.

# Summary of State Fiscal Data and Personnel Years

The passage of Proposition 13 in June of 1979 made it even more essential to effectively utilize California's fiscal resources. The Governor's Budget for 1978-79 was reduced \$1.4 billion through the joint efforts of the legislative and executive branches to meet the mandate of Proposition 13.

During the 1978-79 operating year, a concerted effort was made by the Administration to further reduce costs by implementing a hiring freeze, making permanent position reductions, and identifying low priority activities. The 1979-80 Governor's Budget proposed position reductions in excess of 6,000 positions and \$400 million. A portion of these reductions were enacted into the final budget.

In November of 1979, the people passed Proposition 4 limiting state expenditures to the rate of change in the Consumer Price Index and state population. The Governor's Budget for 1980-81 proposes expenditures well within the Consumer Price Index and population limits set by Proposition 4.

The following charts illustrate the response of the state budget to Propositions 13 and 4. Particular note should be made of the chart "Comparison of Current Income to Current Expenditures." This chart shows how the surplus was accumulated during the period 1975-76 to 1977-78 through a combination of a prospering economy and efforts to keep government expenditures below the available resources. The chart also graphically illustrates how the surplus has been consumed since 1978-79, a direct result of increased State assistance to local governments to respond to the lower property taxes mandated by Proposition 13.

## STATEWIDE INCREASE IN STATE EMPLOYEES

Period	Average Growth Per Year In Personnel Years	
	Number	Percent

Total 1975-76—1980-81 .....	2,928	1.40

## PERSONNEL YEARS PERCENTAGE CHANGES GREATER OR LESS THAN POPULATION

# STATE APPROPRIATIONS SUBJECT TO LIMITATION

(General and Special Funds)

(billions)

## COMPARISON OF CURRENT INCOME TO CURRENT EXPENDITURES GENERAL FUND

# *Legislative, Judicial, and Executive*

*(Changes and Accomplishments)*

The programs within this area include the Legislature, the Court System and most Constitutional Officers.

## **PERSONNEL ADMINISTRATION**

The Governor's Reorganization Plan No. 2 for civil service reform proposes to centralize personnel functions now being done by several State agencies. A major element in the Plan is the creation of an Office of Personnel Administration which would handle various functions now performed by the Office of Employee Relations, State Personnel Board, Public Employees' Retirement System, General Services, Board of Control and the Department of Finance. The State Personnel Board will retain responsibility for operation of the merit system but would relinquish such functions as salary setting and performance evaluation to the new Office of Personnel Administration. Because the Reorganization Plan is still undergoing legislative and administrative review, specific organizational changes have not been reflected in the Governor's Budget.

## **JUDICIAL**

Article VI of the Constitution creates the Judicial Council to administer the State's judicial system and creates the Courts of Appeal to exercise the judicial power of the State at the appellate level.

### *Proposed Accomplishments*

Legislation was enacted during the 1979 Legislative Session which authorized three addition-

al judgeships and supporting staff for the Courts of Appeal effective January 1, 1980. The 1980-81 budget proposes \$306,138 to fund these positions on a full-year basis.

Forty-three law clerks are proposed for the appellate courts to deal with the increasing workload of the courts. This alternative is less expensive than adding senior attorney staff members and will provide an opportunity to expose a number of attorneys to the workings of the court system.

## **SALARIES OF SUPERIOR COURT JUDGES**

The purpose of this budget is to provide for the State's share of the salaries for 607 superior court judges and the State's share of health and death benefits for those superior court judges enrolled in a State Health Plan.

### *Proposed Accomplishments*

Legislation was enacted during the 1979 Legislative Session which authorized the establishment of 46 new superior court judgeship positions effective January 1, 1980 for a total of 607 authorized superior court judges. Included in the 1980-81 budget is \$2,017,725 for the State's share of the salaries for these additional judgeships.

## **OFFICE OF EMERGENCY SERVICES**

The principal objective of the Office of Emergency Services is the coordination of emergency activities to save lives and reduce property losses during disasters and to expedite recovery from their effects.

### *Proposed Accomplishments*

Legislation was enacted during the 1979 Legislative Session (Chapter 956, Statutes of 1979) requiring the State Office of Emergency Services to investigate the consequences of potentially serious nuclear powerplant accidents for powerplants with a generating capacity of 50 megawatts or more and to update the State's Nuclear Powerplant Emergency Response Plan accordingly. The budget year proposes four new positions and \$500,000 in local assistance for this purpose. All costs of these activities will be funded by assessments on the affected powerplants.

### **BOARD OF EQUALIZATION**

The Board of Equalization administers State and local business and property taxes and excise taxes. These include sales taxes, fuel taxes, liquor taxes, cigarette taxes, insurance tax, energy and telephone surcharges, timber yield tax, private car tax, public utility valuation, and guidance of local property taxation. In response to Chapter 1150, Statutes of 1979, the Litter Assessment Program with 66.7 positions and \$1,515,678 has been terminated.

### *Proposed Accomplishments*

Chapter 282, Statutes of 1979 stipulated that the General Fund shall make up the shortfall in funding local government. This has resulted in the need for a monitoring program to determine the degree of statewide assessment conformity to protect the local tax base to keep State subvention monies at a minimum. The Board consequently redirected their Intercounty Equalization Program to a Local Property Tax Monitoring Program.

An additional 75 positions and \$1,345,999 are proposed in the Board of Equalization's 1980-81 budget. The majority of these positions are in the Sales and Use Tax Program and are in response to workload increases.

### **DEPARTMENT OF JUSTICE**

The Department of Justice, through the constitutional Office of the Attorney General, is responsible for ensuring uniform interpretation and enforcement of laws and for representing the State in civil and criminal proceedings.

### *Proposed Accomplishments*

The Department of Justice proposes to carry out the following new programs or increases in existing programs during the 1980-81 budget year:

1. A substantial increase (34 positions) in the Medi-Cal Fraud Unit will produce a stronger enforcement effort against Medi-Cal provider abuses and should result in significant dollar recoveries as well as lower program costs. Quarterly reports on the number of prosecutions, convictions, and dollars recovered are to be provided to the Governor and the Legislature to facilitate a thorough evaluation of the Unit's effectiveness.
2. The legal staff in the Tort and Condemnation Section is being enlarged in order to accelerate the land acquisition activities of the Department of Parks and Recreation and to strengthen the State's representation in defense of tort lawsuits.
3. A significant addition (18 positions) to the Criminal Law Division is proposed to assume the new function of prosecuting crimes committed in State prisons.
4. There will be an increase in staff to meet the increasing demands for more vigorous prosecution of cases presented by the Board of Medical Quality Assurance.
5. The major three-year conversion of computer equipment and programs will be completed on schedule by the end of the budget year.
6. A budget year reduction of \$1,000,000 has been made in the Division of Civil Law in this budget. The Department of Justice has not been responsive to the policies established by the Legislature and the Executive Branch in providing the necessary and timely legal services required in the enforcement of laws protecting the environment. A corresponding increase in the budget of the Department of Water Resources will enable those departments to secure by contract the necessary environment-related legal services.

### **CONTROLLER**

The State Controller provides fiscal control over receipt and disbursement of State funds and

administers the Inheritance and Gift Tax program, the Unclaimed Property program and various programs relating to local fiscal affairs.

*Proposed Accomplishments*

Funds are provided in the 1980-81 State Controller budget to allow the timely processing of OASDI tax sick leave refunds, the implementation of the new (Phase I) payroll system, con-

tinued development of the reporting (Phase II) element of the payroll system, and to develop a computer capability for implementing collective bargaining agreements. Resources are also provided to conduct additional audits of Clean Water Construction Grants and Federal Disaster Assistance to counties and to accommodate increased workload in the Inheritance and Gift Tax program.

# *State and Consumer Services*

*(Changes and Accomplishments)*

The State and Consumer Services Agency is the "conglomerate" agency of State government. The functions of the various departments within the Agency range from the providing of business services (General Services) and personnel management (Personnel Board), to the operation of a museum (Museum of Science and Industry). Other departments which operate under the Agency umbrella are as follows: Consumer Affairs, Veterans Affairs, Fire Marshal, Franchise Tax Board, Public Employees Retirement System, State Teachers Retirement System, the Public Broadcasting Commission, and the Department of Fair Employment and Housing.

## **Personnel Administration**

The Governor's Reorganization Plan No. 2 proposes to consolidate various State personnel functions currently located in several State entities, including functions which are currently the responsibility of the Departments of General Services, Finance, State Personnel Board, Office of Employee Relations, and Public Employees Retirement System. Because the Reorganization Plan is still undergoing legislative and administrative review, specific organizational changes have not been reflected in the Governor's Budget.

## **Department of Fair Employment and Housing**

The Governor's Reorganization Plan No. 1 abolishes the Division of Fair Employment Practices within the Department of Industrial

Relations and creates the Department of Fair Employment and Housing within the State and Consumer Services Agency, and the Fair Employment and Housing Commission within the Department. The Governor's Budget reflects the reorganization in both the current and budget years.

## **General Services**

The Department of General Services is responsible for providing supportive services to other operating departments and for increasing effectiveness and economy in the administration of State government by establishing and improving statewide standards and guidelines and by implementing constructive changes in governmental policies and procedures.

## *Proposed Accomplishments:*

The Department's budget includes 56.3 positions to provide necessary maintenance and custodial services to new State buildings which are scheduled for completion in Fiscal Years 1979-80 and 1980-81. In addition, 16 positions are proposed in Fiscal Year 1980-81 to implement the provisions of Chapter 282, Statutes of 1979 (AB 8). The bill provides:

- The Emergency School Classroom law of 1979 and made \$13 million available for the acquisition of portable classrooms for lease to school districts.
- Establishes the State Schools Deferred Maintenance Program and provides a funding mechanism for administrative and program costs.

The Budget also proposes 10 additional positions to implement an Energy Assessment Program for State buildings and continue the Energy Efficient Procurement Program. These programs will provide statewide leadership in the implementation of energy conservation programs and policies.

### **Public Employees' Retirement System**

The Public Employees' Retirement System provides a retirement, death benefit, and health benefit program for public California employers and their employees.

#### *Proposed Accomplishments:*

The budget provides for a seven-position task force to reduce the time required for a member to receive benefits to which they are entitled. This will be a multiyear effort to process existing backlogs and establish a system which provides a date certain to PERS members and beneficiaries receiving benefits.

Additionally, \$200,000 has been provided to develop a more sophisticated actuarial system to meet in a prompt, accurate manner the actuarial demands arising through collective bargaining and legislation.

### **Consumer Affairs**

The Department of Consumer Affairs overall objectives are to protect and represent consumer rights and interest and, at the same time, ensure standards of high quality among the professions represented by the various boards and bureaus.

#### *Proposed Accomplishments:*

The 1979-80 budget for the Contractor's State Licensing Board includes an addition of 6.5 temporary positions to eliminate the backlog

of licensure applications. Changes in 1980-81 include:

- An addition of 9.4 new positions and a conversion of 18 limited-term positions to permanent status to process an increase in licensure applications.
- An addition of 2 positions to study and audit special issues of current interests.
- An addition of 2 analyst positions to provide expanded administrative support.
- AB 1363, Chapter 1013, Statutes of 1979, strengthens the enforcement provisions of the Contractors' Licensing Law by providing for arbitration, citation, civil penalties, and probationary licensing procedures. The Board will examine the impact on workload and will update and evaluate the workload resources needed. Necessary adjustments to the 1980-81 fiscal year will be submitted to the Legislature in the spring of 1980.

### **Veterans Affairs**

The Department of Veterans Affairs provides assistance to veterans and their dependents in obtaining rights and benefits to which they may be entitled, provides veterans with low interest home and farm loans, and maintains the Veterans Home. The Veterans Home provides four levels of service: domiciliary, intermediate, skilled nursing, and acute.

#### *Proposed Accomplishments:*

In order to maintain the appropriate levels of health care at the Veterans Home and meet the licensure, certification, and U.S. Veterans Administration requirements, 15 positions are proposed in the 1980-81 fiscal year for direct care of the residents.

# *Business and Transportation Agency*

*(Changes and Accomplishments)*

Every California resident and visitor benefits directly from the State's interest in (1) promoting a sound financial and business community while protecting the public from economic loss and illegal or unethical business practices and (2) providing efficient, rapid, and safe movement of people and goods. These two broad areas are the principal concerns of the Business and Transportation Agency.

## **SECRETARY FOR BUSINESS AND TRANSPORTATION**

The Office of the Secretary for Business and Transportation acts as a focal point for the interrelationship of the private sector, government regulatory agencies and the public interest on matters relating to economic development, housing, financial institutions and transportation.

### *Proposed Accomplishments*

The Office of the Secretary will continue to direct the Alternative Motor Vehicle Fuel Development Program authorized by SB 620, Chapter 161, Statutes of 1979. The program will be coordinated with other state agencies and the private sector to assure that the alternatives explored are consistent with the transportation needs of the State as well as environmental concerns.

In addition, the Secretary will administer the new Social Service Transportation Improvement Program authorized by AB 120, Chapter 1120, Statutes of 1979.

## **DEPARTMENT OF ECONOMIC AND BUSINESS DEVELOPMENT**

The Department of Economic and Business Development was created to ensure the long-term, orderly growth of business and economic development in this State. The Department provides economic planning and policy development, encourages new plant locations and expansions and serves as an advocate and ombudsman for business in government. The Department is comprised of six offices which have more specific mandates.

The Department assumes a key role in many specific projects aimed at expanding the economic base of underutilized areas and business sectors within the State. Through its direct loan activities and guarantee authority as well as its provision of a broad range of management and technical assistance, the Department of Economic and Business Development has had a significant impact on the California business climate.

### *Proposed Accomplishments*

The budget proposes to expand the loan guarantee program which will allow for increased participation by the private financial community, and thus extend the program to a larger segment of the State's small and disadvantaged business community. Additional State funds will be provided for the State and federally funded 304 direct loan program and will be used to provide financial assistance for the Century

Freeway project. In the Spring of 1980, the Department will again present the California International Travel Mart. The first mart, held in May of 1979, generated approximately \$110 million in sales of California destinations and tourism services, a good deal of which was to areas in the State heretofore unable to access the international travel market.

## **DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT**

The primary objectives of the Department of Housing and Community Development are (1) to promote and assist in the provision of affordable housing in suitable living environments for California residents, and (2) to seek solutions to California's housing and community development problems.

The Department's program of activities continues to expand as a result of legislative activity. In 1979, the Legislature appropriated \$100 million for two new housing programs and augmentation of a third. These new programs, i.e., rental housing construction and home-ownership assistance, would add another perspective to the ongoing implementation of housing element guidelines, operation of a farmworker housing grant program as well as rural and urban predevelopment programs, and provision of other development services and assistance, all of which are intended to stimulate the production of affordable housing.

### *Proposed Accomplishments*

The budget reflects adjustments of \$550,000 to facilitate the transfer of mobilehome licensing and regulation functions from the Department of Motor Vehicles to the Department of Housing and Community Development. The transfer is being made in light of recent legislative re-characterization of mobilehomes as taxable real property rather than vehicles, and the increasing use of such homes as affordable housing.

The Department will sponsor an affordable housing design competition that will result in prototype designs for affordable single-family and multiple-dwelling housing in urban and rural areas throughout the State. \$500,000 is proposed for this purpose. Building on its experience with the Passive Solar Design Competition, the State will encourage the development of affordable models for the building industry. The competition would be structured and advertised

to elicit broad participation from architects and builders in order to foster innovative, energy-efficient, low-cost housing plans designed specifically for California climates.

In addition the Department will have the primary responsibility for the relocation or replacement of 4,200 housing units which construction of the Century Freeway in Los Angeles will require. The budget proposes \$1,778,000 for this purpose.

During the 1980 legislative session, the Department will sponsor various legislation designed to further stimulate the production of housing in the state.

## **CALIFORNIA HOUSING FINANCE AGENCY**

The primary function of the California Housing Finance Agency is to sell tax-exempt bonds and use the proceeds to finance housing at below market interest rates. This is done by making construction and mortgage loans to qualified borrowers to finance housing development, or purchasing such loans from qualified mortgage lenders, and by purchasing loans in neighborhood preservation areas, or mortgages originated and serviced by qualified mortgage lenders.

The Agency's programs give specified priority consideration for (1) development of housing for very low, low and moderate income individuals and families including the elderly and the handicapped, (2) stimulating reinvestment of capital into mortgage deficient areas, and (3) encouraging rehabilitation of substandard housing. From its creation until the end of Fiscal Year 1979-80, the Agency will have made or purchased loans for over 16,000 housing units for low and moderate income families.

Effective January 1, 1980, the Agency will be authorized to have \$1.5 billion of bonds or notes outstanding at any one time. It is estimated that by June 30, 1980, the Agency will have issued approximately \$800 million of authorized revenue bonds or notes.

Because the Agency is a public service enterprise fund and operates like a bank, it does not receive annual operating appropriations from the General Fund. However, its Board of Directors adopts an annual budget.

### *Proposed Accomplishments*

In addition to escalation of its activities in the home loan and insurance areas, the Agency will provide technical services to the Department of

Housing and Community Development and make available its resources to help implement the legislative mandate of AB 333, Chapter 1043, Statutes of 1979, which appropriated \$100 million for rental housing construction, home-ownership assistance, and housing rehabilitation programs.

### **DEPARTMENT OF REAL ESTATE**

The Department of Real Estate's primary objective is the protection of the public in offering of subdivided property, real property securities, and in real estate transactions handled through agents. Thus, the Department takes disciplinary, civil and criminal action against its licensees and others who have violated real estate law and the Subdivided Lands Act.

In addition, the Department has ongoing programs to educate the real estate consumer and to encourage the professional orientation of those in the real estate business. The Department also administers the Real Estate Recovery Fund, through which a victim of fraud by a licensee could fully satisfy a court judgment.

#### *Proposed Accomplishments*

The Department's proposed budget contains an augmentation of \$284,000 for anticipated claims against the Recovery Fund.

To eliminate substantial backlogs in the processing of subdivision filings, and to handle the projected workload increase because of future subdivision filings, the Budget also reflects an adjustment of \$1,040,712.

### **DEPARTMENT OF TRANSPORTATION**

The Department of Transportation's primary objective is a commitment to a balanced transportation system that considers all modes and is consistent with social, economic, and environmental objectives. The 1980-81 Budget is reflective of the objective and is consistent with the Department's proposed 1980 State Transportation Improvement Program.

#### *Proposed Accomplishments*

The Mass Transportation Program has been augmented by 68 personnel years and \$110,000,000 in 1979-80 and 47 personnel years and \$113,000,000 in 1980-81 to implement Chapter 161, Statutes of 1979 (SB 620). This measure constitutes a comprehensive response by the Legislature and the Governor to statewide mass

transportation needs which, in part, includes: (1) increased commuter and intercity rail services, (2) increased local and intercity bus service, and (3) construction of intermodal passenger transfer facilities.

Additionally, the Highway Transportation Program has been augmented by 130 personnel years and \$45,000,000 in 1979-80 for right-of-way activity, construction, and replenishment housing programs in the Interstate 105 (Century Freeway) corridor.

### **DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL**

The Department of the California Highway Patrol is responsible for assuring the safe, lawful, rapid, and economical use of the state highway system. The primary objectives are to minimize death, injury, and property loss from traffic accidents; to minimize traffic delays; and to provide protection and assistance to the motoring public.

To meet these responsibilities, a support budget of more than \$272 million, along with capital outlay of \$6.2 million is proposed for the 1980-81 fiscal year.

#### *Proposed Accomplishments*

The budget for 1980-81 reflects adjustments to match program benefits with program costs. The significant proposed adjustments will be as follows:

1. Additional staffing for communications centers. This will result in increases of 23.5 personnel years and \$317,000.
2. Completion of the installation of the Management Information System. This will result in a savings of 15 personnel years.
3. Additional staffing to establish a pilot program of inspecting truck terminals for violations relative to transporting hazardous materials. This will result in increases of 9 personnel years and \$294,123.
4. Purchase of additional emergency medical care equipment. This will improve the Department's efficiency in administering prompt and effective emergency care to persons who become ill or injured while traveling on California's highways and will result in a one-time increase of \$214,000.

The Department, with the full support of the Business and Transportation Agency and the Governor's Office, will be seeking legislative approval of fixed wing aircraft and further review

of radar for improving the driving public's compliance with the National Maximum Speed Limit for purposes of energy conservation.

## **DEPARTMENT OF MOTOR VEHICLES**

The Department of Motor Vehicles objectives are: 1) to protect public interest by identifying ownership through the process of vehicle registration, 2) to promote safety on highways by licensing and controlling drivers, 3) to provide public protection through vehicle-related occupational licensing, 4) to encourage motorists to maintain financial responsibility, and 5) to provide other services as required by statute.

To meet these objectives, a support budget of more than \$177 million, along with capital outlay of \$9.9 million, is proposed for the 1980-81 fiscal year.

### *Proposed Accomplishments*

The budget for 1980-81 reflects adjustments to match program benefits with program costs. The significant proposed adjustments will be as follows:

1. Continued automation of fiscal activities at a cost of \$850,224. This will result in an immediate savings of 5.2 positions and an annual savings of \$500,000 starting with the 1981-82 fiscal year.
2. The termination of an inspection fee collecting role in the South Coast Air Basin Mandatory Emission Inspection Program for a net savings of 7.5 personnel years and \$322,599.

3. The addition of 4.2 personnel years for mail pre-sorting resulting in a savings of \$507,833.

## **STEPHEN P. TEALE CONSOLIDATED DATA CENTER**

The Stephen P. Teale Consolidated Data Center was established in response to legislation which mandated the centralization of state computer facilities. By centralizing all electronic data processing and the use of a statewide time-sharing system, the Center provides efficiency and economy to users of computing services. To date, the Center serves 75 separate state entities.

The Center incorporates a large-scale computing facility with remotely located satellite mini-processors of varying size and capability. The main objective is to make available to each user the portion of computer required to effectively process that organization's data and applications. Thus, the consolidated center becomes available to the largest or smallest user at a price compatible with its requirements.

### *Proposed Accomplishments*

Significant proposed adjustments to the Budget are:

1. Implementation of a mass storage system, and
2. Implementation of the State Controller's Office Computer System.

# Resources

## *(Changes and Accomplishments)*

The Resources Agency programs are directly concerned with protecting, preserving, enhancing, and developing the State's environmental wealth for the benefit of all Californians. Programs funded range from those designed to attain and maintain desirable standards of air and water purity, to forest fire fighting, forest management, flood control, water development, oil drilling regulation, and the creation of recreational opportunities.

The Resources Agency, under the direction of the Secretary for Resources, consists of the following Boards, Commissions and Departments: the Departments of Conservation, Fish and Game, Forestry, Boating and Waterways, Parks and Recreation, and Water Resources; the Air Resources Board, the State Coastal Conservancy, the California Conservation Corps, the Colorado River Board, the Energy Resources Conservation and Development Commission, the San Francisco Bay Conservation and Development Commission, the Solid Waste Management Board, the State Lands Commission, the State Water Resources Control Board and the nine regional Water Quality Control Boards.

### **ENERGY RESOURCES CONSERVATION AND DEVELOPMENT COMMISSION**

The Energy Commission was established in 1975 to ensure continuation of a reliable supply of energy for California at a level consistent with the State's needs.

#### *Current Accomplishments*

In an effort to make the power plant siting

process more efficient and expeditious, the Commission adopted a joint policy agreement with the Air Resources Board to ensure that the two permitting processes work together in a timely fashion. New regulations accelerating the power plant siting process from 36 months to 18 months were adopted by the Commission.

Workshops were conducted for over 3,000 builders, design professionals and lenders on how to use and finance solar energy. Wind prospecting projects identified a potential for 40,000 megawatts of power from wind, and the Commission is formalizing agreements with the U.S. Fish and Wildlife Services, the State Department of Water Resources and Pacific Telephone Company to construct windmills of their own.

The Commission awarded \$650,000 to 32 local governments and community organizations to allow them to incorporate solar codes and energy elements in general plans, provide conservation education and assistance programs, and promote ridesharing programs and energy efficient transportation.

#### *Proposed Accomplishments*

There were several major new programs mandated by the Legislature that will be administered by the Commission in 1980-81. SB 771, Chapter 1123, Statutes of 1979, mandates the construction of at least 20 demonstration projects using biomass as fuel. This \$10.5 million program will fund commercial size demonstrations of biomass conversion technologies. AB 900, Chapter 1124, Statutes of 1979, established a \$20 million loan program (\$10 million in 1979

–80 and \$10 million in 1980–81) to improve energy conservation in California schools, hospitals, and other institutional buildings. This program will supplement the federal schools and hospitals program, and is expected to save 12 billion KWH of electricity and 32 billion cubic feet of natural gas by 1983. The total reduction in energy bills for participating institutions is expected to reach \$97.5 million annually.

The Commission will be administering a major contract to determine the feasibility of using clean coal as fuel in turbines and internal or external combustion engines. The intent of this project is to burn coal in California cleanly and efficiently as soon as possible, and transfer the technology developed to the industrial sector for wide utilization.

### **AIR RESOURCES BOARD**

The Air Resources Board is responsible for protecting California's air environment from hazardous emissions from both mobile and stationary sources.

#### *Current Accomplishments*

A significant achievement of California's air pollution control effort is the motor vehicle emissions control program. More than one-half million cars have been inspected since the Southern California program began in March 1979. With nearly half the vehicles failing the initial inspection, compared to the one-third originally anticipated, the program has cut emissions of smog-forming hydrocarbons and oxides of nitrogen by 11 and 2 percent, respectively, and levels of carbon monoxide by 15 percent.

In November 1979, the Air Resources Board adopted and submitted to the Federal Environmental Protection Agency the State Implementation Plan amendments which provided for reasonable further progress toward attainment of federal air quality standards. The submission of the federally mandated plan culminated two years of intensive effort by the Board.

#### *Proposed Accomplishments*

In 1980–81 the Board is proposing to increase efforts in controlling toxic substances. This program is designed to: 1) establish acceptable levels of community exposure to carcinogens, teratogens, and other toxic substances; 2) propose air quality standards for these substances,

and 3) design emission regulations to ensure that community exposures do not exceed allowable limits. Eighteen and one-half positions and \$693,000 are proposed to implement this effort.

In order to mitigate the effects of inflation, the Board is proposing to increase the subvention to local air pollution control districts by \$606,420 to assist in the development of more effective stationary source control programs.

### **PARKS AND RECREATION**

The major activities of the Department are to plan, develop, protect, interpret, and operate the State Park System.

#### *Proposed Accomplishments*

In 1980–81 the visitor days are expected to increase to 62.5 million, from an estimated 60 million in 1979–80, with the addition of 54,454 acres, 301 camp units, and 226 picnic units.

One of the new facilities to be open in 1980–81 is the State Railroad Museum in Sacramento. Due to open in October 1980, the Railroad Museum is expected to draw some 800,000 in attendance during 1980–81.

In order to operate the Railroad Museum as well as staff newly acquired State Park lands and the completion of new developments, an additional 106 positions and \$2.5 million will be needed. Twenty-six of these positions will come from the existing program through the implementation of operational efficiencies.

### **DEPARTMENT OF WATER RESOURCES**

The role of the Department of Water Resources is to protect, conserve and manage California's water. Thus the Department has a major responsibility for supplying suitable water for personal, agricultural, industrial, recreation, and power generating uses as well as for fish and wildlife support.

#### *Proposed Accomplishments*

The 1980–81 budget contains \$2,150,000 for identifying new and innovative methods for conserving agricultural water and \$4,100,000 to design and construct a 1,000,000 gallon per-day pilot reverse osmosis desalting plant in the San Joaquin Valley. Also, for the 1980–81 fiscal year the Department's budget will include \$1,000,000 for the purpose of providing legal services in the

area of environmental law. These funds are available to other resources and environmental related departments to ensure that they will be able to secure necessary legal services relating to enforcement of laws protecting the environment.

### **WATER RESOURCES CONTROL BOARD**

The broad objectives of the State Water Resources Control Board and the nine Regional Quality Control Boards are to preserve and enhance the quality of California water resources and to assure their conservation and effective utilization.

#### *Proposed Accomplishments*

The 1980–81 budget includes funding for increased attention to the problem of toxic water pollution in the State. The 1980–81 budget contains 22.5 positions and \$986,171 to significantly expand existing, and implement new, State and Regional Board activities relating to detection, monitoring, regulating, and otherwise responding to contamination of State waters by toxics. Also included in the 1980–81 budget are 9 positions and \$526,402 to implement actions necessary to ensure that Lake Tahoe will be preserved as a State resource. In addition, to maintain the Bay-Delta watershed as one of the State's most important resources, the 1980–81 budget contains \$602,568 and 9.5 positions to develop new and improved water management policies and practices.

### **CALIFORNIA CONSERVATION CORPS**

The California Conservation Corps was established by Chapter 342, Statutes of 1976, to accomplish two important and interrelated goals: (1) to further the development and maintenance of the natural resources and environment of the State, and (2) to provide to the young men and women of the State meaningful and productive employment, training in employable skills, and educational opportunities. The Corps provides fire suppression services and disaster relief, protects and preserves the natural environment, and develops the public resources to provide opportunities for greater public use.

#### *Proposed Accomplishments*

The Corps, during 1980–81, proposes to expand the Training and Work Program to include greater participation for disabled individuals,

provide additional training opportunities, and establish an urban based nonresidential center.

The Corps proposes to implement a Disabled Corpsmember Program. Under this program, 60 disabled individuals will be recruited and selected as part of the traditional corpsmember enrollment, and will participate in the same activities as other corpsmembers.

The Training and Work Program includes the addition of a Solar and Energy Conservation Program. The Solar Program includes 9.6 personnel years and \$335,016 from the State Energy Resources Conservation and Development Account and \$151,200 in reimbursements to train 50 corpsmembers in the design, fabrication, installation, and maintenance of solar water heating systems for various State agencies.

240 new corpsmembers are proposed to establish a Fire Fighter Trainee Program in conjunction with the Department of Forestry. These trainees will be assigned to 40 selected fire stations and utilized in fuel control, fuel management, and fire engine support activities. The cost to the Corps for the 240 corpsmembers is \$2,442,720 General Fund for salaries and benefits. This will not require additional base centers as the corpsmembers will be located at Forestry fire stations. Along with this program, 36 corpsmembers will be utilized for a Forestry Helitack crew for fuel management and fire suppression activities.

The establishment of an additional urban based nonresidential center is proposed for 1980–81 and includes 9.5 staff and \$858,000 General Fund. The additional center will provide 60 young Californians employment in their community and the opportunity to perform various urban conservation projects.

Chapter 342, Statutes of 1976, provides that the Corps shall remain in effect only until January 1, 1981. Legislation reauthorizing the Corps will be supported by the Administration for continuation of the Corps beyond the sunset provision. It is, therefore, proposed that the 1980–81 budget reflect full-year funding in anticipation of the passage of legislative reauthorization of the California Conservation Corps.

### **DEPARTMENT OF FORESTRY**

The Department of Forestry is responsible for the protection, conservation, and development of California's forest, watershed and range

lands. An extensive fire protection system is included to meet the unique level of hazard within the State. The Department proposes a budget of \$143.7 million for the 1980-81 fiscal year to meet these objectives.

#### *Proposed Accomplishments*

1980-81 will be the first full year of implementation of the California Forest Improvement Act of 1978 (Chapter 1181). This important new program will provide substantial efforts in reforestation, urban forestry and wood energy projects. Over \$9.6 million, made available by the sale of forest products from state-owned forest, will be used to accomplish first-year goals, including the reforestation of 40,000 acres of privately owned forest lands.

New initiatives are proposed to counter the substantial threat to the State's wildlands from people-caused wildfires. A \$630,000 program is included for volunteer fire prevention activities and to institute a new mass media fire prevention campaign. \$440,000 will be used to provide additional crew strength on 80 fire engines as well as a 10 place helitack unit to replace a 4 place unit. The firefighting crews will be provided by the California Conservation Corps.

Significant efforts will be directed towards the management and utilization of the renewable resources on the State's wildlands. Soil productivity, water quality and fish habitat are being adversely affected on the north coast of California by a large number of unique soil erosion problems. Erosion control measures will be instituted to correct damaged areas. Five vegeta-

tion management projects are proposed to provide demonstrated experimental results which increase resource productivity while reducing high fire hazard fuels. Two medium helicopters will be substituted for existing smaller ones in support of this effort. A transportable wood densification unit, which can convert hazardous fuel into a useable energy form, is being developed and tested. \$1.3 million is included for these various efforts.

#### *Agencywide—Resources Management*

In addition to the various new and expanded programs noted above, as the State moves into a period of need for more intensive management of natural resources, more data collection is critical to planning for future programs, as is restoration and conservation of various habitats and environments. As mentioned elsewhere in the budget highlights, in order to meet these critical environmental needs, \$15 million is to be allocated to various Resources Agency departments from the Energy and Resources Fund (ERF). Legislation will be introduced to establish the Energy and Resources Fund to provide for these projects from the anticipated increase in Tidelands oil revenue. This allocation is to support programs or projects which are directed to conserve, restore, and/or enhance California's natural resources. Proposals for 1980-81 include such projects as geologic mapping and soils data collection for Department of Conservation, reforestation of State School Lands for the State Lands Commission, and Wetlands restoration for the Department of Fish and Game.

# Health and Welfare

*(Changes and Accomplishments)*

The programs administered by the Health and Welfare Agency are directly concerned with the physical, mental, and social well-being of all Californians. For Fiscal Year 1980-81, the Health and Welfare programs estimate an expenditure of approximately \$13.8 billion in com-

bined State, Federal, and county funds, representative of the most complex and costly governmental programs. The allocation of these funds to the various departments that are responsible for administration of the programs is shown below.

**HEALTH AND WELFARE**  
Proposed 1980-81 Expenditures  
(In Millions)

<sup>1</sup> Reflects allocations for Agency Secretary, Department of Aging, Department of Alcohol and Drug Abuse, Health and Welfare Consolidated Data Center, Office of Statewide Health Planning and

Development, Governor's Advisory Committee on Child Care, State Council and Area Boards on Developmental Disabilities and the Health Facilities Commission which is independent of the Agency.

Commencing with this Budget, the Departments of Corrections and Youth Authority and the Board of Prison Terms, Youthful Offender Parole Board, Institutional Review Board, Board of Corrections, Correctional Industries Commission, and the Narcotic Addict Evaluation Authority are no longer included as part of the Health and Welfare Agency but are reported separately under the title of Youth and Adult Correctional Agency. This change is proposed in Reorganization Plan No. 3 of 1979, dated December 20, 1979 and is in response to Chapter 1252, Statutes of 1977.

### **Health and Welfare Agency**

The Agency is responsible for administering the State's health, welfare, social and rehabilitative programs.

#### *Current Accomplishments*

The Agency will continue to implement the second phase of the Multipurpose Senior Services Center Program (MSSP). In the current year, eight sites have been selected for participation in the pilot project, and will be fully operational in the 1980-81 Fiscal Year. Total program cost for 1980-81 is \$14.6 million, to be funded from various resources. Over 2,100 frail and elderly Californians will share in the health benefits of these centers.

#### *Proposed Accomplishments*

In the interest of services to youth, the Agency is preparing a Master Plan for Services to Children and Youth for submission to the Legislature on July 1, 1980. Additionally, the Agency is coordinating all State activities related to the Statehouse Conference on Children and Youth to be held in April 1980 in Sacramento, California.

The Agency is also coordinating activities related to the White House Conference on The Family planned for the Summer of 1980 to be held in Washington, D.C.

### **Department of Health Services**

The Department of Health Services administers the Medi-Cal, Public Health, and Licensing and Certification programs.

#### *Current Accomplishments*

During the current year, the Department of Health Services (DHS) will continue to serve California through its broad range of programs to improve the health of its citizens: Medi-Cal pays for medical care for persons who cannot afford such care; Public Health protects the public against unsafe foods, drugs, water supplies, and hazardous materials; and Licensing and Certification regulates licensed health facilities throughout the State. The largest of these: the Medi-Cal Program, has a projected (1979-80) caseload of 2,896,000 and expenditures of \$3.8 billion.

During 1979-80, the new fiscal intermediary, Computer Sciences Corporation (CSC), will complete the installation of its claims processing system. CSC began paying pharmaceutical claims on June 1, 1979, long-term care claims on September 1, 1979 and hospital inpatient and outpatient claims on December 1, 1979. Under the conversion schedule, medical and other professional claims will begin to be paid by CSC on March 1, 1980.

In accordance with Chapter 282, Statutes of 1979 (AB 8), the Department of Health Services is administering the newly created County Health Services Fund which pays for a share of the cost of county health services. Subventions to counties under AB 8 will total \$267 million in 1979-80 and \$306 million in 1980-81. County requirements under AB 8 include the submission of plans, budgets, expenditure information, and specified reports to the Department.

#### *Proposed Accomplishments*

In the budget year, total expenditures for the Department of Health Services are anticipated to grow by \$621 million; General Fund expenditures will increase by \$311 million. The largest part of that growth will be experienced by the Medi-Cal program, whose caseload is expected to increase by 2 percent to 2,954,400 and whose total expenditures are expected to increase by 14.3 percent to \$4.3 billion. Included in the 1980-81 budget is \$141.6 million (\$76.6 million General Fund) for a 9 percent Medi-Cal provider rate increase and \$11.5 million (\$7.9 million General Fund) for Medi-Cal County Administration cost-of-living increases. In addition, other local assistance public health programs receive a 9 percent provider rate increase.

The proposed budget continues the seven positions added in 1979–80 to implement the Medi-Cal hospital cost containment program, which is designed to reduce the rapid rate of growth in Medi-Cal hospital costs. The progress of this program will be reviewed in the spring to identify potential budget year savings, which will be reflected in the May revision of the Governor's Budget.

An additional 242 positions have been proposed for the Department of Health Services to enable the Department to provide essential health services. Among the more significant program changes are:

- A redirection of California's share of Federal public health incentive grants (314(d)) to fund local public health agencies, and a redirection of State public health assistance funds to support State laboratory personnel and new local assistance programs.
- Sixty-five new positions related to the environment are proposed, including 22 positions for hazardous waste inspections, 14 positions for investigating chemical contamination in the environment, and 23 positions for searches of abandoned dump sites. Six new positions are proposed in the Radiologic Materials area: three positions for environmental monitoring standards and surveillance to protect the public from uncontrolled releases of radioactivity from nuclear power plants; two positions for the implementation of standards for the protection of radioactive materials from seismic events, fire, theft, or malevolent misuse; and, one position for the development of a comprehensive system for control of radioactive materials in transit.
- Increased staffing in the Department of Social Services' Disability Evaluation program is anticipated to result in \$5.3 million General Fund savings in the Medi-Cal program in 1980–81 and \$25.8 million annual General Fund savings by 1983–84. These savings will be achieved as Medi-Cal applicants now classified as medically indigent (MI) eligibles are classified as federally funded medically needy (MN) eligibles after a disability evaluation.

A continuing emphasis will be placed on preventing fraud and abuse in the Medi-Cal program. Augmentations for the 1980–81 budget include 31 positions to screen public complaints alleging fraud by providers and beneficiaries and to investigate large-scale abuses in the program. Additionally, thirty-four new positions are proposed to augment the Department of Justice's Medi-Cal fraud unit.

Other program augmentations include:

- Nineteen positions for county health services to implement the provisions of AB 8, Chapter 282 Statutes of 1979.
- Forty-eight positions added to the Community Health Services Division, including 12 positions added to the High Risk Perinatal Unit and 13 positions to implement the Newborn Screening Program.
- Twelve positions added to the Rural Health Division, including four positions for the Farmworker Health program.
- Sixty-seven positions have been added to various programs for workload adjustments.

### **Department of Mental Health**

The goals of the Department of Mental Health are to develop and provide a continuum of mental health services for the state's mentally disabled persons.

#### *Current Accomplishments*

The 1979–80 Budget Act provided an augmentation of approximately \$28 million for a mental health initiative providing alternatives to State hospital placement. These programs have contributed to a population decrease in State hospitals for the mentally disabled from 5,060 patients on June 30, 1979 to an estimated 4,836 patients on June 30, 1980. Chapter 1172, Statutes of 1979 (AB 1438) reappropriated \$15,000,000, included in the Budget Act of 1979, to the State Department of Mental Health for assistance to community mental health programs; appropriated \$750,000 for the development of a statewide mental health prevention program; and appropriated \$300,000 for the development of a statewide mental health management information system. Also included in the augmentation was \$1.6 million provided for revised staffing standards in the State hospitals.

### *Proposed Accomplishments*

The 1980–81 budget proposes a total Mental Health expenditure of \$576,558,731 including an augmentation of \$25 million General Fund to establish nonhospital community based services and to reduce admissions and use of State hospitals. An additional \$26.2 million is included to provide a nine percent cost of living adjustment. These augmentations together with existing programs are expected to reduce the State hospital population by 600 from an estimated 4,836 on June 30, 1980 to an estimated 4,236 patients on June 29, 1981. The budget also includes \$21,973,269 for capital outlay. These funds will continue the program of Fire and Life Safety improvements and will include \$4,145,000 for several projects related to the more efficient use of energy.

### **Department of Developmental Services**

The Department of Developmental Services administers the Lanterman Developmental Disabilities Act. The intent of this Act, and the primary objective of the Department, is to ensure coordination of the provision of services to persons with special developmental needs. Services to the developmentally disabled are delivered directly through State hospitals and continuing care support services and indirectly through a statewide network of 21 private non-profit locally based community agencies.

### *Current Accomplishments*

The Department of Developmental Services has responsibility for nine State hospitals serving 8,552 clients during 1979–80, representing a reduction in population of 403 clients from the preceding year. This declining State hospital population represents the Department's continued emphasis on placing State hospital residents into appropriate community settings. Section 10.68 of the Budget Act of 1978 provided initial funding for expansion of this effort and resulted in 41 net placements into the community above the 200 placements assumed in the Regional Centers budget. The 1979–80 budget for State hospitals includes \$1,369,536 and the 1980–81 budget includes \$1,568,118 for the continued funding of additional community placements by the Regional Centers.

The 21 Regional Centers provide intake, diag-

nosis, and referral services for approximately 72,000 individuals in the community with a budget of \$149.5 million. The current year budget includes a proposed deficiency of \$4.3 million for purchase of services and represents a 20.9 percent increase over the 1978–79 expenditure level. Also during the 1979–80 fiscal year, the Department reinstituted the policy of allowing the Regional Centers to discontinue the use of the Department's Continuing Care Services Branch staff and to assume case management responsibility for all clients. This will result in a transfer of 2,166 of the 10,900 clients presently receiving placement and follow-up services from the State to three of the regional centers. Additional requests by other regional centers to assume case management services are currently under review by the Department.

During the 1979–80 fiscal year, the Department has available funding for 225 Psychiatric Technician Apprentices at four State hospitals in order to improve recruitment and retention of qualified candidates for nursing classifications.

### *Proposed Accomplishments.*

The 1980–81 budget includes the reorganization of the Community Services Division to respond to the need for accountability, administrative direction, and technical assistance in the Department's Regional Centers Program. Commensurate with this reorganization, additional staffing is proposed for the Electronic Data Processing and Audits Sections of the Administration Division to assure timely reporting and fiscal monitoring of community operations.

Continuing growth in the number of new clients served by the Regional Centers is projected at 9,168. Due to concentrated efforts on the part of the Department and the Regional Centers, 7,968 client cases have been identified as inactive and are being deleted from total caseload counts. This budget reflects a total caseload count of 73,677 which is a net growth of 1,200 due to the inactivations. Funding for the Regional Centers is projected at a 23 percent increase over 1979–80 with the General Fund increasing by \$34.2 million, including \$22.2 million for a 9 percent cost-of-living increase.

In addition, the budget reflects the implementation of Chapter 1132, Statutes of 1979 (AB 1164) that transfers the administration of the sheltered workshop programs from Develop-

mental Services to the Department of Rehabilitation through a contractual arrangement. Funding will remain in Developmental Services' budget to be used to reimburse the Department of Rehabilitation through an interagency agreement. This funding includes \$602,707 to fund 27.5 new positions to reflect increased emphasis on program management and monitoring and \$25,754,460 to provide workshop services for approximately 8,819 Regional Center clients. This amount includes funding for an additional 1,395 clients to be served during the 1980-81 fiscal year.

The 1980-81 budget for State hospitals projects a decrease of 487 developmentally disabled clients and a decrease of 578 mentally disabled clients. This decline in population permits a reduction of 929.5 level of care and nonlevel of care positions. Further, the Department has completed staffing standards pursuant to Assembly Concurrent Resolution 103 of 1978 for the Medical/Surgical and Continuing Medical Care Programs. An additional 187.5 positions have been included to phase in the standards for these programs. These adjustments and other minor staffing adjustments result in a net reduction of 685 State hospital positions.

The 1980-81 budget continues the current year funding level of \$1,309,126 for the Psychiatric Technician Apprenticeship Program. The Department proposes to use \$292,629 of this amount to continue a class of thirty apprentices at Camarillo State Hospital and will earmark \$1,016,497 for use in programs approved under the California Worksite Education and Training Act in cooperation with the Departments of Employment Development and Industrial Relations to support development of nursing and related health apprenticeship programs in this area.

The Department of Developmental Services' capital outlay program of \$119,911,745 for the current year and \$70,436,433 in the budget year includes \$114,359,067 and \$57,051,573 respectively for fire and life safety and environmental improvements in the nine State hospitals operated by this department. These amounts represent the 1979-80 and 1980-81 increments necessary to assure all clients in State hospitals reside in code conforming buildings by July 1982. Conditional Federal Certification has been granted based upon the Department's commitment to meet the deadline for the projected July 1982 population of 7,620 clients.

## **Department of Social Services**

The programs administered by the Department of Social Services are designed to provide financial assistance to the eligible needy and to prevent abuse, neglect, and exploitation of children and adults who are unable to protect themselves. Major programs include: (1) SSI/SSP which provides cash grants to adults; (2) Aid to Families with Dependent Children (AFDC) which provides cash grants for children; (3) Food Stamps which provides nutritional aid to needy persons; and (4) Social Services which provides assistance to persons in need.

### *Current Accomplishments*

Approximately 1.4 million low-income people will receive AFDC grants to meet the basic needs of children and their caretakers. In 1979-80, the average family of four will receive \$487 a month to meet these needs. The total grant costs will be \$2.1 billion (\$987 million in General Fund money, \$84 million in county funds, and \$1.04 billion in Federal funds).

The Supplemental Security Income/State Supplementary Program (SSI/SSP) is a Federal-State program which provides grants to finance basic needs of eligible aged, blind, and disabled individuals. An aged or disabled person currently receives \$356 and a blind person \$399 per month. Over 701,000 Californians will receive these payments during the year, at a General Fund cost of \$1.09 billion.

In the Food Stamp program, an estimated \$526 million in Federal funds will help approximately 1.4 million people to receive food during the 1979-80 fiscal year.

The Social Services Program provides services to California's elderly, blind, and disabled citizens and to children and families who need help. The In-Home Supportive Services (IHSS) component of Social Services supplies homemaker and chore services to the aged, blind, and disabled persons who need assistance with personal care and/or essential housekeeping tasks. Approximately 157,000 persons are served annually by county and private agency staff who provide such services pursuant to State guidelines. Departmental resources also provide social services for protecting the welfare of children who are being or are in danger of being

abused, neglected, or exploited. A special effort to combat child abuse through 24-hour child protection systems was initiated in 1979–80 at a cost of \$5 million to the General Fund.

### *Proposed Accomplishments*

Estimated expenditures for all programs will increase from \$4.3 billion in the current year to \$5.2 billion in 1980–81. In accordance with existing statutes a 14.65 percent cost-of-living adjustment is included for AFDC, SSI/SSP, and Aid to the Potentially Self-Supporting Blind (APSB) programs in the budget year.

Approximately 1.5 million low-income people will receive AFDC grants to meet the basic needs of children and their caretakers. In 1980–81, the average family of four will receive \$559 a month to meet these needs. The total grant costs will be \$2.59 billion (\$1.2 billion in General Fund money, \$100 million in county funds, and \$1.29 billion in Federal funds).

Effective July 1, 1980, an aged or disabled person will receive \$416 and a blind person \$447 per month. Approximately 715,700 Californians will receive these payments during the budget year, at a General Fund cost of \$1.31 billion.

In the Food Stamp program, an estimated \$623 million in Federal funds will help approximately 1.4 million people to receive food during the 1980–81 fiscal year.

The budget also provides a 9 percent cost-of-living increase for other local assistance programs. This increase impacts such programs as County Administration, Adoptions, Other County Social Services, and Community Care Licensing. In addition, the budget for the In-Home Supportive Services Program reflects changes in the minimum wage and in the statutory maximum allowance on services provided.

Among the more significant program changes are:

- Additional Federal Social Services (Title XX) funds, in the amount of \$80 million, (\$40 million in each year) are anticipated to be received in Federal Fiscal Years 1980 and 1981. The funds would be used to continue the one-time Federal funds available in 1979–80, meet the requirements of 1979 Budget Act language, provide for cost-of-living increases, and expand the 24-hour child protection systems to the \$7.9 million level.
- An increase of 16.5 positions is proposed for the Indochinese Refugee Assistance Program (IRAP) which was established in 1975 by Federal legislation to meet the needs of Vietnamese, Cambodian, and Laotian refugees coming into the United States. This program will provide aid and services in 1980–81 to over 98,000 of these persons who have established residency in California and are in need of assistance. This 100 percent federally funded program was extended through September 30, 1981 by Public Law 96-110, signed by the President in November 1979.
- Approximately 170,000 persons will be served annually by county and private agency staff who provide in-home supportive services. The General Fund cost is estimated to be \$149.4 million in the budget year.
- Increased staffing in the Disability Evaluation program is anticipated to result in \$25.8 million annual General Fund savings in the Medi-Cal program by 1983–84. These savings will be achieved as the result of statewide implementation of a simplified system of evaluating medically indigent (MI) applicants for medical eligibility as federally funded medically needy eligibles.
- A substantial increase in departmental resources is proposed due to Chapter 282, Statutes of 1979 (AB 8), which directs the Department of Social Services to implement a Centralized Delivery System in all counties by July 1, 1984. This system will be a joint State and county operation by which the State will provide management and delivery support to locally administered public assistance programs. Centralized Delivery will enable the State to realize sizeable cost savings through the standardization of programs and procedures throughout the State.

### **Employment Development Department**

The Employment Development Department provides a labor exchange facility for jobseekers and employers, helps welfare recipients and other disadvantaged persons to become self-sufficient through job training and employment, administers the Unemployment Insurance (UI)

and Disability Insurance (DI) programs, and administers the tax collection and accounting functions under the UI, DI, and Personal Income Tax withholding programs.

#### *Current Accomplishments*

Chapter 1181, Statutes of 1979 (SB 132), established the California Worksite Education and Training Program, and appropriated \$25 million for a three year period. This program is intended to provide vocational and technical classroom instruction, combined with worksite training in jobs that will create career opportunities to youth and low income participants.

#### *Proposed Accomplishments*

The Governor's Budget established 25 positions in 1979-80 in the Employment Development Department to implement the California Worksite Education and Training program CWETA. These positions will continue over the next three years. The plan of expenditure is \$10 million current year, \$8 million budget year and \$7 million in Fiscal Year 1982-83. Additionally, the Department will utilize \$1,016,497 for CWETA in cooperation with the Department of Developmental Services.

### **Department of Rehabilitation**

The Department of Rehabilitation helps disabled persons reach social and economic independence. The Department's primary goal is to rehabilitate and place into suitable employment, physically and mentally handicapped persons.

#### *Current Accomplishments*

Chapter 191, Statutes of 1979 (AB 204) provided \$2 million State funding for 1979-80 for 13 of the 24 existing Independent Living Centers (ILC) in California.

#### *Proposed Accomplishments*

The Governor's Budget proposes \$2 million General Fund for the budget year to maintain funding of core services in the Independent Living Centers. The Administration will support legislation with an additional \$1 million from the General Fund to establish an ongoing State program. The proposed legislation will provide for a 50 percent State/50 percent local funding

match to be phased-in by Fiscal Year 1982-83.

### **Services to the Elderly**

In addition to the programs identified above there are major services provided to the public which cross Departmental lines. Notably, California provides a wide range of specific programs and services to the elderly.

The Department of Aging administers Federal funds of approximately \$65 million for specific grant programs under the Older Americans Act of 1965, as amended. These funds provide meals and services for the elderly at selected sites throughout the State. In 1979-80, California established a Nutrition Reserve Fund with \$5 million General Fund support as a means of providing interim funding for nutrition projects experiencing temporary financial difficulties in order to prevent project closures. The Department also administers approximately \$500,000 in State funds for the Senior Companion and Foster Grandparent Programs and the Senior Nutrition and Volunteer Services Program. These programs encourage private and public community agencies to utilize senior citizens' skills.

In addition, the State provides numerous other services to the elderly which are administered by various State agencies.

The Health and Welfare Agency administers the Multipurpose Senior Services Program which was established under the authority of Chapter 1199/Statutes of 1977. This is a pilot program to develop and test effective methods for coordinating and supplementing the various categorically funded social and health services available to the elderly. The project brings together funding from various resources with a budget of \$43.8 million over the five year life of the project. The 1980-81 budget includes \$14.6 million for these services.

Additionally, the Governor's Budget proposes, within the Medi-Cal program, a significant increase in Adult Day Health Care services for the elderly. An expenditure increase to \$5.7 million, or \$2.9 million in General Funds, will increase the number sited from 25 to 50 and the number of participants from 700 to 2,500.

Among the major programs in the Department of Social Services which provide services to the elderly are the Supplemental Security Income/State Supplementary Program (SSI/SSP)

program and the In-Home Supportive Services (IHSS) program. It is estimated that the SSI/SSP program will provide grants to approximately 715,700 aged, blind, and disabled individuals at a General Fund cost of \$1.31 billion. These recipients will receive a 14.65 percent cost-of-living increase on July 1, 1980 in accord-

ance with State statutes. The IHSS program is anticipated to provide homemaker and chore services to 170,000 disabled and elderly individuals in 1980-81 at a total cost of \$249 million. This represents a 40 percent increase over actual 1978-79 program expenditures of \$178 million.

# *Education*

*(Changes and Accomplishments)*

The citizens of the State continue to have available to them and their children, broad educational offerings spanning kindergarten through high school and postsecondary education from adult education and the Community Colleges through the highest degrees offered by the University Systems. The loss of local property taxes resulting from the passage by the electorate of Proposition 13, was largely mitigated by the passage of Chapter 282, Statutes of 1979 (AB 8) in the 1979 Legislative Session which changed the State's share in the financing of schools in K-12 and the Community Colleges. In 1980-81 total State funding in the amount of \$8,464.5 million will be provided for K-12 and Community College programs including State Teachers Retirement System Contributions by the State, Debt Service on Public School Building Bonds, and School Facilities Aid. This compares to \$3,535.6 million for these same programs in 1977-78, the year prior to Proposition 13. The major area of concern is now the education of the handicapped. The Master Plan which was developed in California and has been adopted nationwide, will be extended to include 45% of the total special education enrollment in 1980-81. In the Community Colleges, funds available for handicapped students have been specifically identified and appropriated. The passage of AB 8 provided a funding mechanism for the Community Colleges through 1980-81. In the 1980 session, it is anticipated that a permanent financing plan for the Community Colleges will be enacted.

Both the University of California and the California State University and Colleges experienced increases in enrollment in 1979-80, which are expected to continue in 1980-81. This will allow time for the planning necessary to adjust for the forecasted steady-state enrollments which are anticipated to occur in the mid 1980's when the number of 18-to-25 year old citizens declines. The proposed budget contains funds to serve disabled students identified in both segments under a new program established for them. In addition, each campus in both segments will have core staff to expand the Student Affirmative Action Program which has been designed to help educationally disadvantaged and under-represented groups of students enter the University and College systems as regular students.

## **DEPARTMENT OF EDUCATION**

California's public education system is administered at the State level by the Department of Education under the direction of the State Board of Education and the Superintendent of Public Instruction, for the education of more than four million students from preschool age through adulthood. State support of elementary and secondary education has changed significantly since the public approved Proposition 13 in June 1978. During 1978-79, over \$2.1 billion was appropriated in several bills from the State surplus to the public schools to replace losses in property taxes resulting from the initiative's enactment. In July 1979, the Legislature enacted and the

Governor signed without modification, a longer term school finance measure, AB 8, that establishes a new general aid support process for the public schools and increased State support for K-12 schools by \$3,256 million in 1979-80 and \$3,425 million in 1980-81. Today the State's share of public school support is in excess of 70 percent compared to the 39 percent share which existed in 1977-78 prior to Proposition 13.

#### *Current Accomplishments*

##### 1. *School Finance*

AB 8 continues the State assumption of the reduction in property taxes resulting from Proposition 13. It provides for a \$549.5 million increase in school district revenue limits in 1979-80. The bill also provides for a new equalization mechanism to achieve substantial compliance with the Serrano vs. Priest mandate, and adds several new State funding sources for school district construction and deferred maintenance needs. In 1979-80, an estimated \$99 million in new State funds will be made available for portable classrooms and school construction.

##### 2. *Master Plan for Special Education*

Chapter 1247, Statutes of 1977 (AB 1250), authorized expansion, starting in 1978-79, of the California Master Plan for Special Education as a continuing program with additional funding contained in Chapter 894, Statutes of 1977 (AB 65), and Chapter 282, Statutes of 1979 (AB 8). The additional funding of \$48 million from AB 65 and \$51.4 million from AB 8 provided \$200.8 million in the current year. This allowed for a 44 percent increase in the number of students served by Master Plan (to 30 percent of all children in special education).

##### 3. *School Improvement Program*

The School Improvement Program, established by Chapter 894, Statutes of 1977 (AB 65), is aimed at restructuring education in kindergarten through grade 12. It replaces the Early Childhood Education Program (ECE) in kindergarten through grade 3. In the current year, program implementation funds of \$118.4 million for grades K-6 and \$17 million for grades 7-12 are provided for a total of

\$135.4 million. No planning grants were provided for 1979-80.

##### 4. *Economic Impact Aid*

Economic Impact Aid is in its first year of operation as a program which revises and consolidates the former Educationally Disadvantaged Youth and Bilingual Education Programs. Chapter 894/77 (AB 65) added 467 school districts to the program in 1979-80, for a total of approximately 1,000 districts in the program. The 1979-80 budget provided \$2.4 million for program expansion, \$8 million in discretionary funds for districts not receiving sufficient funds through the EIA formula, \$2 million for bilingual education mandated costs, and \$2.3 million to increase the supply of bilingual teachers.

##### 5. *Urban Impact Aid*

Urban Impact Aid provides general aid to unified school districts meeting the criteria of size and concentration of disadvantaged pupils provided in Chapter 894/77 (AB 65). The 1979-80 budget appropriated \$44 million for this program. Chapter 282/79 (AB 8) augmented the program by \$18 million for 19 school districts qualifying on the basis of ADA. Statutory authority for all but the so called Meade portion of this program expires June 30, 1980. No funding is proposed in 1980-81 except for a statutory appropriation of \$8.7 million in Meade funds.

##### 6. *Child Care*

The 1979-80 budget provided \$4.5 million expansion funds for child care to provide services to an additional 3,300 children. The current year budget also included \$37 million for school district and community college child care programs to replace revenues generated from permissive child care override taxes prior to passage of Proposition 13. The 25 percent match requirement for campus child care programs was reduced to 12½ percent in 1979-80, with General Fund replacement of the remaining 12½ percent. Legislation enacted in 1979 continued indefinitely the authorization for the alternative child care program in AB 460 (Chapter 251/79) and established intergenerational

child care programs in AB 1496 (Chapter 974/79).

7. *Vocational Education*

Chapter 282, Statutes of 1979 (AB 8), appropriated \$500,000 from horseracing license fees to the Department of Education for support of vocational student organizations. These funds are being used to conduct conferences, workshops, and in-service training, to prepare instructional materials, and to maintain affiliations with national vocational student organizations.

8. *School Facilities Aid*

The School Facilities Aid program was established by AB 8 (Chapter 282/79) and is aimed at providing construction and maintenance for elementary and secondary classrooms for education of public school pupils. For the current year, AB 8 contained two provisions for school construction and maintenance:

- Relocatable classrooms—\$13 million was appropriated for the purchase of relocatable classrooms to be leased to school districts experiencing rapid growth in enrollments.
- Lease-Purchase—Appropriated an amount equivalent to savings (“slip-page”), if any, from State General Fund apportionments, which result from increases in assessed property valuation above specified levels. The appropriation of these savings was made for the purposes of the Leroy F. Greene Lease-Purchase Act of 1976. Originally, it was the intent of the Legislature in enacting this provision to appropriate these savings for transfer to the State School Building Lease-Purchase Fund for school facilities aid. General Fund apportionment aid to school districts would have been reduced by the amount of the transfer and the State would incur no new General Fund costs. However, due to a technical error in drafting this provision, \$86.5 million in additional funds was transferred for school facilities aid and the reduction in General Fund apportionment aid never occurred.

*Proposed Accomplishments*

1. *Apportionments for K–12 Schools*

As authorized by AB 8 (Chapter 282/79), State apportionments to K–12 schools are proposed to increase \$339.6 million in 1980–81. This excludes \$49.7 million in special education apportionments which is transferred to the Master Plan for Special Education. When combined with estimated local property tax revenues, this will make available sufficient resources to provide an average 7.6 percent increase in per-student revenue limits compared to 1979–80 levels. These increases are provided on a basis which will move the State into more substantial compliance with the Supreme Court’s Serrano vs. Priest decision, which mandates that wealth related expenditure differences between school districts be reduced to less than \$100.

2. *School Improvement Program*

The 1980–81 budget includes a \$21.8 million increase for a total of \$157.2 million General Fund for the School Improvement Program. The augmentation is to expand participation in the program by providing planning grants totalling \$8.8 million to 250 secondary schools serving approximately 294,000 students. Since the current year budget contains no planning grants, no expansion implementation funds are included in the budget year. In addition, \$13 million is provided for a 9 percent cost-of-living adjustment.

3. *Economic Impact Aid*

The Governor’s Budget contains \$6 million for expansion of Economic Impact Aid. This augmentation will be targeted directly to the 467 school districts with EIA factors between .35 and .9 that received insufficient funding through the 1979–80 formula augmentation to develop effective compensatory education programs for bilingual and other educationally disadvantaged pupils. Included in budget totals is a 9 percent increase for a cost-of-living adjustment.

4. *State Special Schools*

The California School for the Deaf and the California School for the Blind currently located in Berkeley, will be occupy-

ing new facilities in Fremont during the 1980-81 fiscal year. This marks the culmination of a \$49.7 million construction effort. The 1980-81 budget includes an additional \$2.2 million from the General Fund for 33.5 new security, maintenance, and instruction positions and to cover costs of moving staff and equipment to the new school site.

5. *Master Plan for Special Education*

The Master Plan for Special Education is proposed for expansion pursuant to AB 1250 (Chapter 1247/77) through an augmentation of \$107.2 million from the State General Fund, resulting in a budget year program level of \$308 million which includes \$52 million reallocated from non-Master Plan Special Education programs and \$55.2 million of new General Funds. The number of children served under Master Plan will increase by approximately 57,000 or from 30 percent to 45 percent of children in special education. The program as proposed in 1980-81 provides \$19.7 million for the state's assumption of costs previously borne by districts and counties for non-master plan special education programs. The monies for the master plan will be distributed on a cost-per-services basis as provided in statute.

6. *Bilingual Teacher Corps*

A November 1979 report to the Legislature by the Department of Education and the Student Aid Commission recommends a merger of this program with the Bilingual Teacher Development Grant Program, to be administered by the Student Aid Commission. As a result of this recommendation and in anticipation of legislation, the base program level is continued.

7. *Child Care and Preschool*

This budget provides \$168.8 million in State General Fund for child care and preschool programs. Funding is provided for a State buyout of the 12½ percent match requirement for all campus programs except those receiving bailout through Chapter 282/79 (AB 8). Those 17 programs will provide a 25 percent match.

A \$2.4 million inflation augmentation is

provided for the preschool program which will be administered on a sliding scale to equalize per capita costs for all preschool programs at \$1,461 in 1980-81.

This budget proposes \$15.8 million to provide a cost of living adjustment for child care programs. Expansion funds for the child care program should be addressed in separate legislation which results in necessary changes to the existing child care program.

8. *Development Centers for Handicapped Pupils*

This program serves severely physically and/or mentally handicapped youth as part of community based respite support for parents. The funding level base for this program has been reduced by \$2.3 million to a budget year level of \$9.4 million to reflect a transfer in anticipated enrollments which will be funded through the Master Plan for Special Education. These centers will continue to be fully funded. Included in budget totals is a 9 percent increase in funding for a cost-of-living adjustment.

9. *Professional Development and Improvement Centers*

The Professional Development and Improvement Act of 1968 provides for the establishment of centers to offer comprehensive in-service training programs to classroom teachers in elementary schools having low pupil achievement. The funding level base for this program has been increased \$304,000 to a budget year total of \$961,306 to raise the funding level for each of the 16 existing centers from \$41,000 to \$60,000.

10. *Staff Development and Resource Centers*

In accordance with AB 551 (Chapter 966, Statutes of 1977), six Staff Development Resource Centers coordinate staff development activities for school personnel and also respond to staff development requests from schools participating in the School Improvement Program. The budget contains \$225,000 for three new resource centers to serve major population areas not presently receiving staff development services. Included in budget

totals is a 9 percent increase in funding for a cost-of-living adjustment.

The proposed budget also includes \$500,000 for continuance of Resource Center bilingual in-service training. The in-service training is to assist teachers currently on waivers to attain competency in bilingual education.

In addition to providing for the establishment of Staff Development Resource Centers, AB 551 permits local schools to develop school site staff development programs. The 1980–81 budget includes \$325,000 to add 75 schools to the 191 currently covered by the school site programs.

11. *Legislative Mandates*

Chapter 1135, Statutes of 1977 (SB 90), empowered the State Board of Control to accept and arbitrate mandated cost claims from local school districts complying with legislation passed since 1974, despite disclaimers exempting these costs from reimbursements. The 1980–81 Governor's Budget provides \$41.3 million to school districts for legislative mandates, including three chapters which were initially disclaimed—collective bargaining for school district employees (Chapter 961/75), jury duty for certificated employees (Chapter 593/75), and retirement credit for unused sick leave (Chapter 89/74).

12. *State Child Nutrition Program*

The Child Nutrition Program provides for State allocation of funds to school districts for reimbursement of costs for provision of nutritious school meals. The funding level has been increased \$7.4 million over the current year cost estimate, to a budget year level of \$42.1 million General Fund. This provides for: (1) fully funded 1980–81 basic subsidies, and (2) the statutory elimination of low-wealth school districts eligibility for needy subsidies due to assessed valuation increasing higher than anticipated as calculated by statutory formula.

13. *State Instructional Materials Program*

This program provides State aid to school districts and private school (kin-

dergarten and grades 1 through 8) pupils for the purpose and use of instructional materials. The 1980–81 budget of \$42.7 million represents an increase of \$4,333,672 over 1979–80, for an 11.3 percent cost-of-living adjustment to provide increased State aid for the purchase of instructional materials.

14. *Contributions to the State Teachers' Retirement Fund*

This program provides state financing of teacher retirement benefits which are not funded by employer and employee contributions and income from investments. Due to the rising costs of retirement benefits and the escalation of the unfunded liability in the teachers' retirement system, Chapter 282, Statutes of 1979 (AB 8), provides \$27.3 million in additional funds in 1980–81 with the intent of stabilizing the growth in unfunded retirement obligations. The State's direct contribution to STRS which totals \$171.6 million in 1980–81, will continue to increase in the future through annual adjustments based on the Consumer Price Index plus an additional annual increase of \$20 million per year through 1994–1995.

15. *School Facilities Aid*

The 1980–81 budget includes \$54.6 million for school building maintenance and construction. AB 8 appropriated for school facilities the amount of repayments on State School Building Aid loans (if any) in excess of the amount required to reimburse the General Fund for debt service.

In addition, AB 8 provides that revenues to local entities in excess of the expenditures allowable under Proposition 4 be made available for school construction by reducing subventions to local jurisdiction by one-half of that jurisdiction's excess sales tax and one-fourth of its excess property tax revenues.

## **HIGHER EDUCATION THE UNIVERSITY OF CALIFORNIA**

The University of California, consisting of eight general campuses and one health science campus, is the land grant State university. It has

constitutional status as a public trust and is administered by a board of regents.

It is charged, along with the California State University and Colleges, of offering the baccalaureate degree. In addition, the Donahoe Higher Education Act of 1960 (Master Plan) gives the University exclusive jurisdiction in public higher education over instruction in the professions of law, medicine, dentistry and veterinary medicine. The University has sole authority to award doctoral degrees in all disciplines. The Donahoe Act also designates the university as the primary State-supported academic agency for research.

#### *Current Accomplishments*

In the current year, the University is providing an education to 109,699 full-time equivalent students at the general campuses and to 12,405 FTE students budgeted in the health science disciplines. The general campus students represent an increase of 2,563 FTE over the level budgeted for the current year.

#### *Proposed Accomplishments*

The University is planning to provide education to 108,773 FTE students at the general campuses and to 12,716 FTE students in the health science disciplines in 1980-81.

To accomplish the mission of providing university level education, the 1980-81 budget will provide a total of \$959.7 million from the General Fund for the University of California. This represents a \$53.8 million (5.9 percent) increase above the 1979-80 level of support exclusive of any amount subsequently granted for salary increases. Included in this total, the budget provides an \$7.9 million General Fund increase to accommodate the increase in both general campus and health science disciplines. In addition, funds are proposed for an additional 92 FTE teaching assistants to strengthen undergraduate instruction. Instructional support for the general campuses is strengthened with the proposed addition of \$800,000 for instructional use of computers and \$2 million for replacement of instructional equipment. In addition, \$984,000 is included for the replacement of Federal capitation fund reductions expected to be approved by Congress which are used to support medical education activities and \$618,450 is proposed for 10 FTE faculty and support in preparation for

the enrollment of students in the Charles R. Drew/UCLA Undergraduate Medical Program.

A total increase of \$1.5 million is provided for the support of the University's research efforts in 1980-81. This will provide financing for a greater emphasis on energy research and will provide the necessary funding increases for ongoing research efforts in integrated pest management and in space sciences.

The budget provides a proposed increase of \$2.1 million in State General Funds for the Student Affirmative Action Program. This increase provides a program increase of \$200,000 and a funding shift of \$1,889,000, whereby the State assumes the financing of that portion of the program presently funded from student fees.

Included in the total is a proposal to increase funds for handicapped students by \$570,000 in the budget year. This increase will provide for additional students and will ensure the continuation of programs previously established for these students.

In addition to workload related to the addition of new space of \$609,600, the budget provides \$3,250,000 to finance improved service levels for building maintenance, janitorial services, and utilities operations. In addition, the budget provides \$5 million for deferred maintenance and special repairs from the Capital Outlay Fund for Public Higher Education.

Finally, an increase of \$360,000 is requested to support a personnel manpower training program designed to meet the special needs of California agricultural employers and workers in farm personnel management and \$300,000 is proposed to expand the California Writing project by establishing additional centers throughout the State in cooperation with other public educational institutions.

### **CALIFORNIA STATE UNIVERSITY AND COLLEGES**

Under the provisions of the Master Plan for Higher Education, the California State University and Colleges (CSUC) provide instruction in the liberal arts and sciences and in professions as well as applied fields requiring more than two years of collegiate effort. Also mandated is instruction in teacher education for undergraduate and graduate students. In addition, the doctoral degree may be awarded jointly with the Univer-

sity of California or private institutions, and faculty research is authorized. The CSUC 19 campus system is governed by a 23 member Board of Trustees which appoint the Chancellor.

#### *Current Accomplishments*

Currently, CSUC is budgeted at the enrollment level of 229,350 full-time equivalent (FTE) students. Additionally, Chapter 1176, Statutes of 1979 (AB 1173), provides CSUC a special one-year appropriation of \$2 million to lessen the negative impact of enrollment declines on instructional programs and also to lessen the negative impact on upward mobility and affirmative action. The 1979–80 budget provides funding for those disabled students attending CSUC.

In addition, the 1979–80 budget provides \$616,461 to finance special conservation projects directed to reducing CSUC's energy consumption.

#### *Proposed Accomplishments*

For 1980–81, the CSUC system anticipates enrolling 230,750 FTE. This represents an increase from the previous year budget enrollment of 1,400 FTE. The 1980–81 budget provides a total of \$852.6 million in General Fund support. This is an increase of \$31.1 million (3.8%) above the amount appropriated for the 1979–80 fiscal year exclusive of any amount subsequently granted for salary increases. The total of \$852.6 million includes an increase of \$2,403,796 necessitated by the rise in enrollments. In addition, the 1980–81 budget proposes an increase of \$3,597,072 which establishes a 17.7 to 1 student-faculty ratio at CSUC. This proposal moves the student-faculty ratio to the historic level of 17.8 to 1 adjusted by changes in student demand. The proposed budget also contains new or additional funds for New Program Development and Evaluation with special emphasis given to increasing the representation of women and minority students (\$224,746); special repair and maintenance projects on various CSUC campuses (\$2,964,448); implementation and evaluation of core student affirmative action programs on all CSUC campuses (\$1,050,000); disabled student services (\$573,810); and campus implementation of collective bargaining for CSUC as authorized under Chapter 744, Statutes of 1978 (\$300,000).

Also included in the 1980–81 budget is \$647,285 from the Energy and Resources Fund to continue a program which began in 1979–80 with General Funds to lower energy consumption rates through "quick-fix" and retrofit projects. An additional \$3,000,000 is proposed from the Capital Outlay Fund for Public Higher Education to fund additional special repairs and deferred maintenance projects over a two-year period.

### **BOARD OF GOVERNORS CALIFORNIA COMMUNITY COLLEGES**

The Board of Governors provides Statewide leadership to the 70 community college districts and 106 community colleges and serves as a planning, coordinating, reporting, advising and regulating agency. The Chancellor's Office is the administrative arm of the Board. It directly administers a credentialing program, the State-funded Extended Opportunity Programs and Services (EOPS), certain aspects of Federally funded occupational programs, a grant and loan program for community colleges engaged in projects of innovative and nontraditional methods of instruction, and State apportionments to the 70 local districts.

#### *Current Accomplishments*

State aid for community colleges during 1979–80 and 1980–81 is determined by AB 8 (Chapter 282, Statutes of 1979) formula calculations which supersede the procedures established by Chapter 292/78 (SB 154). AB 8 substantially revises the procedures for funding community colleges. The new revenue levels of districts are determined primarily by formulas based on prior year district revenues and prior and current year ADA. These baseline revenues are then increased by a variable cost-of-living adjustment averaging 8.6 percent in 1979–80 which will tend to equalize revenues among districts over time. Enrollment changes are funded at a marginal rate equal to two-thirds of the average statewide revenue per unit of average daily attendance. Special adjustments are also provided for small districts, small colleges in multicampus districts and large (urban) districts.

AB 8 appropriated \$976 million for the 1979–80 fiscal year.

### *Proposed Accomplishments*

Because Proposition 13 altered the previous ability of community college districts to raise local property tax revenues, additional State aid was necessary. In 1979-80 and 1980-81 additional state funding was provided by AB 8 (Chapter 282, Statutes of 1979). It is anticipated that State aid for 1981-82 and thereafter will be the subject of legislative action during the 1980 Session.

The 1980-81 Budget contains an \$86.8 million increase in funding for inflation and increased ADA per AB 8 for community college apportionments. The total apportionment of State aid to community colleges for the budget year is \$1,062,800,000 and will be available to support all community college programs.

The California Worksite Education and Training Act of 1979 was enacted by passage of SB 132 (Greene). For 1980-81, this program to reduce unemployment in California, will be extended through a cooperative effort between the Employment Development Department and the California Community Colleges utilizing currently budgeted funds.

One of the significant increases in this budget is for Extended Opportunity Programs and Services (local assistance) as part of the Governor's continuing commitment to serve disadvantaged community college students. The additional \$2,723,988 proposed for this program is a 13.3 percent increase over 79/80 and will serve about 3,500 additional students. Included in the additional funding is a 9 percent inflation adjustment for grants and services. This will increase the average financial grant from \$271 to \$294. The number of students served will reach 67,890 in 1980-81 and program costs will increase to \$23,196,080.

The 1980-81 proposed budget for the Board of Governors of the California Community Colleges is 8.97 percent above the 1979-80 level for State Operations and Local Assistance (not including reimbursements).

### **STUDENT AID COMMISSION**

The State of California provides financial assistance through its various programs to academically able students who desire to continue their education beyond high school but who, without financial assistance, would find it difficult or impossible to do so. The major portion

of this aid is provided through the Student Aid Commission by which the students' own resources can be complemented and supplemented thereby enabling attendance at both private and public institutions at both the undergraduate and graduate levels. The Commission's primary grant program is the Cal Grant Award program through which more than 60,000 undergraduate students are annually receiving assistance.

Pursuant to the 1978-79 Budget Act, a 13-member Student Financial Aid Policy Study Group is reviewing student financial aid policies and goals in the State of California. A report will be presented to the Legislature in early 1980, and the findings and recommendations of this group will presumably have a significant impact on the current State administered student financial aid programs. Table III reflects the current and anticipated normal growth of the Commission's student assistance programs under existing law.

### *Current Accomplishments*

In 1979-80, the Commission will administer approximately \$87.7 million in student financial assistance providing for 62,828 grants. In addition to the grant programs, this agency is administering the State Guaranteed Student Loan Program pursuant to Chapter 1201, Statutes of 1977. With the Commission serving as the State guarantee agency for federally reinsured student loans, a conservative estimate of \$100 million in new student loans will be available to students in the current year.

### *Proposed Accomplishments*

For 1980-81, approximately \$91.5 million will provide for 67,192 grants to students. This 4.4% funding increase over 1979-80 reflects an additional \$3.8 million for the Cal Grant Program awards to provide resources for (1) the statutory number of new Cal Grant awards; (2) an increased maximum Cal Grant award amount adjustment specified in Chapter 208, Statutes of 1979; and (3) increased educational costs. Continuation of the legislatively augmented 1979-80 award level for support of the Bilingual Teacher Development Grant Program is proposed. In addition, a conservative estimate of \$150 million in new student loan volume is projected for 1980-81.

**TABLE III  
SUMMARY OF STUDENT AID GRANTS**

	<i>1978-79</i>	<i>1979-80</i>	<i>1980-81</i>	<i>1981-82</i>	<i>1983-83</i>

### Education Capital Outlay

Deciding upon the proper amount and timing of capital expenditures for education is a complex and difficult task. Problems relating to construction, technology, and design are different for each project, but beyond that are the questions of the number and mix of students to be served and the most equitable methods of financing the facilities ultimately approved. The Capital Outlay Program for education continues to fund the highest priority needs for higher education. The 1980-81 Capital Outlay Program proposes utilization of resources from three funds: the Capital Outlay Fund for Public Higher Education (COFPE) (\$39,859,700); the Health Science Facilities Construction Program Bond Fund (\$1,295,000); and an additional \$2,564,000 for capital outlay programs is proposed to be forthcoming from the Energy and Resources Fund (ERF) to support new energy initiatives both in this budget and in the future.

The Capital Outlay Fund for Public Higher Education is funded from a portion of the State's tideland oil revenues. Revenues in the fund for 1980-81 are proposed to be expended for capital outlay needs for the University of California, General Campuses (\$14,282,000) and Health

Sciences (\$3,198,000); Hastings College of Law (\$776,000); the California State University and Colleges (\$10,019,500); and the California Community Colleges (\$11,584,200).

The Health Sciences Facilities Construction Program Bond Fund receives its income from the sale of general obligation bonds and is used exclusively to finance Health Science capital outlay projects for the University of California. The expenditures proposed for this budget will substantially exhaust the bonds authorized by the electorate in 1972.

The proposed expenditure from the Energy and Resources Fund (ERF) is to provide a greater emphasis to be directed towards the development of energy related programs. Legislation will be introduced to establish this fund and will reallocate the receipts from the sale of the State tidelands oil, after all fixed obligations are met, equally to the Capital Outlay Fund for Public Higher Education, the Energy and Resources Fund, and the General Fund. For a more detailed explanation refer to the special presentation on the Tidelands Oil Income, on page A-15.

Table IV illustrates the relationship between fund sources and the proposed use of those funds by the education segments.

**TABLE IV**  
**TOTAL EXPENDITURES FOR MAJOR AND MINOR CAPITAL OUTLAY IMPROVEMENTS**

## **UNIVERSITY OF CALIFORNIA**

The University has two major capital outlay budgets: one pertains to the eight General Campuses and the other to campuses which have Health Sciences programs.

### *Current Accomplishments*

The 1979-80 budget reflects the planning and construction of projects using the funds made available by the Health Sciences Facilities Construction Program Bond Fund. These funds are used exclusively to finance health sciences capital outlay projects for the University of California. Capital Outlay Funds for Public Higher Education (COFPHE) funds were also made available for the highest priorities of the University: the construction of the seismically deficient patient care facility at the Sacramento Medical Center; planning and construction funds for Schoenberg Hall at the Los Angeles campus; and general and advance planning funds for the Drew/UCLA undergraduate medical education program facility.

### *Proposed Accomplishments*

Funding for 1980-81 encompasses the highest priorities of the University of California. Projects consists of the correction to life and safety, minor capital outlay improvements and planning funds for the Northern and Southern Regional Library Compact Shelving Facilities. In addition, construction funds have been provided for the Drew/UCLA undergraduate medical education program facility and planning funds pertaining to the development of studies to determine the effect of the State Seismic policy upon all University facilities.

## **HASTINGS COLLEGE OF LAW**

Hastings College of Law provides students with an education to prepare them to become experts in the field of law.

### *Current Accomplishments*

The 1979-80 budget provided the necessary planning funds to provide alterations and renovation of the existing facility to meet the academic program and equipment funds to make the new academic facilities building operable.

### *Proposed Accomplishments*

Funding for 1980-81 will complete the renovation of the existing facility to meet the academic program and the necessary code deficiencies as required by current law.

## **THE CALIFORNIA STATE UNIVERSITY AND COLLEGES**

The State University and Colleges consists of 19 campuses.

### *Current Accomplishments*

The 1979-80 Capital Outlay Program was designed to continue the elimination of architectural barriers to the handicapped, other code deficiencies, minor capital outlay improvements, funds for the construction of a music building at Long Beach State University, a new science building and the fire damage repair to the forestry building at Humboldt State University.

### *Proposed Accomplishments*

Funding for 1980-81 will meet a number of high priority projects, including continuation of the elimination of architectural barriers to the handicapped, other code deficiencies, minor capital outlay improvements, equipment funds to make operable the Robert E. Kennedy Library at Polytechnic State University, San Luis Obispo, and construction funds for the conversion of the old library building at San Diego State University.

## **CALIFORNIA COMMUNITY COLLEGES**

The Community Colleges are designed to prepare the student after high school with a two-year degree program and offers vocational training.

### *Current Accomplishments*

The 1979-80 Capital Outlay Program included only those projects for the completion of life and general safety, removal of architectural barriers to the handicapped for State-supported facilities (using the remaining funds made available by previous bond issues, which are now exhausted), meet the most critical needs for instructional capacity space and provided additional funds to construct the applied arts,

administration, and maintenance complex at the Contra Costa Community College.

*Proposed Accomplishments*

The 1980-81 budget is designed to continue the removal of architectural barriers to the handicapped for State-supported facilities and to meet the highest priority needs statewide for instructional capacity space. In addition, 1980-81 marks a new era for funding facilities at the 106

campuses statewide. The passage of Proposition 13 virtually eliminated the ability of college districts to provide their traditional matching share of a project as required by existing law. In recognition of this inability, this budget proposes to fund 16 projects in seven districts which represents the most critical needs statewide at a level greater than the level allowed by current law. Funding of these projects is contingent upon legislation to amend the Community College Construction Act of 1967.

# *Youth and Adult Correctional Agency*

*(Changes and Accomplishments)*

Effective December 20, 1979, the Governor approved Reorganization Plan No. 3 of 1979, creating the Youth and Adult Correctional Agency, in response to Chapter 1252, Statutes of 1977. Consistent with the Plan, when it goes into effect, the organizational units referred to in the plan will no longer report in the Health and Welfare Agency.

The new Agency will provide communication, coordination, and budget and policy direction for the Departments of Corrections and the Youth Authority and the Board of Prison Terms, Youthful Offender Parole Board, Institutional Review Board, Board of Corrections, Correctional Industries Commission, and the Narcotic Addict Evaluation Authority. The Agency Secretary will become the chairperson of the Board of Corrections.

## **Department of Corrections**

The principal programs of the Department of Corrections are the control, care and treatment of persons who have been convicted of serious crimes, or those admitted to the civil narcotic program, and committed to state correctional facilities. The Department's objectives also include supervision of individuals who have been paroled from correctional facilities and returned to the community.

### *Current Accomplishments*

The Department of Corrections is required by statute to accept convicted felons and commit-

ted nonfelon narcotic addicts from California courts when their sentence is imprisonment in a State correctional facility. It is the Department's responsibility to provide safe and secure detention facilities to protect society from further criminal activities and to provide necessary services such as feeding, clothing, medical care, and treatment programs including academic and vocational education, and psychiatric and counseling services. In carrying out this responsibility, the Department operates 12 correctional institutions and three reception centers. In addition, the Department operates a Community Services Program. The primary objective of this program, consistent with the public's safety, is to increase the rate and degree of successful transitions of adult offenders who have been, or who are in the process of being, released to the jurisdiction of the Parole and Community Services Division.

The Parole and Community Services Program currently operates through four parole regions.

### *Proposed Accomplishments*

Current projections for the Department of Corrections forecast a continued increase in the average daily institution population from 23,760 in the current year to 25,040 in the budget year or an increase of 1,280. The Department's proposed budget provides 243.8 new positions and \$14,850,223 for the necessary support services for this increased population.

The average daily caseload for the Parole and Community Services Program is estimated at

16,977 during the budget year, which represents an increase of 860 from the current year. This increase will require 55 positions and \$997,663 above the 1979–80 budgeted level.

Total expenditures in 1980–81 for departmental institutions and camps, federal and local government facilities, and community facilities will include \$364.7 million and 8,661.8 positions.

The Department of Corrections will experience continued population growth during the 1980's. In order adequately and safely to house this increased population, the Department's Capital Outlay Program for fiscal year 1980–81 includes a \$20,000,000 appropriation for the expansion and rehabilitation of existing facilities and \$100,000,000 for the next phase of planning, construction and equipping of new facilities. The Department's 1980–81 construction program also contains \$7,899,203 to cover a number of priority projects including security renovation projects at San Quentin State Prison and Deuel Vocational Institution, Tracy.

#### **Board of Prison Terms**

The Board of Prison Terms (formerly known as the Community Release Board) considers parole release and establishes the length and conditions of parole for all persons sentenced to prison under the Indeterminate Sentence Law and reviews the sentences of all determinately sentenced (DSL) prisoners. The Board may recommend to the court that the sentence be reviewed and the prisoner resentenced. The Board also may suspend or revoke the parole of any prisoner who has violated parole. The Board may waive parole for any prisoner and may discharge any prisoner prior to the expiration of the statutory maximum parole period. Upon request of persons determinately sentenced, the Board reviews the length and conditions of parole imposed by the Department of Corrections and the Department's denial of good time credit, and may modify the Department's decision. The Board also advises the Governor on applications for clemency.

#### **Department of Youth Authority**

The primary objective of the Youth Authority as stated in Section 1700 of the Welfare and Institutions Code is "to protect society more effectively by substituting for retributive punishment, methods of training and treatment directed toward the correction and rehabilitation of

young persons found guilty of public offenses." The Department carries out this mandate to protect the public by: (1) providing residential and community rehabilitation programs which will help persons committed to the Youth Authority to become useful and productive citizens, and (2) accumulating a body of knowledge relative to the causes of delinquency and the treatment and control of those who engage in illegal behavior.

#### ***Current Accomplishments***

The Youth Authority's programs for offenders are carried out in ten institutions and six conservation camps. The Institution and Camp Program will provide appropriate care, custody and treatment for 5,106 wards (Average Daily Population) in Fiscal Year 1979–80. In addition, the Department provides post-release services to wards through thirty parole field offices in four parole zones. The average parole population for Fiscal Year 1979–80 is estimated to be 6,315.

#### ***Proposed Accomplishments***

The Department of the Youth Authority's average daily institutional population is estimated to be 5,176 for the 1980–81 budget year. This represents a projected increase of 70 persons over current year. The proposed budget provides 11.4 positions and \$268,500 for security and program staff related to this population increase. Average parole caseload is expected to be 6,314 in 1980–81. To carry out its operations, the budget includes \$204.3 million and 4,324.3 positions.

#### **Youth Offender Parole Board**

Chapter 860, Statutes of 1979 separated the Youth Authority Board from the Department of Youth Authority and renamed the Board to the Youthful Offender Parole Board. The separation from the Department of the Youth Authority was effective January 1, 1980.

The Youthful Offender Parole Board makes decisions as to persons committed to the Department of the Youth Authority. These decisions involve setting a date for the person's next appearance before the Board; the person's readiness for return to the community on parole; conditions relating to the persons conduct on parole; violation and revocation of parole; return to the committing court for redispotion by the court; and discharge of the person from jurisdiction of the Youth Authority.

The programs within this area include general government departments such as, but not limited to Food and Agriculture, Industrial Relations, Public Utilities Commission and Office of Criminal Justice Planning.

#### **DEPARTMENT OF FOOD AND AGRICULTURE**

The Department of Food and Agriculture is responsible for promoting and protecting California agriculture in the interests of public health, safety and welfare.

##### *Proposed Accomplishments*

Chapter 308, Statutes of 1978, mandates the Department of Food and Agriculture to prepare a Pesticide Regulatory Program to act as a functional equivalent to a master environmental impact report for pesticide use in California. During the current year only the registration phase of the program will be undertaken within existing resources. The 1980-81 budget proposes \$8.7 million (\$6 million General Fund and \$2.7 million special fund) for county and State full year implementation of this program.

In addition, the Department of Food and Agriculture is proposing six positions to continue efforts in 1980-81 to eradicate hydrilla from Lake Murray and the All-American Canal (\$582,383). The Direct Marketing Program with two positions (\$148,088) is also proposed to alleviate inner city food shortages which are believed to exist due to withdrawal of food stores from troubled communities.

## ***General Government***

### ***(Changes and Accomplishments)***

#### **DEPARTMENT OF INDUSTRIAL RELATIONS**

The objective of the Department of Industrial Relations is to foster, promote and develop the welfare of California's wage earners, to improve their working conditions and to advance their opportunities for profitable employment.

##### *Current Accomplishments*

During the current year the Department of Industrial Relations will fully implement both the Hazard Alert System and the Occupational Health Centers. The Hazard Alert System (HALTS) is a repository of current data on toxic materials and harmful agents in use or potentially in use in workplaces throughout the State. Support for this system is budgeted at \$1,082,994 in the current year and \$1,147,564 in the budget year with 50 percent of the support to come from the Federal Government as part of the OSHA grant.

The Occupational Health Centers are a joint activity of the University of California and the Department of Industrial Relations to provide within the University a coordinated, interdisciplinary focus on the health of the worker and the environmental quality of the workplace. Support for the Occupational Health Centers is budgeted at \$2,195,251 in the current year and \$2,322,478 in the budget year.

##### *Reorganization*

The Governor's Reorganization Plan No. 1 abolishes the Division of Fair Employment Practices within the Department of Industrial

Relations and creates the Department of Fair Employment and Housing within the State and Consumer Services Agency, and the Fair Employment and Housing Commission within the Department. The Governor's Budget reflects the reorganization in both the current and budget year.

#### *Proposed Accomplishments*

In the budget year nineteen positions are proposed to permit the Department to more actively pursue and eradicate problems associated with toxic substances in the workplace. These positions will permit the Department to analyze health data for the worker environment, initiate health inspections of work facilities and establish a 24-hour "hotline" for information necessary to deal with toxic spills. Total cost of the positions will be \$716,487 of which \$314,926 will come from the Federal Government.

To offset workload increases in the Rehabilitation program, 19 positions are proposed. The Department will be seeking legislation to change funding for this program from General Fund to reimbursements. In anticipation of this legislation, the budget reflects funding for the 19 additional positions to be from reimbursements (\$367,619). Funding for the existing program will remain General Fund in the budget to facilitate continuation of this program should the legislation not be enacted before the budget.

### **PUBLIC UTILITIES COMMISSION**

The Public Utilities Commission has been given general authority to regulate the activities of California's utilities including: energy utilities; communications utilities; water utilities; and transportation utilities. The Commission is able to effect its policies through approval/disapproval of operating authorities and rate structures for the utilities. Decisions of the Commission are appealable only to the California Supreme Court unless a provision of Federal Law is at issue.

#### *Proposed Accomplishments*

In recent years the growing demand for energy coupled with declining sources of new energy have demanded that the Commission increase its involvement in the formulation and implementation of energy policy and resource conservation. To permit the Commission to provide the

leadership necessary for this critical field the Commission's appropriation from the State Energy Conservation and Development Account in the General Fund will be increased by \$1,724,727 in the budget year. This augmentation provides \$750,000 to permit the Commission to engage consultants when specialized skills are needed and \$974,727 to support 27 positions for a variety of conservation/policy projects.

Pursuant to Chapter 1195, Statutes of 1979, the Commission must develop a transportation energy efficiency plan for California's highway carriers. In the budget year, fifteen positions are proposed to enforce the transportation energy efficiency plan and ensure that every rule, order and decision of the Commission is compatible with the provisions of such plan. Support for these fifteen positions is budgeted from the Transportation Rate Fund (\$376,036) and the proposed Energy and Resources Fund (\$125,346) for which legislation is being sought.

### **OFFICE OF CRIMINAL JUSTICE PLANNING**

The Office of Criminal Justice Planning provides staff support to the California Council on Criminal Justice; coordinates planning efforts by private, State and local agencies in the criminal justice system; and administers federally-funded grants to those agencies in accordance with the plans developed under Federal and State guidelines.

#### *Proposed Accomplishments*

A major General Fund local assistance program, the Career Criminal Prosecution Program, will be continued with an increased level of funding but with a ten percent match requirement from grant recipients. This program has been highly effective in aiding District Attorneys in their prosecution efforts.

As a result of new legislation (SB 383, 1979 Legislative Session), a new program of local assistance will begin distributing \$3 million from the Indemnity Fund to local centers providing assistance to victims and witnesses of crimes.

### **CALIFORNIA FISCAL INFORMATION SYSTEM (CFIS)**

In the 1978-79 fiscal year, the Department of Finance implemented the development of the California Fiscal Information System in order to meet the State's high-level fiscal information needs.

Subsequently, the Legislature enacted Assembly Bill 3322 (Chapter 1284, Statutes of 1978) to require changes in the State's budgeting and accounting systems, and the establishment of an on-line fiscal information system. The CFIS Task Force was formed within the Department to develop CFIS and to implement the other requirements of AB 3322. The California Fiscal Advisory Board (CFAB), established pursuant to AB 3322, has been designated as the CFIS Advisory Committee. CFAB is responsible for monitoring and advising the legislative and executive branches on the implementation of AB 3322. As advisor to CFIS, CFAB will review such policy issues as the selection of CFIS software vendors, the level and extent of detail of CFIS information, placement of CFIS terminals, and access to CFIS data, etc.

The California Fiscal Advisory Board consists of the Chairmen of the Senate Finance and Assembly Ways and Means Committees, the Chairman of the Joint Legislative Budget Committee, the Chairman of the Joint Legislative Audit Committee, the State Treasurer, the State Controller, and the Director of Finance, who is the chairperson of the Board. In addition to its advisory and policy review role for CFIS, the board is responsible for the review of the basis of the State's accounting. The board shall also recommend any further legislation that may be necessary to achieve the objectives expressed in AB 3322.

CFIS will make available to Legislative and Executive Branch decision-makers a computerized on-line system providing information on the State's revenues, expenditures and performance measures. CFIS will provide information in graphic and tabular form, and will provide the means to simulate expenditures, forecast revenues and compare program activities.

#### *Current Accomplishments*

The development of CFIS and related changes in the State's budgeting and accounting systems are planned over several years, with specific accomplishments planned each year. The computer software for CFIS has now been acquired, and is being installed at the Teale Data Center. Data base files are being established which will provide interim data from the first eight departments as well as other selected information useful to decision-makers.

Interim CFIS will provide information on:

- Eight department's revenues, expenditures, and performance measures (CSUC, CALTRANS, EDD, Education, Health Services, Motor Vehicles, Social Services and Water Resources).
- General Fund cash flow receipts and disbursements from July 1974 to present.
- Budgeted and actual expenditures for Local Government Fiscal Relief, Property Tax Relief, Shared Revenues, and State-Mandated Local Programs.
- Federal authorizations, receipts, disbursements, and authorizations yet to be received.
- Legislation in process, including author, subject by CFIS Statewide Program Structure, description, and applicable revenue and cost estimates by the Department of Finance and the Legislative Analyst's Office.
- Budget administration for the current fiscal year, including appropriations, augmentations and revised plans.
- Governor's Budget and Budget Bill, including changes made by each House and the Conference Committee in program and line item detail.
- Historical data, including five years of actual revenues, expenditures, and personnel-year data for all departments and most funds. Selected summary data will be available for longer time periods.
- Economic data, including selected U.S. and California time series.
- Revenue models and data for revenue forecasting.
- Positions, including authorized positions and personnel-year equivalents, and actual usage.

Twenty-four video-graphics terminals have now been installed and training sessions are being conducted for Interim CFIS users (staff from Finance, State Controller, State Treasurer, the eight departments, and the Legislature).

The Program Evaluation Unit, Department of Finance, has identified and started the collection of performance measures for the first eight departments to be in CFIS, and work has been started to identify measures for the programs of 35 additional departments. A Statewide Program Structure has been devised which will re-

late departmental program data by statewide programs based on common objectives.

A "Request for Proposal" has been issued to solicit proposals to satisfy the needs for the Standard and Institution Accounting Systems. Vendor selection is anticipated in March 1980. Changes required in the State Controller's Fiscal System have been defined and a contract awarded to implement these changes.

#### *Proposed Accomplishments*

In the budget year, the Standard and Institution Accounting Systems will be developed and implementation started for 12 departments and selected institutions. Modifications to the accounting systems of the eight departments will be undertaken to meet final CFIS design requirements. Development of the State Controller's Fiscal System will be continued in the budget year, and modifications to the State's Payroll System will be undertaken to conform to the new common codes. The State Treasurer's systems will be modified in the budget year to accommodate the same standard coding scheme as other State systems.

Part of the California Fiscal Information System implementation includes changes to the format of the Governor's Budget and the Budget Bill beginning in 1981-82. These changes are the first format revision of the Governor's Budget and the Budget Bill to occur in many years, and the first ever to specifically address the compatibility of the Governor's Budget and Budget Bill. Changes currently under consideration will be finalized and implemented during the budget year.

Funding is proposed to establish four positions in the Program Evaluation Unit, Department of Finance, for the refinement, maintenance and utilization of performance data previously identified for collection from the eight departments. Existing Finance staff will continue to identify and collect performance measures for 35 departments.

#### **TAX RELIEF**

Tax relief expenditures total approximately \$1.3 billion in the budget year. The following is a discussion of tax relief programs that were substantially changed during 1979.

#### **Personal Property Tax Relief .....\$466,725,000**

Chapter 1150, Statutes of 1979, totally exempted business inventories and livestock from the property tax and changed the method for reimbursement to local government beginning in the budget year. Reimbursements will be based on 1979-80 reimbursements increased by the change in the California Consumer Price Index and population. This will increase budget year costs by \$175 million.

#### **Renters' Tax Relief.....\$418,000,000**

Chapter 1207 (AB 1151) increased the renters' credit from \$37 per year to \$137 for married couples, heads of household, and surviving spouses. For single individuals, the credit is increased to \$60 per year. This will return an additional \$228 million to renters during 1979-80 and \$248 million will be returned during 1980-81.

#### **SHARED REVENUES**

The primary objective of the Shared Revenue program is to provide an efficient method for collecting a portion of the necessary revenues to fund local services. During 1980-81 about \$1.3 billion will be collected by the State and distributed to local government.

The following are the significant changes to this program during 1979.

#### **Financial Aid to Local Agencies....\$63,000,000**

Chapter 1150, Statutes of 1979, provided that the revenue attributable to the tax rate imposed on banks and financial corporations in excess of the general tax rate on corporations is deposited in the Financial Aid to Local Agencies Fund. Allocations from this fund are made to cities and counties based on population and AFDC caseload. This tax was previously a General Fund revenue source. Appropriations are estimated to be \$29 million in the current year and \$63 million in the budget year.

# *State-Mandated Local Programs*

## *(Changes and Accomplishments)*

### **History**

An early effort to limit rapidly increasing property taxes was the enactment of Chapter 1406, Statutes of 1972 (SB 90). That legislation established maximum property tax rates, which was intended to limit the amounts collected by local government and, at the same time, required the State to reimburse local government for the costs of any state-mandated programs. Initially, such reimbursement was limited to the costs of legislative acts enacted after January 1, 1973. However, cities, counties and special districts were also entitled to reimbursement of costs resulting from the issuance of executive regulations after that date; school districts were specifically excluded from that entitlement.

As the Legislature considered bills during the 1973-74 Session, it began to provide interpretations of which types of state actions constituted state mandated programs whose costs were to be reimbursed by the State. It did this by including policy statements in certain legislation indicating that such legislation did not qualify for reimbursement of its costs because it was outside the scope of the programs which the legislation previously committed the state to reimbursing. In addition, the Legislature also occasionally included language in bills stating that while a bill's costs were technically reimbursable, the bill would be exempted from the reimbursement requirements of SB 90.

In the years since 1972, a number of modifications to the original SB 90 have been enacted. These modifications have generally served to broaden the scope of activities which qualify for state reimbursement and to simplify the processes for obtaining that reimbursement. For example, school districts have been made eligible for reimbursement of costs incurred as the result of the issuance of executive regulations after January 1, 1978. The State Board of Control has been empowered to accept and arbitrate claims from local governments based on executive regu-

lations. That authority has been expanded to include claims based on actions of the Legislature.

### **Operations**

Since the institution of the reimbursement program in 1973 many bills have been enacted which have provided funds for local governmental entities for costs incurred because of state mandates. For these programs, the State Controller is responsible for developing parameters and guidelines for payment of claims against the specific Statutes. In the event that there are insufficient funds to pay all of the claims, additional funds are requested from the Legislature through an omnibus claims bill. The Department of Finance makes available to the Controller copies of the mandate cost estimates prepared by the Local Mandate Unit to insure that his office will have the benefit of as much information as possible relating to mandate policy and cost as considered by the Legislature.

After the passage of original SB 90 legislation, the Legislature developed a series of disclaimers to limit the State's liability for costs incurred by local governmental entities in complying with mandates. The disclaimers, as originally utilized, were to declare legislative intent that for a specified reason the State was not electing to reimburse a particular legislative enactment or program. These specified reasons, or disclaimers, became formalized as follows:

1. Court mandates
2. Federal mandates
3. Initiative enactment
4. Local requests
5. No new duties
6. Subsequent executive orders
7. Nonreimbursable revenue loss
8. Technical change
9. General legislative
10. No additional cost
11. Crimes and infractions

12. Cost-savings
13. Normal operating procedures
14. Self-financing authority
15. Minor cost
16. No first-year cost

However, the enactment of Chapter 1135, Statutes of 1977, significantly reduced the effectiveness of these disclaimers and now the Board of Control can accept virtually all claims regardless of whether there is a legislatively approved disclaimer. This law change has the net effect of denying the Legislature an opportunity to evaluate the fiscal and/or mandate aspects of a bill and make a determination of whether the State or Local Government should most appropriately pay for a particular piece of legislation.

Once the Board of Control has determined that a chaptered bill contains a state mandate, unless the legislation contains specific instructions or describes precisely what the bill expects of local government, the Board of Control, by law, is required to conduct public hearings and adopt parameters and guidelines. The purpose of the parameters and guidelines is to enable both the Controller and the claimants to utilize common criteria for evaluating cost elements in the claims/payment process. Comments for the hearing are solicited from the claimants, Department of Finance, other interested or affected entities and the Board staff.

Section 6 of Proposition 4 (the Gann Initiative) which was approved by the voters at the November 7, 1979 election reads as follows:

"Sec. 6. Whenever the Legislature or any State agency mandates a new program or higher level of service on any local government, the State shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service, except that the Legislature may, but need not, provide such subvention of funds for the following mandates:

- (a) Legislative mandates requested by the local agency affected;
- (b) Legislation defining a new crime or changing an existing definition of a crime; or
- (c) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing Legislation enacted prior to January 1, 1975."

The effect of this constitutional amendment is to elevate this program of reimbursing state-

mandated costs to a constitutional, rather than statutory requirement. It should be noted, however, that the Initiative is silent on the issue of reimbursing property, sales and use tax losses which result from state legislation.

### ***Problems and Issues***

From the standpoint of local government, there is a continuing concern about the Board of Control and legislative action on mandated costs claimed through the Board of Control process. That is, a statute may impose a requirement on local government without the fiscal resources (appropriation) to reimburse them to implement the requirement. Without those resources local government must utilize the claims process and hope that the Board of Control will declare that the statute mandates a duty and agrees, further, that costs have been incurred and are reimbursable by the State. The second hurdle in this process arises when the Board of Control sponsored claims bill is considered by the Legislature. There is no guarantee the claims will be approved.

Another concern of local government is the time elapsed between the point when costs are incurred and a warrant is received from the State. This time-frame may be as long as one and one-half years from the date of implementation to the receipt of the reimbursement.

Further, local government is also interested in the degree of detail and personnel time involved in the claims preparation, presentation and follow-up activities in the Board of Control process.

The State generally agrees with the problems identified by local government and, in addition, has recognized several other problems in connection with the administration of this program. These are:

- (1) The State is without the authority to recoup or offset savings or program reductions mandated on local government. For example, recent legislation transferred the mailing of election materials to voters from local government to the Secretary of State. This shift created a savings to local government of approximately \$1.3 million. There is no way, under the SB 90 law, to reflect this windfall savings to local government as an offset against the State's costs. In addition, Chapter 491/79 which allows local government to exempt certain employee com-

pensation from social security computations could save local government over \$30 million annually.

(2) There appears to be a lack of a defined process for evaluating the need to continue previously mandated activities, i.e., the absence of a "sunset provision" in mandated legislation.

(3) Still another problem is legislation which, during its passage through the Legislature, is alleged to contain no mandate, to have no cost, to have offsetting cost/savings or otherwise to have no fiscal impact on local government, yet later the Board of Control determines the legislation contains a mandate and, perhaps, costs as well. Four recent awards by that Board based on Chapters 89 and 1398/74 (retirement credit for unused sick leave of school district employees), Chapter 593/75 (jury duty for teachers) and Chapter 961/75 (collective bargaining in schools) are estimated to have an annual ongoing cost of approximately \$29 million.

### ***Program Growth***

While there are a number of other problems which should be resolved in order to improve this program, of primary concern is the significant growth of this program since its inception and implementation in 1973. As depicted in the following chart, state expenditures have grown from \$2.9 million in 1973-74 to \$106.2 million (exclusive of \$64.2 in non-recurring expenditures) in 1980-81.

The rate of increase in this program will be governed by future legislation and by the way in which the Legislature views the relationship between state and local government with respect to that legislation. One of the objectives of this presentation is to afford the Legislature an opportunity to be fully aware of the cumulative effect of mandate legislation on the fiscal resources of the State and Local Government. Further, this display will serve to point out the need for remedial legislation to correct some of these problems.

### ***State Mandated Local Programs Expenditures***

### ***State Mandated Local Programs—1980-81 Governor's Budget***

The State-Mandated Local Programs budget was presented separately for the first time in the 1979-80 Governor's Budget as a means of identifying, on a cumulative basis, those mandated programs for which state funding is provided. The budget is presented in two elements: first, those mandated programs which are reflected within the budgets of state agencies with administrative responsibility for the affected programs; and, second, those mandated programs which do not fall within the jurisdiction of any state agency or which involve unique funding issues and/or problem areas.

# *State Construction Programs*

## *(Changes and Accomplishments)*

Capital outlay construction is divided into several programs of which the most encompassing is the State Building Program. This program includes proposed capital outlay requirements for publicly supported higher education, mental health, developmental services, corrections, and general office space. It also provides for meeting the requirements of several Departments, including Forestry, Fish and Game, Motor Vehicles, California Highway Patrol, State Highway Program, and the Department of General Services.

The sources from which the capital outlay program is funded are:

1. Current revenues and any accumulated balances in governmental cost funds including moneys collected in the form of taxes, license and permit fees, interest on investment, and similar items of income.
2. Proceeds from the sale of general obligation bonds secured by the "full faith and credit" of the State. Outstanding bonds of this kind include (a) State Construction Program bonds, and (b) State Beach, Park, Recreational, and Historical Facilities bonds. The repayment of principal and interest on such indebtedness constitutes a preferred claim on the financial resources of the State. Within this classification falls a special category referred to as "self-liquidating" bonds. Bonds in this category are the California Water Resources Development bonds. In the case of this special grouping, such bonds although legally possessed by the characteristics of general obligation bonds are serviced from the revenues produced by the ventures or projects financed in this manner.
3. Revenue bonds that are secured solely by the income derived from the use of operation of the facilities thus funded.
4. Trust certificates representing a form of capital financing which makes use of the large balances accumulated in trust accounts or funds of the State. Because such

funds are dedicated to meet future obligations, sound fiscal management dictates the investment of the currently unneeded cash in these accounts and funds. One way of investing these moneys is to purchase trust certificates issued by the State for the construction of general purpose office buildings.

5. Funding for all education capital outlay is from three sources: (1) the Capital Outlay Fund for Public Higher Education; (2) proceeds from the sale of Health Science Facilities Construction Program Bonds; and (3) a newly proposed Energy and Resources Fund. All expenditures from these funds will be appropriated through the annual Budget Bill.

To provide a complete and comprehensive picture of the State's capital outlay program, all proposed projects are included in the capital outlay budget regardless of the source of financing.

Following the generally accepted principles of governmental accounting, however, only expenditures from governmental cost funds are included in the budget totals. Governmental cost fund along with selected bond fund expenditures are included in the overall expenditure totals. Expenditures from bond proceeds and other forms of borrowing are reported as expenditures of the fiscal years in which the payments on principal and interest are made.

*The Department of Food and Agriculture's 1980-81 capital outlay program* provides \$565,200 for construction of a new inspection station at Long Valley, \$80,305 for the remodelling of facilities related to the Pesticide Regulatory Program, an additional \$76,835 of construction funds for the Phase I Truckee Inspection Station project, and planning funds in the amount of \$61,721 for Phase II of the Truckee project.

*The Wildlife Conservation Program*, as administered by the Department of Fish and Game and the Wildlife Conservation Board, provides for the protection, propagation, and management of the State's fish and wildlife resources.

The State, Urban, and Coastal Park Bond Act as approved by the voters in November 1976, makes \$15,000,000 available to the Wildlife Conservation Board for acquisition and general development. In 1980-81 these funds will continue to be allocated for this expanded program. In addition, the *Department of Fish and Game's capital outlay budget* includes \$5,807,320 which is principally for modernization and expansion of fish hatcheries and the restoration and development of wetlands.

*The Department of Parks and Recreation's Acquisition and Development Program* reflects the continuing effort to meet California's recreational needs. The 1980-81 budget for this program includes \$6.7 million for acquisition of new lands for the State Park System. These projects will be funded from the State Park and Recreation Fund and the State Urban and Coastal Park Bond Fund.

The 1980-81 budget for facilities development includes \$15.5 million in major and minor capital outlay projects. These funds will create or improve the facilities in 19 park units.

*The Division of Exposition and State Fair's Construction Program* includes \$525,000 for various minor capital outlay improvements and \$330,000 to complete the interior of Buildings A and B in order to improve their year-round usability.

*The Department of General Services 1980-81 Capital Outlay Program* proposes total expenditures of over \$48.9 million of which \$37.2 million is for the continuation of new State building projects for which funds were reserved. Specifically, construction funds are budgeted for Site 1-C in Sacramento and for the Van Nuys office building and parking garage. Funds for working drawings are proposed for the San Francisco and Oakland buildings.

Given the current fiscal situation and the limited reserve for capital outlay, the Administration is reevaluating the original State Office Building Program prior to the commitment of additional funds. Additionally, the Administration is reviewing the alternative of proceeding with other projects in the State Building Program using a lease-with-option-to-purchase plan.

The budget also provides \$9.6 million to correct fire and life safety code deficiencies in State-owned high-rise buildings. Also included are

new funds, \$1 million, for small energy retrofit projects in various State buildings. The Administration believes these projects to be cost beneficial in terms of cost avoidance for energy costs and the conservation of scarce resources.

*The Department of Motor Vehicles proposed capital outlay budget* includes \$7.1 million for the construction of new office buildings at Compton, Los Angeles (Southern Headquarters), Vallejo, Concord, and Victorville. In addition, \$2.6 million is proposed for site acquisition and working drawings for office buildings at Mission Viejo and San Jose.

*The Department of the California Highway Patrol Capital Outlay budget* includes \$1.1 million for minor capital outlay improvements and \$1.5 million for the construction of new area offices at Hollister-Gilroy and Santa Barbara; \$2.3 million for the purchase of leased facilities at Sacramento, Buellton, Contra Costa, Hayward, and Santa Ana; and \$1.2 million for site acquisition and working drawings at Arrowhead, San Andreas, Trinity River, Lakeport, and Dublin.

*The Department of Corrections* is experiencing continued population growth. In order to adequately and safely house this increased population, the Department's Capital Outlay Program for Fiscal Year 1980-81 includes a \$20,000,000 appropriation for the expansion and rehabilitation of existing facilities and \$100,000,000 for the next phase of planning, construction, and equipping of new facilities. The Department's 1980-81 construction program also contains \$7,899,203 to cover a number of priority projects including security renovation projects at San Quentin State Prison and Deuel Vocational Institution, Tracy.

*The Department of Developmental Services' capital outlay program* of \$119,911,745 for the current year and \$70,358,183 in the budget year proposes \$114,359,067 and \$57,051,573 respectively for fire and life safety and environmental improvements in the nine State hospitals. These amounts represent the 1979-80 and 1980-81 increments necessary to assure all clients in State hospitals operated by the Department of Developmental Services reside in code conforming buildings by July 1982. Federal certification has been granted based upon the Department's commitment to meet the deadline for the projected July 1982 population of 7,620 clients.

The 1980-81 budget also includes \$18,641,853 for capital outlay for two State hospitals operated by the Department of Mental Health. These funds will continue the program of Fire and Life Safety improvements and will include \$4,145,000 of projects related to the more efficient use of energy. Details of the Administration's commitment of resources to energy projects are given in the Energy Conservation/

Alternatives and Resources Management page A13.

*The Department of the Youth Authority's Capital Outlay Program* of \$1,992,525 for the 1980-81 fiscal year covers a number of priority projects, including \$1,514,825 for the replacement of the security sound system at various Youth Authority Institutions.

# *Tax Expenditures*

Traditionally, budgets reflect only those expenditures which are appropriated. A tax expenditure, on the other hand, is a revenue reduction that occurs as a result of an exemption, exclusion, deduction, tax deferral, credit or preferential rate. Such revenue losses are similar to payments made by government except that they are made through a reduction in taxes rather than through the legislative appropriation process. Tax expenditures are less visible than appropriations, and are not subject to annual review as are budgeted items. Furthermore, the Legislature can enact a tax expenditure by a simple majority vote, whereas an appropriation requires a two-thirds vote.

Tax expenditures may be enacted to achieve a social or economic goal, or may serve no purpose except to relieve certain taxpayers of tax liability and thus can be termed "tax loopholes." Unlike legislative appropriations, a tax expenditure is usually not reviewed unless (1) it has received unfavorable publicity, as with the oil depletion allowance; (2) the Federal law affecting similar provisions has been changed; or (3) the law enacting the tax expenditure has a provision that causes the tax expenditure to expire on a given date or event. Most tax expenditures, however, are added to the tax code for an indefinite period. Little attention is given as to whether or not the stated objective for the tax expenditure has been attained or priorities changed after a period of time.

Tax expenditures provide relief in the following ways:

1. Special exclusions, exemptions and deductions, which reduce the amount of taxable income and therefore result in a lower amount of tax.
2. Preferential rates, which reduce taxes by providing a lower tax rate on similar activities.
3. Special credits, which are subtracted from the actual taxes due.
4. Deferral of tax, which generally results from allowing, in the current year, deduc-

tions that are properly attributable to a future year.

The total value of all tax expenditures is unknown, although it is in excess of \$10 billion. Some items cannot be estimated even roughly due to inadequate information. In addition, there is still a difference of opinion over what constitutes tax expenditures. Beyond this, however, are additional complicating factors. For example, tax expenditure estimates cannot simply be added together to produce a grand total: the revenue gain resulting from the deletion of two tax expenditure items could be greater than the sum of the two estimates. As an illustration of this situation, taxing interest income from State and local government securities and capital gains at ordinary rates would push many individuals into tax brackets higher than if just one of these sources of income became fully taxable. The combined effect on revenue would be greater than the total of separate estimates.

Conversely, there are expenditures that, when lumped together, produce a smaller revenue gain than the sum of the individual estimates. If the deductibility of mortgage interest payments and homeowner property taxes were both repealed while the standard deduction remained unchanged, many individuals who now itemize would opt for the standard deduction, thus limiting the revenue gain.

As in prior years, it is recommended that certain tax expenditure provisions be given expiration dates so that they can be analyzed under the budgetary procedure in the same manner as direct expenditures. This analysis could consider the revenue impact of special provisions, and the importance and priority of the benefits provided. The Legislature would determine (1) whether the tax provision still serves a valid purpose; and (2) whether the public benefit generated exceeds the cost. Tax expenditure items which meet these three tests should be retained as part of California's tax system. Ineffective and outdated provisions, on the other hand should be repealed.

## INHERITANCE AND GIFT TAXES

Each tax expenditure review in the Governor's Budget includes a more detailed discussion of one particular area. In the past, income, sales, personal, corporation, and property taxes have been covered. The inheritance and gift taxes are the last major General Fund tax source which will be considered.

California's first Inheritance Tax Law was adopted in 1853 and lasted one year. A new law was enacted in 1893 and substantially modified in 1905. While there have been many modifications over the years, the general structure of the law has not changed. It is a tax on the right to succeed to property transferred at death.

The imposition of the inheritance tax appears to have been based in the doctrine that unearned wealth may be taxed more readily than earned income. It has also been suggested that the desire to achieve gradual redistribution of wealth to decrease income inequality underlay the original tax concept. Over time, the inheritance tax has become the fourth largest source of General Fund revenue for the State, although it remains one of the least reviewed, or considered, taxes in a typical legislative year. The inheritance tax is expected to yield \$551.3 million in 1980-81, equal to 3 percent of General Fund revenue.

Various exemptions, deductions, exclusions, and credits have been added since 1893. The widely used exemption for charitable transfers initially surfaced in 1897. The credit for previously taxed property was put into effect in 1921. The exclusion for the proceeds of life insurance policies was enacted in 1935, and that for public pensions in 1956. In 1961, the wife's community property was extended to all community property passing to a surviving wife. In 1967, the exemption for transfers to unrelated beneficiaries was increased from \$50 to \$300, and the specific exemption for aunts, uncles, and cousins was reduced from \$500 to \$300. In the same year, beneficiary classes were condensed. In 1976, the distinctions between community, quasi-community, and separate property were eliminated and the specific exemption for surviving spouses was increased from \$5,000 to \$60,000. Today, there is no distinction between widow and widower for inheritance tax purposes.

The inheritance tax is based on the market value of the property being transferred after any

legal debts or other obligations have been met. Taxable property includes all real and tangible personal property in the State whether or not the decedent was a resident of California. Intangible personal property such as stocks and bonds are included in the estates of California residents only.

A progressive rate schedule, which varies according to the relationship of the beneficiary to the decedent, is applied to the taxable base. Class A beneficiaries, which include widows and widowers, minor and adult children, grandchildren, parents, grandparents and mutually acknowledged children and descendants, receive the highest exemption from taxation, and the lowest tax rate. Class B beneficiaries are brothers and sisters and descendants thereof, inlaws, the wife or widow of a son, daughters or sons-in-law, and the husband or widower of a daughter. Class C beneficiaries are strangers in blood and relationships not otherwise specified. The different tax rates for each class are shown in Table I.

Beneficiaries who are more closely related to the decedent are given preferential treatment, with tax liability computed from a more lenient rate schedule. It may be argued that the rate schedules for all but Class C beneficiaries represent a significant tax expenditure; it is estimated that in 1980-81 an additional \$493 million in revenue could be obtained by applying Schedule C rates uniformly to all beneficiaries. Obviously, however, few if any would recommend application of Class C rates to a spouse or child. In the event only one rate were to be established for any beneficiary regardless of relationship it is almost certain that it would lie somewhere between the extremes shown in the preceding table. In effect, then, the tax expenditure is considerably smaller than would appear at first.

### *Exemptions*

In addition to the variable rate schedules, beneficiaries are eligible for specific exemptions which are deducted from the lowest tax brackets. The balance of the estate is taxed at the same higher rates as though the exemptions had not been subtracted. The amount of the exemption is reduced as the beneficiary class becomes further removed from the immediate family. The Table II shows the size of exemption by beneficiary and class, and the estimated 1980-81 tax expenditure attributable to each.

TABLE I

CLASSIFICATION	up to \$25,000	\$25,000 to \$50,000	\$50,000 to \$100,000	\$100,000 to \$200,000	\$200,000 to \$300,000	\$300,000 to \$400,000	Over \$400,000
<b>Husband or Wife</b> One half of community property quasi-community property or decedent's separate property			Rate of tax on amount left after deducting exemption from \$100,000 <b>6%</b>	<b>8%</b>	<b>10%</b>	<b>12%</b>	<b>14%</b>
<b>Minor Child</b> (Includes Adopted)	Rate of tax on amount left after deducting exemption from \$25,000	<b>4%</b>	<b>6%</b>	<b>8%</b>	<b>10%</b>	<b>12%</b>	<b>14%</b>
<b>Adult Child, Grandchild, Parent, Grandparent</b> (Relationship may be by Blood or Adoption)							
<b>Mutually Acknowledged Child</b> <b>Descendant of Mutually Acknowledged Child</b>							
<b>Brother, Sister</b> (excludes Brothers and Sisters-in-law) <b>Descendant of Brother or Sister</b> (Includes Descendant by Adoption) <b>Wife or Widow of Son, Husband or Widower of Daughter</b>	Rate of tax on amount left after deducting exemption from \$25,000 <b>6%</b>	<b>10%</b>	<b>12%</b>	<b>14%</b>	<b>16%</b>	<b>18%</b>	<b>20%</b>
<b>Strangers in Blood and Relationships not Specified Above</b>	Rate of tax on amount left after deducting exemption from \$25,000 <b>10%</b>	<b>14%</b>	<b>16%</b>	<b>18%</b>	<b>20%</b>	<b>22%</b>	<b>24%</b>

TABLE II

Class of Beneficiary	Special Exemption	Estimated 1980-81 Tax Expenditure due to Exemption (In millions)
<b>Husband or Wife</b> One-half of community property quasi-community property or decedent's separate property	<b>\$60,000</b>	<b>\$16.7</b>
<b>Minor Child</b> (Includes Adopted)	<b>12,000</b>	<b>.3</b>
<b>Adult Child, Grandchild, Parent, Grandparent</b> (Relationship may be by Blood or Adoption) <b>Mutually Acknowledged Child</b> <b>Descendant of Mutually Acknowledged Child</b>	<b>5,000</b>	<b>8.0</b>
<b>Brother, Sister</b> (excludes Brothers and Sisters-in-law) <b>Descendant of Brother or Sister</b> (Includes Descendant by Adoption) <b>Wife or Widow of Son, Husband or Widower of Daughter</b>	<b>2,000</b>	<b>3.8</b>
<b>Strangers in Blood and Relationships not Specified Above</b>	<b>300</b>	<b>.9</b>
<b>TOTAL</b>		<b>\$29.7</b>

### Exclusions

Exclusions also reduce the taxable estate. The reduction is made in the amount taxable in the highest tax rate brackets by diminishing the total amount subject to tax. There are four major areas of exclusion: community and separate property, certain insurance proceeds, bequests to charities, and benefits from public retirement systems.

**Insurance.** Specified types of insurance payable to a named beneficiary, other than the decedent's estate, is excluded up to \$50,000.

When the \$50,000 insurance exclusion was originally added to the law in 1935, it conformed to substantially similar provisions of the Federal estate tax law. In 1942, however, the Federal insurance exemption was repealed: the insurance exclusion provisions of the State inheritance tax law can therefore no longer be justified on the basis of Federal conformity. The insurance exclusion does provide some ease to the recipient in that it enables the State Controller's Office to release insurance proceeds up to a stated amount without first determining the inheritance tax due, if any. The exclusion also provides a benefit to the insurance industry, by encouraging policy sales.

It has been estimated that this exclusion will result in a \$7.5 million tax expenditure in 1980-81.

**Charities.** The inheritance tax law excludes from the tax all property transferred to certain governmental bodies or to qualified charitable institutions, and property transferred in trust for charitable purposes. The purpose of the exclusion is to aid certain organizations which provide benefits which are of greater value than would be their tax contributions. The charitable exclusion is in conformity with similar provisions of the Federal estate tax law.

This exemption will result in a 1980–81 tax expenditure of \$97 million.

*Public Pensions.* In 1956, legislation was enacted excluding from the inheritance tax all transfers of benefits accruing under any public retirement system. The courts have interpreted the pension exclusion provisions as applying to benefits paid under Federal as well as State and local retirement systems.

The revenue loss in 1980–81 attributable to this exclusion is estimated at \$200,000.

*Miscellaneous Exclusions.* In addition to the above, transfers to dependents of servicemen who die as a result of service-connected disease or injury suffered in U.S. military service in World War II or the Vietnam War are excluded. Intangible personal property of a decedent residing at the time of his death in another state is also excluded, as such property is taxed by the state of residence. The revenue loss from these exclusions is unknown.

#### *Inter-spousal Transfers*

California law provides three separate procedures which reduce the taxes on transfers to surviving spouses.

In addition to the \$60,000 specific exemption, the law currently provides that a surviving spouse is entitled to an exclusion equal to one-half the value of all community property. This treatment is not considered a tax expenditure, because, by definition, one-half of the property already belonged to the surviving spouse. Prior to 1976, all interspousal transfers of community property were excluded from the inheritance tax. In that year legislation was enacted which provided that one-half interest in community property transferred to anyone would be subject to the tax.

One-half of the decedent's separate property—property owned prior to marriage, or acquired afterwards by gift, bequest or descent is excluded from an estate if left to a spouse. Prior to 1976, one-half the value of the decedent's separate property transferred to the surviving spouse was "exempt" from the inheritance tax. Legislation subsequently provided that one-half of the separate property transferring to the spouse would be "excluded" from the tax. This change was adopted to eliminate the expensive process of tracing property to determine whether it was of community or separate origin.

It is interesting to note that in 1973–74, surviving spouses paid only 6.7 percent of the total inheritance tax collected, although 33.6 percent of the market value of estates was left to spouses.

#### *Considerations*

##### *a. Charities*

It is recommended that the Legislature study the feasibility of limiting the charitable exemption to charities which operate within the State of California. Tax expenditures are subsidies provided by all taxpayers. Organizations which qualify for this exemption and operate outside the State do not provide a benefit enjoyed by the California taxpayer; it is therefore questionable whether out-of-state charities should receive special tax treatment.

##### *b. Life Insurance*

It is recommended that the Legislature review the life insurance exclusion. Current law does not treat life insurance on the same basis as other personal property. In many cases, the exclusion acts to increase the personal exemption. For example, a child inheriting \$50,000 in cash pays \$1,600 in inheritance taxes, while another child who inherits the same amount through an insurance policy pays no tax. A similar provision in the Federal estate tax law was repealed in 1942.

##### *c. Interspousal Transfers*

The Legislature should review the existing tax rates and specific exemption for interspousal transfers. The current rate of inflation and increased value of property has shifted the tax burden to the middle sized transfers to surviving spouses, who until recently had never had a tax liability. Prior to 1976, a surviving spouse would have received all community property tax free, half the separate property, plus an additional \$5,000. The 1976 Statute provided the surviving spouse with an exclusion equal to half of all community property, half of all separate property left to the spouse and a \$60,000 exemption. Thus an estate consisting of \$200,000 in community property, when left to the spouse, would have been tax free prior to 1976. Now, that spouse would incur a tax of \$2,400. A re-

cent study of inheritance tax reports by the Department of Finance indicates that property of medium sized transfers are generally community property.

### Summary of Identifiable Tax Expenditures

Although it may not be completely accurate to add the individual tax expenditures because of the interactive effects noted earlier, such an accumulation does give some measure of the total revenue foregone. A summary of the amount of identifiable tax expenditures by major tax is shown below:

#### IDENTIFIABLE TAX EXPENDITURES 1980-81

(In billions)

Personal income taxes .....	\$3.8
Retail sales and use taxes .....	2.1
Inheritance Tax .....	0.6
Bank and corporation tax .....	0.2
Motor vehicle fuel taxes .....	0.1
Insurance tax .....	a
Horse racing .....	a
Total State tax expenditures .....	\$6.8

\* Less than \$50 million.

#### Sales and Use Tax (In millions)

Sales tax expenditures:	
To be consumed at home .....	\$950
Candy .....	50
Vending machines—33% provision .....	13
Gas, electricity, and water .....	605
Vessels and aircraft .....	215
Cargo and returnable containers .....	115
Prescription medicines .....	69
Newspapers and periodicals .....	28
Leases of motion pictures .....	23
Option to pay on cost rather than rental receipts .....	15
Sales by charitable organizations .....	3
Master tapes .....	2
Vending machine operators .....	2
Optometrists and podiatrists .....	2
Hot food sold to airlines .....	1

#### Bank and Corporation Tax (In millions)

Exploration and development expenses .....	\$43
Accelerated depreciation .....	38
Research and experimental expenses .....	21
Exempt corporations (from minimum tax only) .....	14
Charitable contributions .....	11
Solar energy devices .....	11
Depreciation of low-income rental housing .....	6
Exemption from preference tax .....	6
Percentage depletion .....	5
Bad debt reserves .....	4
Certain agriculture costs .....	2
Pollution equipment .....	1

#### Personal Income Tax (In millions)

Interest expense .....	\$880
Personal and dependent credit .....	520
Property, sales, and vehicle taxes .....	250
Capital gains exclusion .....	380
Charitable contributions .....	230
Trade & business expense, union dues and miscellaneous .....	210
Employer contributions to pension plans .....	140
Medical expenses .....	140
Head of household status .....	120
Employer contributions to health plans .....	125
Employee business expense .....	100
Standard deduction .....	100
Income averaging .....	85
Social Security Income .....	60
Capital gains on death .....	55
Interest on government bonds .....	50
Expensing of certain agricultural costs .....	40
Compensation for injuries or sickness .....	32
Low income credit .....	32
Exclusion of \$100,000 of gain from sale of home .....	27
Individual retirement accounts & self employed retirement accounts .....	30
Casualty losses .....	20
Accelerated depreciation .....	17
Taxes paid to another state .....	15
Solar energy device/credits .....	20
Professional corporations .....	13
Meals & lodging furnished by employer .....	10
Moving expense .....	9
Scholarships & fellowships .....	5
Exploration & development costs .....	4
Percentage depletion .....	3
Timber valuation for capital gains .....	3
Military pay exclusion .....	3

#### Other Taxes (In millions)

Horseracing tax	
Preferential rates .....	\$3
Preferential breakage treatment .....	2
Inheritance Tax	
Preferential rates: Class A and B beneficiaries .....	\$493
Specific exemptions .....	30
Charitable contributions .....	97
Life insurance exclusion .....	8
Insurance tax	
Nonprofit hospital service plans .....	\$29
Pensions and profit-sharing .....	13
Fraternal benefit societies .....	1
Motor Vehicle fuel taxes	
Aircraft uses, primarily commercial .....	\$45
Sales to military .....	35

# *Revenue Estimates*

## **The National Outlook**

The U.S. economy is at a turning point, entering a business downturn. The resilience which has been evident for the past two years appears finally to have been dissipated. The nation is in for a moderate recession over the next six months, before a new expansionary phase gets underway.

Policy decisions were critical throughout the past year. The desire to contain inflation and, at the same time, avoid a business downturn appears in retrospect to have had no chance of success. Rising interest rates were accompanied by increases in the monetary aggregates which were at the high end of the stated objectives of the Federal Reserve Board. A second factor was related to inflationary psychology. With the prime rate at approximately 12 percent and prices rising at a 13 to 14 percent rate, real interest rates were, in effect, negative. A third consideration may relate to what appears to have been a permanent upward shift in the interest rate structure of 1½% to 2½% during the credit crunch of 1974. Overall, then, there were no effective policies working to curtail increases in economic activity. Efforts at fine tuning, which might have brought about a soft landing in a less inflationary period, were ineffective in 1979.

On October 6 the Fed signaled its intent to combat inflation by curtailing the availability of funds and reducing final demand. The increase in the discount rate from 11 percent to 12 percent was immediately followed by a sharp rise in other rates. The prime moved rapidly to approximately 15 percent. Mortgage rates moved up to a range between 12 and 14 percent. The effective change in reserve requirements led to speculation that more specific actions to restrict credit for consumers or business could be forthcoming.

The anticipated reaction to the policy shift was not long in coming. Homebuilding—always one of the first industries to respond to significant policy changes—slowed noticeably in October, as mortgage funds for new construction or to finance the purchase of existing homes were harder to obtain. Consumer demand slowed

sharply. Layoffs began to build, concomitant with concern over inventory levels. In effect, the groundwork was laid for the seventh postwar recession.

By all economic measures, 1979 was an erratic year. The strong expansion in the first quarter was followed by a slump in the second due almost entirely to the temporary shortage of gasoline resulting from the curtailment of Iranian exports of crude oil. This was followed by unexpectedly good gains in the third quarter—partly in reaction to the second quarter restraint and partly attributable to advance buying of automobiles during the model cleanup promotions.

Overall, real gross national product posted a gain of 2 percent in 1979. Personal income was up almost 12 percent for the year, reflecting in part a 3½ percent increase in wage and salary employment and average wage gains of 7½ percent. Real income per capita and per wage earner was down, however, given the 11½ percent rise in prices for the year.

Corporate profits will amount to approximately \$234 billion, a gain of 13.6 percent from the 1978 level. This better than expected profit performance is attributable in part to the higher profits reported by energy companies.

Rising prices, however, offset many of the gains. The Consumer Price Index increased 11.3 percent for the year, the worst performance since 1947, surpassing even the inflationary surge which accompanied the removal of wage and price controls in 1974. The price issue complicates any appraisal of the economic outlook. Certainly the strength of consumer demand in late 1978 and early 1979 facilitated the posting of price increases, some of which may have been greater than required to cover costs in response to the threat of wage and price controls. Anticipations of still higher prices encouraged advance buying. An indication of this was the exceptionally low savings rate in recent quarters, as consumer spending outpaced income gains and debt extensions continued high.

The auto and housing sectors—bellwether industries in business cycle analysis—deteriorated

significantly during 1979. New car sales started out the year at a more than 11 million rate, and peaked at a 12.4 million rate in March. From that point, a downtrend set in; sales dropped to a 9.3 million pace in November, and are expected to have amounted to only 10.6 million units for the entire year. This will represent a 6.4 percent decline from 1978. Housing starts weakened from the start of 1979, with the deterioration attributable to housing prices and rising interest rates. There is no doubt but that basic demand remains strong. Effective demand has weakened significantly, however, and is not likely to recover until mid-1980 at the earliest.

Beyond these more obvious indicators are the typical harbingers of recession: a rising number of layoffs, a sharp slowdown in the creation of new jobs, and declines in new orders.

The Budget forecast for 1980 and 1981 is predicated on five assumptions:

- The Federal Reserve will attempt to maintain a relatively tight policy through the first quarter of 1980, with gradual easing in succeeding quarters.
- Energy supplies would not be critical even with the cut-off of oil imports from Iran. A slower pace of economic activity and conservation efforts would prevent recurrence of an energy crisis of any significance during the forecast period.
- The Iranian situation will be resolved without a general Middle East conflict.
- Wage and price controls will not be imposed.
- A relatively minor tax cut will be signed into law mid-1980, along with a reduction in the social security rate increase scheduled for January 1, 1981.

Interest rates hold the key to economic activity over the next several quarters. There are already signs that the rate structure may have peaked with the prime just short of 16 percent. This rate has already dropped  $\frac{1}{2}$  percent from its high. There is some concern, however, that the recent easing is a temporary development and that any further tightening by the Fed may push the prime back up to 16 percent or more during the first quarter. Regardless of very short-term patterns, rates should decline fairly rapidly beginning in the spring with the prime falling to approximately 10 percent by the end of 1980. Mortgage rates should ease to 10 percent from

current levels above 12 percent. Any substantive drop in interest rates will have a positive, stimulative effect on both consumers and investors. Housing activity will account for most of the drop in the investment sector. Housing starts are forecast at 1.3 million units in 1980, down nearly 25 percent from 1979. Homebuilding will start its recovery in late 1980 and should again approach a 2 million unit rate by the end of 1981. Renewed investment in plant and equipment will lead to gains in other sectors, and set the stage for further growth in 1981.

In summary, the recession is expected to continue to approximately mid-1980. The first quarter of the year should show a relatively sharp decline in consumer spending, fixed investment, and inventories. A smaller drop is forecast during the second quarter with the trough reached between May and July. A moderate pickup in activity is expected for the third quarter with a relatively strong performance in the closing months of 1980. Overall, the 1979-80 recession will be far less severe than that which occurred in 1973-75. The table below summarizes the quarterly pattern forecast for 1980.

**REAL GROSS NATIONAL PRODUCT**  
Quarterly growth rates through 1980

	1980:1	1980:2	1980:3	1980:4
Real GNP (in billions) .....	\$1,400.9	\$1,389.3	\$1,393.2	\$1,422.1
Rate of change:				
GNP .....	-5.1	-3.3	1.1	8.5
Consumer spending .....	0.3	-0.4	2.8	6.1
Nonresidential investment ..	-10.4	-8.9	-3.3	5.3
Residential investment .....	-20.5	-18.5	-17.3	9.7
Government .....	-1.1	0.3	0.6	1.6
Inventory change (in \$ billions) .....	-4.0	-6.0	-5.0	+6.0

The relatively high level of interest rates, uncertainty over the future course of events, softness in the labor market, rising unemployment, and sharply lower nominal income gains will dampen the consumer sector significantly. It is estimated that car sales next year will amount to 9.7 million units compared to an average of 10.6 million units in 1979. Spending on furniture will be curtailed by the soft housing market. Gasoline consumption will be held in check by both the lower level of economic activity and reduced supplies resulting from the Iranian situation. The only area expected to register a steady gain in real terms is services, which are usually little affected by cyclical downturns. On balance, real consumer expenditures should increase by 0.8 percent.

At the present time conflicting opinions exist as to the inventory situation in the nation. By most reports, inventories do not appear to be excessive; current efforts to reduce stocks along with slowing sales are therefore expected to prevent a repeat of the major inventory adjustments that have intensified recessions in the past.

The general curtailment of activity will lead to rising unemployment. The jobless rate is expected to peak at 8.2 percent during the third quarter of 1980. Much of this rise will be due to the inability of new entrants to the labor force to find jobs. The reduction in wage and salary employment between the peak in the fourth quarter 1979 and the trough in the second quarter of 1980 is put at 650,000—far less than has occurred in prior recessions. Employment cuts should be held in check by the anticipated short duration of the recession, and by some labor hoarding. The extremely tight labor market of the past 18 months has demonstrated the problems inherent with frequent adjustments to short-term economic conditions.

The recession should lead to gradual moderation in price increases. The Consumer Price Index (CPI) has been rising at a 12 to 14 percent rate in recent months, due primarily to sharp increases in the cost of gasoline, housing, and food. These three categories, in particular, are expected to be under less pressure during the next two years than in 1979. For example, the weakening housing resale market has already been reflected in reductions from asking prices. Reduced mortgage rates will also offset other gains in the CPI. The impact which these factors can have on price measures is illustrated by a comparison of the change between the third quarters of 1978 and 1979 in the total CPI and the CPI excluding mortgage costs:

	<i>Indexes: 1967 = 100</i>	
	<i>Total CPI</i>	<i>CPI excluding mortgage costs</i>
Third quarter 1978 .....	197.9	194.4
Third quarter 1979 .....	221.1	214.8
Change .....	+11.7%	+10.5%

As evident from this differential, the large majority of consumers who had met their housing needs prior to 1979, and were therefore not in the new home market, were not as adversely affected by price increases during the past year as were new home buyers.

Controlling overall inflation trends will be a slow and difficult process even with a slowdown

in business activity. Gasoline prices, for instance, will rise in response to further increases in world crude oil prices and decontrol, but the gain is not expected to be as large as that of last year. Food prices will be up about 9 percent on the average during 1980, only slightly less than the 10.8 percent increase of 1979. Prices of new cars will also rise another 9 percent, through a series of increases during the year. In general, the fear of potential price controls will keep prices higher than would normally be the case during a recession. It is anticipated that the inflation rate will decline to about 9 percent by the end of 1980, and will not get below 7 percent until the end of 1981.

The forecast assumes that a tax cut evenly split between business and the consumer will be enacted mid-1980. Provision for further acceleration of depreciation allowances is anticipated. Individuals are expected to receive an income tax cut of \$12 billion as of the fourth quarter 1980.

More significant may be changes made in the Social Security contribution schedule. At the present time, the rate in 1981 is set to jump to 6.65 percent from the current 6.13 percent. The base will rise by 13 percent in 1980 to \$25,900, and by nearly 15 percent in 1981 to \$29,700. Permitting these increases to go into effect would represent a sharp tax increase for most working individuals and would effectively offset most of any general income tax cut approved in 1980. There is developing sentiment in Washington for legislation to reduce the negative impact of Social Security contributions and some corrective action may be taken during the next 12 months. The 1981 forecast given here has incorporated the scheduled rise in the wage base to \$29,700. The contribution rate will be held unchanged, however, at 6.13 percent. Other funding sources will be used to meet benefit payments.

### THE CALIFORNIA FORECAST

The past year can best be characterized as a year of transition for the California economy. The exceptional growth which began in early 1976 and continued through the end of 1978 clearly showed signs of moderating.

The overall condition of the California economy was good during 1979. Total nonagricultural employment increased by nearly 5 percent, or

about 450,000 jobs over the 1978 average. The unemployment rate fell from 7.1 percent to 6.3 percent, despite a nearly 3½ percent increase in the civilian labor force. In fact, by November the State's jobless rate had declined to 5.7 percent, one-tenth below the national average. Total personal income is expected to be up by 13.8 percent for the year although increases in consumer prices during the year have greatly reduced real gains. The number of housing units authorized by permits fell 13 percent from the preceding year to 212,000 units. This level is still slightly above normal when compared to the average number of units authorized annually since 1965.

Total nonagricultural employment increased during 1979 in every month but April. Most of the strength occurred in the aerospace, construction, service, and finance-insurance-real estate sectors. Gains in aerospace occurred in virtually every industry. Service employment growth was strongest in the business, health, and entertainment categories. State and local government employment nearly returned to the levels existing before the passage of Proposition 13. From this it can be inferred that the fiscal relief provided by the Legislature has been effective in avoiding large-scale disruptions in local services.

A major factor impacting on the California economy during 1979 was the gasoline supply shortage. The first indication of a problem came in early March. During that month the year-over-year increase in gasoline distributions was only 0.6 percent. In contrast, the year-over-year increase for 1977 and 1978 was about 5 percent. The table which follows illustrates gasoline supply trends during 1979.

**GASOLINE DISTRIBUTIONS: 1979**

	<i>Millions of gallons (seasonally adjusted)</i>	<i>Percent change from same month, 1978</i>
January .....	1,014.3	6.3
February .....	1,055.2	9.0
March .....	999.5	0.6
April .....	973.9	0.2
May .....	963.4	-2.8
June .....	915.1	-7.4
July .....	898.0	-6.2
August .....	944.4	-6.1
September .....	968.2	-0.3
October .....	954.0	-5.3

Source: State Board of Equalization

While it appears that Californians are now adjusting to lower levels of gasoline availability, the initial reaction to the supply cutback was uncertainty, which led to temporary cutbacks in

some consumption categories. An indication of this was an employment drop of 0.9 percent in April.

Retail sales in California continued to record strong gains. Preliminary data for 1979 indicate that taxable retail sales increased by almost 16 percent compared to 1978. Exceptional increases were registered in the farm equipment, building materials, specialty, and home furnishings categories.

As the State enters the first half of 1980, the slowing in growth which began in the preceding year is expected to continue. Economic trends at the national level, will be the major influence on California. In brief, it is expected that the California economy will be less affected by the recession than the rest of the Nation in 1980, and rebound more quickly in 1981.

In 1980 it is expected that total nonagricultural employment will decline during the first and second quarters. Such a decline has not happened since early 1975, when the U.S. economy was at the trough of a recession. By the end of 1980, however, employment in California will be up by nearly 100,000 jobs from the end of 1979. Continuing gains throughout 1981 should result in an additional 400,000 new jobs for that year.

Individual employment sectors highlight the economic pattern forecast for 1980 and 1981. Construction employment, an important barometer of statewide economic activity, will fall by about 30,000 workers during the first half of 1980. Only 10,000 of these will likely be reemployed during the latter half of the year. By 1981, construction employment is expected to increase by 8,000 to 10,000 each quarter. Manufacturing employment other than aerospace may decline by as much as 40,000 in 1980, with very slow recovery in 1981. The finance-insurance-real estate sector is expected to show virtually no change in 1980, and an average rate of growth in 1981. Transportation and trade employment are expected to increase modestly in 1980 and 1981, while service employment gains should again lead the California economy in both years.

The only sector which is expected to perform exceedingly well in both years is aerospace. Support within aerospace is evident in virtually all areas. Commercial aircraft manufacturing is particularly strong, with orders for new aircraft backlogged for several years. In addition to the orders directly received by California firms, ap-

proximately 25 percent of the orders from the Boeing Company in Seattle, Washington are being subcontracted to firms in this State. Currently the major constraint on the growth in aircraft production, and all other aerospace sectors, is the supply of engineers and other needed personnel.

California leads the Nation in Department of Defense (DOD) and NASA prime contract awards. Of the over \$10 billion in DOD awards contracted in 1978, California received nearly 20 percent. A renewed commitment by the Federal Administration to increase real defense spending during 1980-81 will provide continued support to aerospace. Further gains will occur if the MX missile system is approved by the U.S. Congress. During the last few years, California received 40 to 50 percent of all NASA prime contract awards. While no major new projects are expected in 1980, existing projects such as the space shuttle should maintain current employment levels.

Aerospace employment also includes the rapidly growing consumer electronics industry. Computing and accounting machines and electronic games are just some of the products being manufactured which are in particularly heavy demand.

Despite some bright spots in the California employment picture for 1980, total unemployment will rise during the year. The State's unemployment rate is expected to peak at 8 percent during the latter half of 1980. At that time the number of persons out of work will total approximately 900,000, compared with the 650,000 unemployed at the end of 1979. Growth in civilian employment during 1981 will bring the unemployment rate below 7 percent by the end of the year.

Housing is perhaps the greatest unknown in the outlook. The 212,000 units authorized in 1979 represented a surprisingly high level of construction, in light of record mortgage interest rates. As of November, many new home buyers were paying 13 percent for home mortgages. It is expected that home construction in early 1980 will decline sharply. Partially as a result of the Federal Reserve Board action to limit growth of the money supply, some lenders now state that they will not be able to finance housing in the near term, regardless of the interest rate.

As interest rates fall in the latter half of 1980,

and demand for homes continues to expand, residential construction should become progressively stronger through 1981. The forecasted decline to 165,000 units in 1980 represents a drop of 47,000 units from the 1979 level; an increase of 65,000 units is expected in 1981. Nonresidential construction, both commercial and industrial, remained strong in 1979. It is expected that 1980 will see moderate reductions in this area.

The share of new home construction attributable to multiple units fell from 42 percent in 1978 to 35 percent in 1979. This share should remain relatively unchanged in 1980. The prospect of rent controls and the decreasing profitability of operating rental housing, are the major factors behind the low level of multiple-unit construction.

It is not known to what extent the passage of Proposition 2, which raised maximum interest rates, will stimulate construction activity. Before the measure, mortgage bankers, insurance companies and others in California were subject to a 10 percent interest rate ceiling on loans. This led to investment funds being placed in other states. As the flow of these funds is reversed back into California as a result of Proposition 2, the State's housing industry can expect access to several billion dollars for real estate loans. Some estimates within the mortgage banking industry suggest that up to \$10 billion will be available throughout the State in 1980. More conservative estimates place the figure at \$2 billion. The actual amount gained will probably lie between these two extremes. The increase in competition which this funding will provide is also likely to exert downward pressure on interest rates as the year goes on.

The real income of Californians will fall slightly in 1980. The growth in total personal income expected during the year will be more than offset by a record high level of inflation. By 1981, however, real income should rise by as much as 4 percent. The 11.7 percent increase forecast for the California CPI in 1980 assumes monthly increases of about 0.8 percent, versus the increases of 1.0 to 1.1 percent during 1979.

Table 1 summarizes the national and California forecasts for 1979 and 1980.

### **ALTERNATIVE FORECASTS**

The forecast discussed above is not the only possibility for 1980 and 1981. There is more than

a little uncertainty at the present time regarding the economic outlook, Federal policy and consumer responses. While a consensus seems to be developing regarding overall levels of activity for the coming year, there is considerable disagreement among forecasters as to the quarterly pattern of events. This disagreement accounts for the broad range of estimates for 1981.

Two alternative scenarios, summarized below, have been developed to cover both a more and a less severe downturn.

### *Downside Risk*

As noted earlier, the outlook for the coming two years depends to a great extent on fiscal policy. If the Federal Reserve Board restricts the money supply more than is now expected, interest rates will remain at relatively high levels. Under this scenario, the prime would again rise in the first quarter of the year and not decline significantly until the third quarter. By the end of 1980, the prime would stand at approximately 11¼ percent. Gradual reductions in 1981 would not be sufficient to provide major economic stimulus.

Consumer confidence could be expected to remain at low levels for several quarters under these conditions because of continued inflation and rising unemployment in an unusually slack job market. Substantial OPEC price increases would fuel inflation, and could lead to lower overall levels of economic activity if gasoline supplies were restricted.

Under this alternative, wage and salary employment would decline on the order of 1.7 million jobs between the peak in late 1979 and the trough in the third quarter of 1980. The unemployment rate would rise to a high of approximately 9 percent, and would average 8 percent for the entire year. The jobless rate would average still higher—8½ percent—in 1981, reflecting the slow recovery process. Real income would be down 2½ percent for 1980 due in large part to the small gain in total wages and salaries. Consumer demand would therefore be sharply curtailed. Sales of new cars, for instance, could be expected to average only 8.5 million units for all of 1980.

Unfortunately, the inflationary situation would not be resolved by these developments. Prices have been shown to be relatively inelastic on the down side and with the threat of wage and

price controls still in the wings, price increases would not be significantly curtailed in the short-run. In the longer run, however, reduced demand would lead to a more rapid deceleration in the rate of price increase than anticipated under the standard forecast.

This low alternative calls for four quarters of decline in real GNP—from the 4th quarter 1979 through the 3rd quarter of 1980. The first two quarters of the year would see particularly sharp cuts in activity. Recovery would begin in the fourth quarter, but at a slower pace than is typical coming out of a recession. By the end of 1981, economic activity would still be significantly below its potential.

Under this scenario, California would be more significantly impacted by the recession than is anticipated in the standard forecast. A job loss of approximately 100,000 would occur between the peak and trough of the cycle. The most pronounced cuts would come in non-aerospace manufacturing, trade and construction. Aerospace gains would be held in check as a result of the slow-down in air traffic and a less buoyant consumer market for electronics items. The construction industry would feel the effects of a weak housing situation (145,000 new units in 1980) and reduction in the volume of non-residential construction activity. The finance-insurance-real estate group would see virtual stagnation for the year. Finally, service growth could be expected to slow sharply. The trough in 1980 would be followed by only moderate gains for several quarters with gradual acceleration in the second half of 1981.

The jobless situation would deteriorate rapidly in early 1980, with the unemployment rate rising above 9 percent and remaining high through the forecast period. This would create problems reminiscent of those which existed in 1975 and 1976 when the unemployment rate reflected the inability of new entrants to the labor force, re-entrants and laid-off workers to find jobs.

Personal income would rise by approximately 10 percent in 1980, and by 11 percent in 1981.

### *The High Alternative*

On the other hand, it is possible that the current recession will be of relatively short duration, with fairly rapid recovery in the latter half of 1980 and significant gains in 1981. Apparent

imbalances in the economic system may be less than generally thought. Concern over consumer debt levels, for instance, has led analysts to the conclusion that the recession will substantially curtail consumption. If, however, those debt levels are not in fact overly burdensome, demand could continue at higher levels than now anticipated. If the Fed pulls back from its current policy course and allows the money supply to increase more rapidly, interest rates will fall relatively quickly during 1980. This would prevent a serious downturn in investment and would also buoy the consumer market.

It is possible under this scenario that business would not resort to massive layoffs, but would attempt to reduce hours in order to preserve existing jobs. With fewer layoffs and a slower increase in the unemployment rate, consumer confidence would remain relatively high. Auto sales, for instance, would amount to 9.9 million units in 1980 and would reach an 11 million unit rate by the end of 1981. Housing starts would fall to a low of 1.3 million units but average nearly 1.5 million for all of 1980. Pent-up demand for homes would lead to a resurgence in the housing industry in 1981, with the number of units built during that year approaching 2 million. Income growth would be more substan-

tial—10½ percent in 1980 and nearly 12 percent in 1981. The gain in real income would amount to 3 percent during the latter year.

On this basis, the California economy would see very little effect from the current recession. There would be a modest downturn in trade and non-aerospace manufacturing employment early in the year, but these cuts would be more than offset by increases in the aerospace and service sectors. Overall, employment would be up 2 percent for 1980 with a 4½ percent growth in 1981.

These employment increases would lead to income gains of 11½ percent in 1980 and 12½ percent the next year. Real income of Californians would show marked improvement by 1981, a factor which would stimulate both the housing and consumer sectors. The number of housing units authorized could amount to 205,000 and 260,000 for the two years, reflecting a large inflow of funds as a result of the recent relaxation in interest rate limits.

The unemployment rate would peak at just under 8 percent, and fall rapidly in 1981, approaching 6½ percent by the end of that year. In brief, the 1979–80 national recession would lead to only a temporary pause in the exceptional growth of the California economy in recent years.

## REVENUE ESTIMATES

Tax yields generally follow changes in economic activity. The revenue estimates for 1979-80 reflect a decline in economic activity with a recovery forecasted for 1980-81.

State revenue during the 1980-81 fiscal year is estimated at \$22,074,776,637, approximately \$1,771 million above the \$20,303,549,036 anticipated during the current fiscal year and \$4,647 million above actual 1978-79 receipts.

Revenue for the General Fund is estimated to total \$19,065,363,629 in 1980-81, up \$1,598 million (9.2 percent) from the current year and \$4,163 million (27.9 percent) higher than 1978-79 actual revenue. Record high personal income, corporate profits and retail sales account for most of these gains. In addition, a major tax reduction in 1978-79 distorts the comparison.

Special fund revenue for 1980-81 is estimated at \$3,009,413,008<sup>1</sup> or 6.1 percent above the current year and 19.1 percent above 1978-79.

Receipts for the General Fund and the special funds for past, current and budget years are shown in the table below.

## 1979 Tax Legislation

The Personal Income Tax Law was revised (AB 276, Chapter 1198) to provide for full indexing of the tax rate brackets for the 1980 and 1981 income years. This will reduce 1980-81 revenues by \$180 million. Prior to the enactment of this bill, the tax rate brackets were scheduled to be indexed by the annual percent change in the California Consumer Price Index less 3 percent.

Chapter 1150 (AB 66) increased the business inventory exemption to 100 percent beginning in 1980-81, repealed several minor sales and use tax exemptions and increased the general corporation tax rate for fiscal years ending in 1980 and thereafter from 9 percent to 9.6 percent. In addition, banks became subject to the \$200 minimum franchise tax, sales and use taxes, the State energy resources surcharge, and local utility user taxes. The bill also extended the in-lieu provisions currently enjoyed by banks to other financial corporations, and specified that the financial rate would be a flat 2 percent for 1980 and 1981. For 1982 and thereafter, the rate would be computed using a formula which includes business license fees. The revenue attributable to the financial rate will be transferred to cities and counties. Finally it repealed the "Litter Tax" and replaced the lost revenue with a transfer from the General Fund to the Litter Fund. The increase in the bank and corporation tax rate is expected, over time, to fund the corporate share of the additional subvention costs resulting from the 100 percent business inventory exemption.

## GENERAL FUND REVENUE

Over 86 percent of aggregate state revenue is deposited in the General Fund. This includes collections from such levies as those on sales of tangible personal property, personal income, corporate profits and insurance premiums. For the most part, these taxes are related directly to business conditions. Hence, the estimates of revenue from each source are derived from the economic assumptions outlined above. The influence of these economic factors upon the various tax bases and the methods used in preparing the budget revenue estimates are summarized in the following material.

## Sales and Use Tax—\$7,365,000,000

The sales tax—an excise tax imposed for the privilege of selling tangible personal property in California for final consumption in the State—is the largest single source of revenue in the State. The sales tax was enacted in 1933 at a rate of 2½ percent. The use tax was enacted in 1935 as a complement to the sales tax, and has always been at the same rate as the sales tax. In 1955, the Bradley-Burns Uniform Local Sales and Use Tax Law was enacted, allowing cities and counties to impose a 1 percent State-administered sales and use tax. The sales tax is based on retail sales of tangible personal property and the use tax is measured by the sales price of personal property which is stored, used, or otherwise consumed in this State.

There were five exemptions in the original sales tax law:

1. Sales of tangible personal property which the State is prohibited from taxing under the laws of the United States or the California Constitution;
2. Sales of gas, electricity, and water when delivered to customers through mains, lines or pipes;
3. Sales of gold bullion, gold concentrates, or gold precipitates by a producer or refiner (this exemption was repealed by Chapter 1150, Statutes of 1979).
4. Sales of tangible personal property used for the performance of a contract in public works executed prior to the effective date of the act; and
5. Sales of motor vehicle fuel taxed under the Motor Vehicle Fuel License Tax Law and not subject to refund. (This exemption was repealed, effective July 1, 1972.)

Many exemptions have been enacted since these original exemptions; some of the more important and their dates of enactment are: food for home consumption (not including hot take-out food), 1935; newspapers and periodicals, 1941; prescription medicines, 1961; and candy (which was defined as a food product), 1971.

The sales tax rate has increased from its original 2½ percent to a rate of 6 percent (6½ percent for the San Francisco Bay Area Rapid Transit District, the Santa Clara County Transit District and the Santa Cruz Metropolitan Transit District.) This rate includes the 4¾ percent State rate, 1 percent local rate, and a ¼ percent county

tax to be used for the support of local transit systems.

The ¼ percent county tax was enacted in 1971 (effective July 1, 1972) when the gasoline exemption was repealed and the State sales tax rate decreased from 4 percent to 3¾ percent. (The State rate has been at its current level of 4¾ percent since April 1, 1974.) The ¼ percent tax was levied to approximate revenues collected from extending the sales tax to gasoline. Each year an estimate is made to determine if the additional revenue derived from the taxation of gasoline is offset by the ¼ percent State tax rate reduction. If more is raised by the State sales tax on gasoline, the excess is transferred from the General Fund to the Transportation Fund. If less is raised, the deficit is absorbed by the General Fund.

From 1972–73 to 1978–79, the calculation of this transfer was based upon the State tax rate in effect when the transfer originated. That is, the 3¾ percent rate with gasoline in the base had to generate more revenue than taxing sales less gasoline at 4 percent in order for a transfer to be made. Chapter 161, Statutes of 1979, revised the formula for calculating the transfer to reflect the higher State tax rate currently in effect. If gasoline sales taxed at 5 percent generate more revenue than ¼ percent of all taxable sales, the excess is transferred. No more than \$110 million can be transferred in 1979–80. In each succeeding fiscal year, the maximum amount that may be transferred will be increased by the percentage increase in inflation and population. This will result in a transfer of \$125 million in 1980–81.

The sales tax revenue estimates also reflect the following legislation enacted in 1979. Chapters 1160 and 1180, Statutes of 1979, revised the tax treatment of mobilehomes to more closely resemble housing. Mobilehomes either on permanent foundations or purchased new on or after July 1, 1980 will be subject to property taxes rather than vehicle license fees. In addition, the sales tax on new mobilehomes will be based on 80 percent of the wholesale cost and used mobilehomes will be exempt from the use tax. These changes are expected to reduce State revenue by \$760,000 in 1979–80 and \$8,100,000 in 1980–81.

In addition to providing a property tax exemption for business inventories, Chapter 1150, Statutes of 1979 (AB 66) made banks subject to

the use tax and repealed several minor sales tax exemptions. This action will result in additional sales and use tax revenue to the State of \$1.9 million in 1979-80 and \$5.7 million in 1980-81.

Food or meals served by a house or institution that provides board and room to senior citizens for a flat monthly rate were exempted from the sales tax by Chapter 1048, Statutes of 1979. This will reduce State revenue by an estimated \$500,000 in the current year and \$2,100,000 in the budget year.

In total, sales and use tax measures enacted during the 1979 legislative session will reduce General Fund revenue by \$45.9 million in 1979-80 and \$4.5 million in 1980-81.

Taxable sales are estimated on both a quarterly and an annual basis, using two methods. A multiple regression equation is used to estimate total annual sales in constant dollars, using as independent variables, disposable personal income in constant dollars, wage and salary workers in manufacturing and construction, new vehicles sold and the savings rate. Sales in constant dollars are converted to current dollars by application of an appropriate price factor. Total quarterly sales are estimated on a current dollar basis, using personal income, wage and salary employment in manufacturing and construction, and real personal consumption expenditures as independent variables. In addition, estimates are made on both an annual and quarterly basis by classifying taxable sales into 16 homogeneous groups, each of which is regressed against an appropriate economic factor. The various estimates are then reconciled. The current estimates are shown in Table 3.

Taxable sales in 1979 are estimated at \$131.1 billion, an increase of 15.5 percent from 1978. Much of this growth reflects the higher level of inflation during the year. In real terms, the growth rate was 3.5 percent—less than half that of the prior year. Gasoline sales contributed substantially to the overall total. Although the number of gallons consumed dropped by 1.6 percent, dollar sales are expected to be up over 33 percent. Construction, farm, manufacturing and wholesaling were other categories with exceptionally strong growth.

For 1980, the slowdown in the economy is expected to result in no real growth in taxable sales. In nominal terms \$146.4 billion in taxable sales is forecast, representing an 11.7 percent increase. Again, the gain in sales of gasoline are expected to substantially outpace other types of sales.

Total taxable sales in 1981 are estimated at \$169.4 billion, up 15.7 percent in current dollars and 6.2 percent in real terms. Gasoline, furnishings, new car and construction sales should show the most rapid expansion.

A transfer of \$110 million to the Transportation Planning and Development Account is estimated for 1979-80. In the budget year, the transfer should total \$125 million.

Sales and use tax revenues prior to the transfers to the State Transportation Fund, including revenue attributable to audit activities of the Board of Equalization and the effects of legislative changes are:

## Personal Income Tax—\$6,800,000,000

The Personal Income Tax was enacted in 1935 at a rate which was graduated from 1 percent on taxable income under \$5,000 to 15 percent on taxable income in excess of \$250,000. Both the tax rates and tax brackets have changed significantly over the years. The current law is the result of extensive modifications made in 1971, which provided for withholding and quarterly estimated tax payments. In addition, it revised capital gains treatment, imposed a tax on preference income, closed various loopholes, and increased the then maximum tax rate of 10 percent to 11 percent. The imposition of withholding and estimated tax payments resulted in considerable windfall revenue due to the cash flow of withholding and prepayments. A special one-time tax credit was enacted in 1972 which returned \$438 million to taxpayers. This law also provided for a low-income tax credit which, in effect, exempted single persons with less than \$4,000 income and married couples with less than \$8,000 income from paying any income tax. In 1976, the maximum income for this tax credit was increased to \$5,000 and \$10,000. In 1978, the Legislature provided for a special one-time increase in the personal tax credits which returned \$714 million to the taxpayers. Because the personal income tax rates are progressive, inflation pushes many taxpayers into higher tax rate brackets. Therefore, beginning with 1978, the tax rate brackets were indexed by the annual percent change in the California Consumer Price Index, less 3 percent and, in 1979, the standard deduction and various tax credits were fully indexed.

Legislation enacted in 1979 provided that for the 1980 and 1981 income years, the tax rate brackets will be indexed by the full annual percent change in the California Consumer Price Index. The reduction in revenue due to indexing was \$270 million for the 1978–79 income year and is expected to be \$665 million and \$1,440 million for the 1979–80 and 1980–81 income years.

The personal income tax is the State's second largest revenue source, producing about one-third of the General Fund revenues. The tax is imposed on net California taxable income (gross income less exclusions and deductions) with tax rates ranging from 1 to 11 percent. A personal

tax credit and dependent tax credit is allowed against the gross tax liability. In addition, a tax on preference income is levied at one-half the regular rates. Preference income includes such items as accelerated depreciation on property in excess of straight-line depreciation, percentage depletion claimed in excess of the adjusted basis of mineral and timber producing property and the portion of capital gains income excluded from adjusted gross income.

The personal income tax revenue estimate is determined by the amount and type of income. The revenue attributable to each type of income fluctuates from year to year in response to changes in the amount received from each source and changes in the distribution among the tax brackets. For example, capital gains are, for the most part, received by taxpayers in the higher tax brackets while wages and salaries are mainly reported by taxpayers in the lower and middle tax brackets. Therefore, a fluctuation in capital gains income will have a greater impact on revenue than a similar dollar variation in wages and salaries because of the higher marginal tax rates. For this reason, revenue from each type of income is estimated separately. Historic relations between types of income are examined. These relationships are then applied to forecasts of income by source to obtain a revenue forecast. Tax attributable to capital gains is analyzed separately since capital gains are not included in the definition of personal income. An estimate is also prepared on a cash flow basis by source of revenue. The two analyses are then reconciled to obtain the final forecast. The cash flow analysis is of special interest in the forecasting process because the data are monthly, exact (actual receipts), and current (to the month prior to the forecast). In contrast, the source of income data are annual, and derived from a sample of returns for the year prior to the forecast. The components of the cash flow data are withholding, declarations, final payments, refunds, and other revenue (e.g., receipts from audit activities).

Total personal income tax revenue is estimated to be as follows:

(In thousands)	
1978–79 (Actual) .....	\$4,761,571
1979–80 (Estimated) .....	\$6,275,000
1981–82 (Estimated) .....	\$6,800,000

## Bank and Corporation Tax—\$2,800,000,000

The bank and corporation franchise tax, enacted in 1929, is a tax levied on corporations for the privilege of doing business in California. The tax is measured by net income and is imposed at a 9.6 percent rate. A minimum tax of \$200 is imposed on all corporations. The corporation income tax was enacted in 1937 to complement the franchise tax. It is levied, at the same rate as the franchise tax, on the net income of corporations which are not doing business in California but which derive income from California sources (primarily foreign companies engaged wholly in interstate commerce and holding companies).

From 1933 through 1979, banks and other financial corporations were required to pay an additional tax on net income not to exceed 4 percent. The tax rate was determined annually as the ratio of personal property taxes paid to net income for all corporations other than banks, financial corporations, and utilities. The bank tax rate for the 1978 income year is 2.542 percent, down from 3.425 percent in the previous year.

The tax on banks is in lieu of all state and local taxes except those on real property, motor vehicles and sales and use taxes. The following shows the history of bank and corporation tax rates:

Year	Tax Rate General Corporations (Percent)	Maximum Tax Rate on Banks and Other Financial Corporations (Percent)
1929-32 .....	4.0	4.0
1933-34 .....	2.0	6.0
1935-42 .....	4.0	8.0
1943-49 .....	3.4	7.4
1950-58 .....	4.0	8.0
1959-66 .....	5.5	9.5
1967-71 .....	7.0	11.0
1972-73 .....	7.6	11.6
1973 *-79 .....	9.0	13.0
1980 .....	9.6	11.6

\* Beginning July 1, 1973

The Bank and Corporation Tax Law was amended in 1971 to include a 2½ percent tax on items of tax preference. The intent is to impose some tax on taxpayers who benefit substantially from various forms of tax exempt income or deductions that reduce their tax under existing law.

There are three sources of tax preference income:

1. Depreciation and amortization in excess of the straight line method.

2. Percentage depletion in excess of cost.

3. Excess additions to bad debt reserves by financial corporations.

The tax applies to the amount by which items of tax preference, less \$30,000, exceeds any net losses for the year.

In 1979 there were three major legislative changes that will affect bank and corporation tax revenue during the current and budget period.

Chapter 1150 (AB 66) increased the general tax rate to 9.6 percent, subjected banks to the \$200 minimum tax and set the bank tax rate at a flat two percent for 1980 and 1981. This legislation also specified that such revenue would go to local government, and provided for a transfer of a portion of this tax to the State Litter Control, Recycling, and Resource Recovery Fund. The general rate increase was designed to fund the additional State reimbursement costs to local governments for completely exempting business inventories from property taxation. The combined effect of these changes will be to increase bank and corporation tax revenues \$51,400,000 in the current year and \$115,200,000 in the budget year.

Chapter 1168 (AB 93) conformed various bank and corporation tax provisions to Federal law as amended by the Revenue Act of 1978 and the Energy Act of 1978. The combined effect of these changes will be to reduce revenue collections by \$5,500,000 in both the current and budget years.

Chapter 1182 (SB 93) provided a bank and corporation tax credit to employers of persons eligible for certain welfare programs. This change is expected to reduce collections by \$1,800,000 in the current year and \$5,900,000 in the budget year.

Revenue collections in the current and budget year depend upon corporate profits attributable to California during 1978, 1979, and 1980. Profits for 1979 were estimated from responses to a questionnaire sent to a sample of firms doing business in California. The survey indicated a wide variation in corporate profits among the several industry groups. Mining and oil production are expected to register the strongest increase, while utilities expect to experience a decline. The companies answering the sample approximate 37 percent of the corporate tax base. Actual and estimated corporate profits are shown in Table 4.

**TABLE 4**  
**Taxable Corporate Profits in California \***

\* These figures represent income of corporations with accounting periods ending from August of the year shown through July of the following year. This method of reporting approximates the federal system of reporting corporate profits in the year earned.

According to the survey, California corporate profits in 1979 are expected to total \$26.3 billion, 13.7 percent above 1978. For 1980 corporate profits are expected to be unchanged from the 1979 level.

After adjusting for legislation and adding payments attributable to audit activities of the Franchise Tax Board, total revenue is estimated as follows:

	(In thousands)		
	1978-79 Actual	1979-80 Estimated	1980-81 Estimated
General Fund .....	\$2,281,223	\$2,566,419	\$2,723,029

	<u>\$2,381,223</u>	<u>\$2,610,000</u>	<u>\$2,800,000</u>

#### Inheritance and Gift Taxes \$568,800,000

The California Inheritance Tax Law, adopted in 1879, was extensively modified in 1905. At that time a progressive rate schedule which covered transfers to family members was enacted. While there have been many modifications of the tax provisions over the years, its general structure has not changed. It is a tax on the right to succeed to property transferred at death and includes gifts made either in contemplation of death or with the intention that the transfer take effect at or after death. The responsibility for the tax liability rests with the decedent's estate.

The inheritance tax base is the market value of the property being transferred less certain deductions and exclusions. Taxable property includes all real and tangible personal property in the State. In the case of a decedent who was a

resident of this State at date of death, intangible personal property wherever located is also taxed. A progressive rate schedule, which varies according to the relationship of the transferee to the decedent, is applied to the taxable base.

Since enactment of the tax, various exemptions, deductions, exclusions, and credits have been added. The widely used exemption for charitable transfers initially surfaced in 1897. In 1935, the exclusion of the first \$50,000 of the proceeds of life insurance policies was enacted. A detailed history of this tax is included in the tax expenditure report beginning on Page A 88.

California's Gift Tax Law was enacted in 1939 as a supplement to the inheritance tax because large transfers made during the lifetime of a donor would otherwise escape tax. The tax is imposed on the donor on the transfer of property to the extent that the transfer was made without full consideration. The property is valued at its market value on the date of the gift.

The Gift Tax Law presently provides for an annual exemption of \$3,000 from a donor to the same donee. In addition to the annual exemption, the law provides a specific, one-time exemption which varies in amount according to the relationship of the donee to the donor.

The tax rate varies according to the relationship of the donee to the donor. Both the specific exemptions and the rates of tax are the same as those provided in the Inheritance Tax Law.

Estimated revenues for the inheritance and gift taxes are:

	<i>(In thousands)</i>		
	<i>1978-79</i>	<i>1979-80</i>	<i>1980-81</i>

Totals .....	\$416,955	\$491,900	\$568,800

**Insurance Tax—\$490,000,000**

The taxation of insurance companies doing business in California began in 1853 when foreign and domestic insurers were required to pay quarterly license fees of \$500 and \$250, respectively. In 1862, a gross premiums tax was enacted and levied on foreign insurers with less than \$50,000 invested in California property. In 1910, a constitutional amendment subjected all insurers to a 1.5 percent gross premiums tax which was in lieu of all taxes other than on real estate.

Since its inception there have been relatively few rate changes in the gross premiums tax. The tax has been levied at the rate of 2.35 percent since 1949. Certain pension and profit-sharing plans are taxed at 0.5 percent whereas surplus lines are taxed at 3 percent. Ocean marine insurers are taxed at 5 percent of underwriting profits.

The insurance tax estimate is based on projections of premium growth for specific lines of insurance. Responses to a survey were obtained from 110 companies which account for 60 percent of the insurance written in California. The results of this survey indicated that taxable premiums increased by 6.7 percent in 1979, and will grow by 8.9 percent in 1980.

The estimated tax for the current and budget years and the actual tax collection in 1978-79 are:

<i>(In thousands)</i>	
1978-79 (actual) .....	\$420,184
1979-80 (estimated) .....	443,000
1980-81 (estimated) .....	490,000

**Cigarette Tax—\$278,000,000**

The cigarette tax was enacted in 1959 at the rate of 3 cents per pack, and imposed on the

distributor for the privilege of selling cigarettes in California. The rate was subsequently increased to 10 cents per pack in 1967, with 30 percent of total revenues going to local governments. Cigars and other tobacco products are not subject to a tobacco tax.

A projection of the total number of taxable cigarettes distributed in the current and budget year is the basis for the cigarette tax estimate. Per capita consumption in the budget year will remain relatively level with total cigarette consumption increasing only slightly to reflect population increases. Taxable distributions of cigarettes are estimated at 2.76 billion packs in 1979-80 and 2.77 billion packs in 1980-81. Estimated revenues for the cigarette tax are:

	<i>(In thousands)</i>		
	<i>1978-79 Actual</i>	<i>1979-80 Estimated</i>	<i>1980-81 Estimated</i>
General Fund.....	\$189,780	\$191,000	\$195,000
Cigarette Tax Fund.....	79,036	81,500	83,000
Totals .....	\$268,816	\$272,500	\$278,000

#### Alcoholic Beverage Taxes—\$141,000,000

The tax on alcoholic beverages was enacted in 1935. In general, the tax is levied on distributions of distilled spirits, beer and wine from wholesaler to retailer.

The various rates applicable to alcoholic products have changed infrequently since 1935. The rate for dry wines has remained unchanged since 1937 when it was reduced from 2 cents per gallon to 1 cent per gallon. The rate on distilled spirits of 100 proof or less has been changed twice—in 1955 when the rate was increased from \$0.80 to \$1.50 per gallon, and in 1967 when it was increased to its current level of \$2.00 per gallon. In 1955, the rate for sparkling wines was raised from \$.24 to \$.30 per gallon. The tax on sweet wines has remained constant at 2 cents per gallon.

Alcoholic beverage tax estimates are based on a projection of the total number of gallons distributed in the current and budget years for each type of beverage. Estimated per capita consumption of each beverage is shown below:

#### Apparent Per Capita Consumption (In gallons)

	<i>1978-79 Actual</i>	<i>1979-80 Estimated</i>	<i>1980-81 Estimated</i>
Distilled spirits.....	2.52	2.45	2.44
Beer .....	24.72	25.36	25.92
Sparkling wine.....	.28	.30	.33
Dry wine .....	3.63	3.87	3.99
Sweet wine .....	.42	.42	.42

Estimated revenues for the current and budget years, compared with the actual revenue for 1978-79 are:

	<i>(In thousands)</i>		
	<i>1978-79 Actual</i>	<i>1979-80 Estimated</i>	<i>1980-81 Estimated</i>
Distilled spirits.....	\$114,922	\$112,100	\$113,500
Beer and wine .....	25,137	26,100	27,500
Totals .....	\$140,059	\$138,200	\$141,000

#### Horse Racing Fees—\$142,195,000

Parimutuel betting on horse racing in California was authorized in 1933. The major portion of horse racing revenue is derived from a license fee imposed on the total parimutuel handle (the amount bet) and breakage (the odd cents not paid to winning ticket holders). Other sources of horse racing revenue are unclaimed parimutuel tickets, occupational license fees, fines and penalties.

The original law provided for a parimutuel license fee of 4 percent. For meets with average handles greater than \$650,000 per day, the current rate schedule provides for a base rate of 6.10 percent on the first \$20 million bet and one other rate, ranging from 5.70 to 7.45 percent depending on the total amount bet in excess of \$20 million.

Beginning in 1947, the State received the breakage attributable to the handle in excess of \$27 million. Breakage was defined as the odd cents by which the amount payable on each dollar exceeded a multiple of five cents. In 1959, the breakage was changed from five cents to ten cents, and the State received one-half of the breakage attributable to the first \$24 million bet and all of the breakage on the handle in excess of \$24 million at each track. However, in 1967 a special provision was added that allowed all race meets which handle less than \$125 million (all meets except Santa Anita and Hollywood

Park) to remit to the State only the breakage attributable to the handle in excess of \$50 million to the State. Breakage not paid to the State added to purses.

From July 1, 1970, to July 1, 1975, all meets which handled less than \$20 million were subject to a 5.5 percent rate rather than the normal 6.1 percent. This special treatment was permanently extended to the California State Fair and Exposition (Cal Expo) and all district and county fairs.

For meets averaging less than \$650,000 per day the fee ranges from 1 percent to 4 percent for fairs and lessees of Cal Expo and from 2.5 percent to 7.5 percent for all other meets.

Total handle of all race meets is expected to increase by 11.4 percent in 1979–80 and 8.7 percent in 1980–81. Total revenues from horse racing will increase by 15.2 percent in 1979–80 and 8.9 percent in 1980–81, with General Fund revenues from horse racing showing gains of 13.9 percent and 8.9 percent for the same periods.

Total parimutuel pools, receipts from horse racing, and the final distribution of such revenue among the various funds are shown below.

TABLE 5 Sources and Distribution of Horse Racing Revenue (In thousands)			
	1978–79 Actual	1979–80 Estimated	1980–81 Estimated
Total parimutuel pools ....	\$1,520,241	\$1,693,345	\$1,840,260
Receipts:			
Parimutuel license fee ..	101,525	116,601	125,760
Breakage .....	7,446	9,207	10,590

Wildlife Restoration Fund .....	750	750	750
Sires Stakes .....	393	740	1,250

Other General Fund Revenue—\$785,240,000

Miscellaneous receipts for the General Fund will total \$785.2 million in the budget year; a decrease of 0.5 percent from the corresponding figure for the current year and up 9.9 percent from 1978–79. Miscellaneous revenue is made

up of seven categories: Medi-Cal aid reimbursements—\$132.0 million; interest income—\$400.0 million; pay patients and county board charges at hospitals—\$25.5 million; General Fund share of liquor license fees—\$11.0 million; private car tax—\$4.3 million; royalties from oil and gas production on state-owned lands—\$84.9 million; and other—including charges for certain services to business and individuals and sales of property—\$127.5 million.

## ALTERNATIVE FORECASTS

The alternative economic forecasts outlined on pages A-97 through A-99 will result in different revenue estimates. The deeper and more prolonged recession of the low forecast and the relatively sluggish recovery could be expected to reduce General Fund revenues by approximately \$400 million between now and June 1980. The high side alternative, which calls for a very short, mild recession with only a marginal impact on California, would lead to revenue collections approximately \$300 million greater than forecast for the remainder of this year. The following table compares the General Fund revenue estimates used in this Budget with revenue estimates based on both the high and low alternative economic forecasts.

TABLE 6 Estimated General Fund Revenue Based on High, Budget and Low Economic Outlooks (In millions)			
	High Alternative	Budget Estimates	Low Alternative
1979–80			
Sales & use tax .....	\$6,790	\$6,460	\$6,130

Total.....	\$19,672	\$19,065	\$18,387
Difference from Budget estimate .....	+\$607		–\$678

## SPECIAL FUND REVENUE

Provisions of the California Constitution, codes and statutes restrict the use of certain revenue for specified purposes, and these receipts are separately accounted in various spe-

cial funds. In general, they comprise three categories of income: (1) receipts from tax levies which are allocated to specified functions; (2) charges for special services to specific groups; and (3) rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees illustrate the first of these classes. License fees for the regulation of business and professions are typical of the second. Oil and gas royalties are examples of the third. Interest received by the investment of special fund money is deposited in the fund for which the investments are held.

Motor vehicle taxes and fees account for 78 percent of all special fund revenue. Principal sources of this income are the motor vehicle fuel taxes, registration and weight fees and vehicle license fees. During the 1980-81 fiscal year, \$2.1 billion will be derived from the ownership or operation of motor vehicles. Approximately \$1,-073.5 million of this revenue will be returned to local governments. The remainder will be available for various state programs related to transportation and services to vehicle owners.

Thirty percent of cigarette tax revenue is deposited in a special fund for distribution to cities and counties. In 1980-81 receipts for this fund are estimated at \$83 million.

Charges for special services to industry, business and the professions, together with hunting, fishing and liquor licenses, other regulatory fees and miscellaneous receipts will amount to \$45.6 million in 1980-81. Oil and gas revenues are estimated to total \$202.7 million. Interest from investments held for the various special funds is projected at \$400 million.

#### Motor Vehicle Fuel Taxes—\$902,900,000

The motor vehicle fuel license tax and the use fuel tax provide the major sources of funds for maintaining, replacing, and constructing state highway and transportation facilities.

The motor vehicle fuel license tax (gas tax) is a tax on the distribution of gasoline and other flammable liquids which are used in propelling motor vehicles, aircraft, and vessels. Distributions of diesel fuel, liquid petroleum gas (LPG), and kerosene are not included under this tax.

The current tax rates per gallon are as follows:

Motor vehicle fuel for highway use ....	7¢
Motor vehicle fuel for off-highway recreational use .....	7¢
Aircraft jet fuel .....	2¢
Fuel used in aircraft <sup>1</sup> .....	7¢
Fuel used in vessels.....	7¢

When the motor vehicle fuel license tax was first imposed in 1923, it was limited to the distribution of fuel used for motor vehicles. In 1969, distributions of jet fuel became taxable at a rate of 2 cents per gallon. Since 1965, refunds for the distribution of fuel used in aircraft have been limited to 5 cents per gallon. In 1968, the refund provision for fuel used in vessels was repealed. In 1972, refunds for the distribution of fuel in off-highway recreational vehicles were discontinued. These revenues are transferred, however, to the account which reflects the fuel's use; for example, revenues collected from the distribution of motor fuel used in aircraft are transferred to the Aeronautics Account.

Gasoline tax revenues are estimated on the basis of average gasoline consumption per vehicle and total vehicle registrations. Consumption per vehicle in 1978-79 amounted to 621.55 gallons and is projected at 605.47 gallons for 1979-80 and 598.09 gallons for 1980-81.

The use fuel tax is imposed on diesel fuel, liquefied petroleum gas (LPG), and natural gas for use on state highways. This tax augments the gasoline tax and is used for the construction and maintenance of highways. The enactment of the tax in 1937 was limited to diesel fuel, reflecting the increasing importance of diesel-powered motor vehicles. In 1959 LPG was shifted from the gasoline tax to the use fuel tax. In 1970 the use fuel tax was extended to natural gas.

The current rates are 7 cents per gallon of motor vehicle fuel or per 100 cubic feet of compressed natural gas, and 6 cents per gallon of LPG or liquid natural gas. In addition, a person may elect to pay a flat rate fuel tax based on vehicle weight in lieu of the tax on LPG. Local transit systems and certain common carriers pay 1 cent per gallon.

Highway consumption of diesel fuel is estimated by projecting the trend of past distribu-

<sup>1</sup> Subject to 5 cent refund.

tions with adjustments to reflect changes in the economy. Consumption of diesel fuel in 1979-80 is estimated to be about the same as in 1978-79, whereas a 5 percent increase is expected in 1980-81.

Revenues from motor vehicle fuel taxes are shown below:

	<i>(In thousands)</i>		
	<i>1978-79</i>	<i>1979-80</i>	<i>1980-81</i>
	<i>Actual</i>	<i>Estimated</i>	<i>Estimated</i>
Gasoline .....	\$822,165	\$812,200	\$825,100
Use fuel .....	74,427	74,400	77,800
Totals .....	\$896,592	\$886,600	\$902,900

#### Motor Vehicle Fees—\$1,153,300,000

California has imposed motor vehicle registration and weight fees in their present form since 1923. Originally, the Legislature granted permission to local governments to license motor vehicles and to charge a flat fee of \$1 per vehicle. When the state's highway user taxes were revised by the Vehicle Act of 1923, registration fees for all vehicles were established at a flat rate and additional fees based on weight were imposed on commercial vehicles.

Registration fees are levied on all motor vehicles, trailers, semi-trailers and certain types of dollies. In addition to registration fees, commercial vehicles pay fees which range from \$5 to \$413 based on their unladen weight. The registration fee for most motor vehicles is \$11; since 1975 additional charges ranging from \$50 to \$300 are levied on vehicles with high compression engines.

New vehicle sales (autos, trucks, trailers and motorcycles) in California are estimated to total 1,640,000 units in 1979. In 1980 and 1981, sales are expected to reach 1,535,000 and 1,655,000 units, respectively.

Allowing for scrappage and vehicles entering and leaving the state, total fee-paid registrations at year-end are estimated at 18,833,500 for 1979, 19,163,500 for 1980, and 19,708,000 for 1981. Based on these estimates, registration and weight fees are expected to total \$375.0 million in the current year and \$385.0 million in the budget year. Drivers' license fees and various

other charges related to vehicle operation make up the balance of motor vehicle fees.

The vehicle license fee, established in 1935, is imposed for the privilege of operating a vehicle on the public highways of California. Prior to the imposition of the license fee, motor vehicles were taxed as personal property under the property tax. However, because local administration of the tax on vehicles proved inequitable and easy to evade, the vehicle license fee was established, and the local property tax on vehicles was repealed. Although it is a state imposed fee, the revenues collected, less certain deductions, are distributed to local governments on a population basis.

The vehicle license fee is calculated on the vehicle's "market value"—the manufacturer's suggested base price, not including options, adjusted by a depreciation schedule. For motor vehicles, the schedule is based on a nine-year depreciation period, while for trailer coaches an 18-year depreciation period is used. A rate of two percent is applied to the market value to determine the fee. Revenue from this source is therefore contingent on the number of vehicles in the State, the age distribution of those vehicles, and their original base price.

Total revenues from motor vehicle fees are:

	<i>(In thousands)</i>		
	<i>1978-79</i>	<i>1979-80</i>	<i>1980-81</i>
	<i>Actual</i>	<i>Estimated</i>	<i>Estimated</i>
Registration, weight, and other fees .....	\$409,672	\$425,700	\$441,500

Totals .....	\$1,021,857	\$1,068,100	\$1,153,300

#### Other Special Fund Revenue—\$648,342,000

For the most part, nontax revenue flowing to special funds represents regulatory fees on business and professions, charges for special services to designated groups, special accounts in the General Fund and royalties from oil and gas production on state-owned land.

For the budget year, these revenues will total \$648.3 million compared with \$628.6 million in the current year. Actual receipts in 1978-79 were \$512.2 million.

<sup>1</sup> Population estimated by the State Department of Finance.

<sup>2</sup> Personal income, 1950 through 1978, from estimates by the Office of Business and Economics, United States Department of Commerce. Data for 1979 and 1980 are estimates by the State Department of Finance.

<sup>3</sup> Taxes per capita computed on the basis of population January 1, the midpoint of the fiscal year.

<sup>4</sup> Beginning in 1966-67, most state revenues were placed on an accrual basis. Beginning in 1973-74, accounts receivable only are accrued.

+ Estimated.

Data may not add due to rounding.

NOTE: Data are shown for 1966-67 on both bases in order to facilitate long-term comparisons.

LEGISLATIVE COUNSEL BUREAU

Program Objectives and Description

The objective of the Legislative Counsel Bureau is to provide legal assistance to the two houses of the Legislature and their Members and Committees in resolving a large volume of complex legal problems arising in connection with the legislative process, all of which must be resolved within a critical time span. The legal services furnished include rendering opinions, drafting bills, counseling, attendance as Counsel at meetings of legislative committees, and representing the Legislature in litigation. The attorney-client relationship is maintained, and all work is confidential.

In addition, the Bureau prepares and provides necessary indices and appropriate tables necessary to identify legislative measures, and compiles and indexes statutes and codes.

The Bureau has developed a system which permits the utilization of data processing in the drafting of bills and is in the process of extending the utilization of data processing to other operations of the Bureau and the Legislature.

Seven additional clerical positions are proposed for the budget year to offset workload on the Bureau's staff resulting from automation of bill amendments. One associate programmer analyst position is proposed to facilitate automation of the Daily File and Daily Journal. In addition, two permanent intermittent positions (75 percent time base) will be changed to full time for a net increase of 0.5 personnel years in the budget year.

# CALIFORNIA LAW REVISION COMMISSION

## Program Objectives and Description

The primary objective of the California Law Revision Commission is to study the statutory and decisional law of this state, to discover defects and anachronisms and to recommend legislation to effect needed reforms.

The Commission consists of a member of the Senate appointed by the Committee on Rules, a member of the Assembly appointed by the Speaker, and seven additional members appointed by the Governor with the advice and consent of the Senate. The Legislative Counsel is an ex officio nonvoting member of the Commission.

The Commission assists the Legislature in keeping the law up to date by intensively studying complex and controversial subjects, identifying major policy questions for legislative attention, gathering the views of interested persons and organizations, and drafting recommended legislation for legislative consideration. The efforts of the Commission permit the Legislature to determine significant policy questions rather than to concern itself with the technical problems in preparing background studies, working out intricate legal problems, and drafting needed legislation. The Commission thus enables the Legislature to accomplish needed reforms that otherwise might not be made because of the heavy demands on legislative time. In some cases, the Commission's study discloses that no new legislation on a particular topic is needed, thus relieving the Legislature of the need to study the topic.

The Commission may study only topics which the Legislature authorizes by concurrent resolution. The Commission now has an agenda of 26 topics, two of which were added by the 1979 session.

In 1979, seven of eight bills recommended by the Commission were enacted. One modernized almost 30 percent of the Probate Code by streamlining and consolidating the divisions relating to guardianships and conservatorships. The others dealt with confessions of judgment, wage garnishment, conforming California attachment law to the new Federal Bankruptcy Act, ad valorem taxes when property is taken for public use, and rules for construction of the Probate Code. Commission recommended bills enacted in 1979 affected 966 sections; 483 new sections were enacted, 193 sections were amended, and 290 sections were repealed.

The Commission plans to submit recommendations to the 1980 session dealing with such matters as the probate homestead, agreements for the entry of support and paternity judgments, quiet title actions, undertakings for costs, Evidence Code property valuation rules, special assessment liens on property acquired for public use, assignments for the benefit of creditors, vacation of streets, highways, and service easements, and enforcement of judgments against public entities. In 1980-81, the Commission also plans to complete work on a new comprehensive statute relating to the enforcement of judgments, including such matters as exemptions from execution, and to continue work on other major projects—problems under the community property statutes, whether a Marketable Title Act should be enacted in California, and a new adoption statute.

*In 1979-80, increased salary savings, resulting in the reduction of one personnel year, were used to purchase word processing equipment. This position reduction is proposed as permanent in the budget year due to increased productivity resulting from use of this new equipment.*

## COMMISSION ON UNIFORM STATE LAWS

## Program Objectives and Description

In conjunction with other states, the Commission drafts and presents to the Legislature uniform laws deemed desirable and practicable by the National Conference of Commissioners on Uniform State Laws for adoption by the various states. The Commission is composed of four members appointed by the Governor, one member of each house of the Legislature appointed by the respective houses, and the Legislative Counsel. Provision is made for the attendance of the commissioners at meetings of the national conference, and California's contribution to the conference.

*In the budget year California's dues will increase by 10 percent from \$33,000 to \$36,300.*

## CONTRIBUTIONS TO LEGISLATORS' RETIREMENT FUND

## Program Objectives and Description

Established in 1947, the Legislators' Retirement System provides retirement and death benefits for legislators, constitutional officers and legislative statutory officers. In 1977-78 the Legislature initiated a one-time General Fund augmentation of \$27,436,508 to eliminate the unfunded liability of the fund. In addition, Chapter 937, Statutes of 1977 revised the State's contribution rate to 18.81 percent of payroll in order to maintain an actuarially sound system. The system is also financed through member contributions of 4 percent for members enrolled prior to 1972 and 8 percent for members enrolled after 1972 and interest earnings. Administration of the system is provided by the Public Employees' Retirement System.

## JUDICIAL

Article VI of the Constitution creates the Supreme Court of California and the Courts of Appeal to exercise the judicial power of the State at the appellate level, creates the Judicial Council of California to administer the State's judicial system, and creates the Commission on Judicial Performance to consider complaints against judges.

Legislation enacted during the 1979 Legislative Session (Chapter 1018/Statutes of 1979) authorizes three new appellate court judgeships and provides funding for six additional support staff effective January 1, 1980. One of the judgeships is in the Fourth Appellate District while the other two are in the Fifth Appellate District. This budget requests 43 additional law clerk positions in the budget year to handle the increasing workload of the Courts of Appeal. These law clerks are less expensive than permanent senior research attorneys. Both the current and budget years reflect a decrease of \$100,000 in the assignment of municipal court judges to superior courts program and a decrease of \$200,000 in the justice courts temporary judgeships program. These reductions are being made to reflect more accurately the estimated level of expenditure. The budget year is also being reduced by \$137,000 in the voluntary arbitration program which recognizes the final termination of the program.

The budget year also reflects the termination of 6 limited term positions authorized July 1, 1978 to test the law clerk concept of dealing with increased workload in the courts of appeal and the addition of one position to deal with the increasing workload of the Commission on Judicial Performance.

In the current year there is an Emergency Fund allocation for \$325,000 to finance a portion of the costs of special proceedings of the Commission on Judicial Performance.

## Judicial Council Special Projects

## Program Objectives and Description

During the past several years, the Judicial Council has received grants from the Office of Criminal Justice Planning (OCJP), the Office of Traffic Safety, the Law Enforcement Assistance Administration, and the Foundation for Judicial Education to augment its services to state and local courts. These grants are for the purpose of funding studies and providing essential services designed to improve judicial administration. Accordingly, their focus has been on such key areas as calendar management, reduction of congestion and delay, improving the effectiveness of judicial procedures, training judges and nonjudicial personnel, improving management information systems, expediting trials, and judicial reorganization.

Applications for and acceptance of grant funds are made only after a careful assessment of each proposed project in terms of its relevance to judicial administration priorities, potential impact on the courts, and enunciated Judicial Council goals.

The Judicial Council will receive new OCJP funds for "Automation of the California Appellate Court Clerk's Office" beginning in the 1979-80 fiscal year. Funds for the first phase of this project will be used to purchase EDP equipment for the Clerk's office in the First Appellate District. Ongoing equipment maintenance costs (\$7,200 in 1980-81) will be funded from savings in the Judicial budget.

## SALARIES OF SUPERIOR COURT JUDGES

## Program Objectives and Description

The purpose of this budget is to provide for the State's share of the salaries, and health and death benefits for 607 Superior Court judges in 1979-80 and in 1980-81. The budgeted expenditure for salaries does not exceed the State's share of the monthly salary rate effective on July 1, 1979, and includes 46 additional judges authorized in 1979 legislation. The budgeted expenditure for health benefits includes the State's share of health benefits for those superior court judgeships enrolled in a state health plan.

As a result of legislation enacted in 1979 (Chapter 1018, Statutes of 1979) beginning July 1, 1980, judges will receive annual salary increases equal to the average percentage salary increase for the current fiscal year for California State employees, but not to exceed 5 percent. However, if in either of the two previous fiscal years the average increase for State employees was less than 5 percent, the judges shall, in addition, receive that portion of a current increase in excess of 5 percent which they would have been entitled to had the increases in the two previous years each been equal to 5 percent.

The following table shows the contributions by the State and the county towards the salary of each superior court judge as provided under Sections 68202, 68203 and 68206 of the Government Code.

Population of County	State Share	County Share	Total
250,000 or more .....	\$44,705	\$9,500	\$54,205
40,000 to 249,999 .....	46,705	7,500	54,205
40,000 or under .....	48,705	5,500	54,205

## Program Requirements

	1978-79	1979-80	1980-81
Salaries of Superior Court Judges (General Fund) .....	\$23,856,048	\$26,956,289	\$28,002,978

## Authority

Government Code Sections 22825, 68202, 68203, 68206 and 68207.

## SIGNIFICANT PROGRAM CHANGES

	1979-80	1980-81
Additional salary cost for 45 new judgeships authorized in 1979 legislation <sup>1</sup> .....	\$1,008,885	\$2,017,725

## SUMMARY BY OBJECT

	1978-79	1979-80	1980-81
Salaries of Superior Court judges .....	\$23,349,137	\$26,300,390	\$27,309,230
Health benefits .....	506,911	655,899	693,748
TOTALS, EXPENDITURES .....	\$23,856,048	\$26,956,289	\$28,002,978

## RECONCILIATION WITH APPROPRIATIONS

## LOCAL ASSISTANCE

## General Fund

APPROPRIATIONS	1978-79	1979-80	1980-81
Budget Act appropriation .....	\$22,471,546	\$24,499,463	\$28,002,978
Allocation for employee compensation .....	1,598,831	1,447,941	-
Chapter 968, Statutes of 1978 <sup>2</sup> .....	24,127	-	-
Chapter 1018, Statutes of 1979 .....	-	1,008,885	-

Allocation for contingencies or emergencies .....	211,620	-	-
Totals Available .....	\$24,306,124	\$26,980,416	\$28,002,978
Balance available in subsequent years .....	-24,127	-	-
Unexpended balance, estimated savings .....	-425,949	-24,127	-
TOTALS, EXPENDITURES (Local Assistance) .....	\$23,856,048	\$26,956,289	\$28,002,978

<sup>1</sup> Chapter 1018, Statutes of 1979 authorized 46 new judgeships; however, it is understood that the legislative intent was to authorize 45 new judgeships.

It is further understood that legislation will be introduced during the 1980 legislative session to delete the authorization for one judgeship in San Diego County. The amount budgeted for 1980-81 includes funds for only 45 judgeships.

<sup>2</sup> Chapter 968, Statutes of 1978 inadvertently appropriated \$24,127 in such a manner as to preclude its intended purpose of funding the state share of salaries for one additional Superior Court judgeship.

## STATE BLOCK GRANTS FOR SUPERIOR COURT JUDGESHIPS

### Program Objectives and Description

The State Block Grants for Superior Court judgeships budget reflects State policy that, effective January 1, 1973, the State will provide a \$60,000 annual block grant for each new superior court judgeship authorized.

The block grant is deemed to be the full support cost for each new Superior Court judgeship created and is in addition to state contributions to counties towards the salaries, retirement, health and death benefits of Superior Court judges.

The 1980-81 Budget Act appropriation includes a block grant appropriation for each of the 119 Superior Court judgeships authorized since January 1, 1973. (One judgeship was authorized in 1973-74; 15 in 1974-75; 17 in 1975-76; 22 in 1976-77; 9 in 1977-78; 10 in 1979-80; and 45 in 1980-81.)

*Chapter 1018, Statutes of 1979 actually authorized 46 new judgeships effective January 1, 1980 but it is understood that the legislative intent was to provide only 45 new judgeships. It is further understood that corrective legislation will be introduced in January, 1980 to delete the authorization for one superior court judgeship in San Diego County.*

### Program Requirements

	1978-79	1979-80	1980-81

<sup>1</sup> Chapter 969, Statutes of 1978 contained an insufficient appropriation to fund full cost.

## CONTRIBUTIONS TO JUDGES' RETIREMENT FUND

### Program Objectives and Description

The Judges' Retirement Fund receives contributions from the State in the amount of 8 percent of the salaries for the established judgeships of the justices of the Supreme Court, District Courts of Appeal and the Superior and Municipal Courts. A like amount is deducted from the salaries of active justices and judges and deposited in the fund.

In addition, filing fees of \$2 and \$3 from specific civil cases, investment income, Budget Act appropriations and emergency fund allocations are used to maintain the solvency of the retirement fund.

Section 75110 of the Government Code declares that the Judges' Retirement System shall be fully funded and actuarially sound on and after January 1, 2002. An actuarial evaluation completed in December, 1977 indicates an unfunded accrued liability of almost \$400 million.

*Chapter 1056, Statutes of 1979 (AB 1520) provides a monthly allowance of \$400 to the surviving spouse of a judge who took office in August 1938, and who died in office in October 1951.*

*Chapter 1018, Statutes of 1979 (SB 53) adds 54 new judgeships to California's court system: 3 to the Appellate Court, 46 to the Superior Court<sup>1</sup>, and 5 to the Municipal Court.*

The budget provides contributions for the following numbers of judges by type of court:

Type of Court	Number of Judges		
	1978-79	1979-80	1980-81
State Operations:			
Supreme .....	7	7	7
Appellate .....	56	59	59
Local Assistance:			
Superior .....	561	607	607
Municipal .....	465	470	470

### Authority

Chapter 11, Title 8 of the Government Code.

<sup>1</sup> Chapter 1018, Statutes of 1979 (SB 53) authorized 46 new superior court judgeships; however, the legislative intent was to authorize only 45 new judgeships. Legislation will be introduced during the 1980 legislative session to delete the authorization for one judgeship in San Diego County.

## NATIONAL CENTER FOR STATE COURTS

The National Center for State Courts was established in 1971 to act as a focal point for judicial reform; to serve as a catalyst for setting standards for fair and expeditious judicial administration; and to find and disseminate answers to the problems of State judicial systems. The National Center consists of a headquarters office which is located in Denver, Colorado and six regional offices (one of which is located in San Francisco, California). The National Center is funded through grants from the Law Enforcement Assistance Administration with the necessary cash match provided by donations from private foundations and more recently from State membership fees. California's membership fee of \$14,000 was set by the Center's Board of Directors, as in all states, on the basis of population and represents approximately 7 percent of the total State fees requested.

In return for membership fee payment, each state will receive basic services provided by the National Center including copies of current publications of its research and study teams; short-term consultative services; responses to requests for information hard to get elsewhere; judicial salary reports; and various states' views on federal legislation and other national programs affecting the judicial system.

Governor's Office  
SECRETARY FOR STATE AND CONSUMER SERVICES

The Secretary for State and Consumer Services provides communication, coordination, and policy guidance between the Chief Executive and departments within State and Consumer Services and is the "conglomerate" agency of State government. The Secretary is directly responsible to the Governor and has the authority of general supervision over the operation of: the Department of Consumer Affairs, the Department of Veterans Affairs, the Department of General Services, the Office of the State Fire Marshal, the Franchise Tax Board, the State Personnel Board, the Public Employees' Retirement System, the State Teachers' Retirement System, the California Museum of Science and Industry, the California Public Broadcasting Commission, the State Building Standards Commission and pursuant to the Governor's Reorganization Plan No. 1 of 1979, the Department of Fair Employment and Housing.

The Secretary also administers the Intergovernmental Personnel Act Grant Program through the IPA Advisory Council.  
In addition to exercising supervision over the departments of the Agency, the Secretary functions as an advisor to the Governor, a communications link between the Governor and these departments, a coordinator of the activities of these departments and other units of government, and a member of the Governor's Cabinet.

Chapter 1152, Statutes of 1979 (SB 331) revised the membership and duties of the State Building Standards Commission and gives it the responsibility of approving and publishing all building standards adopted by State agencies. Six positions have been added in the current and budget years to implement the provisions of this act. The budget proposes to establish two positions in Fiscal Year 1980-81 to coordinate energy conservation program and address workload increases. In addition, the 1980-81 Budget reflects an increase of 0.5 position over the 1979-80 authorized level. The increase is reflective of one-time reductions pursuant to Section 27.2 of the Budget Act of 1979.

**Governor's Office**  
**SECRETARY FOR BUSINESS AND TRANSPORTATION**

**Program Objectives and Description**

The Secretary of the Business and Transportation is a member of the Governor's Cabinet and the personal advisor to the Governor on policies and programs relative to transportation and business regulatory activities. The Agency consists of the following Departments:

- The California Highway Patrol
- The Department of Motor Vehicles
- The Department of Transportation
- The Office of Traffic Safety
- The Department of Alcoholic Beverage Control
- The Alcoholic Beverage Control Appeals Board
- The Department of Banking
- The Department of Corporations
- The Department of Housing and Community Development
- The Department of Insurance
- The Department of Real Estate
- The Department of Savings and Loan
- The California Housing Finance Agency
- The Department of Economic and Business Development
- The Stephen P. Teale Consolidated Data Center Office

In September, 1979, the Governor signed AB 120 (Ch. 1120, Statutes of 1979) which established the Social Service Transportation Improvement Program. The Agency will be administering the funds for this Program. Two positions have been established in the current year and are proposed now for the budget year to meet increased workload. In addition, with the promulgation of regulations pursuant to the Housing Financial Discrimination Act of 1977 (Chapter 1140, Statutes of 1976), the continued existence of a district Office of Fair Lending is no longer necessary. Accordingly, the Office will cease to exist on June 30, 1980, with the appropriate departments assuming full responsibility for enforcing the Act. Two positions are reduced as a result of this action.

For the list of standard (lettered) footnotes see the end of the Governor's Budget.

# Governor's Office

## SECRETARY FOR HEALTH AND WELFARE

### Program Objectives and Description

The Health and Welfare Agency, the largest of the Agencies within the Executive Branch of State Government, is responsible for administering the State's health, welfare, and social programs. The Secretary of Health and Welfare, a member of the Governor's Cabinet, advises the Governor on major policy and program matters, and oversees the operation of the several departments and offices of the Agency.

*The Secretary's liaison team assists in the policy and program development and implementation processes. Two additional positions and \$64,805 are proposed to adequately perform these liaison functions.*

*The Agency is coordinating the development of the master plan for services to children and youth for submission to the Legislature by July 1, 1980.*

*An administrative adjustment is proposed to transfer one position and \$40,701 to the Department of Mental Health from the Agency's Systems Review Unit.*

The Multipurpose Senior Services Project Unit was established in the Health and Welfare Agency to implement Ch. 1199/77 (AB 998) which provides for a pilot program of services to seniors. The purpose of this pilot is to develop and test effective methods for coordinating and supplementing the various categorically funded social and health services available to the elderly. The fundamental goal of the pilot program is to prevent premature disengagement of older persons from their communities by providing that impaired or frail older persons, who have the capacity to live independently, have access to appropriate social and health services to facilitate their continuance in an independent living setting.

*Effective January 1, 1980, the Governor by Executive Order designated a Special Assistant for Correctional Programs Liaison and established a Correctional Programs Liaison Office. This office will be funded in part by the transfer of staff resources from the Health and Welfare Agency. In the 1979-80 fiscal year, the Agency will contract with the Office to provide two positions. In 1980-81, two positions will be transferred from the Health and Welfare Agency to the Correctional Programs Liaison Office.*

In order to achieve statewide reductions and produce economies per Section 27.2 of the Budget Act of 1979, the Health and Welfare Agency 1979-80 program was reduced by \$47,717.

### Authority

**Governor's Office**  
**SECRETARY FOR RESOURCES**

**Program Objective and Description**

The Secretary for Resources assists the Governor in establishing objectives of the administration and in formulating programs and policies governing the acquisition, development, and utilization of resources to obtain these objectives. Towards this goal the Secretary strives to ensure the protection and balanced management of California's natural resources and environment.

The Resources Agency consists of the Departments of Forestry, Conservation, Fish and Game, Boating and Waterways, Parks and Recreation, and Water Resources, the State Lands Commission, the Air Resources Board, the Colorado River Board, the San Francisco Bay Conservation and Development Commission, the State Reclamation Board, the State Water Resources Control Board, the nine regional water quality control boards, the Solid Waste Management Board, the Energy Resources Conservation and Development Commission, the California Conservation Corps, the California Coastal Commission, the California Coastal Conservancy and Special Resources Programs.

The Secretary for Resources serves as chairman of the Coastal Conservancy, and sits as a member of the Coastal Commission, the San Francisco Bay Conservation and Development Commission, the California Tahoe Regional Planning Agency and the Tahoe Regional Planning Agency. The Secretary is also an ex-officio, non-voting member of the Energy Resources Conservation and Development Commission. In addition the Secretary is responsible for administering the Sea Grant Program, the Open Space Subvention Program, the California Environmental Quality Act, and the Waterways Management Program of the California Wild and Scenic Rivers System.

The Secretary communicates the Governor's policies and program objectives to the organizations within the Resources Agency, and advises the Governor on major policy and program considerations relative to the Resources Agency. The Secretary also represents the Governor in the coordination of Resources Agency programs in relations with other State, federal, and local jurisdictions.

During the 1979-80 fiscal year 1.3 CETA funded positions were added to assist in the coordination of a salmon restoration and watershed rehabilitation program, involving State and federal agencies as well as local Indian tribal organizations, in the area of the Trinity and Klamath Rivers. In addition, one position funded through reimbursements is included for both 1979-80 and 1980-81, to provide agencywide coordination of the Career Opportunity Development (COD) Program. One-time salary savings amounting to 0.8 personnel years occur in 1979-80 as a result of Section 27.2, Budget Act of 1979.

## SECRETARY FOR YOUTH AND ADULT CORRECTIONAL AGENCY

### Program Objective and Description

By Reorganization Plan No. 3, dated December 20, 1979, the Governor proposed that a new agency be established to consolidate the State's youth and adult correctional programs.

The Youth and Adult Correctional Agency will include the Department of Corrections, Department of the Youth Authority, Board of Prison Terms, Youthful Offender Parole Board, Board of Corrections, Correctional Industries Commission, Institutional Review Board, and the Narcotic Addict Evaluation Authority.

The Agency will provide communication, coordination, and budget and policy direction for the Departments, Boards and Commissions.

The new agency will be funded in 1980-81 by the transfer of six positions and associated staff resources from existing programs. The Health and Welfare Agency will provide a professional level position and a secretarial position. The Department of Corrections will provide one professional level position and two clerical level staff. The Department of Youth Authority will provide one professional position.

Pending legislative review of the proposed reorganization, preparation will be underway to develop plans for the new agency. Provided support for the new Agency is given, a decision may be made to implement operation of the Agency in the current year.

## Governor's Office OFFICE FOR CITIZEN INITIATIVE AND VOLUNTARY ACTION

The Office for Citizen Initiative and Voluntary Action was created by Chapter 1195, Statutes of 1978 to advocate and encourage citizen initiative and volunteer action. Positions and funds to establish the Office were transferred from the Governor's Office to this separate budget.

The primary goals of the office are: (1) To foster the spirit of citizen initiative and voluntary action among businesses, industries and individual citizens in the community; (2) To enable adequate communication and collaboration whereby individuals and agencies may converse with each other to initiate new programs or improve existing programs for citizen initiative and voluntary action at the local level; (3) To identify untapped human, technical and material resources that can be mobilized for the public good through citizen initiative and voluntary action; (4) To open up the process of government and social institutions and to provide a common ground for two fundamental concepts, i.e., volunteerism and citizen initiative, to be brought together in mutually supportive relationships as a basis for better service; and (5) To achieve an effective and permanent expansion of citizen initiative and voluntary action in community problem solving and citizen participation in the delivery of government services.

## Governor's Office SOUTHWEST BORDER REGIONAL COMMISSION

### Program Objectives and Description

The Southwest Border Regional Commission is a regional economic development commission established by Congress under Title V of the Public Works and Economic Development Act of 1965 as amended. The Commission, which is made up of the counties of the four states which border Mexico, will attempt to develop a coordinated plan of development for the entire border region. It will adopt a multi-faceted approach to integrate economic development with improvements in the areas of health care services, transportation facilities, educational opportunities and public works programs. California's membership includes Riverside, Imperial and San Diego counties.

The Commission is comprised of five members: the Governor of each of the four states (Texas, California, New Mexico, Arizona) and a federal co-chairman appointed by the President.

The 1980-81 budget proposes a new \$50,000 General Fund appropriation to pay the State's share of the support costs for the Federal Commission's Tucson Office. The amount required for the 1979-80 State contribution is included in reimbursements and was received through contract with the Department of Economic and Business Development.

## Governor's Office OFFICE OF EMPLOYEE RELATIONS

### Program Objectives and Description

The objective of this program is to ensure full communication between the State and elected representatives of State employees regarding wages, hours and other terms and conditions of employment. The ongoing responsibility of the Office is to improve personnel management and employer-employee relations within the State of California.

Effective July 1, 1978, the State Employer-Employee Relations Act (Chapter 1159, Statutes of 1977) established a formal, bilateral process of employer-employee relations. The right to meet and confer in good faith granted to State civil service employees under this Act requires the Office of Employee Relations, in conjunction with departments, to review existing terms and conditions of employment subject to negotiation, to develop management's negotiating positions, to represent management in negotiations with the exclusive representatives of employee representation units and to administer negotiated contracts.

The Director and Staff of the Office of Employee Relations represent the Governor in all matters concerning State employer-employee relations. A basic charge to the Office is to establish and train a unified State management team. The Office of Employee Relations will continue to design appropriate employer-employee relations training and assist all State departments in its delivery.

*The budget year reflects an increase of 0.8 personnel year resulting from the restoration of the one time Section 27.2 reduction made in 1979-80. Office of Employee Relations received a Title II grant of \$500,113 in 1978-79 with an additional \$134,938 available in 1979-80. These Title II funds are no longer available in the budget year and the office will now be fully General Fund supported.*

*The Governor's Reorganization Plan #2 proposes to consolidate various State personnel functions currently located in several State entities, including functions which are currently the responsibility of the Office of Employee Relations. Because the Reorganization Plan is still undergoing legislative and administrative review, specific organizational changes have not been reflected in the Governor's Budget.*

## Governor's Office OFFICE OF PLANNING AND RESEARCH

In amendments to the Government Code relating to State land use planning and the Office of Planning and Research (OPR), the California Legislature found that decisions involving the future growth of the State should be guided by an effective planning process and should proceed within the framework of officially approved statewide goals and policies concerning land use, population growth and distribution, air and water quality, and related physical, social and economic development. The Legislature also found that it is necessary to have one agency responsible for developing State land use policies, coordinating the planning activities of all State agencies, and assisting and monitoring local and regional planning. It recognized OPR as the most appropriate State agency to carry out this statewide land use planning function.

The Office of Planning and Research serves the Governor and his Cabinet as the staff for long range planning and research. The primary responsibilities of the office are: (1) to prepare long range goals and policies for land use, population growth and distribution, urban development, open space, resource preservation, air and water quality, and other factors which shape statewide development patterns and significantly influence the quality of the State's environment; (2) to assist in the orderly preparation of intermediate and short-range functional plans by State departments and agencies; (3) to evaluate plans and programs of state departments and agencies; (4) to assist the Department of Finance in preparing an integrated program of actions to implement State functional plans and to achieve statewide environmental goals and objectives; (5) to operate the State Clearinghouse and coordinate the development of policies relating to the review of applications for federal grants-in-aid and the preparation and review of environmental impact reports; (6) to coordinate the development and operation of a statewide environmental monitoring system; (7) to coordinate State research activities relating to growth and development and the preservation of environmental quality; (8) to coordinate the technical assistance provided by State departments to local and regional planning agencies; and (9) to insure the equitable treatment of Native Americans by government agencies. The Office is also responsible for ensuring compliance with AB 884 (Statutes of 1977) and AB 2825 (Statutes of 1978) relating to the review and approval of development projects.

In order to fulfill these responsibilities, OPR has divided its activities into six program areas: State Planning and Policy Development, Local Government Affairs, Project Review and Coordination, Appropriate Technology, Office of American Indian Coordinator, and Executive and Administration.

IVl. Carry-out an affordable cost housing design competition, with funding from the Department of Housing & Community Development .....	-	\$160,000

## I. STATE PLANNING AND POLICY DEVELOPMENT

### Program Objectives and Description

The California *Urban Strategy* prepared by OPR as an update to the *Environmental Goals and Policy Report* and adopted by the Governor in 1978, directs State and local governments toward a common purpose: the revitalization of existing cities and sound management of new urban development. Since the Governor's endorsement of the *Urban Strategy* and the issuance of Executive Order B-41-78 directing all State agencies to bring their policies, programs, and actions into conformance with the *Strategy*, OPR's land use policy program has been directed primarily toward the implementation of the *Urban Strategy*.

During Fiscal Year 1979-80 OPR developed additional proposals to encourage urban revitalization. The Office also analyzed the impact of Proposition 13 on housing development and developed several proposals which would allow local governments to provide public services for new development. The Office began work in several new areas, including a study of housing displacement and establishment of a Route 2 development corporation to resolve ownership questions in the abandoned freeway corridor in Los Angeles. The Office was instrumental in creating the worksite education program embodied in SB 132, and in setting up the South Los Angeles Economic Development Corporation.

During Fiscal Year 1980-81, OPR will continue to create new initiatives to support the goals of the *Urban Strategy*. It will also continue to work on resolving the development problems arising from Proposition 13. The Office will survey the status of redevelopment districts after Proposition 13, play a major role in coordinating the actions of State agencies involved in the Los Angeles Century Freeway project, and undertake a research project focusing on development issues in the Sierra foothills and similar areas which are experiencing rapid growth.

OPR also will continue its role in State plan and program review to achieve consistency with State goals and priorities and its role of assisting the Department of Finance in the preparation of the Governor's Budget. This will include review of the ARB's State Implementation Plan, areawide wastewater treatment plans, the California Park and Recreation Plan, the Energy Commission's Biennial Report and the ARB's Air Conservation Plan. Through review of these plans and other actions, OPR will encourage the conservation of the state's natural resources and environmentally sound development. OPR will also evaluate the State Health Plan, the Comprehensive Annual Services Program Plan, the Alcohol and Drug Abuse Plan, the Community Mental Health Centers Plan, and will assist in coordinating new programs for controlling toxic materials.

Two positions have been added in the current year and are proposed for continuation in the budget year for completion of special *Urban Strategy*-related studies funded through a HUD Incentive Grant. One position attributed to 27.2 reductions in the current year has been added back in the budget year.

For the list of standard (lettered) footnotes see the end of the Governor's Budget.

II. LOCAL GOVERNMENT AFFAIRS

Program Objectives and Description

When the Legislature eliminated the Council on Intergovernmental Relations in 1975, OPR assumed responsibility for the State's interest in counties, cities, and special districts. OPR's Local Government Unit and the Planning Advisory and Assistance Council, created in 1977, continue to link the interests of citizens and their local governments with State agencies and assists citizens and local officials with land use, planning, fiscal, and organizational issues. Through the adoption of the *Urban Strategy*, OPR has made a significant commitment to working with locally elected officials and their staffs to solve the problems caused by rapid and premature development. After proposition 13, OPR has helped find innovative methods of financing and organizing local governments so that the costs of public services can be reduced.

- OPR's Local Government Affairs Program has five principal objectives:
- (1) To assist citizens and local officials and land use planning and development issues;
  - (2) To assist city and county officials complete their State mandated local general plans;
  - (3) To develop innovative methods of financing and organizing local governments;
  - (4) To analyze and prepare legislation, particularly bills affecting local governments; and
  - (5) To support the work of the Planning and Advisory and Assistance Council.

During the 1979-80 Fiscal Year OPR responded to nearly 4,500 requests for assistance and information regarding land use and development matters and trained more than 400 local planning commissioners and staff in the State Planning and Zoning Law's requirements. OPR also completed its revisions of the advisory General Plan Guidelines and assisted 60 cities and counties with major revisions to their local plans. The staff examined the problems of smaller cities, in cooperation with researchers from the University of California and evaluated area planning commissions and local agency formation commissions for their ability to maintain service levels and reduce costs. In response to the recommendation of the Governor's Commission on Government Reform, the Planning Advisory and Assistance Council encouraged better cooperation between State and local agencies. Although OPR remained as the designated recipient for HUD 701 planning funds, the Department of Housing and Community Development assumed management responsibilities for local 701 grants.

In the 1980-81 Fiscal Year, OPR will continue to assist and train citizens and local officials and will use its advisory General Plan Guidelines to help cities and counties complete or revise their local plans. The Office will pursue revisions to the State Planning and Zoning Law that will simplify planning requirements, while strengthening local general plans, and will continue to explore local governments' fiscal needs and recommend organizational changes. *One-half position was added in the current year only to assist five nonmetropolitan councils of governments in implementing HUD housing and land use elements.*

### III. PROJECT REVIEW AND COORDINATION

#### Program Objectives and Description

In order for the State to achieve its environmental goals and objectives, maintain a healthy economy, and meet the human needs of its citizens, land use decisions must be made with full knowledge of their environmental, economic, and social implications and must be made within a framework that maximizes coordination among levels of government. OPR, through its Project Review and Coordination Program, prepares principles, objectives, and criteria necessary to implement the California Environmental Quality Act; serves as the State Clearinghouse for the purpose of coordinating the review of federal grant-in-aid and federal development projects; manages the environmental review process; ensures the permit and environmental impact reporting processes are carried out in a straightforward, rational manner with minimal delays, and manages the Environmental Data Center to coordinate State agency data collection activities.

The principal objectives of OPR's Project Review and Coordination Program are:

- (1) To ensure that federal expenditures in California are consistent with regional and State goals, objectives and plans;
- (2) To manage the State review of environmental documents and to integrate the environmental impact reporting process with State and local planning and decision-making processes.
- (3) To coordinate State planning activities.
- (4) To identify major development projects of statewide significance and analyze the policy implications and environmental, social and economic impacts.
- (5) To streamline and coordinate State and local permit and environmental review processes by providing a central office to which applicants can turn for assistance, by helping to coordinate environmental review and permit activities, and by encouraging early consultation between project proponents and responsible agencies.
- (6) To provide a focal point for the development of the Administration's policy on Outer Continental Shelf (OCS) oil and gas development and to relate adopted policy to the federal government and to involved industries.
- (7) To eliminate unnecessary duplication and coordinate the collection and storing of environmental data.
- (8) To assist in the development of Administration's policy on federal land planning for the 40 percent (40 million acres) of California land which is included in National Forests, Bureau of Land Management Districts, and National Parks.

During the current year, OPR completed phase I of a review of Clearinghouse functions and began phase II. The review will identify procedural changes needed to improve the efficiency and effectiveness of the State review process for federal grants, environmental documents and State plans. OPR issued a new State Plan Directory, an update of the CEQA Handbook, and a Catalog of Environmental Resource Data. OPR also analyzed proposed major energy production and transportation facilities, encouraged early consultation and review by all responsible agencies, and encouraged the preparation of joint environmental documents which would meet the requirements of local, State, and federal agencies. In addition, the Office of Permit Assistance provided assistance to over 400 permit applicants and worked directly with local governments to aid them in complying with the provisions of AB 884 (Chapter 1200, Statutes of 1977).

During Fiscal Year 1980-81, OPR will continue to analyze major development projects, streamline and improve environmental review and permit processes, ensure that these processes operate smoothly, and seek ways to expedite State regulatory decision-making.

Funding through reimbursement from the Coastal Commission has been added in the current year and is proposed for continuation in the budget year for studying OCS development alternatives and suggesting policy initiatives.

#### IV. APPROPRIATE TECHNOLOGY

##### Program Objectives and Description

In May, 1976, the Governor created the Office of Appropriate Technology (OAT) within the Office of Planning and Research (Executive Order B-18-76). The purpose of the Appropriate Technology program is to assist and advise all State agencies in developing and implementing less costly and less energy intensive technologies in the area of recycling, waste disposal, agriculture, building design, and energy and resource conservation.

During the 1979-80 fiscal year, OAT will complete several major projects which will encourage the application of appropriate technologies in State government operations and promote energy and resource conserving technologies throughout the State. These projects include:

- (1) Completion of the California Energy Commission/Office of Appropriate Technology-sponsored Passive Solar Design Competition.
- (2) Development of the State's Energy Extension service plan and initiation of the first-year program.
- (3) Development of a commercialization program for alcohol fuels, a joint project with the Department of Food and Agriculture, the Energy Commission, and the Business and Transportation Agency.
- (4) Joint sponsorship with the State Water Resources Control Board of a design competition for small alternative wastewater treatment systems for rural areas.
- (5) Assistance to the University of California, Davis in establishing an Aquaculture Development Center.
- (6) Completion of feasibility studies for conservation, comfort conditioning, and/or cogeneration of electricity for Napa, Metropolitan, and Atascadero State hospitals. The Napa project is expected to save the State over \$20 million by providing alternatives to a central refrigerated air conditioning system.
- (7) Development of a new small-scale wind program in cooperation with the Energy Commission.

In addition, the Office of Appropriate Technology continues to assist local governments in establishing solar energy ordinances, and in developing small-scale hydro-electric power generation facilities. During the current year emphasis has been placed on working with State regulatory bodies to eliminate economic and regulatory barriers to local production of energy from renewable sources. OAT is also helping local governments identify funds for local renewable resource development and conservation-oriented housing rehabilitation, and is assisting with local economic development plans that use appropriate, renewable resource technologies.

During Fiscal Year 1980-81, OAT will continue to provide technical and advisory services to State agencies. OAT will assist in securing funds necessary to help finance the construction of award winning small-scale wastewater treatment systems and monitor the wind-electric systems constructed during the current fiscal year. OAT will also begin work on the development of a model urban energy-conserving redevelopment project as part of the Capital Area Development Program, will assist the Farmer's Home Administration and the Department of Housing and Community Development in developing solar and conservation options for low-cost housing, and will continue to assist State agencies in the design and development of energy-conserving capital outlay projects.

7.1 personnel years are added in the current year and continued in the budget year along with 3.9 additional personnel years for 1980-81 for implementation of the California Energy Extension Service, with funding from the Department of Energy. In addition, 2.2 person years have been added in the current year only to reflect additional grant funds received from various sources and 0.2 personnel years relating to one-time Section 27.2 reductions in the current year have been restored in the budget year.

One-year programs, funded through reimbursements from the Departments of Health Services and Housing and Community Development are proposed for the budget year for assessing the feasibility of alternative hazardous waste disposal methods and for carrying out an affordable housing cost design competition.

**V. OFFICE OF AMERICAN INDIAN COORDINATOR**

**Program Objectives and Description**

The Office of American Indian Coordinator was established by Executive Order B-38-77 to insure that Native Americans are receiving equitable treatment from agencies of the State and federal government and to define the relationship between the Indian communities and the State and federal government. To further these objectives, the Office of American Indian Coordinator participated in the following activities during the current year:

(1) Development of new legislation guaranteeing the Indian veteran who resides on a federally recognized reservation the opportunity to participate in the Cal-Vet program.

(2) Publication of a quarterly newsletter and a monthly bulletin to provide timely information to California's Indian communities.

(3) Developing comments on proposed regulations for major federal Indian programs, including the 1978 Amendments to the Older Americans Act and Title IV of the Indian Education Act of 1978.

During the 1980-81 fiscal year the Office of the American Indian Coordinator will:

(1) Compile relevant studies and needs assessments prepared on California Indians by State and federal agencies and by community-based organizations to determine the availability of services to California's Indian population.

(2) Prepare an analysis of the level of California Indian participation in State and federal programs and an analysis of federal funding available for California Indian programs.

(3) Develop recommended State policies which address the social and economic conditions of California Indians.

(4) Assist the Office of Criminal Justice Planning in developing a recommended State position regarding State jurisdiction over criminal and civil matters on Indian reservations, as permitted by Public Law 280, 67 Stat. 588.

**Governor's Office**  
**OFFICE OF PLANNING AND RESEARCH—Continued**

**VI. EXECUTIVE AND ADMINISTRATION**

**Program Objectives and Description**

This program provides executive leadership and administrative services to the program divisions within OPR. The director determines policy directions for the Office and works with the Governor, Cabinet and Legislature and with local, State, and federal officials on matters of concern to the Office and the Administration. The administrative function provides services necessary for the daily operation of OPR. Major administrative functions include personnel, affirmative action, training, purchasing, reproduction, budgeting, federal grant management, contracts, and financial management. In addition, a reorganization made effective in 1979 transferred responsibility for reference, information, and publications services to the Administrative Unit. *1.5 personnel years have been added in the budget year, funded primarily from reallocating funding for contractual services, for graphic arts and word processing assistance.*

## Governor's Office OFFICE OF EMERGENCY SERVICES

The principal objective of the Office of Emergency Services (OES) is the coordination of emergency activities to save lives and reduce property losses during disasters and to expedite recovery from their effects.

On a day-to-day basis, OES provides leadership, assistance and support to State and local agencies in planning and preparing for the most effective use of Federal, State, local and private sector resources in emergencies. This emergency planning is based upon a system of mutual aid, in which a jurisdiction relies first on its own resources, then calls for assistance from its neighbors. OES plans and programs are coordinated with those of the Federal government, other states, and the State agencies and political subdivisions of California.

OES functions as the immediate staff and coordinating organization of the Governor to carry out the State's responsibilities under the Emergency Services Act and applicable Federal statutes and it acts as the conduit for Federal assistance through natural disaster grants and Federal agency support.

### Authority

Government Code, Section 8550 et seq. Government Code Section 8610.5

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Emergency Mutual Aid Services .....	\$45,403,539	\$57,574,775	\$58,088,574
II. Administration .....			
Distributed .....	(712,706)	(759,207)	(909,565)
III. Fixed Nuclear Power Plant Planning .....	-	318,970	700,830
TOTALS, PROGRAMS .....	\$45,403,539	\$57,893,745	\$58,789,404
Reimbursements .....	-18,945	-3,000	-3,000

General Fund .....	2,155,556	2,692,961	3,322,270
Nuclear Planning Assessment, Special Account .....	-	318,970	700,830
Federal funds .....	43,229,038	54,878,814	54,763,304
Personnel years .....	105.7	105	113

### SIGNIFICANT PROGRAM CHANGES

Program Description	Personnel Years	Dollars
Ia. Personnel and Administration funding .....	-	\$311,000
Ic. Toxic Materials Planning .....	3	\$95,612
Id. Emergency Equipment Purchase (Toxic Materials) .....	-	\$199,770
III. Fixed Nuclear Powerplant Planning .....	4	\$700,830

### I. EMERGENCY MUTUAL AID SERVICES

#### Program Objectives and Description

This program's objective is to achieve and maintain operational readiness at all levels of government, including provision and effective use of Federal, State, and local resources by and for the benefit of jurisdictions whose resources and services are overextended in a disaster situation.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program cost .....	78.9	78	75.3	\$45,403,539	\$57,555,101	\$57,914,508
Workload adjustments .....	-	1	9	-	19,674	174,066
Totals, Emergency Mutual Aid Services .....	78.9	79	84.3	\$45,403,539	\$57,574,775	\$58,088,574
General Fund .....				2,155,556	2,692,961	3,322,270
Federal funds .....				1,773,190	2,180,950	1,853,391
Federal funds (local assistance) .....				41,455,848	52,697,864	52,909,913
Reimbursements .....				18,945	3,000	3,000

#### Program Elements

a. Provision and coordination of mutual aid ....	22	23.1	24.3	\$42,379,971	\$53,829,330	\$54,122,937
b. Development and utilization of emergency communications systems .....	12.6	14.7	14.7	1,035,547	1,349,735	1,415,036
c. Development and implementation of emergency plans .....	32	29.5	33.5	1,358,539	1,643,785	1,653,569
d. Management and maintenance of State mutual aid resources .....	12.3	11.7	11.8	629,482	751,925	897,032

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

**Governor's Office**  
**OFFICE OF EMERGENCY SERVICES—Continued**

**a. Provision and Coordination of Mutual Aid**

OES maintains fallout protected emergency operating centers at its headquarters and in each of four mutual aid regions. These operating centers are the focal points through which emergency information is disseminated to affected areas, operations coordinated, mutual aid assistance provided, and intelligence gathered for the Governor and his staff.

In addition to various communications facilities, specialized equipment is prepositioned throughout the State, to be made available to local governments in support of mutual aid agreements.

OES administers Federal programs that provide funding for disaster relief and contributions for civil defense equipment and personnel and administrative expenses.

Chapter 290, Statutes of 1974, placed the administration of the Natural Disaster Assistance Act with the Director of OES. Chapter 369, Statutes of 1979, provides funds to pay airplane maintenance costs for airplanes owned by the Civil Air Patrol.

One Office Assistant II position which was limited term to expire on June 30, 1980, has been continued on a limited term until June 30, 1981, to support the personnel and administrative expenses function for state agencies and local jurisdictions. 0.5 Staff Data Processing Systems Analyst and 0.5 Office Assistant II positions have been added in 1979-80, for the FIREScope project to work with U.S. Forest Service personnel in the programming of an on-line computer in the 1979-80 F.Y. and to assume operational functions in the 1980-81 F.Y. These positions will be continued full time in the budget year. One Steno has been added to the Federal Emergency Management Division in the 1980-81 F.Y. to assist in the processing of claims to the federal government for assistance in Federally declared disaster areas. In addition, 0.8 person years have been reallocated in the budget year to program I.c as a result of workload adjustments.

Output	1978-79	1979-80	1980-81
Mutual aid equipment resources dispatched (fire, rescue, law enforcement, and communications) .....	5,300	5,300	5,410
Law enforcement intelligence (interviews, exchanges, and direct liaison) .....	1,000	1,000	1,000
Federal matching funds for personnel and administrative expenses: Federal funds disbursed .....	\$1,725,315	\$2,227,864	\$2,460,093
Federal contributions for civil defense equipment and training: Federal funds disbursed .....	286,048	420,000	449,820
Federal excess property loaned out for civil defense purposes .....	(486,909)	(52,150)	(-)
Federal disaster relief: Federal funds disbursed .....	39,444,485	50,000,000	50,000,000
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>
Expenditures .....	22	23.1	24.3
	1978-79	1979-80	1980-81
	\$42,379,971	\$53,829,330	\$54,122,937

**b. Development and Utilization of Emergency Communications Systems**

The Federal National Warning System (NAWAS) extends to the California terminal at OES headquarters and to 41 key points throughout the State. Interstate emergency communications are also provided through the Federal Emergency Management Agency's national radio communications equipment.

At the State level, a local government radio system using State microwave facilities provides a communications tie with local governments and selected State agencies for primary direction and control purposes in disaster situations; a fire services radio network provides an emergency communications system for interdepartmental fire communications during mutual aid operations; the California Law Enforcement Radio System serves as a backup for the NAWAS and for the Department of Justice California Law Enforcement Telecommunications System; a private line teletype system interconnects six of the OES regional operating centers, the Governor's Emergency Operating Center and OES headquarters.

Output	1978-79	1979-80	1980-81

Expenditures .....	12.6	14.7	14.7
	1978-79	1979-80	1980-81
	\$1,035,547	\$1,349,735	\$1,415,036

**c. Development and Implementation of Emergency Plans**

The element's objectives are to review and recommend revisions to the Governor's orders and regulations, the State emergency plan and supporting plans, and community emergency plans; to assist State agencies and local governments in the preparation of emergency plans to ensure consistency in planning at all levels of government; to maintain and update emergency operating manuals and assist in the preparation of subject matter for training courses and test exercises; and administration of the Dam Safety Act, Chapter 780, Statutes of 1972.

**Governor's Office**  
**OFFICE OF EMERGENCY SERVICES—Continued**

**Output**

Changes in State government organization and other factors require continuing revision of the State Emergency Plan, and supporting plans including the Governor's executive and administrative orders to State departments. A periodic review of local plans and annexes for compatibility with the State plan is also required. Approximately 460 plans or orders are written, revised, or reviewed periodically.

During Fiscal Year 1978-79, OES issued revised State Agency Administrative Orders, revised and published the State Nuclear Power Plant Emergency Response Plan, and issued the State Earthquake Prediction Response Plan, Damage Assessment Plan for Building Officials, Equipment Rental Plan for Disaster Operations, and State Radiological Intelligence Plan. In addition a new Governor's Executive Order and several new State Agency Administrative Orders were developed and issued during this fiscal year. In Fiscal Year 1980-81 OES will continue participating in the preparation of the new State Disaster Medical Care Plan and State Public and Environmental Health Plan. Guidance will be issued for local Medical and Health, Direction and Control/Emergency Operating Center, Procurement and Supply annexes and In-Place War Emergency plans.

*Two Emergency Services Coordinator II positions which were limited term to expire on June 30, 1980, have been extended to develop the statewide Emergency Medical Mutual Aid system and they will expire on June 30, 1981.*

*One Project Specialist III, one Hazardous Substance Specialist and one Office Assistant II are established, to expire on June 30, 1981, to develop a statewide Emergency response plan for hazardous/toxic materials and to develop and manage a central hazardous substance notification and reporting system. One position has been added in the budget year as a result of a reallocation of 0.8 person years from program I.a and 0.2 person years from program II.*

Dam Safety Program (Ch. 780, Stats. 1972):	1978-79	1979-80	1980-81
Inundation maps submitted and processed .....	6	10	10

Expenditures.....	32	29.5	33.5	\$1,358,539	\$1,643,785	\$1,653,569

**d. Management and Maintenance of State Resources**

The State has procured a stock of emergency equipment which has been prepositioned throughout the State. This includes fire pumpers, communications vehicles, portable radio transceivers, police support equipment, and portable aluminum water pipe, as well as installed communications equipment.

The State also maintains and controls a stock of radiation detection equipment and emergency water/power equipment provided by the Federal government. One-tenth person year has been reallocated to this program, from program II and is added in the budget year.

*A one time appropriation of \$199,770 is being provided in the 1980-81 F.Y. for purchase of 30 kits of specialized equipment to be used in responding to accidents involving hazardous materials. This equipment will be strategically prepositioned throughout the state to provide an emergency response time of one-half hour to areas of significant population size and one hour to remote areas along principal routes of transportation.*

**Output**

This program includes continuing inspection, inventory, and maintenance of prepositioned fire, law enforcement and water/power equipment, as well as servicing and exchange each year of about one-fourth of the 14,600 radiation detection instrument kits on loan to Federal, State and local agencies.

State and Local Fire and Law Enforcement Resources:	1978-79	1979-80	1980-81
Inspections, inventory, and maintenance.....	469	650	750

**Governor's Office**  
**OFFICE OF EMERGENCY SERVICES—Continued**

**II. ADMINISTRATION**

**Program Objectives and Description**

Achievement of the overall objectives of OES requires a systematic process of program development, management and direction. This includes leadership and policy determination in the conduct of emergency activities throughout the State; internal guidance and control in management of the Agency's functions; and office services and administrative support for day-to-day operations.

Two organizational units are grouped under this program: (1) Executive: responsible for adoption of departmental policy, direction of ongoing programs, organizational administration, and public information; and (2) Personnel and Office Management: personnel, fiscal administration, accounting, and office services. A modest program to replace and upgrade office equipment is being continued. Two positions attributed to 27.2 reductions in the current year have been added in the budget year and 0.2 person years have been reallocated to program I.c and 0.1 person year to program I.d.

Emergency mutual aid services .....				- 712,706	- 759,207	- 909,565
Net Totals, Administration .....				-	-	-

**III. Fixed Nuclear Powerplant Planning**

**Program Objectives and Description**

The Office of Emergency Services as designated by the addition of Section 8610.5 of the Government Code (Chapter 956, Statutes of 1979) will, in consultation with the State Department of Health Services and affected counties, investigate the consequences of serious nuclear powerplant accident for each of the four nuclear powerplants in California with a generating capacity of 50 megawatts or more. This study will include the preparation of specific site maps showing the areas likely to be affected by such an accident.

As a result of this study OES will revise its Nuclear Powerplant Emergency Response Plan and will assist local authorities in preparing or upgrading their emergency response plans to reflect its new planning guidelines.

Funding is to be provided by the operators of the four existing nuclear powerplants having a generating capacity of 50 megawatts or more, not to exceed the sum of two million dollars (\$2,000,000).

Section 8610.5 will remain in effect until January 1, 1983 unless a later enacted statute which is chaptered on or before January 1, 1983, deletes or extends such date.

During the current year, one Project Specialist III, one Project Specialist II and one Secretary position have been added to begin implementation of the provisions of this urgency act. One Office Assistant II is proposed to be added in the budget year to provide additional clerical support.

## Governor's Office

## OFFICE OF EMERGENCY SERVICES—NATURAL DISASTER ASSISTANCE FUND

## Program Objectives and Description

The objective of the program is to provide aid to local agencies for repair and restoration of public real property in stricken areas in time of disaster and to provide assurance that all public facilities will be restored and provide the necessary service to the citizens of the affected areas.

The Natural Disaster Assistance Act was established by Senate Bill No. 1614 (Chapter 290) approved by the Governor May 31, 1974. This law charged the Director of the Office of Emergency Services with the administration of the program and requires that a local agency must declare a "local emergency" which must be found acceptable to the Director of OES to establish the local agency's eligibility.

The law established the Natural Disaster Assistance Fund made up of two accounts—the Street and Highway Account and the Public Facilities Account. State funding is provided based on an established statutory formula under each of these accounts. On the Street and Highway Account, funds are made available to a local agency only after the damage caused by the natural disaster exceeds 3% of the local agency's prior year Highway Users Tax apportionment. On the Public Facilities Account, funds are made available to a local agency when the damage exceeds one-half of one percent of the total revenues of the local agency less any funds received from a federal or state agency.

Funds appropriated in past years which have exceeded the cost of the program are available in both accounts and are maintained in the Surplus Money Investment Fund drawing interest. Funds in the Public Facilities Account have been made available in past years by appropriation from the General Fund. Funds in the Street and Highway Account are available as a result of the one cent additional tax collected under the Highway Users Tax during 1969.

## Authority

Item 446.7, Budget Act of 1958; Chapter 20, Statutes of 1965; Chapter 27, Statutes of 1965 as amended by Chapter 131, Statutes of 1966 and Chapter 8, Statutes of 1967; Chapter 52, Statutes 1969; Chapter 10, Statutes 1970; Chapter 8, Statutes 1971; Chapter 1284, Statutes 1972; Chapter 624, Statutes 1973; and Chapter 290, Statutes of 1974.

**I. GENERAL ACTIVITIES**

**Program Objectives and Description**

The Lieutenant Governor serves on the three-member State Lands Commission which oversees leasing and control of millions of acres of State-owned land, including the vital offshore oil resources. He heads the Commission of the Californias, an organization of California and Mexico citizens devoted to improving cultural and economic ties and goodwill between California and Mexico.

He also serves on other boards and commissions handling State problems such as land use planning, interstate cooperation and disaster preparation. He serves on the Board of Regents of the University of California and on the Board of Trustees of the State College and University System. He also handles special assignments and special tasks as assigned by the Governor.

\$9,452 is being proposed in 1980-81 for a one-time expenditure for equipment. A one-time reduction of one position in 1979-80 reflects the provisions of Section 27.2, Budget Act of 1979.

**Authority**

Constitution, Article IV, Section 6; V, 9, 10; IX, 9. Government Code Sections 8000, 8575, 8700, 13502; Education Code, Section 22600; Motor Vehicle Code, Section 2600; Public Resources Code; Section 6101, Governor's Executive Orders.

## OFFICE OF THE LIEUTENANT GOVERNOR—Continued

## II. CALIFORNIA ADVISORY COMMISSION ON YOUTH

## Program Objectives and Description

The objectives of the Commission are: (1) to coordinate information regarding youth activities in California; (2) to foster greater involvement of youth in all areas of government; (3) to encourage the formation of local youth commissions and councils; (4) to assist existing youth commissions and councils with efforts to aid their effectiveness; (5) to serve as the advisory group on youth affairs to the State Legislature and the Executive Branch of government, making such recommendations as the Commission may find necessary and desirable to carry out the purpose(s) for which it was created; (6) to conduct forums on areas of concern to the youth of California in which various governmental and nongovernmental agencies and community organizations may be invited to participate; (7) to study the problems, activities and concerns of the youth of the State of California.

The Commission was created by Chapter 557, Statutes of 1978, effective January 1, 1979. The Lieutenant Governor has the responsibility for administering the activities of the Commission.

The Commission shall be composed of a minimum of 15 members, selected and appointed by the Lieutenant Governor, representing as closely as possible youth throughout the State geographically, ethnically, by sex and by population. Commissioners must be residents of California and not older than 25 years of age.

The 1978-79 budget contained half-year funding for the Commission. The first full year of operation will be 1979-80.

*Beginning with 1980-81 the Lt. Governor is proposing that State General Fund support for the Youth Commission be eliminated. The Lt. Governor is planning to modify the Youth Commission's objectives and seek private funding beginning July 1, 1980. Any overhead costs will be absorbed by the General Activities portion of this budget.*

## III. YOUTH TRAINING FEASIBILITY STUDY

## Program Objectives and Description

The Youth Training Feasibility Study (YTFS) was a Department of Labor funded study to research the employment needs of young people in Madera and Humboldt Counties, and develop a rural youth employment training program. The study focused on the unemployment problems in the two areas and the potential for jobs within the existing economy. Consideration was also given to developing economies and new industry potentials.

The study, conducted by the Office of the Lieutenant Governor, resulted in a proposal being submitted to U.S. Department of Labor (DOL). The Department of Labor granted the program, Rural Youth Employment, to the Lieutenant Governor's Office in August of 1978 and which was subsequently transferred to the Department of Social Services by Executive Order D-3-78 issued in December, 1978.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	0.4	-	-	\$10,214	-	-
Federal funds .....				10,214	-	-

## IV. RURAL YOUTH EMPLOYMENT

"The Rural Youth Employment (RYE) program was established by a Department of Labor grant to minimize unemployment problems specific to rural areas. The program, a pilot project, focuses on Madera County, though its application to other rural areas is feasible.

The purpose of RYE is to furnish training and support services to meet specific employment needs, interests and potential ability of eligible persons. Persons 16 to 24 years of age (secondary consideration will be given to older applicants 25 to 30 who have been outside of the mainstream of society) who are economically disadvantaged, unemployed or underemployed will be eligible. The goal is to matriculate approximately one hundred and twenty-five (125) persons. RYE will provide specialized training in farm machinery operation and maintenance, auto mechanics, office skills, welding, and small engine repair.

The program is a cooperative approach between the Office of the Lieutenant Governor and the County of Madera. The flexibility of the program allows it to share instructional and facilities costs with existing programs. The RYE program is the result of the Youth Training Feasibility Study. *Federal funds have been provided for the RYE program through December 31, 1979, when the program will terminate. The termination of the RYE program in the current year reflects a reduction of eight positions for 1980-81.*

## Program Objectives and Description

Objective of this Commission is to cooperate with official Mexican delegations from the States of Baja and Baja California Sur in the development of mutually beneficial projects in the areas of: (1) agriculture and livestock—its growth and development; (2) economic plans and projects; (3) U.S.-Mexico-California tourism; (4) bilingual education; (5) social and cultural affairs; (6) environmental protection; (7) fish and navigation; (8) drug abuse; and (9) public health.

A major emphasis of this international endeavor is that of working on positive projects that leave benefits for both Mexico and the United States. Day-to-day efforts concentrate on the development and growth of the three-state organization by making better use of existing human, technical, cultural, and economic resources from both sides of the International Border.

The work of the commission is carried out by a dedicated cadre of volunteer American and Mexican delegates.

*An Intergovernmental Personnel Act grant for the Marine Resource Training Project expires Fiscal Year 1979-80.*

## DEPARTMENT OF JUSTICE

The constitutional office of the Attorney General, as chief law officer of the State, has the responsibility to see that the laws of California are uniformly and adequately enforced. This responsibility is fulfilled through the diverse programs of the Department of Justice.

The objectives of the Department of Justice are as follows. First, to provide skillful and efficient legal services on behalf of the people of California. To this end, the Attorney General represents the people in all matters before the Appellate and Supreme Courts of California and the United States; serves as legal counsel to State officers, boards, commissions and departments; and assists district attorneys in the administration of justice. Second, to provide skillful and efficient support to efforts to enforce the laws of California. In accomplishing this objective, the Department of Justice coordinates efforts to address the statewide narcotic enforcement problem; assists local law enforcement in the investigation and criminalistic analysis of crimes; provides person and property identification and information services to criminal justice agencies; and supports the telecommunications and data processing needs of the California criminal justice community. Third, to aggressively pursue those other projects and programs which are designed to protect the people of California from fraudulent, unfair and illegal activities. The Attorney General's special efforts to prosecute organized criminal activity conducted in California, and to coordinate and maximize the crime prevention efforts of the State's communities are examples of activities which accomplish this objective.

During the past twelve months under the new Attorney General, the Department of Justice has undergone a number of organizational and programmatic changes. These changes, which are addressed in more detail below, have streamlined the structure of the Department by consolidating certain management responsibilities, and have emphasized those projects and programs which contribute greatly to the accomplishment of the objectives outlined above.

### SUMMARY OF PROGRAM REQUIREMENTS

### I. EXECUTIVE/SPECIAL PROGRAMS

#### Program Objectives and Description

The Executive/Special Programs area of the Department of Justice consists of the Attorney General's Executive Office, which maintains overall direction and administration of the diverse programs and projects of the Department. It also consists of those special program areas which are outside the major divisions of the Department of Justice and under the direct control of the Attorney General and the Chief Deputy Attorney General. These programs include the Legislative Unit, the Opinion Unit, the Crime Prevention Center, the Special Prosecutions Unit, the Public Inquiry Unit and the Affirmative Action Office.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

DEPARTMENT OF JUSTICE—*Continued***a. Executive Office**

The Attorney General, the Chief Deputy Attorney General and their top-level assistants and support staff make up the Executive Office of the Department of Justice. Overall direction and administration of the Department are accomplished from the Executive Office.

**b. Legislative Unit**

The Attorney General's Legislative Unit provides assistance in aggressively pursuing the enactment of laws which protect the interests and safety of the people of California. This unit coordinates analysis of legislation affecting the department and represents the Attorney General and the Department of Justice in matters before the Legislature. It administers the legislative studies program and provides analogous services relating to Federal Legislation. It serves as the liaison between the Department and the criminal justice community regarding legislative matters.

**c. Opinion Unit**

This unit carries out the Attorney General's duty under Government Code Section 12519 to provide opinions in writing to designated public officers upon questions of law relating to their respective offices. All opinion requests directed to the Attorney General are sent to the Opinion Unit. The Unit was established during the 1978/79 fiscal year. By concentrating the departmental resources devoted to writing Attorney General's opinions, this unit has resulted in a more effective and efficient opinion preparation process.

**d. Crime Prevention Center**

The Attorney General's Crime Prevention Center conducts a public education effort to coordinate and promote a unified, innovative and effective crime prevention program throughout California. The Center seeks to maximize cooperation between governmental agencies and an informed public to reduce all categories of serious crime, with particular emphasis on violent crime. The Center prepares, publishes and distributes model crime prevention programs, technical materials and assistance, legal, news media and public education pamphlets, books and materials, and other documents to local governments, police departments, sheriff's offices, and school districts, as well as multijurisdictional or statewide fraternal, professional, civic and community service organizations. Crime prevention subject areas covered include efforts to reduce residential burglary, rape, child abuse, spousal abuse, juvenile crime, business and construction site crime, commercial burglary, school vandalism, theft and violence, arson, auto theft, fraud and crimes against the elderly. A program to develop environmental alteration and design to reduce crime is also underway. The Center's primary effort is directed at unifying and leading California's effort to reduce crime through citizen enlightenment and involvement.

**e. Special Prosecutions Unit**

*The Special Prosecutions Unit was established during 1979/80. The unit concentrates attorney and investigator resources of the Department of Justice to fulfill the Attorney General's statutory responsibility (Government Code Section 15025) to prosecute individuals and groups involved in organized criminal activity.*

*The organized, multijurisdictional nature of an ever-increasing element of criminal activity creates the need for special efforts in the investigation and prosecution of that activity. The statewide responsibility and perspective of the Attorney General make him and the Department of Justice uniquely qualified to bring special efforts to bear on these crime problems. The Special Prosecutions Unit constitutes such an effort. The specific objective of the Special Prosecutions Unit is to investigate and prosecute criminal acts carried out by recognized, organized crime groups, such as syndicated crime organizations, prison gangs, outlaw motorcycle gangs, and terrorist groups. The unit also investigates and prosecutes major drug traffickers who are involved in statewide or multijurisdictional criminal activity. Any criminal activity of an organized, multijurisdictional nature is a potential target for investigation and prosecution by the Special Prosecutions Unit.*

*Although this is a newly created program, it will be funded and staffed within existing resources. Accordingly, six attorneys from the Criminal Law Division and 14 special agents from the Division of Law Enforcement are being transferred along with necessary clerical support to the Executive/Special Programs Division to create a total staff of 30.1 positions.*

**f. Public Inquiry Unit**

This is the Department's central unit for responding to written and telephone inquiries from the public and other governmental agencies. It is the unit's responsibility to review complaints and respond to California residents on matters concerning statewide violations of law; direct individuals to the appropriate governmental agencies having statutory authority over specific types of grievances; and assist the Attorney General's legal staff in determining which patterns of business activity require action by the office. The unit also maintains and coordinates a central index file which assists local law enforcement agencies throughout the State in the investigation and prosecution of consumer and business frauds.

**g. Affirmative Action Office**

This unit is responsible for assisting the Attorney General and departmental management in achieving and maintaining a balanced workforce which proportionately includes minorities, women and disabled persons at all levels within the Department.

## DEPARTMENT OF JUSTICE—Continued

## II. CIVIL LAW

## Program Objectives and Description

The Civil Law division provides legal representation and advice to the various agencies, departments, boards, and commissions of the State. This division is also responsible for the investigation and prosecution of investment fraud, the registration and review of all charitable trusts, the investigation of complaints to ensure the constitutional rights of individuals, and the enforcement of environment laws in unregulated or inadequately regulated areas.

This program's objectives are to maintain uniform and adequate enforcement of the laws of the State and to protect the citizens' interests by providing expert and efficient legal services.

The legal authority for this program is found in Article V, Section 13 of the California Constitution, as well as various sections of the Government Code including Section 11042, 11043, 11157, 11522, 12511, 12512, and 12519.

This budget reflects several major organizational changes to the legal services program of the Civil Law division. The division now includes the public resources, land law, environment law, charitable trust, escheat and constitutional rights functions which were part of the now abolished Special Operations division. The Civil Law division was further restructured to form seven law sections with the client and program responsibilities described below. For continuity, the program element, output, and input information below refers to former law sections which have been absorbed within the current seven section organization.

The budget for this division reflects a shift in funding support for the legal services provided to the Department of General Services and the Department of Water Resources. These two major clients are now billed for legal services and the costs of these services have been shifted from the General Fund to reimbursements in the budget year. The 1980-81 budget for the Department of Justice, Civil Law Program, is being reduced in the amount of \$1,000,000. This action is taken in response to the Attorney General's recent reorganization of the Department of Justice which resulted in the dismantling of the environment section and the redirection of those resources to accomplish other efforts. This reorganization has resulted in an inability on the part of some resource and environment-related departments to secure the necessary and timely legal services required in the enforcement of laws protecting the environment. In the interest of allowing the Attorney General sufficient flexibility to accommodate this adjustment, within the Civil Law Program, the adjustment is identified as a single line item appearing as "Unidentified Savings." A corresponding increase of \$1,000,000 is proposed in the 1980-81 Department of Water Resources budget to secure by contract the necessary environment-related legal services.

## a. Licensing Section

The Licensing section provides legal representation to agencies within the Department of Consumer Affairs. It is the responsibility of this section to protect the people of the State from unprofessional or deceptive conduct by various professionals and businesses.

Representation includes giving informal advice to clients and providing legal representation to statewide regulatory agencies in the Federal and State trial and appellate courts. This section prosecutes administrative trials to deny, revoke, or suspend a professional or business license and in appropriate cases, obtains restitution on behalf of financially injured consumers. The Licensing section seeks court injunctions to protect the public's health, safety and welfare from immediate threats, to stop repeated illegal acts by licensees, and to prevent unlicensed practice. The section also works to rectify Medi-Cal abuses on behalf of the Department of Health Services. The Licensing Section includes an increase of five attorney positions and four clerical support positions to meet the increased workload for the Department of Consumer Affairs, primarily from the Board of Medical Quality Assurance. These costs are also supported by reimbursements. In addition, revised salary savings requirements result in a decrease of 1.3 positions for the budget year.

## b. State Government Section

The State Government section represents six State constitutional officers and in excess of 30 State agencies. Among its clients are the Governor, Lieutenant Governor, Controller, Treasurer, Secretary of State, the Department of Finance, Department of General Services, State Personnel Board, California Highway Patrol, Department of Motor Vehicles, Department of Corrections, California Youth Authority, Department of Alcoholic Beverage Control, and California Horse Racing Board. The types of legal work addressed by this section include issues arising from the appointment of judicial or executive branch officers, the legality of expenditures by State agencies, the construction of public works, the acquisition of goods and services, the disciplining of State employees, the application of motor vehicle laws, and the application of privacy laws.

When requested, the section represents the Secretary of State in election litigation. The section also prepares titles and summaries on all initiative measures circulated or placed on the ballot.

The State Government section represents the State's interests in probate and escheat matters, and is also responsible for the protection of charitable gifts. The Registry of Charitable Trusts is a unit of the State Government section. The law requires charitable trustees and charitable corporations, with certain exceptions, to register and file periodic financial reports. It is the Registry's duty to audit the periodic reports and forward questionable reports to the legal staff for appropriate action. Revised salary savings requirements result in a decrease of 0.7 personnel years for the budget year.

DEPARTMENT OF JUSTICE—*Continued*

## c. Business and Tax Section

The Business and Tax section provides legal advice to, and represents in litigation, agencies administering laws designed to protect the public in their business transactions and the safekeeping of their funds. These departments are the Department of Insurance, Banking, Corporations, Real Estate, and Savings and Loan. Legal opinions on financial bonds of the State and its agencies are also given.

This section represents State taxing agencies in collection actions as well as in refund matters and property tax actions in which the validity or application of a tax statute is challenged. Advice on tax matters to the Legislature, State agencies and appropriate county officials is often rendered.

Legal services are also provided to agencies administering fair employment and fair housing laws and other programs of the Department of Industrial Relations.

It is the responsibility of the Business and Tax section to maintain a continuing investigation of statewide investment frauds and assist district attorneys in the prosecution of persons engaged in fraudulent investment schemes.

*Revised salary savings requirements result in a decrease of 0.2 personnel years in the budget year.*

## d. Health, Education, and Welfare Section

This section provides legal services to the State agencies concerned with health, education and welfare. Services include extensive litigation in Federal and State trial and appellate courts, administrative proceedings, informal advice, drafting or approving proposed legislation and regulations. Litigation includes complex constitutional issues of national importance.

This section provides services to the various departments within the Health and Welfare Agency including the Departments of Health Services, Social Services, Mental Health, Developmental Services, Rehabilitation, Alcohol and Drug Abuse, and Aging, and to the Office of Statewide Health Planning and the Advisory Health Council. The section's major clients also include the Department of Education, the State University and Colleges, the Community Colleges, the Employment Development Department and the California Unemployment Insurance Appeals Board.

*In the current year, one attorney and 0.8 support positions are administratively established to provide legal services to the Nursing Home Administrator's Board and one legal assistant is administratively established to meet the health facilities licensing workload. In addition, workload adjustments and revised salary savings requirements and changes in the allocation of legal support personnel result in a decrease of 0.8 personnel years for the budget year.*

## e. Environment Section

The Environment section provides legal services to and assures uniform and adequate enforcement of laws administered by the departments and agencies which it represents. These departments and agencies are responsible for enforcing and administering laws and programs for the State's public resources. These resources include agricultural products, fish, wildlife, water and water quality, air, timberland, and lands owned and used by the public for recreation and wildlife protection purposes. The field of agricultural products includes the administration and enforcement of marketing regulations and protection of these products to assure their wholesomeness and availability to the consuming public. This section is also responsible for water rights litigation on behalf of all agencies of the State, and for the Attorney General's program for protection of the environment.

*In the current year, two attorneys and 1.6 support positions are administratively established to meet the additional workload requirements of the Water Resources Department concerning water rights litigation in the Sacramento-San Joaquin delta. In addition, workload adjustments and revised salary savings requirements result in a decrease of 0.8 personnel years for the budget year.*

## f. Land Section

The Land section handles all litigation and other legal services arising from the administration of State-owned lands by the State Lands Commission; from the regulatory activities of the Division of Oil and Gas, the Geothermal Resources Board, the California Coastal Commission, the six Regional Coastal Commissions, and the California Tahoe Regional Planning Agency, and from the programs of the California Coastal Conservancy, and the Santa Monica Mountains Zone Land Acquisition Program (formerly Santa Monica Mountains Comprehensive Planning Commission).

This section also handles matters relating to any public rights in lands arising by implied dedication. Especially affected by this doctrine are littoral lands, including 3,400 miles of frontage on tidal waters and 1,400 miles on navigable, nontidal waters. By statutory mandate, the component establishes the criteria for the Department of General Services to determine whether such public rights exist in lands proposed for State acquisition. Over \$180,000,000 in appropriations are affected by these criteria and investigations and review by this section.

The legal services provided by this component include legal matters arising from regulation of development within the State coastal zone and at Lake Tahoe.

These services also include real estate and oil and gas matters relating to lands under the jurisdiction of the State Lands Commission. These lands consist of 4,000,000 acres (about 6,400 square miles) of tide and submerged lands and lands underlying navigable rivers and lakes and 600,000 acres (over 900 square miles) of lands in the public domain granted to the State. The value of these lands, including minerals and timber therein, is estimated at \$12 billion. Annual revenues therefrom aggregate over \$28,500,000 plus additional annual net revenues of \$85,500,000 per year from the Long Beach Tidelands, and constitute the State's largest source of nontax revenue.

*This section will add two attorney positions plus 1.8 clerical support for the legal representation of the California-Tahoe Regional Planning Agency in both the current year and budget year. The cost of these services will continue to be supported by reimbursements from the client agency. In addition, revised salary savings requirements result in decrease of 0.3 personnel years for the budget year.*

## g. Tort and Condemnation Section

The Tort and Condemnation section is responsible for the preparation for trial, and trial or settlement of (1) tort and civil rights actions filed against the State or its employees involving highways and vehicle accidents of State-owned vehicles, except those of the Department of Transportation, (2) condemnation matters for the principal departments of the State except for the Department of Transportation, and (3) actions against the State for damage to property, such as inverse condemnation actions. Most of the trial work is jury trial work. Appellate work is also handled. The section supervises investigations, renders advice to the State Board of Control and makes appearances before that Board in connection with claims filed against the State.

The section handles all litigation for the Public Employees' Retirement System and the State Teachers' Retirement System.

This section defends the Subsequent Injuries Fund. It is also charged with the responsibility of representing the State in the Death Without Dependents Program, a program which seeks to collect for the State those workers' compensation benefits when a worker dies without dependents as a result of an industrially caused death.

*For the budget year, eight attorneys plus 6.4 clerical support are added to the Tort and Condemnation Section. Of these, three attorneys are needed for the litigation associated with the land acquisition program of the Department of Parks and Recreation, and five attorneys are needed to represent various client agencies in the defense of tort and inverse condemnation lawsuits. The costs of three of these eight attorney positions are supported by the redirection of existing General Fund resources of the Department while the other five attorneys are supported by reimbursements from the Special Fund agencies they serve. Revised salary savings requirements result in a decrease of 0.7 personnel years in 1980-81.*

DEPARTMENT OF JUSTICE—*Continued*

## III. CRIMINAL LAW

## Program Objectives and Description

The Criminal Law Division represents the State in all criminal matters before the appellate and supreme courts. This division also performs the Attorney General's duties with regard to assisting the district attorneys in cases for which they are disqualified, assisting the Commission on Judicial Performance, enforcing the Political Reform Act, advising the Governor on extradition matters, enforcing the antitrust laws, assisting local agencies in the protection of the public from fraudulent and unethical practices, and prosecuting criminal actions involving Medi-Cal provider fraud.

The primary objectives of this program are to maintain uniform and adequate enforcement of the laws of the State and to protect the public by providing expert and efficient legal services. The legal authority for this program is found in Article V, Section 13 of the California Constitution, in Government Code Section 995, 996, 12511, 12512, 12550, 83116, 91001(a), and 91003, and in Penal Code Sections 1256 and 1548.3.

This budget reflects several major organizational changes to the legal services programs. The Criminal Division now includes the antitrust and consumer law functions which were part of the now abolished Special Operations Division.

d. Grant Projects .....	58.3	69	100	1,753,159	2,725,328	4,136,393

## a. Appeals, Writs, Trials and Other Constitutional Duties

The Criminal Law division carries out the Attorney General's duty to represent the people on all appeals filed by criminal defendants in the California Courts of Appeal and Supreme Court. The division also represents the State and its officers in actions in both State and Federal trial and appellate courts in which writs of habeas corpus, mandate, prohibition and coram nobis are sought by prisoners or defendants in criminal cases. When the United States Supreme Court grants review in any of these cases, division attorneys represent the people and officers of California in the high court.

The duty of the Attorney General to assist district attorneys is performed by lawyers of the Criminal Law division. The attorneys of the division act for the district attorneys in cases in which the district attorneys are disqualified or unable to perform their official duties. The attorneys of the division are also responsible for the prosecution of all crimes committed by prisoners in custody in the State prisons whenever any district attorney makes an election to transfer this responsibility to the Attorney General. Criminal Law division lawyers also defend the State and its officers in actions filed by State prisoners under the Federal Civil Rights Act.

Criminal Law division attorneys investigate misconduct by judges at the request of the Commission on Judicial Performance and present evidence of such misconduct to special masters, the Commission and the California Supreme Court. The enforcement of the criminal provisions of the Political Reform Act of 1974 is also the responsibility of the Criminal Law division. Criminal Law division attorneys review all extradition requests before action by the Governor.

The budget proposes an increase of ten attorney positions and eight clerical positions for prosecuting crimes committed by prisoners in State prisons pursuant to Penal Code Section 4703.

In addition, three attorney positions with 2.4 clerical support are proposed for workload increases of appeals, writs, and trials. These positions are supported by the redirection of the Department's existing General Fund resources.

Two legal assistant positions with one clerical position are proposed for the increased workload of the Child Support Enforcement Program. The costs of these positions are fully reimbursed by the client agency, the Department of Social Services.

In addition, revised salary savings requirements and changes in the allocation of legal support personnel result in a decrease of 5.7 personnel years for the budget year.

## b. Antitrust Section

The Antitrust section of the Criminal Law division has the authority and obligation to enforce the antitrust laws in order to foster and protect our free enterprise system. This section brings both criminal prosecutions and civil actions. Antitrust attorneys bring actions to recover treble damages suffered by government agencies and the public as a result of price fixing and other anti-competitive activities. In addition to recovery of treble damages, identifiable costs involved in the investigation and prosecution are also recovered.

## DEPARTMENT OF JUSTICE—Continued

## c. Consumer Law Section

The Consumer Law section of the Criminal Law division files lawsuits against businesses engaged in unlawful, unfair or deceptive practices which adversely affect consumers. In these lawsuits, consumer law attorneys seek injunctive relief, civil penalties, restitution and any other relief unique to the particular problem involved.

Attorneys in this section of the Criminal Law division are actively investigating and obtaining prosecutions and injunctions against persons who engage in unlawful and fraudulent practices in the home mortgage and lien foreclosure areas.

Attorneys in the section draft consumer legislation and give advice on pending consumer legislation. The section also works with other local, State and Federal prosecutorial agencies to help solve consumer problems in the marketplace.

## d. Grant Projects

## d.1. Medi-Cal Fraud Units

The Medi-Cal Fraud unit of the Criminal Law division, operating with 90 percent federal funding assistance, has a staff of attorneys, investigators and auditors who investigate and prosecute cases of fraud committed by the providers of Medi-Cal services and supplies under the auspices of government aid programs. Attorneys of this unit also follow up cases with administrative agencies and civil attorneys to insure continued rigorous attention to a case involving a convicted Medi-Cal provider.

Thirty-four (34) additional positions are proposed for the Medi-Cal Fraud Unit program at a General Fund cost of \$144,239. The balance of funds, or 90 percent, is provided by the federal government. These funds are being provided with the requirement that quarterly reports are provided to the Governor and the Legislature on the number of prosecutions, convictions, and dollars recovered can be evaluated to determine the effectiveness of the Unit. The total Medi-Cal Fraud Unit will be 90 positions at a cost of \$3.9 million.

## d.2. Computerized Litigation Support

This federal grant project provides training to district attorneys within the State on antitrust enforcement. Advanced antitrust training is provided to the staff of the Antitrust section. The development of a computerized litigation support system will upgrade the ability of the Antitrust section to handle complex cases requiring the storage and retrieval of large amounts of information.

A shift in program emphasis will result in a decrease of three personnel years for this grant program in the budget year.

## IV. LAW ENFORCEMENT

## Program Objective and Description

The Division of Law Enforcement provides efficient and effective statewide services, technical and special investigative training, statistical and communication services and selected special operational investigations. The division also works to suppress the traffic in narcotics and dangerous drugs and to identify and prevent infiltration of organized crime.

The division was reorganized in June, 1979 into two branches, a consolidated data center and an executive office to enhance its efficiency and effectiveness. The reorganization consisted of the following major changes:

- The Investigative Services Branch (ISB) is now the Forensic Services Bureau (FSB) and a part of the newly named Investigations and Enforcement Branch (IEB).
- The Organized Crime and Criminal Intelligence Branch (OCCIB) is now the Bureau of Organized Crime and Criminal Intelligence (BOCCI) and a part of the Investigations and Enforcement Branch.
- The Special Services Section has been combined with the Bureau of Criminal Statistics in the newly named Criminal Identification and Information Branch (CIIB).
- The Bureau of Identification (BID) is now the Bureau of Criminal Identification (BCID).
- The Department's Training Center is now under the direction of the Division of Law Enforcement's Executive Office.

The Investigations and Enforcement Branch supports other law enforcement agencies through investigative assistance, liaison and training, special investigations, specialized criminalistics and other technical services, and by gathering and disseminating information about organized crime. The Criminal Identification and Information Branch provides identification services on individuals and property along with information, including statistics, relative to crime and delinquency. The Law Enforcement Consolidated Data Center provides data processing to the Department and telecommunications services to the entire California criminal justice community.

f. Grant projects .....						

## a. Executive

The Division of Law Enforcement Executive Office is responsible for administration of the Division of Law Enforcement, which includes the planning, organizing, directing, coordinating, and facilitating of law enforcement activities in the Department of Justice.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	(4.8)	(4)	(4)	(\$2,724,207)	(\$2,888,426)	(\$2,946,374)

## DEPARTMENT OF JUSTICE—Continued

## b. Training Center

The Executive Office is also responsible for the administration of a Training Center which coordinates and manages the interdepartmental training programs and provides a centralized location for training local criminal justice and law enforcement personnel.

*The current year reflects four positions which were administratively established. Two of these are for the certification of tear gas training programs and two for indirect costs of contract administration. Revised salary savings requirements result in an increase of 1.8 personnel years in the budget year.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	27.1	27.2	25	\$1,117,245	\$1,222,047	\$1,144,571

## c. Investigations and Enforcement

The Investigations and Enforcement Branch serves as the investigative and enforcement arm of the Attorney General. It is composed of four bureaus that seek to ensure uniform enforcement of California laws by providing a broad range of investigative, analytical and forensic services to local law enforcement agencies throughout the State.

An Internal Affairs unit is responsible for conducting internal investigations, for investigating serious allegations of misconduct by departmental employees, and for conducting security inspections of the various department occupied facilities.

A Facility Security unit provides security to the Division of Law Enforcement, 3301 "C" Street facility in Sacramento. The types of services offered by the Division of Law Enforcement, coupled with the confidential types of information and intelligence maintained and stored by the division's branches, require internal and external security of the division's 3301 "C" Street facility in Sacramento in order to adequately protect the division's personnel and property.

The branch is also responsible for the maintenance and operation of the Department of Justice radio communications network.

Special agents within the Bureau of Investigations provide field investigative assistance to local enforcement agencies in the investigation and prosecution of major crimes. These investigations are of extreme importance to the community and often involve multijurisdictional offenses. Other investigations are conducted as directed by the Attorney General, upon the request of the Governor, Legislature, or State agencies. Many cases are investigated for other State agencies on a reimbursement basis. Special agents in this function also conduct investigations of claims made against State agencies to prevent fraud and undeserved payments. In addition, investigations are conducted and assistance rendered to local agencies in the areas of consumer and investment fraud.

The Bureau of Narcotic Enforcement is responsible for bringing its statewide interjurisdictional capabilities and expertise to bear upon the complex problems of multijurisdictional narcotic dealers, clandestine drug manufacturers, and licentiate violators in the medical and pharmaceutical professions. This is accomplished through the coordination and management of multijurisdictional narcotic enforcement groups; coordination and management of multi-agency investigations; investigation of major conspiracies and intrastate multijurisdictional traffickers; investigation of clandestine laboratories; monitoring and investigation or professionals licensed to dispense drugs; providing narcotic enforcement training; consultation on specific narcotic enforcement cases; short-term undercover agent support; and the analysis and dissemination of information and intelligence.

The Bureau of Narcotic Enforcement is responsible for the administration of the triplicate prescription system which prevents the diversion of licit supplies of narcotics into illicit channels. The bureau also operates the California Narcotic Information Network (CNIN). The CNIN is an organization formed to promote the exchange of information and criminal intelligence not available through regular police channels in relation to narcotics trafficking.

The Bureau of Forensic Services provides criminalistics and related forensic science services to sheriff, police, coroner, district attorney, State and local law enforcement departments, and the courts of California. The specialized forensic services furnished include the examination and analysis of physical evidence, questioned documents and latent fingerprints, as well as photography services and polygraph examinations.

The State began furnishing forensic science laboratory services to law enforcement agencies and the courts on a limited scale in 1931. Since 1971, a system of regional and satellite laboratories has been established using Federal funds made available through the Office of Criminal Justice Planning and the Governor's Office of Traffic Safety. Under these federally funded programs, full-service regional laboratories were opened in Redding, Santa Rosa, Sacramento, Modesto, Fresno, Salinas, Santa Barbara and Riverside. These facilities are continuing to meet the needs of their local communities. Their chief task is to process, examine, analyze and compare a wide variety of physical evidence, to interpret the significance of the scientific findings to law enforcement agencies, and to provide expert testimony in the courts.

A satellite, or limited service laboratory program, devoted mainly to blood-alcohol and controlled substances analysis with facilities in Oroville, San Rafael, Stockton, San Luis Obispo, and West Covina, was also started in 1971. This program helps meet the needs of the California Highway Patrol and other police agencies engaged in the enforcement of traffic laws. Every county in the State is now equipped to carry out the provisions of the implied consent law concerning analytical tests for driver impairment caused by alcohol and/or drugs.

Senate Bill No. 1127 was enacted in September of 1978 to provide reimbursement funding for the Blood/Breath Analysis Program. AB 1324 (Chap. 849/79) will allow the bureau to continue this service to the criminal justice system through June 30, 1981, when the program will be reevaluated.

Forensic services in addition to criminalistics, are provided in the fields of questioned document analysis, latent fingerprint examination, polygraph examination and photographic services to the entire criminal justice system. Because of the increasing requirements for services in the far reaches of the State, some of these services are being provided at regional laboratories through the assignment of personnel qualified to carry out these duties.

Additionally, for approximately four years the bureau has been researching the applicability of automation to the identification of latent fingerprints. As a result of that research, an Automated Latent Print System (ALPS) was acquired in Fiscal Year 1978/79. This system should greatly enhance the services currently provided to the California law enforcement community.

The Bureau of Organized Crime and Criminal Intelligence (BOCCI) provides the State-level support, leadership and coordination required to develop an effective criminal intelligence system based on mutual cooperation of State, regional, local, and out-of-state law enforcement agencies. The bureau operates under the authority of the Government Code. Article 2 specifically covers the purposes and duties of the bureau under Sections 15024, 15025, and 15028, as follows:

1. to gather, analyze, and store intelligence pertaining to organized crime;
2. to provide this intelligence to local, State, and federal law enforcement units;
3. to provide training and instruction to assist local and State law enforcement personnel in recognizing and combatting organized crime;
4. to provide a research resource of specialized equipment and personnel to assist local, State, and Federal agencies in combatting organized crime;
5. to conduct a continuing analysis and research of organized crime in order to determine current and projected organized crime activity in California;
6. to initiate and participate in the prosecution of individuals and groups involved in organized crime activities.

## DEPARTMENT OF JUSTICE—Continued

The report of the Governor's Select Committee on Law Enforcement Problems, which was submitted to the California Legislature in August, 1973, in reference to organized crime in California, further outlines the function of the State. Six categories are noted for a successful program to combat organized crime. They are (1) to perform continual analysis to determine the nature and scope of organized crime as it changes; (2) to establish a central repository of reliable information about organized crime; (3) to develop a standard organizational pattern of organized crime units; (4) to maintain a mutual assistance program; (5) to conduct training courses for specialists in organized crime; and (6) to provide liaison with Federal, State, and local agencies.

The Bureau of Organized Crime and Criminal Intelligence of the Department of Justice is engaged in all these activities and works constantly to improve and expand its efforts and effectiveness. This operation also provides criminal intelligence to the Governor's Emergency Planning Council consisting of representatives of the Governor's Office, the Department of Justice, the California Highway Patrol, the Office of Emergency Services, and the California Military Department.

This bureau carries on a continuing program to determine and analyze the nature, characteristics, magnitude, and trends of organized crime in California. The basis is thus provided for the development of indicators of the presence of organized crime, tactical plans to combat priority organized crime areas, and strategic plans for the prevention of organized crime. Following is a description of the major activities of the bureau.

Specialized training programs covering matters relating to criminal intelligence gathering, analysis and dissemination are continually developed, resulting in the upgrading of knowledge and capabilities of law enforcement for effectively combatting organized crime.

A pool of specialized investigative equipment is maintained for loan to local law enforcement agencies. These equipment items are financially out of reach for most local agencies and would not otherwise be available to them. The equipment is used in investigations of fraud, bribery, narcotics, conspiracy, arson, vice, armed robbery and murder. A group of specialists provides technical assistance and training in the use of the equipment.

The bureau is the law enforcement clearing house for all types of criminal intelligence. Information is received for criminal intelligence processing and for crime analysis, and is correlated with existing information, analyzed and disseminated in the form of criminal intelligence to Federal, State, and local agencies. This is information not usually obtainable through regular police channels. A staff of criminal intelligence agents is responsible for gathering information and for establishing and maintaining liaison and communication links in a continuing move toward making the Department of Justice the central support and coordinating agency for the entire state. Dissemination of criminal intelligence is accomplished in a variety of forms and methods of distribution, including telephone, teletype, individual reports and letters, regular and special bulletins, computer terminals, personal contacts, and regional meetings.

The bureau furnishes administrative support for the nationwide Law Enforcement Intelligence Unit (LEIU) through the central coordinating section, which has responsibility for controlling the data base (LEIU subjects), developing, producing and disseminating LEIU subject cards, publication of regular and special bulletins, and coordination of various meetings.

For the budget year, 9.6 limited-term positions are proposed to provide security for Phase I of the new Justice building. The 9.6 proposed new positions have been spread to the elements as follows: Bureau of Narcotic Enforcement (3.5), Bureau of Investigations (2.5), Forensic Services Bureau (2), and Bureau of Organized Crime and Criminal Intelligence (1.6). Also, revised salary savings requirements result in a net increase of 4.8 personnel years in the budget year which are spread as follows: Bureau of Narcotic Enforcement (1.9), Bureau of Investigations (1.8), Forensic Services Bureau (.8), and Bureau of Organized Crime and Criminal Intelligence (.3).

Totals .....	\$16,396,889	\$18,290,296	\$19,062,721

**d. Criminal Identification and Information**

The Criminal Identification and Information Branch is comprised of four main components: the Executive Office, the Field Services Section, and Bureau of Criminal Statistics and Special Services, and the Bureau of Criminal Identification. All serve to provide identification and criminal information services to all law enforcement agencies. The Executive Office is the administration function of the branch, providing policy and direction to all branch activities.

The Field Services section provides training to local criminal justice personnel, coordinates division programs, supports the Attorney General's field activities, implements new projects, identifies and resolves problems with local agencies, and provides feedback in a manner which will allow the Division of Law Enforcement to react to the changing requirements of the criminal justice system. The Criminal Records Security unit within the Field Services section is responsible for preventing misuse of criminal offender record information and protecting the citizens' right to privacy. The Criminal Records Security unit performs the following functions: (1) provides legislatively mandated records security training to user agencies' personnel; (2) develops, implements, and maintains the California plan for complying with federal security and privacy regulations; (3) audits user agencies for compliance with state and federal privacy and security regulations; (4) provides technical assistance in the area of records security to local and state user agencies.

The Bureau of Criminal Statistics and Special Services is organized into four functions: Administration; Criminal Statistics Program; Command, Communications, and Compliance Programs; and the Automated Systems Program.

The Administration section directs, plans, and coordinates the activities of two major functions which include 24-hour-a-day, seven-day-a-week command and communication centers, automated systems, registration files, and compliance with licensing and regulatory services; directs the development, implementation, and maintenance of criminal justice statistical reporting systems; and directs preparation of statistical analytical reports and publications describing crime and the criminal justice system in the State of California.

The Criminal Statistics Program compiles, analyzes, interprets, and reports statistical facts on crime and delinquency, and the processes of criminal justice administration in California. To accomplish this, the bureau collects data from city, county, and state agencies that administer criminal justice. These agencies represent all levels of the criminal justice system including courts, prosecutors, corrections, and enforcement agencies. Annual reports and responses to special requests for data are made to the Governor, the Legislature, criminal justice agency administrators, and others concerned with crime and delinquency and the effectiveness of agencies that administer criminal justice.

The Command, Communications, and Compliance Program—on a 24-hour-a-day basis—processes teletypes and provides record information to authorized agencies; coordinates the National Law Enforcement Telecommunications System (NLETS) for California; acts as the California control terminal for the National Crime Information Center; monitors the sale of concealable firearms; issues licenses and permits for possession of tear gas, destructive devices and dangerous weapons; controls the issuance of non-exempt license plates to law enforcement agencies; maintains special files on arsonist releases, sex registrants, narcotic registrants, missing persons, unidentified deceased, child abuse, non-automated property, etc.

The Automated Systems Program has management control over the Stolen Vehicle System, Automated Firearm System, Automated Property System, and the Wanted Persons System. The Automated Systems Program performs the administrative functions necessary for the Department of Justice to carry out its responsibility as the National Crime Information Center's California control terminal.

## DEPARTMENT OF JUSTICE—Continued

The Bureau of Criminal Identification is organized into five major entities: Bureau Administration, Fingerprint program, Record Analysis and Processing program, Record Control program, and Special Projects /California Parent Locator Services Program. However, the objectives of the bureau are accomplished through programs that cross organizational lines. These programs are: Criminal Identification, Noncriminal Identification, On-going Purge, and Failure to Provide, plus support to programs in Special Services.

The Fingerprint program classifies, searches, and verifies fingerprints submitted by law enforcement, licensing, and regulatory agencies. Also, the Automated Fingerprint Project, which will provide an alternative to the manual processing of fingerprints, is under the direction of the Fingerprint program.

The Record Analysis and Processing program encodes source documents such as fingerprints, dispositions, and probation flash notices received from criminal justice agencies and enters this information into the criminal history record. This program is also responsible for creating, updating, and verifying non-criminal records and entries which makes it possible for the bureau to provide subsequent arrest information to authorized agencies.

The Record Control program maintains and operates the record folder file which contains the manual master criminal record and supporting documents for the Criminal Records System. It also maintains and operates a name index providing access to the folder and fingerprint files. Additionally, the Record Control program maintains an ongoing purge effort which reviews records at specified times and purges them in accordance with record retention criteria established by the Attorney General. The Quality Control section, which is a part of the Record Control program, scans incoming criminal/applicant fingerprints and arrest disposition documents. Errors are identified and resolved before being forwarded to the next appropriate section for processing within the bureau. Court orders and correspondence regarding record sealings, dismissals, and deletions are also processed by this program.

The Special Projects/California Parent Locator Service program is responsible for obtaining, compiling, and disseminating information from official records which can be useful in locating absent parents whose whereabouts are unknown. Additionally, this program is responsible for coordinating the activities relating to the 1981 Automated Criminal History/Adult Criminal Justice Statistical System, coordinating the implementation of an automated name index to both the manual and Automated Criminal History System, coordinating with local agencies who have or are developing automated systems which interface in some manner with the Automated Criminal History System, and providing staff services to the Bureau of Criminal Identification.

*Revised salary savings requirements result in an increase in the budget year of 1.8 personnel years in the Bureau of Criminal Statistics and Special Services and 5.8 personnel years in the Bureau of Criminal Identification.*

Output	1978-79	1979-80	1980-81

## e. Consolidated Data Center

Chapter 787, Statutes of 1972, established the Law Enforcement Consolidated Data Center as one of four proposed data centers in State government. Division Order No. 73-19 officially established the Law Enforcement Consolidated Data Center (LECDC) on May 21, 1973, to enhance the ability of operating criminal justice agencies to combat crime and criminality; to reduce the multiplication of effort expended to maintain like criminal justice information in many agency files at all levels of government; and to develop a systematic method of getting complete, accurate criminal record information to the user in time to be useful for the critical decisions relating to arrests, prosecution, court proceedings, and detention.

The Law Enforcement Consolidated Data Center consists of Administration, Communications Administration Section, and the Automated Information Services Bureau, which work as a closely coordinated team to implement and maintain the Criminal Justice Information System (CJIS), equipment and service vendors and users and potential users of CLETS/CJIS, and administer the California Law Enforcement Telecommunications Systems (CLETS). The LECDC is responsible for all DOJ automatic data processing and telecommunications activities related to the statewide CLETS/CJIS Systems and internal departmental administrative data processing activities. The major objectives are to increase the effectiveness of justice administration in California by providing an up-to-date, accurate, centralized criminal justice information data base; to provide a telecommunications system adequate to meet the needs of law enforcement agencies throughout the State; to reduce turnaround time in responding to requests for criminal justice information from minutes, hours, and days to seconds, and minutes; to provide centralized data processing services to all organized components of the Department; to provide ready access to the central information source for all criminal justice agencies (large and small), thereby eliminating the need to proliferate the same data in many files throughout California; and to protect the rights and privacy of individuals by placing strict security and confidentiality controls on criminal justice information.

Law Enforcement Consolidated Data Center administration plans, organizes, and directs all phases of the Law Enforcement Consolidated Data Center and administers all activities related to the CLETS/CJIS network, including computer operations, system analysis and design, programming, and data entry; analyzes and makes recommendations regarding proposed legislation affecting criminal justice processes and coordinates the data processing and related activities of the Department of Justice; represents the Department and the State in local, regional, and federal criminal justice information sharing programs; acquires, reviews, and processes information in the commission of administering the California Law Enforcement Telecommunications System (CLETS) and the Criminal Justice Information System (CJIS); provides expert technical and operational knowledge of CLETS/CJIS network; communicates daily on an ad hoc basis with all CLETS/CJIS interfacing elements; and responds to both short-range and long-range activities which influence the CLETS/CJIS network.

DEPARTMENT OF JUSTICE—*Continued*

The Communications Administration section coordinates with all federal, state, and local law enforcement entities interfacing with the CLETS and CJIS environment; develops plans and policies for CLETS/CJIS; provides consultation to CLETS Advisory Committee and CLETS/CJIS programmer/analyst staff; develops technical guidelines, standards, and long-range and operational plans for CLETS/CJIS programs; and provides technical and operational advice, policies, practices and procedures to users and potential users of CLETS/CJIS.

The Automated Information Service Bureau manages the planning, design, implementation, operation, and enhancement of all LECDC automated programs. The performance of this function involves the following activities:

Operations support provides the operation of three computer centers and data transcription service, evaluates and makes recommendations regarding data processing equipment and production services, and acts as operational liaison between DOJ computer operations and other interfacing computer systems.

Administrative support administers to the needs of the Automated Services Bureau and, in part, of the Law Enforcement Consolidated Data Center, including systems analysis, staff support services, programmer/analyst support, pool administration, training, clerical support, property and supplies control, and personnel transactions.

Technical support (a collection of interrelated, highly technical data processing functions) provides services in the area of software, telecommunications, and data base administration.

Applications support sections provide for design, implementation, and maintenance of both on-line data base and off-line batch applications; prepares program and project budgets, allocates personnel and equipment resources; organizes project teams as necessary to provide data processing services for user programs; and maintains primary responsibility for the success of data processing programs provided to interdepartmental units and other statewide criminal justice agencies.

*The expiration of 21 limited-term positions for the EDP conversion project is reflected in the budget year. Ten of these will be reestablished for one year only. Three new positions are proposed to implement the consolidation of the DMV telecommunications workload into DOJ CLETS. In addition, revised salary savings requirements will result in an increase of 4.5 positions in the budget year.*

Output	1978-79	1979-80	1980-81
CLETS (Total) .....	139,374,649	144,949,635	150,524,621

## f. Grant Projects

For the projects shown below, with the exception of the Automated Name Index, 40.6 positions have been established in the current year of which 17.3 are proposed for continuation in the budget year. This reflects the various termination dates of these projects.

## f.1. Automated Fingerprint Project

This project is to determine the feasibility of: (1) microfilming the master file of fingerprints; (2) a computerized file search; (3) an automated retrieval system. It includes an automated latent print system which uses a computer assisted search in conjunction with the latent fingerprint analyst's expertise to rapidly scan a file of known offenders. *The current year includes two administratively established positions.*

## f.2. Drug Diversion Investigative Unit (DIU)

This project forms a multiagency drug diversion investigation unit to investigate and reduce the incidence of drug diversion from legitimate channels. The agencies involved are: Federal Drug Enforcement Administration, State Department of Justice, Consumer Affairs, and the Board of Pharmacy.

## f.3. Criminal Record Purge

The criminal record file maintained by the Department of Justice has never been purged and contains the fingerprints of nine million persons with five million of these persons also having a record folder. In January, 1974 the Attorney General established criminal record purge and retention criteria. This program will institute these criteria and reduce the above files by approximately 50 percent.

## f.4. Offender Based Transaction Statistical System (OBTS)

The OBTS system is being developed by utilizing a method of uniquely identifying everyone arrested, then tracing their passage through the systems, recording pertinent information about each transaction during the process. OBTS is needed to assess criminal justice activities in order to meet any criminal justice standard which may be developed as a result of the National Advisory Commission on Criminal Justice Standards and Goals.

## f.5. Western Regional Training Institute

This project continues the Regional Organized Crime Training Center, an ongoing activity which expands California's organized crime training program. It extends the benefits of training in the investigation and prosecution of organized criminal activity to law enforcement officers within California and throughout the nation.

## f.6. Forensic Procedure for the Presence of Marijuana in Blood

This extension of the "Marijuana Incidence in Impaired Drivers" Federal grant will focus on developing a program for training law enforcement personnel in proper roadside screening and blood sampling procedures, and establishing a statewide blood-marijuana assay service. *The current year reflects four temporary Student Assistants during the data gathering phase which is not present in the budget year.*

## DEPARTMENT OF JUSTICE—Continued

## f.7. Property Recovery

This pilot project is designed to identify and recover stolen office equipment by means of an automated system utilizing industry repair record data. The current year reflects full-year staffing. Decreasing federal funding support results in 6.5 personnel year reduction in the budget year.

## f.8. Sinsemilla

Potent marijuana called sinsemilla is being commercially cultivated in Northern California's rural counties and distributed in a new type of statewide distribution system which is posing unique enforcement problems for both local and state law enforcement agencies. This project will initiate an intensive program to identify and eradicate major sinsemilla crops, cultivators, and cooperatives.

## f.9. California Witness Protection Program

This project enables the Department of Justice to make funds available to law enforcement agencies for the protection of witnesses in those cases which do not meet criteria of other programs. The current year reflects full-year staffing. Decreasing Federal funding support results in a 0.7 personnel year reduction in the budget year.

## f.10. Intoxilyzer Purchase and Retrofit Program

This project is for the retrofit of existing and purchase of additional intoxilyzer equipment used in breath-alcohol testing.

## f.11. Marijuana Incidence in Impaired Drivers

This study will determine the incidence of marijuana use in a highly suspect stratified population of motorists, subjectively judged to be intoxicated upon arrest. This represents an initial attempt to define problem limits and to provide statistics.

## f.12. Automated Name Index (ANI) Project

This proposal provides for expanding the Automated Criminal History System to include all names and personal description information on subjects for which DOJ has records by converting the existing Manual Soundex Name File to an Automated Name Index (ANI) System. The project will require 13.3 person years in 1979-80 and 40.0 person years in 1980-81. The budget year reflects full-year staffing, resulting in a 26.7 personnel year increase over the current year.

## V. ADMINISTRATION

## Program Objectives and Description

The direction and management of projects and programs of the complexity and diversity of those of the Department of Justice creates significant administrative needs. These administrative support needs are met by the Financial Management Branch and the General Administration Branch of the Department of Justice.

The Financial Management Branch is responsible for meeting the fiscal and business services needs of the Department's operating unit. Development and maintenance of the departmental budget is coordinated by the Budget Office. Allotment and expenditure information control is the responsibility of the Accounting Office. The equipment, facilities, and support services needs of the Department are met by the Business Administration Office. Special fiscal related problems are dealt with by the Fiscal Analysis Unit.

The General Administration Branch is responsible for meeting the other administrative support needs of the Department of Justice. Development and maintenance of the departmental personnel management system is coordinated by the Personnel Office. Implementation of employer-employee relations guidelines is coordinated by the Labor Relations Office. Studies and evaluations of departmental programs and issues are conducted by the Management Services Section. Secretarial, general clerical, and office management support to the legal services programs of the Department of Justice is provided by the Legal Support Services Section. One position is proposed to manage and maintain the Department's centralized vehicle pool. The cost of this position is supported by the redirection of existing General Fund resources.

The budget year also includes 23.4 new legal support positions which are distributed to the new legal divisions as described earlier. Revised salary savings requirements result in a decrease of 0.8 personnel years for the budget year.

DEPARTMENT OF JUSTICE—*Continued*

## VI. LEGISLATIVE MANDATE

## Program Objectives and Descriptions

Section 2231(a) of the Revenue and Taxation Code requires the State to pay local governmental units the cost of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973.

Marijuana Destruction—Chapter 952/76 relates to the destruction or obliteration of records of courts and public agencies of convictions for possession of marijuana and arrests for possession of marijuana not followed by conviction occurring prior to January 1, 1976. This mandate affects counties and cities. Those entities having law enforcement agencies and courts may incur costs in the destruction or obliteration of records as prescribed in Chapter 952, Statutes of 1976.

Dental Record File—Chapter 462/78 relates to having dental examinations conducted on dead bodies when all other identifying data has failed and with obtaining dental examinations records of all persons missing more than 30 days. This mandate affects cities and counties. Those entities having found dead bodies or reported missing persons may incur costs in the dental examinations of dead bodies and obtaining dental records of missing persons as prescribed in Chapter 462, Statutes of 1978.

## STATE CONTROLLER

The State Controller is the elective State fiscal officer. As such the primary objectives of his office are: to provide sound fiscal control over receipt and disbursement of public funds; to report the financial operations and conditions of the State and local government; to assure that money due the State is collected and to provide equitable, effective and economical tax administration; to provide fiscal assistance and guidance to local government; to administer the State's unclaimed property laws; and to serve as a member of fiscally oriented State boards and commissions.

The powers, duties and functions of the State Controller embrace (1) those expressed in the Constitution (Article XVI, Section 7), (2) those inherent in the nature of his office, though not so expressed, (3) those unquestionably essential to the efficient operation of his office, and (4) such additional powers, duties, or functions as the Legislature may confer or impose upon him.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81

## I. FISCAL CONTROL

### Program Objectives and Description

The primary objectives are: to maintain an effective system of internal control over the State's financial transactions through effective auditing and disbursing techniques; to report promptly and accurately the State's financial condition and operations to assure the fiscal integrity of State government; and to provide timely financial information to the Legislature and public.

The major activities of the Divisions of Accounting, Audits, Disbursements and Personnel Payroll Services are integrated into a system of internal control over the receipt and use of State, federal and other public moneys in the State Treasury. Agency documents are reviewed to determine the purpose for which the money may be used and to verify the program, fund or account prior to authorizing the deposit or transfer of funds. Agency claims against the Treasury are office audited for legality prior to disbursement, supplemented by field audit where necessary. All deposits, transfers and withdrawals are recorded in EDP control accounts, and a determination is made that there is an available appropriation and sufficient cash in the appropriate fund to pay each claim. The preparation and distribution of warrants to payees is the final link in the integrated claim and warrant process. Reports stating the State's financial operations and condition are issued periodically.

## STATE CONTROLLER—Continued

## a. Control Accounting

Control accounts are maintained for all funds and appropriations in the State Treasury and for the centralized State treasury trust system. Cash management is performed for all funds investing through the Surplus Money Investment Fund Program including the Local Agency Investment Fund. This unit also initiates the transfers of money for loans to and from the General Fund on the basis of cash needs and loan authorizations. Both control and detailed accounts covering investments made from various State funds and from treasury-pooled money, as well as interest-bearing bank deposits, are maintained. Education Code requirements as to repayments by school districts of State school building aid loans are also administered under this element. *Two and one-half positions are permanently reestablished in the current year and the budget year to process accounting documents associated with the Federal Trust Fund.*

Output	1978-79	1979-80	1980-81
Receipts issued .....	36,194	37,000	37,700
Transfers, journals and canceled warrant reports .....	65,073	67,400	68,700
Claims processed .....	245,209	250,100	255,100
Treasury trust deposits .....	\$200,862	\$204,900	\$209,000
Treasury trust account transactions .....	\$22,596,860	\$23,050,000	\$23,500,000
<b>Input</b>			
Expenditures .....	\$1,361,516	\$1,599,997	\$1,682,641
Personnel years .....	46.7	50.3	49.6

## b. Financial Analysis

Comprehensive fiscal reports, the principal one being the Controller's Annual Report of the State's financial affairs, are issued regularly. Others include the preliminary annual cash and accrual reports, the August governmental cost fund report, the month-end statements showing revenues derived from all major taxes, and the receipts and expenditures of the General Fund, and other periodic special reports. Data is compiled and computations made for apportionments to local agencies, such as highway users' taxes, cigarette taxes, motor vehicle license fees (in-lieu tax), property tax relief, mandated cost claims, timber tax, and federal funds. Estimates of future cash receipts and expenditures are compiled for management of the Pooled Money Investment Program. Interest earnings of the Local Agency Investment Fund and the Surplus Money Investment Fund are distributed quarterly and semi-annually. *Two and one-half positions are added in the current year for claims processing workload associated with Chapter 1206, Statutes of 1979 and four and one-half positions are added in the budget year for increased mandated cost claims processing workload. Chapter 1206 provided funds for special law enforcement assistance.*

Output	1978-79	1979-80	1980-81
Mandated cost:			
Number of claims .....	18,800	21,500	25,000
Financial reports .....	27	24	24
Apportionments .....	92	95	95
<b>Input</b>			
Expenditures .....	\$549,116	\$616,309	\$702,524
Personnel years .....	15.4	14.8	17.1

## c. Claim Audit

All State expenditures, including contract services, personal services, equipment, materials, travel claims and investments, are audited prior to payment to assure charges are legal, for an authorized purpose and that an appropriation exists from which they can be paid.

Output	1978-79	1979-80	1980-81
Claim schedules audited .....	261,340	267,350	273,500
Amount of claims approved (millions) .....	\$86,327	\$88,917	\$91,585

Amounts disallowed .....	\$4,820,641	\$4,931,500	\$5,044,925
Cost benefit ratio (disallowances per \$ of cost) .....	\$5.87	\$4.96	\$4.82
<b>Input</b>			
Expenditures .....	\$821,925	\$995,028	\$1,101,833
Personnel years .....	41.2	44.5	46

## d. Field Audit

The staff conducts field audits of expenditures of State and federal funds subvented, loaned or granted to local jurisdictions under various programs and performs fiscal overview audits on the State Medi-Cal program. Municipal and justice court accounting systems are reviewed to insure that they are following a uniform system established by the Controller and that adequate audits of the courts are made. *Four positions are added in the current year and the budget year for expanded auditing of Clean Water construction grants to be funded by Federal Funds under a contract with the Environmental Protection Agency. Four positions are reestablished in the budget year for one year to conduct pre-audits of Federal Disaster Assistance claims by California counties.*

Output	1978-79	1979-80	1980-81
Audits performed .....	882	1,384	1,344
Amounts audited (thousands) .....	\$1,656,026	\$1,812,913	\$1,743,186
Recoveries .....	\$25,286,682	\$27,682,342	\$26,617,638

<b>Input</b>			
Expenditures .....	\$3,214,686	\$4,063,836	\$4,308,979
Personnel years .....	97.5	117.6	120.7

## e. Disbursements Services

This includes the issuance of all Controller's warrants in payment of the State's obligations including salaries and wages; the preparation and maintenance of warrant registers and an alphabetical warrant index; maintenance of controls over all disbursements, agency trust accounts and fund

## STATE CONTROLLER—Continued

accounting transactions; and reconciliation of warrants paid by the State Treasurer as well as maintenance of paid warrants.

Entries to the central control accounts reflecting disbursement transactions are automatically generated by electronic process. Information returns summarizing reportable tax payments and Forms W-2 are submitted annually in magnetic tape form to the Internal Revenue Service and the State Franchise Tax Board. Seven and one-half positions are added in the budget year for increased workload relating to warrant writing activities.

Output	1978-79	1979-80	1980-81
Warrants issued .....	15,588,866	18,819,994	21,189,977
Claim schedules processed .....	245,127	257,369	263,796
Tax statements prepared .....	274,682	282,922	287,166
U.S. Savings Bonds issued .....	275,583	283,850	288,108
Payroll deductions .....	\$18,475,027	\$19,029,278	\$19,314,717
<b>Input</b>			
Expenditures .....	\$4,515,264	\$5,104,778	\$6,091,631
Personnel years .....	88	99.4	101.4

## f. Technical Services

This element provides Systems analysis, EDP programming, key entry computer services, reproduction and mail services to all divisions of the Controller's office. Two positions are continued in the budget year to rewrite existing computer programs. Two personnel years, effective from January 1, 1980 to December 31, 1980, are added to write computer programs for revised local district reporting required by Chapter 161, Statutes of 1979. One and one-half positions are reestablished in the budget year for workload associated with the Senior Citizen's Tax Postponement Program. Three tenths of a personnel year is continued in the budget year for Federal Fund Tracking workload. In the current year, 9.1 positions are added and in the budget year 9.9 positions are added for workload associated with Chapter 1202, Statutes of 1979, OASDI sick leave exclusion.

Output	1978-79	1979-80	1980-81
Pieces mailed .....	909,638	946,512	970,175

Undistributed .....	\$53,997	\$31,457	\$88,020
Personnel years .....	64.9	81.4	83.8

## g. Personnel Services

The Personnel Services element maintains the Employment History Data Base, which contains the personnel records of all State employees and serves as a basis for Uniform State Payroll System payments. It provides personnel policy and processing training to State Agencies, furnishes to the State Personnel Board, Public Employees Retirement System, California State Universities and Colleges, and the State Controller's Office Division of Personnel and Payroll Services information those agencies need to carry out their program responsibilities and also provides employee roster information to authorized persons within the legal requirements governing security and confidentiality.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$3,671,054	\$4,442,973	\$4,476,981
Personnel years .....	113.7	115.1	112.3

## h. Payroll Services

The Payroll Services element is responsible for the Uniform State Payroll System. The Uniform State Payroll System was adopted by the Legislature in 1951 to provide an effective, efficient, uniform and controllable payroll system which meets the needs of management and employees.

The Uniform State Payroll System performs all of the standard payroll functions. This includes reporting of withholding and wages for State and federal taxes, and unemployment insurance for covered classes; deducting and reporting of contributions and other data required by the State retirement systems, such as miscellaneous deductions authorized by employees, and the voluntary reductions of wages for investment in tax sheltered annuities and deferred compensation plans; and maintaining employee accounts for the purchase of U.S. Savings Bonds for which bonds are issued monthly. Six analyst positions are reestablished for one year in 1980-81 to assist in user testing of the new payroll system and analysis of changes needed to the payroll system. Five data technician positions are reestablished for one year in the budget year to operate the new payroll system. In the current year, 35.8 personnel-years are administratively established to be funded from existing resources for increased manual payroll transaction workload. These positions are proposed new positions in the budget year.

In the current year, 42.5 positions (14.8 personnel-years) are added for manual processing of refunds of OASDI taxes paid on account of sickness. This program, authorized by SB 1016, Chapter 1202, Statutes of 1979, is expected to save the State \$1,450,000 and employees \$2,700,000 in 1980-81. In the budget year, 42 positions are added, 25 of which are limited term to July 1, 1982.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$2,657,997	\$4,683,717	\$5,234,471
Personnel years .....	132.6	201	201

## II. TAX ADMINISTRATION

## Program Objective and Description

The objectives are to provide equitable, effective and economical administration of inheritance and gift taxes, gasoline tax refunds, and certain minor taxes.

The Division of Inheritance and Gift Tax administers the inheritance tax, representing the State in the court determinations of the tax and supervising the activities of inheritance tax referees and county treasurers in the determination and collection of inheritance taxes, and also audits and collects gift taxes. The Division of Tax Collection and Refund collects certain delinquent taxes and audits and refunds taxes paid on gasoline used off-road.

d. Gas Tax refund.....	35.7	28.1	28.5	922,131	902,622	878,151

## a. Inheritance Tax

An inheritance tax is levied upon the right to succeed to property upon the owner's death, or transferred in lieu thereof or in contemplation of death. To carry out this program, the Controller appoints from a list of prequalified applicants at least one person to a panel of inheritance tax referees in each county. The court appoints a referee to act in each proceeding. The referee appraises the property for both probate and inheritance tax purposes, after which he prepares the report of inheritance tax due. Completed reports are submitted to the Controller for an office review to determine the correctness of the tax, including distribution and computation. The report is then filed with the court, which may hear and determine any objections. Based upon the referee's report, and any hearing, the court makes its order fixing tax. The tax is paid to the county treasurer who periodically remits to the State. *Six positions are added in the budget year for clerical and paralegal workload increases in Sacramento. Two positions are added in the budget year for clerical workload increases in Los Angeles. Three limited term positions are added in the budget year for the microfilming of records. Seven positions are continued in the budget year for the workload associated with a large and complex inheritance tax case.*

## Measures of Effectiveness

		1978-79	1979-80	1980-81
1. Percent of payments made timely .....	Estimated	72%	73%	73%
	Actual	72%	—	—
2. Percent of decedent's estates raising legal questions in tax treatment ....	Estimated	32%	33%	32%
	Actual	31%	—	—
3. a. Percent of examined reports with errors detected in tax computation .....	Estimated	8%	8%	8%
	Actual	9%	—	—

## Input

Expenditures	\$607,293	\$613,192	\$648,933
Personnel years	24.2	25.5	24.1

## c. Tax Collection

Accounts are maintained and delinquencies are collected for four taxes assessed by other agencies—motor vehicle fuel license tax, the taxes on insurance companies (premium tax and retaliatory tax), petroleum and gas charges and subsidence abatement charges and the inheritance and gift taxes administered by the State Controller.

## Measurement of Effectiveness

		1978-79	1979-80	1980-81
Delinquent account collections as a percent of accounts available for collection during the year:				
(1) Amount	Estimated	82%	82%	82%
	Actual	82.7%	—	—
(2) Number of accounts	Estimated	85%	85%	85%
	Actual	86.2%	—	—

## Program Size Indicators

Delinquent taxes collected during the year:			
(1) Amount	\$3,541,468	\$4,885,743	\$5,376,024
(2) Number of accounts	395	400	425

## Input

Expenditures	\$63,193	\$172,077	\$202,218
Personnel years	1	5.9	6.9

## d. Gas Tax Refund

The Motor Vehicle Fuel License Tax is levied on the distribution of gasoline to support the construction and maintenance of highways and rapid transit systems. The tax is paid at the time of distribution, regardless of the purpose for which the fuel is being acquired. The tax is then passed on to the ultimate user. Users may file a claim with the Controller and obtain a refund of the tax paid on fuel used for certain non-highway purposes. Three positions are redirected in the current and budget years to the Local Government Fiscal Affairs Program.

## Measures of Effectiveness

		1978-79	1979-80	1980-81
Percent of proper claims paid within 30 days	Estimated	70%	80%	80%

## III. LOCAL GOVERNMENT FISCAL AFFAIRS

## Program Objectives and Description

The objectives are to secure uniform and effective local budgeting, accounting and property tax collection procedures and to report, on a timely basis, meaningful financial local governmental information.

This program includes the prescribing of uniform county budgeting procedures and uniform accounting systems for counties and special districts; collection, compilation and dissemination of comprehensive fiscal data for all local agencies and for Public Retirement Systems; reviewing and reporting on the use of State gas tax funds apportioned to local government; reviewing and approving county cost allocation plans; and preservation of the local property tax base by prescribing uniform collection procedures, assuring marketable tax titles and prompt restoration of tax delinquent properties to the local tax rolls; and administering the Senior Citizens Property Tax Postponement Program.

To the fullest extent possible, the Controller involves local governmental officials in these activities through membership on various advisory and coordinative committees.

## a. Financial Reporting, Budgeting and Accounting

Local Government financial data are collected, compiled and made available in a number of annual publications. County budgets are reviewed; forms, rules and regulations on the preparation of county budgets are prescribed. The bonds of eligible local agencies are certified in accordance with law. Two statutory committees of local government officials who serve without remuneration assist the Controller in these matters. Under Section 7504 of the Government Code the Controller must prescribe uniform reporting procedures for all State and public retirement systems. Under Section 30200 of the Government Code the Controller must devise and supervise the installation of uniform accounting procedures for all counties. Assisting is a ten-person "Controller's Committee on County Accounting Procedures", all representatives of local government who serve without pay. Under Section 53891 of the Government Code, the Controller must prescribe uniform accounting and reporting procedures for all special districts. *Four positions are permanently reestablished in the budget year for production of an annual report on the financial condition of all public retirement systems. In the budget year, 1.5 positions are added for review of local government reports of expenditures of Transportation Development Act funds as required by Chapter 161, Statutes of 1979.*

## Output

	1978-79	1979-80	1980-81
Annual Report of Financial Transactions Concerning:			
Revenue sharing reports .....	2,539	2,552	2,564
School and special districts, counties and cities .....	6,699	6,763	6,820
State and local public retirement systems .....	100	100	100

## Input

Expenditures .....	\$1,038,856	\$1,236,308	\$1,126,654
Personnel years .....	29.7	32.8	28.5

## b. Streets and Roads

Data is collected, reviewed, compiled and published in an annual consolidated report concerning street and road financial transactions. By law the Controller must review and report on the use of State gas tax funds apportioned to local government to insure proper use and accounting. *One and one-half positions are added in the budget year for review of data for a report of local government expenditures of Transportation Development Act funds as required by SB 620, Chapter 161, Statutes of 1979. Five positions are added and three existing positions are transferred from Tax Collection and Refund in the current and the budget years for reimbursed audits of local government agencies receiving Transportation Development Act funds as required by regulations adopted by Caltrans.*

## STATE CONTROLLER—Continued

	1978-79	1979-80	1980-81
<b>Output</b>			
Gas Tax Reviews:			
Gas tax claimed (thousands) .....	\$151,278	\$411,609	\$520,000
Projects Reviewed .....	2,553	11,600	12,000
Disallowances (thousands) .....	2,591	3,844	3,900
Other projects .....	891	2,272	2,572
<b>Input</b>			
Expenditures .....	\$776,883	\$1,002,343	\$1,151,729
Personnel years .....	23.5	31.1	33.6

## c. County Cost Plans

Under Federal Management Circular 74-4, each county prepares a county-wide cost allocation plan each fiscal year to receive federal reimbursements for indirect costs of federally supported programs. The federal Department of Health, Education and Welfare delegated to the Controller the authority to review, negotiate and approve such plans and to issue supplemental instructions and procedures to counties.

Three positions are reestablished and one new position added in the budget year for increased workload in the review of county indirect cost plans. These positions are to be funded from reimbursements.

	1978-79	1979-80	1980-81
<b>Output</b>			
County cost plan reviews:			
Provisional approvals .....	58	58	58
Formal agreements .....	1	18	35

<b>Input</b>			
Expenditures .....	\$242,089	\$287,678	\$350,920
Personnel years .....	8.5	8.2	9.2

## d. Tax-Deeded Land

Provides technical advice and assistance to county officials and others, including Members of the Legislature, to assure uniform and effective interpretation and application of property tax laws. Exercises general supervision over procedure for collection of property taxes and redemption of tax-delinquent property; authorizes and approves tax sales. This control helps ensure sound, marketable tax titles and prevents continuing delinquencies that otherwise would affect the financial integrity of many county governments.

The State's cost of this element is paid through collection by the counties of a redemption fee, half of which goes to the General Fund. They also transmit \$1.50 to the General Fund from the sale of each tax-deeded property.

	1978-79	1979-80	1980-81
<b>Output</b>			
Sales to state .....	190,000	193,800	195,000
Deeds to state .....	8,200	8,000	8,000
Parcels approved for sale .....	8,000	8,000	8,200
Redemption and sales fees .....	\$195,870	\$238,960	\$239,500
<b>Input</b>			
Expenditures .....	\$195,449	\$254,682	\$278,734
Personnel years .....	8.4	8.2	8.4

## e. Senior Citizens' Property Tax Postponement

Chapter 1242, Statutes of 1977, enacted the Senior Citizens' Property Tax Postponement Program Act of 1977. This Act authorizes the Legislature to provide for the postponement of property taxes on owner-occupied principal places of residence of persons who are 62 years of age or older. On October 1, 1977, the effective date of the Act, the State Controller established a Bureau within the Local Government Fiscal Affairs Division to administer the Act. Chapter 43, Statutes of 1978, extended the Property Tax Postponement Program to include persons who are tenant-stockholders of property in cooperative housing corporations and who occupy as their principal residence a unit owned by the corporation. Chapter 576, Statutes of 1978, extended the program to persons who hold a possessory interest in real property and who occupy as their principal residence a dwelling on the property.

Eleven positions are permanently reestablished to conduct the Senior Citizens Property Tax Postponement Program.

	1978-79	1979-80	1980-81
<b>Output</b>			
Certificates issued .....	7,750	8,060	8,460
Active Accounts .....	9,760	10,150	10,550
<b>Input</b>			
Expenditures .....	\$344,710	\$391,479	\$358,418
Personnel years .....	9.5	11.2	10.5

## IV. SYSTEMS DEVELOPMENT

## Program Objectives and Description

With the implementation of the Basic Payroll System, the last major phase of the Personnel Information Management System will be completed. The emphasis will change to the addition of management information reporting capabilities to support such needs as collective bargaining, which will permit operating departments and control agencies to realize the major benefits available from the new systems. Departments requiring information capabilities must include such needs in their individual budget requests. The State Controller's Office has established the Systems Development Program to assist departments in adding needed capabilities and to maintain existing systems.

## STATE CONTROLLER—Continued

## Authority

All activities are within authority of the participating departments.

## a. Payroll Development

A third generation computerized Payroll System is being developed to replace the current payroll system at the State Controller's Office. The current payroll system operates on computer equipment scheduled to be phased out by the manufacturer.

Six positions are reestablished in the budget year to continue payroll development work. Five limited term positions are added in the budget year for new payroll development associated with the collective bargaining process. One limited term position is added to administer a contract with a consultant who will study the future development of the payroll system. In both the current and the budget year, 6.5 limited term positions are added for development of an automated system to process OASDI sick pay exclusion refunds under Chapter 1202, Statutes of 1979.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$1,092,405	\$1,406,444	\$1,984,781
Personnel years.....	33.1	37.6	44.8

## b. Employment History Development

The development work proposed for this element will improve the availability of information and maximize the benefits available to the managements of the State Personnel Board, the Public Employees' Retirement System, the Department of Finance, the California State Universities and Colleges, the State Controller's Office, and the general State management needs under collective bargaining.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$639,904	\$1,097,824	\$1,266,981
Personnel years.....	19	26.7	27.6

## c. Systems Maintenance Support

This element represents the EDP activities required to maintain the efficiency and effectiveness of the production systems operated by PPSD. Included is maintenance support for the production Employment History, Payroll, and Health Benefits Systems.

Fourteen positions are reestablished in the budget year for maintenance of the payroll system.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$1,165,480	\$864,953	\$897,102
Personnel years.....	33.4	20.8	20.5

## V. UNCLAIMED PROPERTY

## Program Objectives and Description

The Unclaimed Property Program's main objective is to restore unclaimed property to its true owners or their heirs. While the property is on deposit with the State Controller, the people of California derive the benefit of its use, with the funds subject to claim indefinitely by the owners or heirs. Efforts are being undertaken to increase compliance by businesses with the Unclaimed Property Law in order to ensure maximum protection in reuniting the owners with their property.

## Authority

Code of Civil Procedure, Sections 1300-1615.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

b. Estates of deceased persons .....	4.6	5.4	5.5	118,013	204,290	163,808

## a. Abandoned Property

Abandoned property, consisting of unclaimed bank deposits, checks, money orders, life insurance proceeds, safe-deposit box contents, etc., must be turned over to the State after a seven year dormancy period if the owner is unlocatable by the holder of the property. The State Controller attempts to locate owners by mailing notices to their last known addresses, by advertising their names in local newspapers and by actively researching for their current whereabouts. Five positions are added in the budget year for increased workload in the claims inquiry, research and scheduling functions.

## STATE CONTROLLER—Continued

## Output

	1978-79	1979-80	1980-81
Receipts .....	\$32,132,000	\$39,362,000	\$46,842,000

Expenditures .....	\$118,013	\$204,290	\$163,808
Personnel years .....	4.6	5.4	5.5

## VI. REFUNDS OF TAXES, LICENSES, AND OTHER FEES

## Program Objectives and Description

This program exists for the purpose of refunding the licenses, taxes and other fees erroneously collected and paid into the General Fund for which no other specific provision of the law exists. Funds are also available for payment of prior judgments, liens or encumbrances as provided in Government Code Section 12516, and to cover refunds of taxes in special situations confronting the Franchise Tax Board in which a court of record orders the refund of taxes collected, withheld or transmitted from persons subject to trial and for which no other provision for refund is made by law.

Funds are appropriated each year to provide for expeditious refunds of noncontroversial amounts paid and deposited in the General Fund. This avoids the necessity of filing claims with the Board of Control and inserting items in a claims bill. This program was incorporated into the Controller's budget in the 1978-79 fiscal year.

## Authority

Section 12516, Government Code.

## Program Requirements

	1978-79	1979-80	1980-81
Refunds of Taxes, Licenses, and Other Fees ( <i>General Fund</i> ) .....	\$19,149	\$30,000	\$30,000

## VII. ADMINISTRATION

## Program Objectives and Description

To provide executive direction, general policy determination and management for all office programs and to coordinate and provide major administrative and business management services to the operating units of the office. In addition, the Controller serves on various fiscal boards and commissions including the Board of Equalization, Franchise Tax Board, State Lands Commission, Pooled Money Investment Board, Board of Control, and various bond finance committees.

## Authority

Membership by State Controller on boards and commissions, principally:

State Board of Equalization, Const. Art. 13, 7, and 9.

State Board of Control, Gov. 13901.

Franchise Tax Board, Gov. 15700.

Pooled Money Investment Board, Gov. 16480.1.

State Teachers Retirement Board, Ed. 13851.

Various bond and finance committees, Ed. 19510; M.&V. 991; Ch. 765/27, Ch. 23/63, 1st Ex; Water 12933; H.&N. 3902-3; Gov. 17220.

California Exposition and Fair Executive Committee, Agr. 72.1.

State Lands Commission, Pub. Res. 6101.

Reapportionment Commission, Const. Art. 4.6.

Reciprocity Commission, Veh. 2600.

Interagency Council for Ocean Resources, Gov. 8810-11.

California Commission on Interstate Cooperation, Gov. 8003-4.

Intergovernmental Council on Urban Growth, Gov. 34200.

## STATE BOARD OF EQUALIZATION

The State Board of Equalization administers fourteen tax programs for support of State and local activities, more tax programs than any other State department. It administers State and local Sales and Use Taxes; Motor Vehicle Fuel License Tax; Use Fuel Tax; Alcoholic Beverages Tax; Cigarette Tax; Tax on Insurers; Energy Resources Surcharge; Emergency Telephone Users Surcharge; Litter Control, Recycling, and Resources Recovery Assessment; Utility Assessments; Private Railroad Car Tax; Timber Yield Tax; and guides local government in the administration of the property tax. The five-member Board was created and named by the Constitution of 1879. Four Board members are elected from equalization districts, which divide the State into areas almost equal in population, and a fifth, the State Controller, is elected at large.

The Board operates over 60 offices throughout California and has offices in New York, Chicago, and Houston. The Board administers taxes exceeding \$8.1 billion for the State Treasury, plus some \$350 million in local funds derived from utility rolls prepared by the Board and more than \$1.8 billion in local sales and use taxes.

The Board, as a policy making body, adopts rules and regulations based upon the Revenue and Taxation Code for the administration of the business taxes programs and for the guidance and direction of the Board's property tax staff, county assessors, boards of supervisors, and local assessment appeals boards in valuing property.

The Board, as an appellate body, hears appeals from taxpayers on business taxes audit findings; from county officials on intracounty and intercounty property tax assessments; from public utilities on utility assessments; and from assesses on privately owned railroad cars. The Board is also the appellate body for contested actions of Franchise Tax Board decisions under the personal income tax laws, bank and corporation tax laws and senior citizens property tax relief laws and from appeals from rulings of the Insurance Tax Commission.

An executive secretary, appointed by the Board, implements the policies and directions of the Board. The Executive Secretary is aided by assistant executive secretaries for administration, property taxes, and business taxes.

STATE BOARD OF EQUALIZATION—*Continued*

## I. LOCAL PROPERTY TAX MONITORING PROGRAM

## Program Objectives and Description

California taxpayers will pay nearly \$6 billion in property taxes to local governments in 1980-81 (the third year under the Constitutional provision which limits property taxes to no more than 1 percent of taxable value). Approximately 95 percent of these taxes will result from valuations based on ad valorem property tax assessments made by 58 county assessors. To ensure equitable treatment of all property taxpayers, it is necessary that a central agency provide direction, supervision, and review of local assessment practices. The objective of this program is to bring about and maintain an acceptable degree of both intracounty and intercounty conformity to the law at a reasonable cost.

Property taxes levied on the assessed values as found by the county assessor comprise a significant portion of the revenues collected to support local government. With the tax rate limits imposed by Proposition 13, as adopted on June 6, 1978, it is imperative that all counties assess at the allowable full value to maintain revenue for local services. A high degree of assessment conformity in all counties is necessary so that the State will not oversubvent to districts in some counties at the expense of those districts in counties complying more fully with the law. Traditionally, this Board program has consisted of a field appraisal based upon a random sample of assessments selected from the local assessment rolls of about one-third of the counties each year. Appraisals of these selected properties were made and the full value of the county estimated. If comparison of the total assessed value as shown on the assessment rolls with that derived by the sampling process produced a ratio of conformity of 25 percent, it meant the county was in complete conformity with the assessment laws; a ratio of less than 25 percent meant that counties were underassessing properties.

Because Proposition 13 altered the way county assessors perform their tasks, the Board has revised its field audit so as to review the procedures and evaluate the quality of the assessments enrolled on the local assessment rolls. The Board will conduct field appraisals of a randomly selected sampling of assessments from 15 counties each year to see if reappraisals were made when a change in ownership occurred, or new construction took place, and evaluate the extent to which proper values were enrolled, and whether other assessed values have been changed as allowed by law.

The passage of Assembly Bill 8 (Chapter 282, Statutes of 1979), which provides for the State's General Fund to make up the shortfall in funding local government, has made the need for this monitoring program to determine the degree of statewide assessment conformity a necessity; hence, the thrust of the redirected program will be to develop measures, compile data, and publish results of the degree of conformity achieved by each of the 58 counties over a four-year cycle. It is important to note that the State's General Fund will be overly taxed to fund public schools in those counties with below average measures of assessed conformity. These samplings will be interfaced with the Assessment Practices Surveys (element a, Program II).

## Authority

Constitution—Article XIII; Education Code—Sections 41200-41206 and 84200-84206; Government Code—Sections 15605.5-15645, 54900-54903.1; Revenue and Taxation Code—Division I (Parts 2, 3, 3.5, 10, 11, and 12); California Administrative Code—Title 18, Chapter I.

## Program Elements

a. Sample selection and full value estimates ....	6	3.6	3.6	\$156,767	\$93,619	\$96,172
b. Property appraisal.....	89.5	38.7	38.7	2,753,170	1,691,917	1,647,433
c. Appraisal appeals .....	9	5.1	5.1	288,381	225,521	231,672

## a. Sample Selection and Full Value Estimates

A stratified random sample of properties is selected from the locally assessed roll in one-fourth of the 58 counties each year. The appraisals of the properties are compared with the assessors' enrolled values and work sheets to measure the extent to which the assessor is in conformity with the law concerning assessed value and to estimate the amount of assessed value not enrolled.

## Output

Because of the adoption of Proposition 13 by the voters on June 6, 1978, the previously reported measures of output that measure degree of conformity and reliability of the sampling and estimating techniques have been made obsolete and new measurements have been developed. At least one completed cycle will be needed before such realistic measures of output can be projected in a meaningful way.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	6	3.6	3.6	\$156,767	\$93,619	\$96,172

STATE BOARD OF EQUALIZATION—*Continued*

## b. Property Appraisal

Certified appraisers will estimate the taxable values of approximately 4,000 individual properties in one-fourth of California counties in 1980-81. Using professional appraisal procedures, they will inspect, analyze, and value the properties in the sample. The types of property appraised include residences, vacant lots, farms and ranches, commercial and industrial enterprises, oil fields, mineral properties and timberlands, as well as unsecured property. All appraisals are reviewed with the county assessor. Property of significant value that appears to have escaped assessment is brought to the assessor's personal attention for inclusion on the local roll.

In 1978-79, the triennial survey was accelerated to a biennial survey as a result of the passage of Proposition 13. Approximately 6,300 individual properties were appraised in one-half of California's counties. In 1979-80, staff reductions imposed upon the program placed it in a one-year "holding pattern" whereby only 1,812 individual properties in six California counties could be appraised.

Output	1978-79	1979-80	1980-81
Number of appraisals completed .....	6,281	1,812	4,100
Market value of properties appraised (000) .....	\$6,565,000	\$1,494,000	\$1,651,000
Number of apparent escapes of over \$100,000 full value brought to assessor's attention .....	120	40	45
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>
Expenditures .....	89.5	38.7	38.7
	1978-79	1979-80	1980-81
	\$2,753,170	\$1,691,917	\$1,647,433

## c. Appraisal Appeals

Assessors who do not agree with the appraisals may request reviews by the Office of Appraisal Appeals (OAA) shortly after the Board's Property Tax Department completes its appraisals of the sample properties. Members of the OAA staff review these appraisals, inspect the properties, interview county and state property tax appraisers and identify the position each party takes in support of its estimate of value. An independent appraisal may be made by OAA staff if necessary. The OAA staff prepares a written proposed finding on each appealed appraisal. If either the county assessor or the Property Tax Department is dissatisfied with the findings, either party may request an OAA conference. The OAA staff prepares a final finding which includes any new substantiating information the parties contributed at the conference. If either of the two contending parties is still dissatisfied with the final findings, either may request a hearing before the Board of Equalization.

The objective of this office is to make findings and recommendations sufficiently supported so that time-consuming hearings before the Board are minimized. The degree to which this objective is achieved is measured by the number of findings that do not go to Board hearings.

Output	1978-79	1979-80	1980-81
Number of appraisals initially appealed by assessors .....	200	150	150
Number of OAA final findings requested by either party .....	80	60	60

## II. COUNTY ASSESSMENT STANDARDS PROGRAM

## Program Objectives and Description

Through this program the Board's Division of Assessment Standards provides county assessors and their staffs with technical consultation and services to aid them in the legal distribution of the tax burden among property owners. The establishing of standards and administration of legally conforming practices in all property assessments by the assessor's office are the primary objectives of the program.

## Authority

Government Code Sections 15606, 15608, 15624, and 15640-15645; Revenue and Taxation Code Sections 218.5, 251, 401.5, 452, 601, 671-673, 826, 1153, 1254, 5364, 5581 and 5781; California Administrative Code—Rules 31, 101, 171, 202(b), 252, 282-283, 1042 and 1045.

STATE BOARD OF EQUALIZATION—*Continued*

## a. Assessment Practices Surveys

At least once each four years, a survey is made of all aspects of each county assessor's appraising, mapping, recordkeeping, clerical, and personnel practices. A written report is then prepared containing recommendations for improvement, to which the assessor must respond within a year. In addition, a series of mini-surveys will be conducted statewide to address specific issues more timely than the regular surveys. These mini-surveys will address areas of current interest to the legislature.

Output				1978-79	1979-80	1980-81
Number of surveys completed .....				11	10	10
Input				1978-79	1979-80	1980-81
	78-79	79-80	80-81			
Expenditures.....	13.4	14.3	14.3	\$453,968	\$640,627	\$658,099

## b. Property Tax Forms and Rules

Property reporting and exemption claim forms must be filed annually with county assessors by thousands of taxpayers. The Board designs and prepares these forms for county use with a concern for their adequacy and compliance with the law.

The Board is also responsible for the preparation of rules governing assessors and county boards of equalization.

Output				1978-79	1979-80	1980-81
Forms						
Number of property statement and exemption claim forms prescribed .....				66	67	67
Number of property statement forms approved .....				1,052	1,100	1,100
Number of exemption claim forms approved .....				880	900	900
Rules						
Property tax rules processed .....				20	15	15
Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	2.1	2.1	2.1	\$60,209	\$75,944	\$78,015

## c. Technical Services

Four technical services sections are organized by major functional categories which include real property, personal property, building cost, and systems design and implementation.

The Board's staff replies to inquiries regarding property tax problems from assessors, their staffs, taxpayers, the Legislature, and other public and private agencies. The staff also researches and writes a continuing series of "Letters to Assessors" on statutory changes, court decisions, Board rules and instructions, and conducts workload and salary studies. These letters have taken on more significance with the passage of Proposition 13 because of a lag in handbook maintenance. Field training and assistance are given to assessors in the appraisal of the various types of taxable property including specialized properties such as possessory interests, oil and gas wells, and mineral reserves. Assistance is also provided in the installation and maintenance of a standard map system. In addition, the Board issues and updates handbooks on assessment and appraisal practices for assessors' use. The Board's staff assists assessors in developing both computerized and manual systems to improve efficiency in assessment administration.

Output				1978-79	1979-80	1980-81
Number of directive and advisory "letter to assessors" transmitted .....				221	225	225
Number of pages in new handbook sections written .....				—	100	150
Number of pages in handbook sections revised .....				347	400	850
Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	20.4	21.3	21.3	\$585,344	\$776,559	\$797,738

## d. Certification and Training

Property tax appraisers must be certified by the Board before serving as appraisers and must pass examinations, either compiled or approved by the Board, prior to being permanently certified. Certified appraisers must then fulfill statutory annual training requirements. The Board also administers an advanced certification program. A file is maintained on approximately 3,000 appraisers regarding civil service status, appraisal experience, and annual training. A series of appraisal courses is designed and presented by the Board's staff in various counties and at regional and central schools. Training courses developed by county assessors and those conducted by colleges and appraisal organizations are reviewed and approved to insure the programs meet reasonable training standards.

Output				1978-79	1979-80	1980-81
Number of appraisers permanently certified.....				2,564	2,500	2,500
Number of appraisers on assessor's staffs who are not permanently certified .....				225	200	200
Number of appraisers attending Board courses .....				526	1,165	1,100
Number of appraisers successfully completing courses .....				435	930	900

Number of workshops offered .....				82	25	25
Number of appraisers attending workshops .....				2,736	2,500	1,600
Number of nonappraisers attending workshops .....				280	350	250
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Expenditures.....	9.7	10.4	10.4	\$283,600	\$374,106	\$384,309

## STATE BOARD OF EQUALIZATION—Continued

## e. Exemption

The Board has statutory administrative duties with respect to two categories of exemptions. First, each claim for a welfare or veterans organization exemption is reviewed, and a finding, which cannot be overruled if the exemption is denied, is transmitted to the county assessor. Second, an intercounty match of homeowner's exemption claims is made, and lists of duplicates are sent to the county assessors involved, for a determination of which claims are valid and which county is entitled to reimbursement by the Controller for the tax loss.

Output	1978-79	1979-80	1980-81
Number of veterans organization claims reviewed.....	110	100	100
Number of welfare exemption claims reviewed .....	7,695	7,851	7,900
Number of welfare properties in claims .....	12,935	12,509	13,000

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	7.4	7.5	7.5	\$209,163	\$264,278	\$271,486

## f. Contract Auditing Services

This fully reimbursable service is designed to assist State and local taxing authorities by providing auditor and appraisal personnel, on request, to audit the accounting records of selected taxpayers. The service is used primarily by county assessors to meet the legislative mandate that accounts of \$100,000 or more must be audited quadrennially.

Output	1978-79	1979-80	1980-81
Number of audits performed .....	158	194	214

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	1.7	1.6	1.6	\$59,901	\$70,200	\$77,200

## III. STATE-ASSESSED PROPERTY PROGRAM

## Program Objectives and Description

The nature of some taxable property is such that it cannot be valued in accordance with the standard appraisal practices applicable to all property unless it is valued as a unit by an agency whose jurisdiction is statewide. The program's objectives are to estimate the market value and assess annually intercounty pipelines and all of the taxable tangible properties owned or used by railroads, certain public utilities, and private (railroad) car companies.

The properties subject to State assessment are valued by the Board using standard appraisal techniques. In the case of public utilities, railroads, and the intercounty pipelines, the values thus determined are allocated among the taxing districts in which the property is located for inclusion on county and city assessment rolls so that taxes may be levied and collected by local governments. For private railroad car lines (except fixed property) the values are placed on an assessment roll, and taxes are levied and collected by the State.

## Authority

Constitution—Article 13, Section 19; Revenue and Taxation Code—Division 1, Part 2; Division 2, Part 6.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	85.7	85.8	85.8	\$2,421,447	\$2,966,857	\$3,064,143

Totals (General Fund) .....	85.7	85.8	88.6	\$2,421,447	\$2,966,857	\$3,169,591

## Program Elements

a. Assessment of public utilities .....	77.6	78	80.8	\$2,207,868	\$2,701,272	\$2,896,763
b. Private railroad car tax .....	8.1	7.8	7.8	213,579	265,585	272,828

## a. Assessment of Public Utilities

State assessee, annually, file property statements with the Board which list all of their properties by situs with the associated costs and provide complete accounting and financial information on their properties and operations. From this and other information the Board determines the value of each assessee's 'unitary' property as a whole and the value of each nonunitary property. The values are allocated among taxing districts, using the situs information provided in the property statements. These allocated values are further processed to produce a 'board roll' for each county and for each city that requires one, showing each assessee's assessments in each tax-rate area.

Output	1978-79	1979-80	1980-81
Number of assessee.....	184	180	180
Market value of property assessed (000) .....	\$27,695,920	\$29,774,549	\$31,858,000
Number of State Board rolls.....	58	58	58

Element Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing element costs .....	77.6	78	80.8	\$2,207,868	\$2,701,272	\$2,896,763
Element components:						
1. Derivation of unit value indicators.....	14.6	15.1	16	424,137	543,303	601,149
2. Field appraisals .....	27.1	28.1	30	803,131	1,017,378	1,107,544
3. Allocation of assessed values to taxing districts .....	20.5	21.2	21.2	594,320	716,497	736,038
4. Preparation and maintenance of tax-rate area maps.....	15.4	13.6	13.6	386,280	424,094	452,032

## STATE BOARD OF EQUALIZATION—Continued

## a.1. Derivation of Unit Value Indicators

Various indicators are used to determine the value of the unitary property. Four of the most important indicators are historical cost less depreciation, reproduction cost new less depreciation, capitalized earnings, and market value of stock and debt.

*Nine-tenths of a personnel-year is proposed to study the transfers of property by major utility and industrial property owners.*

Output				1978-79	1979-80	1980-81
Number of unit value indicators computed .....				490	509	500
Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	14.6	15.1	16	\$424,137	\$543,303	\$601,149

## a.2. Field Appraisals

Field appraisals are made of all land and all nonoperative and other nonunitary improvements and personal property. Nonoperative properties consist of properties owned but not used in the primary function of the company such as lands owned by a railroad but leased out for agricultural purposes. Properties held in a lessee capacity by State assesses and possessory interests are also considered nonunitary and are separately appraised.

*One and nine-tenths personnel-years are proposed to audit financial and fixed-asset records for large public utilities and private railroad car companies within the four-year audit cycle.*

Output				1978-79	1979-80	1980-81
Number of parcels appraised .....				14,947	13,000	14,000
Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	27.1	28.1	30	\$803,131	\$1,017,378	\$1,107,544

## a.3. Allocation of Assessed Values to Taxing Districts

The total assessed value of the unitary property of each assessee is divided among the tax-rate areas in which the property is located, substantially in proportion to the reproduction cost new less depreciation of the properties in the several areas. The assessed value of each nonunitary property is assigned to the tax-rate area in which the property is located. Board rolls are prepared for each county and each city that collects its own taxes, showing assessments by tax-rate area, by assessee, and by class of property. These rolls are used by the county auditors and cities in computing the taxes due local government.

Output				1978-79	1979-80	1980-81
Number of items assessed .....				332,978	340,740	350,000
Number of tax-rate areas .....				27,206	27,566	31,000
Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	20.5	21.2	21.2	\$594,320	\$716,497	\$736,038

## a.4. Preparation and Maintenance of Tax-Rate Area Maps

Maps identifying the boundaries of all tax-rate areas in the State are prepared and updated to reflect boundary changes, formations of new districts, and dissolutions of districts. A tax-rate area is a geographical area in which a unique combination of tax rates apply for the current fiscal year.

Output				1978-79	1979-80	1980-81
Number of filings for changes in maps processed .....				2,832	2,850	2,870
Change in number of tax-rate areas .....				333	360	3,500 <sup>1</sup>
Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	15.4	13.6	13.6	\$386,280	\$424,094	\$452,032

## b. Private Railroad Car Tax

The value of cars is determined from information in property statements and other sources. The equivalent number of cars in California is determined by counting the days each car spends in the State and dividing by 365 or 366. After the value and the number of cars for each assessee are established, assessment rolls are prepared and tax bills issued.

Output	1978-79			1979-80	1980-81
Number of assessees .....	164			162	160
Market value of property assessed (000) .....	\$349,573			\$362,803	\$375,000

<sup>1</sup> The number of changes in tax rate areas is expected to increase drastically as a result of the passage of AB 8.

STATE BOARD OF EQUALIZATION—*Continued*

Element Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing element costs .....	8.1	7.8	7.8	\$213,579	\$265,585	\$272,828
Element components:						
1. Car-day count.....	1.7	2.7	2.7	47,977	55,669	57,187
2. Valuing, assessing, and collecting the tax	6.4	5.1	5.1	165,602	209,916	215,641

## b.1. Car-Day Count

Information is obtained from the records of the railroad companies on the movements of each car in and out of the State. This information is accumulated by assessee and class of car. From this record, the total car-days accumulated for the year by each assessee by class of car are ascertained, and this total is divided by the number of days in the year to determine the number of cars to be assessed.

Output	1978-79	1979-80	1980-81
Number of movements of cars in and out of the state .....	925,272	930,000	935,000
Input	78-79	79-80	80-81
Expenditures.....	1.7	2.7	2.7
	\$47,977	\$55,669	\$57,187

## b.2. Valuing, Assessing, and Collecting the Tax

The market value of each assessee's cars is determined, and assessments are enrolled at 25 percent of market value. Taxes are extended on the roll at the statewide average general property tax rate including voter-approved debt service. Billings are then prepared and mailed to the assessees. Tax payments are made directly to the Board.

Output	1978-79	1979-80	1980-81
Number of cars.....	17,483	14,514	15,000
Number of tax bills issued .....	164	162	160
Number of tax bills collected .....	163	162	160
Input	78-79	79-80	80-81
Expenditures.....	6.4	5.1	5.1
	\$165,602	\$209,916	\$215,641

## IV. TIMBER TAX PROGRAM

## Program Objectives and Description

The Timber Tax Division administers the Timber Yield Tax by collecting revenue for the Timber Tax Fund and the Timber Tax Reserve Fund; providing local government with data for the valuation of timberland; establishing timber value areas and the immediate harvest values for species of timber within those areas; developing a standard method of timber measurement and conversion factors where the standard cannot be used; and controlling and auditing the reporting and self-assessment of the yield tax liability.

## Authority

Government Code Chapter 6.7 of Part 1 of Division 1 of Title 5; Revenue and Taxation Code Article 1.7 of Chapter 3 of Part 2 of Division 1 and Part 18.5 of Division 2.

e. Collecting taxes receivable.....	0.7	0.5	0.5	16,430	20,607	21,365

**a. Timber and Land Valuation**

Forest property appraisers continually obtain land and timber sales data for the purpose of developing regulations, value schedules, and value areas that are consistent with the market. The resulting value tables are subject to adoption under the Administrative Procedure Act and are used by assessors in valuing timberland and by timber owners in determining tax liability.

	78-79	79-80	80-81	1978-79	1979-80	1980-81
<b>Input</b>						
Expenditures.....	19.1	19.2	19.2	\$562,846	\$695,576	\$723,951

**b. Registration of Taxpayers**

Registration of timber owners harvesting timber enables the Board to furnish the taxpayers with the proper instructions and tax forms for the purpose of reporting tax and harvest data each quarter. The Board establishes an account for each new taxpayer, maintains the account on a current basis, and closes it out when the owner ceases harvesting.

	78-79	79-80	80-81	1978-79	1979-80	1980-81
<b>Input</b>						
Expenditures.....	4.1	4.2	4.2	\$107,676	\$134,988	\$139,953

**c. Processing Tax Returns and Harvest Data**

Upon receipt of a tax return, it is processed by the cashier for deposit of revenue receipts, fund allocation, and fiscal accounting purposes. The harvest data reported are compiled and adjusted quarterly through data processing. A delinquency record is established for taxpayers failing to file timely returns and notices are sent to the respective taxpayers.

The returns and harvest data reports are reviewed for mathematical accuracy, proper preparation, and conformance with the laws. Billings or refunds are prepared to notify the taxpayer of errors in self-declared tax and applicable penalty and interest.

	78-79	79-80	80-81	1978-79	1979-80	1980-81
<b>Input</b>						
Expenditures.....	2.2	2.1	2.1	\$57,031	\$68,261	\$70,772

**d. Auditing Accounts**

Accounts eligible for audit are selected through a process which assures field audit time is used as productively as possible to promote accurate tax reporting and deter evasion. The primary benefit of these audits is to protect the tax base and assist taxpayers in understanding the law and reporting requirements.

	78-79	79-80	80-81	1978-79	1979-80	1980-81
<b>Input</b>						
Expenditures.....	7	7	7	\$197,172	\$247,026	\$256,112

**e. Collecting Taxes Receivable**

The headquarters office is primarily responsible for collecting taxes receivable. Field personnel make collections and investigations as directed and when it is necessary, locate assets which may be levied upon or which are subject to lien. Headquarters staff supports the field collection efforts by preparing liens, issuing sheriffs' warrants, and maintaining a taxes receivable ledger.

	78-79	79-80	80-81	1978-79	1979-80	1980-81
<b>Input</b>						
Expenditures.....	0.7	0.5	0.5	\$16,430	\$20,607	\$21,365

<sup>1</sup> Increase over 1977-78 reflects substantial increases in harvest values.

<sup>2</sup> Decrease from 1978-79 reflects reduction in yield tax rate as a result of Proposition 13.

## STATE BOARD OF EQUALIZATION—Continued

## V. SALES AND USE TAX PROGRAM

## Program Objectives and Description

This program is needed to provide General Fund revenue for the State and for cities, counties, and transit districts. The program's objectives are to insure that all sales and use tax revenues are collected in an equitable and effective manner by; effecting timely reporting of tax liability, detecting and correcting errors in self-assessments, and promptly collecting amounts determined to be due and economically recoverable.

The State Board of Equalization administers the State's 4½ percent Sales and Use Tax Law, the 1½ percent Bradley-Burns Uniform Local Sales and Use Tax Ordinances of cities and counties, and 0.5 percent transactions (sales) and use tax ordinances for the San Francisco Bay Area Rapid Transit District, the Santa Clara County Transit District, and the Santa Cruz Metropolitan Transit District.

## Authority

Revenue and Taxation Code, Division 2, Parts 1, 1.5 and 1.6.

## Program Size Indicators

	Estimated and Actual Effectiveness Levels			
	Actual 1977-78	Actual 1978-79	Estimated 1979-80	Estimated 1980-81

a. Registration of taxpayers .....	449.8	487	490.4	\$9,838,753	\$12,058,256	\$12,466,215
b. Processing tax returns .....	400.7	423.3	449.3	11,446,727	13,719,056	14,799,334
c. Auditing account .....	903.2	964.1	1005.9	23,990,607	29,436,339	31,343,085
d. Collecting taxes receivable .....	251.2	273.9	287.5	5,619,754	6,998,080	7,434,412

## a. Registration of Taxpayers

Registration of sellers and users enables the Board to furnish them with proper tax forms and instructions for purposes of reporting and allocation of these taxes. Necessary security within the limits allowed by law is obtained to assure payment of the tax. The Board establishes an account for each new taxpayer, maintains the account on a current basis and closes it out when the business terminates.

Two and eight-tenths personnel-years are proposed to process increased workloads associated with mandatory registration of accounts (taxpayers). Six-tenths of one personnel year is added to reflect reallocation of fixed overhead charges.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	449.8	487	490.4	\$9,838,753	\$12,058,256	\$12,466,215

## b. Processing Tax Returns

After the taxpayer files a return, it is processed through the mail processing, cashier, and data processing units for deposit of revenue receipts and fiscal accounting purposes. This accounting includes the proper distribution of local and transit district taxes. A delinquency record is established for taxpayers failing to file returns, and notices are sent to them. Taxpayers whose accounts remain unclear after a reasonable period are cited to appear at the local board office to show cause why their permits should not be revoked for failure to file returns.

Returns are reviewed for mathematical accuracy, proper preparation, and application of the law. Billings or refunds are prepared to notify the taxpayer of errors in self-declared tax and applicable penalty and interest. When questionable deductions are observed, the taxpayer is contacted and asked to explain the deduction.

Twenty-seven and five-tenths personnel-years are proposed to process workload resulting from an increased number of tax returns being processed. One-half personnel year is added to reflect reallocation of fixed overhead charges. Two personnel years for certification of vehicle purchase price are limited term to 6/30/80.

<sup>1</sup> Includes investigations which resulted in field billing orders.

## STATE BOARD OF EQUALIZATION—Continued

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	400.7	423.3	449.3	\$11,446,727	\$13,719,056	\$14,799,334

## c. Auditing Accounts

This activity is statistically designed to cover the tax base in a manner which will result in audits of accounts most likely to make substantial errors in reporting and on a selective basis to police other accounts as a means of promoting accurate self-reporting.

A major objective of the audit selection system, which is based on the principle of marginal analysis, is to audit accounts which will produce tax change in excess of the cost of auditing. Tax change is the difference between self-assessed taxes and the final determination of taxes due after auditing, whether the difference is a deficiency or a refund to the taxpayer.

To assist the field staff in the selection of accounts to be audited, a tabulated list of eligible accounts is furnished to each district annually. Taxpayer accounts with similar audit characteristics are classified into one of 16 separate groups (cells) according to the probability of productive audits and average time expended.

Districts use the cell lists together with information in their files to select specific accounts to be audited within recommended quotas. The final step in the selection process occurs when a supervisor or field auditor determines, after field investigation, that an audit should be completed or that an audit is not warranted.

Twenty-one and eight-tenths personnel-years are proposed to maintain the current approved level of audit coverage by processing sales tax audit workload resulting from an increased number of eligible accounts. One and three-tenths personnel-years are added to reflect reallocation of fixed overhead charges. Eighteen and seven-tenths personnel-years are being added to reflect the one-time Section 27.2 savings in the 1979-80 fiscal year.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	903.2	964.1	1005.9	\$23,990,607	\$29,436,339	\$31,343,085

## d. Collecting Taxes Receivable

Field offices are primarily responsible for the collection of delinquent amounts. The effort expended on each account is consistent with the amount due. Although efforts are made to accomplish collection through use of the telephone or by correspondence, field calls and the utilization of statutory remedies may be necessary to collect larger amounts when other efforts have not been productive.

Headquarters staff supports field collection efforts with actions such as the preparation of liens, issuance of warrants, demands on sureties and personal guarantors, and processes all claims and documents pertaining to bankruptcies, assignments, and probates and refunds to the Attorney General.

Thirteen and three-tenths personnel-years are proposed to process increased workloads, stabilize delinquent tax receivable write-offs, and accelerate revenue collections. Three-tenths of one personnel-year is added to reflect reallocation of fixed overhead charges.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	251.2	273.9	287.5	\$5,619,754	\$6,998,080	\$7,434,412

## VI. LITTER ASSESSMENT PROGRAM

## Program Objectives and Description

This program is needed to provide revenues for the State Litter Control, Recycling, and Resource Recovery Fund. The program's objectives are to insure that annual assessments are collected in an equitable and effective manner by timely reporting of tax liability, detection and correction of errors in self-assessment, and prompt collection of delinquent amounts determined to be due and economically recoverable.

The revenue is derived by collecting an annual assessment from manufacturers or wholesalers who employ an average of three or more employees annually and are engaged in a business activity in the State of selling tangible personal property as such property is defined in the law.

Sixty-six and seven-tenths personnel-years and \$1,515,678 are being relinquished due to the phase out of the Litter Assessment Program as required by passage of AB 66 (Chapter 1150, Statutes of 1979). Fifty-eight and four-tenths personnel-years and \$1,170,741 in 1979-80, and in 1980-81 the remainder.

## a. Registration of Taxpayers

Registration of taxpayers enables the Board to furnish tax reporting forms and instructions for self-reporting of assessments. The Board establishes an account for each taxpayer, maintains the account on a current basis, and closes it out when the business terminates.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	13.5	2.3	-	\$354,697	\$72,724	-

STATE BOARD OF EQUALIZATION—*Continued*

## b. Processing Assessments

After a taxpayer files a self-assessment form, it is processed through the mail processing, cashier, and data processing units for deposit of revenue receipts and fiscal accounting purposes. A delinquency record is established and notices sent to those taxpayers failing to file an assessment form. Taxpayers whose accounts remain uncleared after a reasonable period are cited to appear at a Board field office to file a self-assessment form or for Board preparation of an assessment form.

Reporting forms are reviewed for proper preparation, application of the law, and mathematical accuracy. Billings or refunds are prepared to notify the taxpayer of errors in self-assessment and applicable penalty and interest.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	22.4	5.2	-	\$445,789	\$189,088	-

## c. Auditing Accounts

The Litter Assessment audits are made in conjunction with audits of sales and use tax accounts. Sales and use tax accounts eligible for audit are selected through a process which assures field audit time is used as productively as possible to promote accurate self-assessment and deter evasion. The primary benefit of these audits is to protect the assessment base and assist sellers in understanding the law and reporting requirements.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	2.9	0.5	-	\$68,520	\$20,699	-

## d. Collecting Assessments Receivable

Field offices are primarily responsible for the collection of delinquent assessments. The effort expended on each account is consistent with the assessment due. Initial efforts to collect assessments are through use of the telephone or by correspondence. Field calls and the utilization of statutory remedies may be necessary to collect larger amounts when other efforts are not productive.

Headquarters staff support field collection efforts with actions such as the preparation of liens, issuance of warrants, and the processing of claims and documents relating to bankruptcies, assignments, and probates and referrals to the Attorney General.

## VII. ALCOHOLIC BEVERAGE TAX PROGRAM

## Program Objectives and Description

This program is needed to provide revenue for the State General Fund. The objective of this program is to insure that all Alcoholic Beverage Tax revenues are collected equitably and effectively by; effecting timely reporting of tax liability, detecting and correcting errors in reporting, and promptly collecting amounts determined to be due and economically recoverable.

Self-assessed State excise taxes imposed on the manufacture, importation, or sale of alcoholic beverages in this State are administered by the Board.

## Authority

Revenue and Taxation Code—Part 14, Division 2.

d. Collecting taxes receivable .....	1	1	1	19,601	22,648	23,265

## a. Registration of Taxpayers

Persons subject to the alcoholic beverage taxes are identified through licenses issued by the Department of Alcoholic Beverage Control. The Board registers them as taxpayers and furnishes tax returns for the reporting of tax. Accounts are regularly reviewed to determine security requirements. Nontaxpaying common carriers, customs brokers, out-of-state vendors, and out-of-state purchasers are also registered and supply necessary information reports.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	1.2	1.2	1.2	\$27,985	\$33,651	\$34,569

## b. Processing Tax Returns and Reports

Alcoholic beverage tax returns are filed directly with the Board's headquarters office. The returns are processed through the cashier and the data processing division for deposit of funds and fiscal accounting purposes. The excise tax unit then verifies reported tax computations, notifies taxpayers of apparent discrepancies on returns, and reviews them for proper preparation and application of the law.

A delinquency is established for taxpayers failing to file returns and notices are sent to them. A list of delinquent accounts is furnished to field offices for followup. Billings or refunds are prepared for errors in self-declared tax and applicable penalty and interest.

After reports received from common carriers, customs brokers, and out-of-state vendors are coded and processed by the data center, they are used to verify amounts reported by taxpayers. These informational reports produce an accountability system which enables the Board to effectively monitor taxable and nontaxable transactions in the State.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	18.3	18.3	18.3	\$337,258	\$421,146	\$432,632

## c. Auditing Accounts

Due to informational reports received from out-of-state vendors, common carriers, customs brokers, and reciprocating states, the excise tax unit is able to effectively select for field auditing those accounts which appear to have understated the tax. In addition, audits are made of accounts selected at random to deter tax evasion and to promote accurate reporting.

During the audit process, taxpayers are assisted in understanding the law, rules, and regulations and the proper filing of tax returns and reports.

<sup>1</sup> Approximately 90 percent of the reported tax base is audited in a three-year audit cycle.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	12	12	12	\$309,198	\$356,244	\$365,960

## d. Collecting Taxes Receivable

The headquarters office is primarily responsible for collecting taxes receivable. Investigations are made by field personnel when it is necessary to locate assets which may be levied upon or which are subject to lien.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	1	1	1	\$19,601	\$22,648	\$23,265

## VIII. CIGARETTE TAX PROGRAM

## Program Objectives and Description

This program is needed to provide revenue for the State General Fund and for cities and counties. The objective of this program is to insure that all cigarette tax revenues are collected equitably and effectively by; effecting timely reporting of tax liability, detecting and correcting errors in reporting, and promptly collecting amounts determined to be due and economically recoverable.

The Cigarette Tax is imposed upon distributors of cigarettes at the rate of one-half cent per cigarette (10 cents per standard package of 20) and upon consumers who acquire untaxed cigarettes which are not otherwise exempt from tax. The tax is paid by distributors through the purchase of stamps or meter register units from commercial banks which contract with the State for the issuance of stamps and indicia.

## Authority

Revenue and Taxation Code—Part 13, Division 2.

e. Collecting taxes receivable .....	0.6	0.6	0.6	13,264	14,980	15,389

**a. Registration of Taxpayers**

Every person desiring to engage in the sale of cigarettes as a distributor or wholesaler must obtain a license for each location at which he engages in such business. This enables the Board to furnish proper forms for the reporting, processing, allocation, and administration of the tax. Necessary security to assure payment of the tax is obtained from licensed distributors. Taxpayers are advised about reporting requirements, records that must be maintained and the application of tax to specific transactions.

<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Expenditures .....	0.1	0.1	0.1	\$2,629	\$2,676	\$2,749

<sup>1</sup> Approximately 90 percent of the reported tax base is audited in a three-year audit cycle.

<sup>2</sup> The number of cigarette stocks is unknown as they include every retail outlet that sells cigarettes as well as warehoused stock shipments in transit.

## STATE BOARD OF EQUALIZATION—Continued

## b. Processing Tax Returns

Forms and instructions are mailed to licensed distributors and wholesalers to enable them to file monthly reports to account for their purchases and distributions of cigarettes, stamps, and meter units, and to enable cigarette manufacturers (who are all licensed distributors) to report tax on sample cigarettes distributed in California. Other reports relating to the acquisition and sale of stamps and meter units are received from banks. Information reports are received from manufacturers and common carriers. After tax reports, stamp and meter unit sales reports, payments from banks, and various information reports are received in headquarters, they are processed to account for tax payments, verify mathematical accuracy, and assure conformity with the law. This information is also used for audit selection. When a timely report is not filed, the taxpayer is notified. If the delinquency is not cleared, revocation proceedings are instituted.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	5.5	5.5	5.5	\$1,015,715	\$1,019,986	\$1,035,584

## c. Auditing Accounts

Field auditing is essential to assure uniform application of the law, deter tax evasion and carelessness in self-reporting, and identify and correct errors in self-reporting. Reconciliations are made in headquarters using data reported by manufacturers, distributors, wholesalers, banks, and others. Immediate corrective action is taken when underreported tax is indicated. This headquarters function assures payment of the underreported tax on cigarettes received from legitimate sources. However, it does not provide an adequate control of cigarettes obtained from illegal sources.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	4.4	4.4	4.4	\$120,006	\$138,528	\$142,306

## d. Enforcement Activities

Enforcement activities are designed to prevent loss of revenue through tax indicia counterfeiting, bootlegging, smuggling and illegal sales of cigarettes. Field inspections are made of distributors' stamping machines to see that indicia is properly affixed, clear, and legible. Inspections also are made of cigarette stocks in retail stores, in transit, and in vending machines to assure that all packages are properly stamped.

Cigarette wrappers bearing indicia are collected on a regular basis throughout the State and sent to laboratories for analysis to verify that they are genuine. Any counterfeit stamp can be traced to the area in which it was collected, and a field investigation initiated to determine the source.

Liaison is maintained with all Federal, State, and local law enforcement agencies.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	2.7	2.7	2.7	\$66,760	\$76,082	\$78,157

## e. Collecting Taxes Receivable

The headquarters office is primarily responsible for collecting taxes receivable. Investigations are made by field personnel when it is necessary to locate assets which may be levied upon or which are subject to lien. The headquarters staff supports the field collection efforts with various actions, such as preparing of liens, issuing sheriffs' warrants and maintaining the taxes receivable ledger.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	0.6	0.6	0.6	\$13,264	\$14,980	\$15,389

## IX. MOTOR VEHICLE FUEL LICENSE TAX PROGRAM

## Program Objectives and Description

This program is needed to provide revenue for the Highway Users Tax Fund, Aeronautics Fund, Harbor and Watercraft Revolving Fund, Off-Highway Vehicle Fund, and Agriculture Fund. The objective of this program is to insure that the Motor Vehicle Fuel License Tax is administered equitably and effectively by: effecting timely reporting of tax liability, and detecting and correcting errors in taxpayers' self-assessments.

The seven cent per gallon gasoline tax is imposed upon refiners, importers, and wholesale distributors on their distributions to retailers. A two cent per gallon tax is imposed on sales of aircraft jet fuel by dealers to certain users. The State Controller shares responsibility with the State Board of Equalization for the administration of this tax by collecting delinquent taxes and making refunds to consumers who use gasoline in an exempt manner.

Expenditures.....	5.1	5.1	5.1	\$130,753	\$145,548	\$149,741

## c. Auditing Accounts

Accounts to be audited are selected through a process which assures optimum use of field audit time to detect misplaced tax, promote accurate tax reporting, and deter evasion. Such audits protect the tax base and assist taxpayers in understanding the law and with the proper preparation of reports. These activities result in a sustained high level of self-declared tax.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	8.5	8.5	8.5	\$239,669	\$274,831	\$282,749

## X. USE FUEL TAX PROGRAM

## Program Objectives and Description

This program is needed to provide revenue for the Highway Users Tax Fund. The objectives of this program are to insure that all Use Fuel Tax revenues are collected in an equitable and effective manner by effecting timely reporting of tax liability, detecting and correcting errors in taxpayer self-assessment and promptly collecting amounts determined to be due and economically recoverable.

The Use Fuel Tax is imposed on users of diesel fuel at 7 cents per gallon, liquefied petroleum gas and liquid natural gas at 6 cents per gallon, and compressed natural gas at 7 cents per 100 cubic feet, measured at standard pressure and temperature. The tax applies on use of these fuels in motor vehicles on California highways. An annual flat rate amount may be paid for vehicles using liquefied petroleum gas, liquid natural gas or compressed natural gas. All users must hold permits, file returns, and pay applicable tax. The tax is collected by vendors on that portion of the fuel sold and delivered into the fuel tanks of motor vehicles. These vendors hold permits, file returns, and report the tax.

## Authority

Revenue and Taxation Code—Part 3, Division 2.

<sup>1</sup> Approximately 90 percent of the reported tax base is audited in a 3-year audit cycle.

d. Collecting taxes receivable .....	8.7	7.5	7.5	208,695	208,206	214,205

## a. Registration of Taxpayers

Registration of sellers and users enables the Board to furnish them with proper tax forms and instructions for purposes of reporting and processing of these taxes. Necessary security within the limits allowed by law is obtained to assure payment of the tax. The Board establishes an account for each new taxpayer, maintains the account on a current basis and closes it out when the business terminates.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	35.4	35.4	35.4	\$804,427	\$917,469	\$956,567

## b. Processing Tax Returns

This enables the Board to verify the computations, account for the tax paid, identify taxpayers who are delinquent, assess self-declared but unpaid tax liability, and notify taxpayers of apparent discrepancies detected on the returns.

After returns are filed by taxpayers in the headquarters office, they are processed through the cashier section and data processing for deposit of funds and fiscal accounting purposes. Delinquencies are established for taxpayers failing to file returns and notices are sent to them.

Returns are verified for mathematical accuracy and reviewed for proper preparation and application of the law. When questionable deductions are found, the taxpayer is contacted and asked for an explanation. A control system is maintained to assure the accuracy of credits claimed by users for tax paid to vendors.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	28.3	25.7	25.7	\$637,068	\$631,609	\$649,806

## c. Auditing Accounts

This activity is planned to assure uniform application of the tax by detecting and correcting errors in reporting and is statistically designed to cover the tax base in a manner which will audit accounts most likely to make substantial errors in reporting and on a selective basis to police other accounts as a means of promoting accurate reporting. A major objective of the selection system is to audit accounts which will produce tax change in excess of the cost of auditing. To assist the field staff in selection of accounts to be audited, a list of eligible accounts is furnished to each district yearly. Eligible accounts are grouped into eight tax intervals in descending order according to annual tax reported.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	23.2	18	18	\$583,100	\$533,406	\$548,774

## d. Collecting Taxes Receivable

After the finality date of billings, field offices are primarily responsible for collection action including the use of mail, telephone, and personal contacts. Necessary investigations are made by the field staff to locate assets subject to lien or execution proceedings. Vehicles may be seized and thereafter sold when necessary to effect collection of the tax. The object is to bring about payment with the least delay.

In addition to field collection activities, liens are automatically recorded by headquarters seven weeks after the finality date where the amount owed is \$100 or more. If the delinquent amount is owed on an active account, a 'notice of hearing' preparatory to revocation action is issued simultaneously with the recording of the lien.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	8.7	7.5	7.5	\$208,695	\$208,206	\$214,205

## XI. ENERGY RESOURCES SURCHARGE PROGRAM

## Program Objectives and Description

This program is needed to provide revenues for the State Energy Resources Conservation and Development Commission. The objective is to administer a surcharge on the consumption of electricity.

Administration of this surcharge on consumers of electrical energy includes registration of electric utilities required to collect the surcharge from consumers; registration of consumers purchasing electrical energy from the United States; auditing accounts; collecting taxes receivable; resolving petitions for redetermination and claims for refund; advising taxpayers regarding the law; and setting the surcharge rates.

## STATE BOARD OF EQUALIZATION—Continued

## Authority

Part 19 of Division 2 of the Revenue and Taxation Code.

## Measures of Effectiveness

## XII. EMERGENCY TELEPHONE USERS SURCHARGE PROGRAM

## Program Objectives and Description

This program is needed to provide revenue to fund the '911' emergency telephone number system. The objective is to administer a surcharge on intrastate telephone communication services.

Administration of this surcharge on telephone users includes registration of telephone service suppliers required to collect the surcharge from users; auditing accounts; collecting taxes receivable; resolving petitions for redetermination and claims for refund; advising taxpayers regarding the law; and setting the surcharge rates.

## Authority

Part 20 of Division 2 of the Revenue and Taxation Code.

## Measures of Effectiveness

## XIII. INSURANCE TAX PROGRAM

## Program Objectives and Description

This program is needed to provide revenue for the State General Fund. It is estimated that this tax will produce \$455 million in General Fund revenue in 1980-81. The objective is to assess taxes on insurance premiums and on the ocean marine profits of underwriters and to levy retaliatory assessments against 'foreign' insurers.

The program is administered jointly by the Board, the Controller and the Insurance Commissioner. The Board is responsible for assessing the tax and adjudicating petitions for redetermination and claims for refund.

The Board renders an annual assessment against each insurance company based on the net premiums on California business other than ocean marine insurance, and the average annual underwriting profit on ocean marine business. It also imposes a retaliatory tax on any out-of-state company doing business in California whenever that company's home state subjects a California company doing business in that state to a greater burden than California imposes on insurers domiciled in that state. The Board also hears taxpayer appeals and makes decisions to grant or deny petitions for redetermination and claims for refund.

## Authority

The State Constitution, Article XIII, Section 28 and Part 7 of Division 2 of the Revenue and Taxation Code.

## Output

	1978-79	1979-80	1980-81

STATE BOARD OF EQUALIZATION—*Continued*

## XIV. APPEALS FROM OTHER GOVERNMENTAL PROGRAMS

## Program Objectives and Description

A method of independent review is necessary when a taxpayer disagrees with actions taken by the Franchise Tax Board. The Board of Equalization provides this necessary appellate procedure.

There is also a need for an impartial tribunal that decides disputes between entities of local government relative to assessments and equalization on local rolls of taxable property of a county, city, city and county, or municipal corporation. The objective is to render sound and equitable administrative appellate decisions in an expeditious manner.

In the case of franchise and income tax and senior citizens property tax appeals, a taxpayer files a written notice with the Board to initiate the appeal action.

In the case of intracounty equalization appeals, the review action is initiated when the local public entity which owns taxable property outside its jurisdiction files an application for review, equalization, and adjustment of the assessment with the Board.

## Authority

(1) Franchise and Income Tax Appeals: The Revenue and Taxation Code Sections 18593 to 18596, 18621, 18646, 18648, 19057 to 19061.1, 19062.2 to 19062.5, 25666, 25667, 25701, 25701a, 25731a, 25761a, 26075 to 26078 and 26060.1. Procedural regulations respecting appeals from the Franchise Tax Board are contained in Title 18, California Administrative Code, Chapter 2, Subchapter 10, Sections 5021 to 5027 and 5071 to 5080; (2) Senior Citizens Property Tax Assistance: Section 20645 of the Revenue and Taxation Code; and (3) Intracounty Equalization: Section II of Article XIII, California Constitution, and Sections 1840 and 1841 of the Revenue and Taxation Code. The procedural regulations are contained in Sections 451–458, Chapter 1, Title 18, California Administrative Code.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

c. Intracounty equalization .....	0.1	0.1	0.1	2,250	2,533	2,602

## a. Franchise and Income Tax Appeals

Action is initiated after a taxpayer files a written notice with the Board of Equalization. The legal staff secures the framing of the issues of law and fact by means of memoranda and stipulations of the parties. After an oral hearing before the Board, the case is referred to the Board's legal staff for review, analysis, and preparation of a written opinion and decision reflecting the views of the Board of Equalization.

*Two and nine-tenths personnel-years are proposed to reduce backlogs, handle increased workloads and to render sound and equitable administrative appellate decisions in an expeditious manner.*

Output	1978-79	1979-80	1980-81
Percent of appeals decided within 90 days .....	41	40	42
Number of appeals decided within 90 days .....	76	80	88
Number of appeals disposed of by opinion .....	184	185	220

Expenditures.....	0.4	0.4	0.4	\$13,619	\$16,652	\$17,106

## STATE BOARD OF EQUALIZATION—Continued

## c. Intracounty Equalization

Action is initiated when the local public entity which owns the property files with the State Board of Equalization an application for review, equalization, and adjustment of the assessment imposed by the county or city in which the property is located. The assessor may file an answer. A prehearing conference is conducted by a member of the Board's legal staff to define the issues and arrange for stipulations and exchange of exhibits. A formal hearing is conducted before the Board which renders a written decision with findings of fact, conclusions, and an order.

Output	1978-79	1979-80	1980-81
Percent of all applications disposed of prior to August 23.....	—	100	100
Number of all applications disposed of prior to August 23 .....	—	4	1
Number of applications filed .....	3	1	1

## XV. ADMINISTRATION PROGRAM

The objectives of this program are to implement the policies and directives of the elected Board Members, and to provide direction, leadership, planning, and supportive services for all Board programs.

These activities are provided by the executive secretary, assistant executive secretaries, and the chief counsel. It also includes administrative staff services reporting to these positions.

## SECRETARY OF STATE

The principal objectives of the Secretary of State's Office are to examine numerous types of documents for statutory compliance; to file such documents as a matter of public record; to administer and enforce election laws and procedures; to appoint notaries public and to enforce the laws relating to the conduct of notaries public; to access and preserve records having historical significance and to make such records available for public use.

The office administers six major programs: Corporate Filing, Elections, Political Reform, Uniform Commercial Code, Notary Public, and Archives.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Corporate Filing .....	\$2,113,972	\$2,450,470	\$2,628,812
II. Elections .....	2,388,831	5,350,035	4,447,171

Data processing—distributed .....	(870,598)	(988,913)	(1,031,169)
VIII. Subventions for Signatures in Lieu of Filing Fees .....	356,810	23,500	319,191
IX. Subvention to Counties for Voter Registration File Purge .....	1,044,988	—	592,712
X. Subventions to Counties for Registration by Mail Costs .....	750,325	800,000	800,000
TOTALS, PROGRAMS .....	\$9,935,655	\$12,232,477	\$12,516,871
Reimbursements .....	— 704,156	— 470,904	— 443,904
Amount payable from the Political Reform Act .....	— 396,607	— 464,635	— 471,678
NET TOTALS, PROGRAMS (General Fund) .....	\$8,834,892	\$11,296,938	\$11,601,289
Personnel years .....	241.8	248.7	261.8

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel years	Dollars
I.	Workload increase in corporate filing .....	5.7	\$74,996
II.	Workload increase, review of county subvention claims .....	1	26,583
II(c).	Additional Postage, Registration by mail .....	—	43,889
VI.	Workload increase, administration for the State Archives .....	0.9	26,438

## I. CORPORATE FILING

### Program Objectives and Description

The Secretary of State staff examines articles of incorporation and related documents to assure that corporations are formed, merged, dissolved, etc., in compliance with California law. The program provides proprietary control over the formation of corporations which, in turn, allows for the protection of the public interest in such matters. The program also calls for the recording of names and addresses of corporate officers, directors and agents for service of process. Trademarks and service marks are also registered. The program provides for the dissemination of information contained in the filed documents. Filed documents are open to public inspection, and copies are available upon request.

5.7 additional clerical personnel years are proposed for this program in anticipation of workload increases. Revenue associated with the anticipated workload increases will exceed the cost of the new positions. With the restoration of the 1979-80 Section 27.2 reduction of 4.2 personnel years, there is a net increase of 9.9 personnel years in 1980-81.

### Authority

Corporations Code Sections 110, 1502, 9304.5 and Government Code Section 12201 et seq.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## SECRETARY OF STATE—Continued

## II. ELECTIONS

## Program Objectives and Description

The Secretary of State, as California's chief election officer, ensures that the State's election laws are complied with in a uniform manner. Technical information and legal opinions are issued for the public, Legislature, and local election officers regarding election laws and procedures. The continuing complexity of the State's election system requires increased vigilance by the Secretary of State, as well as the promulgation of appropriate rules and regulations to insure that the State's election laws are uniformly and adequately observed. In addition, the Secretary of State certifies to the nomination and election of State candidates, and the office is the central repository for voter registration data and official election results.

One (1) auditor is proposed to review the increasing number of subvention claims from California's 58 counties for the following program elements: voter registration by mail; the mailing of voters' pamphlets; the purging of electors who failed to vote; and the processing of "in lieu signatures" on nominating petitions. In addition, one limited-term special investigator is not carried over into 1980-81. The net increase in 1980-81 of 0.6 personnel years reflects elimination of salary savings associated with Section 27.2 of the Budget Act of 1979.

## Authority

Constitution, Elections Code, Government Code, Federal Voting Rights Act and the Federal Overseas Voting Act.

## Elections—Registration by Mail

The voter registration program is an important element of the Elections program and is displayed here to demonstrate the details of that program. Funding for voter registration is shown in the appropriate location elsewhere in the Secretary of State's budget.

Statutes 1975, Chapter 704 (AB 822), affecting "Elections—Voter Registration" became operative on July 1, 1976. The act established a new system of self-registration for voters in addition to the existing system of registration by deputy registrars.

This chapter mandates the Secretary of State to adopt regulations requiring counties to design and implement programs which must meet certain minimum requirements. These programs must identify qualified electors not registered to vote and register the maximum number of such persons in order to maintain registration at the highest possible level. The chapter also requires the Secretary of State to design and cause to be printed deputy registration forms, voter registration cards, and voter notification cards so that electors may register by mail as well as in person.

The act also requires the Secretary of State to pay all postal costs associated with the program. The Secretary also is required to review all claims of local government for reimbursement of net costs of the program and to recommend the inclusion of proper sums for that purpose in the Governor's Budget.

Commencing in the 1980-81 fiscal year, funding for the printing of voter registration forms and for postage relating to the voter registration process will be carried as special items of expense and separate budget items.

## Authority

Statutes 1975, Chapter 704. (This is the detail of element c of Program II including the subventions to the counties.)

## III. POLITICAL REFORM

## Program Objectives and Description

The Secretary of State shares the responsibility for enforcing the California campaign disclosure laws enacted as the Political Reform Act of 1974. Under this law the Secretary of State is charged with reviewing all campaign receipts and expenditure statements from candidates, committees, and ballot measure proponents and opponents and their committees; registering lobbyists and reviewing and publishing lobbyist and lobbyist employer monthly expenditure reports.

Chapter 415, 1976 Statutes requires the Secretary of State to print and make available to the public all registrations and amendments thereto of persons qualifying as lobbyists under the Political Reform Act of 1974.

Included in the budget year are 0.8 personnel years associated with elimination of salary savings due to Section 27.2 of the Budget Act of 1979.

## Authority

Government Code (Title 9, Political Reform).

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs	18.5	19.4	20.2	\$429,523	\$478,792	\$485,582

Lobbyists statements filed		6,000	3,000	2,400
Lobbyists registrations		600	20	600
Lobbyists employer statements filed		9,600	4,500	3,400
Revenue		\$44,022	\$24,500	\$39,000

SECRETARY OF STATE—*Continued*

## IV. UNIFORM COMMERCIAL CODE

## Program Objectives and Description

This program provides for the filing of financing statements and related documents so that a secured creditor may perfect a security interest in personal property covered by a security agreement as against other creditors. Not only does this program afford a secured creditor some protection against debtor bankruptcy, insolvency or default, but it also provides a prospective lender or seller the means to determine if there are any previously perfected security interests involving certain personal property. The division further files notices of federal tax liens against partnerships and corporations, state tax liens and attachment liens against personal property. The Secretary of State's staff examines all documents presented for filing for statutory compliance. The documents are then filed and open to public inspection. Certificates of filing and copies of filed records are available upon request.

*The budget year includes 1.8 personnel years associated with elimination of salary savings due to Section 27.2 of the Budget Act of 1979.*

## Authority

Uniform Commercial Code, Chapter 4, Division 9 and 10 and 11; Uniform Federal Tax Lien Registration Act; Chapter 14, Division 7 of Title 1 of the Government Code; and Chapter 14.5, Division 7 of Title 1 of the Government Code relating to the registration of State tax liens; Section 488.340 of the Code of Civil Procedure relating to attachment liens.

## V. NOTARY PUBLIC

## Program Objectives and Description

The business community and general public is served through the appointment of notaries public for the purpose of performing certain official acts and to give official recognition and authenticity to acts and documents executed in the presence of a notary public. Many documents to be legally or officially acceptable must be notarized. Notary public services are generally related to oaths, affirmations, affidavits, depositions, and acknowledgments. Applications for a notary public commission are reviewed to determine that applicants meet the requirements for appointment. Appointments are for four-year terms and under such an appointment, a notary may render notarial services throughout the State. The Secretary of State further investigates improper conduct on the part of the notaries public and takes appropriate disciplinary measures if warranted.

*The budget year includes 0.2 personnel years associated with elimination of salary savings due to Section 27.2 of the Budget Act of 1979.*

## Authority

Government Code, Chapter 3, Division 1, Title 2.

Revenue .....	\$538,837	\$551,178	\$572,178

## VI. ARCHIVES

## Program Objectives and Description

The State Archives collects, catalogs, indexes and preserves historic and otherwise valuable documents from a wide range of origins including county and city records as well as state papers. The Archives serves the public directly and assists State agencies and private and semiprivate institutions by providing an organized record of California history. Without this program for collecting historic documents, many valuable and needed records would be lost or otherwise destroyed, leaving the state with a reference vacuum that could not be filled. The State Archives at 1020 O St., Sacramento, maintains an exhibit hall which is open to the public on a daily basis. Beginning with the 1978-79 budget, support for the California Heritage Preservation Commission is included in the support for the State Archives.

*In 1980-81, 0.9 personnel years are added to handle administrative needs. In addition, the budget year includes 0.5 personnel years associated with elimination of salary savings from Section 27.2 of the Budget Act of 1979. With the termination of Title II funding and 2.5 personnel years in 1979-80, there is a total net decrease of 1.1 personnel year in 1980-81.*

SECRETARY OF STATE—*Continued*

## VII. ADMINISTRATION AND STAFF SERVICES

## Program Objectives and Description

Management control and staff support are provided to line functions with emphasis on personnel, fiscal, data processing and general administrative services. This provides the office with a means for continuing evaluation of its programs for greater responsiveness to program requirements. Through analytical studies, development of personnel, fiscal and other administrative options developed by administrative staff, the executive staff to the Secretary of State is able to establish policy, plan and direct the various programs administered by the Department. Fiscal, personnel, electronic data processing, system analysis, computer programming and management analysis functions contribute significantly to the executive and administrative direction provided by management.

The budget year reflects an increase of 2.8 personnel years due to elimination of salary savings associated with Section 27.2 of the Budget Act of 1979.

## Program Requirements

## VIII. SUBVENTIONS FOR SIGNATURES IN LIEU OF FILING FEES (Local Assistance)

## Program Objectives and Description

Chapter 454 (AB 914, Gonzales) waives the requirement for a filing fee when petitions signed by a specified number of registered voters in the area to be represented are filed by a candidate for public office.

## Program Requirements

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs in lieu of filing fees (General Fund).....	—	—	—	\$356,810	\$23,500	\$319,191

## IX. SUBVENTIONS TO COUNTIES FOR VOTER REGISTRATION FILE PURGE (Local Assistance)

## Program Objectives and Description

Chapter 1401, Statutes of 1976, Chapter 780, Statutes of 1977, and Chapter 3, Statutes of 1978, amend the procedures for purging nonvoters from the voter registration files. Chapter 1401, Statutes of 1976, and Chapter 780, Statutes of 1977, require that local government be reimbursed for any net cost associated with the purge.

It is expected that savings will be realized for general elections because voter files will be more accurate than before. For this reason, appropriations for this program will be for the net primary costs resulting from both the primary and general elections considered together.

## X. SUBVENTIONS TO COUNTIES—REGISTRATION BY MAIL

## Program Objectives and Description

Section 304 of the Elections Code requires each county to design and implement a program to identify qualified electors who are not registered to vote and to register said persons to vote. Chapter 704, Statutes of 1975 provides for a voter registration-by-mail program. Section 91 of Chapter 704, Statutes of 1975 provides that counties shall be reimbursed for any net cost associated with the implementation of Chapter 704 including any program required pursuant to Section 304 of the Elections Code.

## COMMISSION ON VOTING MACHINES AND VOTE TABULATING DEVICES

Pursuant to Chapter 246 Statutes of 1976 the State Commission on Voting Machines and Vote Tabulating Devices is mandated to study and adopt regulations governing the use of voting machines, voting devices, and vote tabulating devices.

The Secretary of State, as Secretary of the Commission, makes all arrangements for the time and place to examine voting equipment proposed to be sold in California. In addition, the Secretary furnishes complete reports of the findings of the examining engineers, and has the ongoing responsibility for verifying that the equipment used in elections is operable in every election.

*The budget for 1980-81 proposes \$5,000 for consulting services to investigate any complaints against previously certified voting machines.*

### STATE TREASURER

The State Treasurer provides banking services for State government with a minimum interest and service cost and with a maximum yield on investments. He is charged with the responsibility for the custody of all money and securities belonging to or held in trust by the State; investment of temporarily idle State monies; administration of the sale of State bonds, their redemption and interest payments; and payment of warrants drawn by the State Controller and other State agencies. The State Treasurer is also responsible for reviewing the financial soundness of certain local district construction financing proposals.

STATE TREASURER—*Continued*

## I. BOND SALES AND SERVICES

## Program Objectives and Description

This program element includes the selling, issuing, servicing and redeeming of all State of California general obligation and revenue bonds. Interest costs are minimized through a planned bond marketing program. This includes the offering of complete bond services to present bond holders, including flexible bond registration and maintenance of paying agents in New York and Chicago. *An increase of one position in 1980-81 reflects the elimination of one-time salary savings attributed to Section 27.2 of the Budget Act of 1979.*

Output	1978-79	1979-80	1980-81
Value of bonds sold (in millions) .....	\$877	\$1,400	\$1,580
<b>Input</b>			
Expenditures .....	\$464,380	\$542,578	\$602,787
Personnel years .....	16.6	18.8	19.8

## II. INVESTMENT SERVICES

## Program Objectives and Description

The State Treasurer has the responsibility for investment of State moneys from the day of receipt until the day that warrants issued to expend these receipts are presented to the State Treasurer's Office for redemption. During the 1978-79 fiscal year, this office handled 9,209 security investment transactions totaling \$90.9 billion. The Pooled Money Investment Board program accounted for 9,091 of these transactions totaling \$90.1 billion. The remaining \$800 million was distributed among other investment programs such as California Housing Finance Fund, Central Valley Water Project and Construction Fund and Marketing Trust Account. Cash management for these programs includes a comprehensive cash forecasting system which permits the purchase of longer term securities, thus maximizing the return from these funds.

Output	1978-79	1979-80	1980-81
Total revenue (in millions) .....	\$692	\$760	\$620
<b>Input</b>			
Expenditures .....	\$388,086	\$472,022	\$496,455
Personnel years .....	8.7	10.4	10.4

## III. PAYING AND RECEIVING

The State Treasurer provides banking services for all State agencies. Included in this element are the deposit of State moneys in the State Treasury and centralized banking system and the redemption of all State warrants. *In 1979-80, two positions were administratively established to process Controller's warrants. These positions are proposed as permanent in the budget year. Two additional positions are also proposed for 1980-81 to automate the trust services program and to handle increases in other warrant workload. A 0.5 position increase in the budget year reflects the elimination of one-time salary savings attributed to Section 27.2 of the Budget Act of 1979.*

Output	1978-79	1979-80	1980-81
Dollars received (in billions) .....	\$91.5	\$103.4	\$111.7
Number of warrants paid (in millions) .....	38.4	41.2	44.1
<b>Input</b>			
Expenditures .....	\$1,246,718	\$1,379,220	\$1,530,635
Personnel years .....	39.2	45.8	48.3

## IV. TRUST SERVICES

The State Treasurer is responsible for the safekeeping of all securities and other personal property owned by or pledged to the State. These securities are held in the Treasurer's vault or in approved depositories such as the Federal Reserve Banks in San Francisco and Los Angeles. As of June 30, 1979, the Treasurer was responsible for over \$24 billion in securities. During the past year, 25,195 security receipts and releases were prepared and processed involving 604,242 securities. In addition, 1,509,938 coupons, representing the interest increment on bonds held, were clipped and processed for collection during Fiscal Year 1978-79. *The 1980-81 decrease of 0.1 person years in Trust Services is due to salary savings adjustments.*

Output	1978-79	1979-80	1980-81
Number of securities received and released .....	25,195	25,300	25,400
<b>Input</b>			
Expenditures .....	\$578,947	\$697,258	\$729,605
Personnel years .....	18.3	19.8	19.7

## V. DISTRICTS SECURITIES DIVISION

The California Districts Securities Division is charged with the supervision of certain fiscal proposals and physical operations of irrigation districts, water districts, water storage districts and certain other types of districts and local entities of the State of California.

The Districts Securities Commission was established in 1931 as a result of a special investigation by the California Irrigation and Reclamation Financing and Refinancing Commission following the default of many irrigation and other districts in payment of principal and interest due on outstanding bonds. The Districts Securities Commission succeeded the Bond Certification Commission which had been created in 1911. Since the creation of this Commission, there has not been a default in payment of principal or interest due on bonds approved by the Commission.

The Districts Securities Commission became a division in the State Treasurer's Office effective November 10, 1969, in accordance with the Governor's Reorganization Plan No. 1.

## MUSEUM OF SCIENCE AND INDUSTRY

The Museum of Science and Industry is an educational, scientific and technological center administered by a nine-member board of directors appointed by the Governor. It is located in Exposition Park, a 104-acre tract just south of the central part of Los Angeles, which is owned by the State in the name of the museum.

In a number of State-owned buildings, it presents a series of exhibits and conducts associated programs centering on the scientific and industrial development of the State. In addition, it has responsibility for the operation of parking facilities for visitors to the park, the museum, and the Los Angeles Coliseum and Sports Arena.

## I. EDUCATION

### Program Objectives and Description

The program performed by the Museum of Science and Industry exhibits man's scientific and industrial capabilities and accomplishments. The director and his staff, in cooperation with the nine-member board of directors, administer the museum operation. They also have responsibility for the security and operation of the museum's buildings and Exposition Park.

The primary purpose of this educational program is to create and stimulate the interest of Californians in the fields of science and industry. It is particularly geared to reach the largest possible number of the State's young people, with the anticipation that some will pursue scientific and industrial careers and thereby provide California with needed talent in these fields. The program in addition to permanent, temporary and traveling exhibits, consists of lectures, seminars, films, science workshops and teaching institutes led by eminent scientists from all over the country. A major portion of these latter activities is financed by the Museum Foundation Fund which is supported by private contributions.

Admission to the museum's exhibits is free, and attendance records underscore continued public interest.

This budget proposes to increase temporary help by three positions in 1979-80 and 1980-81 to comply with a State Personnel Board directive which requires the use of State civil service employees for tour guides rather than contracting for the service. Salary savings have been increased by 1.6 positions in 1979-80 only as a part of the reductions required by Section 27.2, Budget Act of 1979.

The budget proposes 3.5 positions in 1980-81 for increased workload, one of which will be funded by reimbursements. Of these, one temporary help position is to be allocated to the education unit, one temporary help position and one exhibit technician position is to be allocated to the exhibit unit, and a half-time office assistant II position is to be allocated to the graphic unit.

The 1980-81 budget also reflects the addition of 1.9 positions for the initial staffing of the proposed Hall of Economics and Finance. This addition expands the educational program to include economics.

### Authority

## II. ADMINISTRATION

The administrative staff of the Museum of Science and Industry operates under the general direction of the Museum Director and provides personnel, budgeting, planning and clerical services in support of the museum program. This function assures the proper operation and maintenance of all plants and facilities and is responsible for the operation of twenty-six acres of public parking.

## MUSEUM OF SCIENCE AND INDUSTRY—Continued

## III. SUPPLEMENTAL INFORMATION

The expenditures reflected below are being displayed for informational purposes only and are not included in overall budget totals. The California Museum Foundation of Los Angeles is a nonprofit corporation which functions as membership auxiliary to the museum. It was established in 1950 for the purpose of soliciting and providing funds to acquire and maintain exhibits to be displayed at the museum and assisting in the establishment and operation of educational activities of the museum.

## BOARD OF BEHAVIORAL SCIENCE EXAMINERS

The confidential and sensitive nature of services performed by Licensed Clinical Social Workers, Marriage, Family and Child Counselors, and Educational Psychologists necessitates the development and enforcement of standards of performance and competence consistent with the public welfare. By establishing educational and experience requirements as well as examinations, the Board of Behavioral Science Examiners assures that minimum standards are met. The Board investigates cases of possible violations or unlicensed practice.

The 1979-80 and 1980-81 budgets include the redirection of funds from the oral commissioner blanket to temporary help and examination proctors.

DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

## Output

Comprehensive examinations assure that only those demonstrating competence obtain licensure. Investigative and disciplinary actions reduce the opportunity for unethical or improper practice.

## BOARD OF DENTAL EXAMINERS

Dental treatment and care must be performed in a competent and professional manner. To ensure this, the Board of Dental Examiners establishes qualifications for licensure as a dentist, hygienist, assistant, expanded function auxiliary, or professional corporation; administers examination; approves dental schools and training programs; sets requirements for continuing education; receives complaints and investigates possible violations of the Dental Practices Act; and, polices against unlicensed practice.

## For the Dentistry Program:

The 1980-81 budget year includes the addition of 1.0 clerical position to implement the provisions of Chapter 886/1979 relating to an anesthesia permit program.

Chapter 1067/1979 creates a State Dental Auxiliary Fund effective January 1, 1980. This change is reflected by the transfer of \$152,500 and 5.0 positions in the current year and \$320,000 and 5.2 positions in the budget year from the Dentistry Program to the Dental Auxiliary Program.

## For the Dental Auxiliary Program:

The 1979-80 and 1980-81 budgets include a redirection of funds to the proctor blanket for examiner assistants.

The 1980-81 budget for the Dental Auxiliary Program also includes:

1. An increase of \$2,943 to provide orientation to examiners.
2. An increase for special consultants and 0.5 positions for temporary help to implement the extended functions category of licensure.
3. The addition of 1.0 clerical position to be funded from within existing resources.
4. An increase in estimated salary savings by 0.1 positions.

## DEPARTMENT OF CONSUMER AFFAIRS—Continued

## Output

Effective application screening and testing of candidates identifies those persons capable of performing competently. Investigative and disciplinary actions ensure that these standards are maintained.

## STATE BOARD OF GUIDE DOGS FOR THE BLIND

The primary objectives of the State Board of Guide Dogs for the Blind are to:

1. Protect the safety of blind guide dog users by ensuring that instructors and schools possess minimum qualifications and are licensed.
2. Enforce standards of performance and conduct established for such licenses, and police unlicensed practices.

## Output

The Board licenses those persons who meet the educational and experience requirements to be guide dog trainers and operators of guide dog schools.

## BOARD OF MEDICAL QUALITY ASSURANCE

The people of California are deserving of the best possible medical treatment and healing arts services. They must be protected from the unethical and/or unlicensed individual who can do much harm because of the personal and intimate nature of the services provided. The Board attempts to meet this need through the enforcement of the Medical Practices Act and other related laws under its jurisdiction.

The objectives of the Board are:

1. To protect the consumer from incompetent, grossly negligent, unlicensed or unethical practitioners.
2. To enforce provisions of the Medical Practices Act and other healing arts laws.
3. To educate healing art licensees and the public on health quality issues.

The 1980-81 budget includes:

1. The addition of 1 position to implement AB 410 relating to physician staff privilege reporting requirements.
2. The addition of 4 positions to implement a physicians impairment program as provided for in AB 1146. Funding and positions for this program will terminate on June 30, 1981 subject to Department of Finance review during the 1981-82 budget hearings.
3. Adjustments for overtime, special consultants, and contract services for a net decrease of \$11,000 and 6 positions.
4. The addition of 2 investigators to be funded from within existing resources.
5. The addition of 1.5 clerical positions to be funded from within existing resources.
6. An increase in estimated salary savings by 0.7 positions.

DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

## Output

To license those who qualify and provide the consumer with the utmost protection in the marketplace by a careful consideration of complaints and action to ensure that health care standards are met as required by law.

a. Numbers of licenses issued to qualified applicants and denied to those not qualified.

b. Numbers of complaints and inquiries processed, investigations conducted and disciplinary actions rendered.

## ACUPUNCTURE ADVISORY COMMITTEE

The practice of acupuncture is a theory and method for treatment of illness and disability and for strengthening and invigorating the body. As such affects the public health, safety and welfare there is a necessity that individuals practicing acupuncture be subject to regulation and control. A committee exists to advise the Board of Medical Quality Assurance on implementing the provisions of the related laws.

## HEARING AID DISPENSERS EXAMINING COMMITTEE

It is estimated that one out of every five California citizens has some degree of hearing loss. For those who must wear hearing aid devices, there are dangers from unlicensed or un reputable hearing aid dispensers.

The Board's objectives are:

1. To protect consumers by investigating and examining applicants for hearing aid dispensers licenses and ensuring compliance with all occupational licensing requirements.

2. Discipline those licensed who fail in their public trust.

## Output

1. Number of applicants for licenses who are screened out by the examination process and are denied their license until they can successfully demonstrate they possess the required skills and knowledge.

2. Number of complaints investigated that result in disciplinary actions.

## PHYSICAL THERAPY EXAMINING COMMITTEE

Physical therapists in independent practice treat patients who have disabilities resulting from accidents, congenital defects or illnesses. In order to ensure proper patient evaluation and treatment, those persons skilled in the profession of physical therapy must meet the minimum standards established according to law. This is accomplished by licensing those who possess the necessary qualifications and enforcing standards of ethical conduct established for such licensees and policing against unlicensed practice.

## Output

1. The number of applicants who do not successfully complete the examination, and are therefore denied a license.
2. The number of investigated complaints which result in license suspensions and revocations which put the unethical and incompetent therapists out of reach of the consumer.

## PHYSICIAN'S ASSISTANT EXAMINING COMMITTEE

Concern over the growing shortage and geographic maldistribution of health care services in California has been expressed in both the private and public sector. The physician's assistant is one category of health care manpower that is providing a means by which California can combat this shortage. The effective use of physician's assistants enables the physician to delegate health care tasks where such delegation is consistent with the patient's health and welfare, thereby freeing the physician to concentrate his or her skills on more complex health care services.

The Physician's Assistant Examining Committee facilitates the utilization of physician's assistants by assuring the public that the Committee's licensees and approved programs have met certain minimum requirements. Such minimum licensing requirements attempt to protect the public from inadequately trained, unethical or incompetent practitioners.

## Output

Evidence that the Committee is meeting its objectives can be seen in the increased number of licensees and approved programs.

During this fiscal year the Committee will be administering three specialty examinations, which have been developed by the Committee. Administration of two of the exams will mark the first time the specialty physician's assistants have taken a certification exam.

## SPEECH PATHOLOGY AND AUDIOLOGY EXAMINING COMMITTEE

Many thousands of California citizens are afflicted with serious hearing and disabilities occasioned by congenital disorders, occupational injuries and diction-related disfunctions. Recognizing the dimensions of their need for professional services, the State instituted licensure requirements and established this Committee to ensure that only those possessing the necessary qualifications are licensed.

*Changes in the current and budget year include the addition of 0.2 positions in temporary help to be funded from within existing resources.*

## Output

To guarantee protection of consumers of the State through rigorous, disciplined interpretation of the provisions contained in enabling legislation.

## BOARD OF EXAMINERS OF NURSING HOME ADMINISTRATORS

Patients in skilled nursing facilities and intermediate care facilities have a right to expect quality medical treatment, a sanitary environment, a nutritional diet, and safekeeping of their funds.

The Board of Examiners of Nursing Home Administrators helps to assure that the rights of nursing home patients are safeguarded. In licensing Nursing Home Administrators—as required by Federal statutes—the Board prescribes standards for administrators, provides an administrator-in-training program for would-be licensees, examines applicants, issues licenses, disciplines administrators who violate the laws or rules pertaining to the administration of nursing homes, and handles consumer complaints involving administrators.

The principal objectives of the Board of Examiners of Nursing Home Administrators are as follows:

1. Through a program of examination and licensure, to identify to the consuming public those persons who have demonstrated that they are qualified to function as Nursing Home Administrators.
2. To insure, through the setting of standards and through disciplinary actions, that Nursing Home Administrators provide quality services to their patients, in accordance with the laws and the rules governing nursing homes.
3. To assure that consumers who have legitimate complaints against Nursing Home Administrators receive fair and just treatment.

## BOARD OF OPTOMETRY

The administration of the Optometry Practice Act includes examining and licensing individuals for the practice of optometry, licensing branch offices, registering optometric corporations, issuing fictitious name permits, issuing statements of licensure, accrediting schools and colleges of optometry, and enforcing the regulatory features of the Act, for the protection of the consumer patient. The Board's objectives are to insure that only those who possess the optometric expertise and knowledge can acquire and hold a license to practice as a licensed optometrist within the provisions of the Optometry Practice Act. The malfeasant practitioner could cause serious eye injury to the consumer patient. In order to reduce the possibility of such occurrence, the Board is required to enforce the optometry legal statutes and to discipline the malfeasant practitioner.

DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

## Output

The Board is meeting its objectives by annually revising the examination which is the entry point into the practice of optometry in California and providing consumer information, to insure that the consumer patient receives the best optometric care possible and is made aware of the best vision care procedures.

## BOARD OF PHARMACY

The distribution and dispensing of prescription drugs and controlled substances within the legal channels must be regulated to prevent illegal distribution or improper use of these potentially dangerous or harmful substances. Also the patient must be warned regarding the possible harmful effects if the drug is combined with alcohol.

To accomplish this, the Board of Pharmacy sets minimum requirements for licensure of pharmacists, approves professional schools and continuing education programs, receives complaints and investigates possible violations, investigates unlicensed practices and inspects pharmacies and drug wholesalers regularly for compliance with Board rules and regulations.

The 1979-80 and 1980-81 fiscal years include a redirection of 0.2 positions to increase examination proctor capability.

## Output

Evidence that the Board meets its objectives includes the denial of licenses to those unable to satisfy requirements and the number of suspensions or revocations which result from the investigative process.

## BOARD OF REGISTERED NURSING

It is essential for the public health and safety that the registered nurse meet high standards of education and training in providing quality health care and be accountable for their nursing practice. The registered nurse is responsible for the safe and effective nursing care of the patient (consumer) as well as the directing of the ancillary health team. Failure to perform in a professional and intelligent manner could result in the patient's injury, failure to regain health, or death.

The 1980-81 fiscal year includes an increase of \$10,000 to develop a nurse-midwife exam and 2.6 positions to implement AB 648 Chapter 933/79 which expands the Board's disciplinary powers.

## Output

The Board licenses those qualified applicants who meet the educational requirements and who successfully complete the licensing examination. It reviews the educational programs in schools of nursing and accredits qualified schools. The Board also investigates and takes disciplinary action against the unsafe and ineffective licensee.

## BOARD OF EXAMINERS IN VETERINARY MEDICINE

Veterinarians protect the health and welfare of animals as well as the public through prevention, control and eradication of animal diseases, and inspection of food products of animal origin. In 1974, the growing need for animal health care necessitated the certification of animal health technicians to assist veterinarians in certain areas. Examinations assure minimum competence. Through licensure and inspections, professional standards of competence are enforced and premises maintained in a sanitary manner. The Board of Examiners in Veterinary Medicine also responds to complaints, investigates alleged violations, and polices unlicensed practice.

*The 1980-81 fiscal year includes the redirection of 1 position from temporary help to permanent positions and the addition of \$9,810 for exam costs.*

## DEPARTMENT OF CONSUMER AFFAIRS—Continued

## Output

Exacting standards in examinations eliminate unskilled or poorly trained persons. Inspections and investigations generate disciplinary actions in which the Board may suspend or revoke the practice rights of persons who do not comply with Board rules and regulations.

## BOARD OF VOCATIONAL NURSE AND PSYCHIATRIC TECHNICIAN EXAMINERS

Inadequately trained personnel may render patients poor quality health care services. Through licensure of vocational nurses and psychiatric technicians, the Board identifies persons who demonstrate the necessary competence. The development and enforcement of standards of conduct helps to meet the need to protect those receiving care. Educational and training program approval by the Board is required. Nursing education consultants assist schools in meeting and maintaining standards.

*Vocational Nursing Program:*

The 1980-81 budget year includes a redirection of 2 positions from temporary help to permanent positions and the addition of an analyst position to be funded from within existing resources.

*Psychiatric Technician Program:*

The 1980-81 budget year includes a redirection of funds from operating expenses to cover 25% of the costs associated with the proposed analyst position in the Vocational Nurse Program.

DEPARTMENT OF CONSUMER AFFAIRS—*Continued***Output**

Effective screening and investigative activities reduce opportunities for harmful or unlawful conduct by licentiates. Disciplinary proceedings revoke or suspend privileges of persons performing unprofessionally.

## BOARD OF ACCOUNTANCY

A greatly increased percentage of the public and the business structures serving that public are now requiring the services of certified public accountants and public accountants because of the dramatically increased complexity in laws affecting business operations and taxation. This greater degree of sophistication in the practice of accounting makes it mandatory that certified public accountants and public accountants holding themselves out to the public are qualified to render services fully meeting the public's needs and that they maintain such qualification by updating their technical knowledge through required continuing education.

The 1979-80 fiscal year includes a proposed deficiency bill of \$53,903 to offset increased examination costs. The 1980-81 budget also includes \$64,367 for increased examination costs and 1.5 positions for examination proctors.

DEPARTMENT OF CONSUMER AFFAIRS—Continued

Output

Meeting the objectives of the Board requires that certain benchmarks be observed to make certain (1) that the written examination effectively screens out those applicants who are not qualified, (2) that the experience exposure of applicants who have passed the examination is of sufficient breadth and depth, (3) that the continuing education program is being undertaken as required by all licensees in actual public practice, and (4) that the disciplinary process, both in the punitive and educational improvement areas, is either successfully removing the incompetents or updating the skills of those licensees whose infractions are based upon lack of preparation.

## CEMETERY BOARD

The public needs protection from possible fraud, misrepresentation, or negligency by cemeteries and their representatives. The Cemetery Board's goal is: to protect the consumer from possible fraud, misrepresentation, or negligency by cemeteries and their representatives. To carry out that goal the Cemetery Board's objectives are: to ensure that only qualified applicants receive licenses to operate cemeteries or act as cemetery brokers or salesmen; to ensure that those so licensed comply with applicable rules and regulations; to ensure that all trust funds (revocable or irrevocable) are properly placed in trust, invested, and income used for the purpose intended; and to ensure permanence of mausoleums and columbariums.

## BUREAU OF COLLECTION AND INVESTIGATIVE SERVICES

Debtors and users of collection agency services require that collection agencies and their employees be scrupulously honest in the handling of collected moneys, accountable for actions, and fair in their dealings as required by law.

The Board's objectives are to:

1. Guarantee that only those possessing the necessary qualifications be licensed, certified and registered.
2. Enforce standards of conduct required of licensees, certificate holders and registrants by law and by regulation.
3. Police against unlicensed collection activity.

The addition of 2.5 positions to process complaints and 0.5 Auditor position for enforcement are reflected in the 1979-80 fiscal year to be funded within existing resources for the current year. The 1980-81 fiscal year reflects a continuation of the 3.0 positions proposed in 1979-80, an increase of \$32,305 to cover the costs of shared services with the Private Investigator Program, an increase of \$1,400 to fund the California Advisory Board of Collection Agencies, and a decrease in estimated salary savings of 0.3 positions.

## Output

1. Evidence of performance is shown by the number of applicants for examination who were unsuccessful in securing qualification certificates.
2. The extensive auditing program conducted and the number of investigations result in the suspension or revocation of licenses.

## PRIVATE INVESTIGATORS AND ADJUSTERS

The public must have the assurance that those persons who offer services as private investigators, insurance adjusters, reposseors, uniformed security guards, private patrol operators, alarm company operations, and alarm agents are competent, scrupulous and fair in their dealings with their clients. The Bureau ensures that only those persons who can meet the prescribed qualifications be licensed, enforces standards of ethical conduct established for such licensees, and provides mandatory firearms training and testing for guards and patrolmen who carry firearms.

The 1979-80 fiscal year includes proposed deficiency bills for:

1. \$62,130 to cover the costs of three proposed positions for an expanded enforcement program.

2. \$8,172 and one position to process complaints.

The 1980-81 fiscal year includes:

1. Four positions to terminate on June 30, 1982 for an expanded enforcement program. One position is a continuation of a limited term position due to expire June 30, 1980.

2. One position to process complaints.

3. A reduction in shared services of \$32,305.

4. A reduction in salary savings of 0.4 positions.

## Output

The Bureau licenses only those who successfully complete an examination, and takes action against violators of its rules and regulations and unlicensed activities.

## TAX PREPARERS PROGRAM

In order to protect the public from potential abuses found in the commercial tax preparation industry, the Tax Preparers Program develops registration standards for the regulation of the business practices and advertising of commercial tax preparers. The program expects some changes in the enforcement areas as a result of a recent field study.

## BOARD OF ARCHITECTURAL EXAMINERS

The consuming public is subject to serious injury or death should a structure such as a school, store, office building, or dwelling collapse. To reduce the possibility of such an occurrence resulting from faulty design, it must be required and enforced that those who hold themselves out to the public as skilled in the design of such structures meet the minimum standards established by law. It is also necessary that those who have not proved by education, experience and examination that they meet these minimum standards be prevented from deceiving the public as to their qualifications in the field of architecture.

The 1980-81 fiscal year includes:

1. \$13,247 for enforcement costs.
2. 0.5 positions to process applications.
3. \$26,969 for exam commissioners.
4. \$13,230 for Board Members per diem and operating expenses related to examination and enforcement.
5. A reduction in examination costs of \$62,084.

## BOARD OF REGISTERED CONSTRUCTION INSPECTORS

The Board of Registered Construction Inspectors was created in 1973 to insure the health and safety of the public from faulty workmanship, materials and manner of construction of structures. Funding of the Board's operations was to be derived by fees collected from the applicants and registrants. The 1979-80 budget reflects 2.5 positions while the 1980-81 budget reflects 3.0 positions to allow the Board to become a functioning, licensing entity. The net increase in 1980-81 is 0.5 positions. Funding for the current year is proposed from a deficiency authorization.

## CONTRACTORS' STATE LICENSE BOARD

The consuming public is subject to personal and financial injury resulting from: (1) unsafe construction and poor workmanship; (2) financially irresponsible contractors; and (3) fraudulent representation relating to home improvement contracts.

The Board's objectives are:

1. To establish construction standards which ensure safe building methods and quality workmanship.
2. To qualify contractors by examination; to establish their construction knowledge and experience; and to ensure fiscal integrity through an independent statement of financial condition and through the bonding process.
3. To establish ethical sales standards to preclude misrepresentation by persons licensed to "sell" home improvement, and to seek injunctive action against fraud when deemed necessary.

The 1979-80 fiscal year includes:

1. A redirection of \$75,000 to conduct a feasibility study related to the Board's complaint records storage.
2. An addition of 6.5 temporary positions to be funded from existing resources to eliminate the licensing backlog as of June 30, 1980.

The 1980-81 fiscal year includes:

1. An addition of 9.4 new positions and a conversion of 18 limited-term positions to permanent status to process an increase in applications for licensure.
2. The elimination of 2 limited-term positions to process solar insulation applications.
3. A redirection of \$50,000 to continue the feasibility study related to complaint record storage.
4. An addition of 2 positions to study and audit special issues of current interest. Costs are to be funded from within existing resources. These positions are to be limited term until June 30, 1982.
5. An addition of 2 analysts to be funded from within existing resources to provide expanded administrative support.
6. No resources have been added for the implementation of AB 1363, Chapter 1013/Statutes of 1979. This bill strengthens the enforcement of provisions of the Contractors' Licensing Law by providing for arbitration, citation, civil penalties, and probationary licensing procedures. The fiscal impact is currently being assessed and an adjustment of resources, if necessary, will be made in the spring of 1980.

## DEPARTMENT OF CONSUMER AFFAIRS—Continued

## Output

The Board qualifies contractors by examination for 39 license classifications and suspends licensees when bonding firms cancel or rescind bonds. Resolution of complaints, through conciliation, is indicated by the savings to the public while enforcement activity statistics indicate the results of the Board's compliance efforts.

## Licensing, Files, and Information

The licensing unit is responsible for the review of applications for examination and renewal of approximately 170,000 licensees. The files unit is required to maintain complete records of all contractors in the State, all proprietary personnel connected with those licenses and ensure bonding requirements are met. The information unit provides current and accurate information concerning license status, personnel of licensee, license bonds, disciplinary actions and bonds.

## BOARD OF REGISTRATION FOR GEOLOGISTS AND GEOPHYSICISTS

Geological and geophysical investigations relating to: (1) landslides, active faults, earthquakes and land subsidence; (2) ground water and mineral exploration; and (3) planning, design, construction and maintenance of civil engineering projects require degrees of skill and proficiency to avoid death, injury and destruction of property.

The Board:

1. Licenses qualified geologists and geophysicists.
2. Develops policies, rules, regulations and standards for practice, education and administration of the act.
3. Acts on complaints and violations of the law by licensees and nonlicensees.

The 1980-81 fiscal year includes an increase of \$2,500 in Board Members per diem.

## BOARD OF LANDSCAPE ARCHITECTS

Improper location, arrangement and design of developments, including the preservation of natural land features, endangers the social, environmental, and economic quality of life. In order to assure the consuming public that landscape architects carry on business in a proper manner, the Board's objectives are to establish and enforce levels of professional competence, eliminate unlicensed activity and provide consumer/industry education. The 1979-80 fiscal year includes a \$24,000 proposed deficiency bill to offset cost for examinations.

## BOARD OF REGISTRATION FOR PROFESSIONAL ENGINEERS

It is necessary that those persons who hold themselves out as skilled in the various branches of professional engineering and in the practice of land surveying be identified to the public, be qualified, and be held responsible for the possible consequences of their actions. It is necessary that those persons who do not possess a reasonable minimum level of professional skill be deterred from providing professional services to the public in the various branches of engineering and land surveying.

The 1979-80 budget includes \$107,420 for conducting administrative hearings as specified in Chapter 1035/79. The 1979-80 budget includes the addition of 9 positions to be continued in 1980-81 to carry out the Title Act Program as specified in Chapter 1035/79.

DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

## Output

The Board pursues its objectives through (1) a qualification program which includes application review and examinations, and (2) an investigation program which pursues a policy of seeking compliance with the law and which pursues evidence of fraudulent practices, negligence or incompetence.

## STRUCTURAL PEST CONTROL BOARD

Scientific and professional standards are necessary to assure the public that persons obtain and maintain the skills and knowledge to: inspect the structural condition of buildings for pest problems, identify pests, apply pest control chemicals, and recommend and implement other means to control pests. The Board's objective is to license those persons that possess the necessary qualifications to professionally perform structural pest control work.

## Output

The Board has established examination criteria which effectively measure the knowledge and skills of the applicants. Complaints against both licensed and unlicensed practitioners are thoroughly investigated and acted upon.

## ATHLETIC COMMISSION

Contestants in boxing and full-contact karate matches are subject to serious injury and death through mismatches and lack of proper medical examinations. The public and State government suffer monetary losses due to fraudulent promotional practices and improper collection and verification of attendance and revenue. The Commission sets standards and enforces them through examinations, regulatory inspections and attendance by Commission representatives at all matches, exhibitions and closed circuit events.

*The 1979-80 budget reflects a decrease of two positions as part of the Section 27.2, Budget Act of 1979 reductions.*

## Output

A continuing inspection program discourages fraudulent practices, while medical screening and staff evaluation eliminates the participation of unfit and mismatched contestants. Stated revenues are properly received and audited. Violations result in warnings, fines, suspensions or revocations of licenses.

## BUREAU OF AUTOMOTIVE REPAIR

The California citizen is dependent upon the automobile. When the automobile breaks down he is literally immobilized. He is also, for the most part, dependent upon the service industry for repair and maintenance of his vehicle. The fundamental need is for these service transactions to occur in a market place characterized by full disclosure and fair dealing between buyer and seller. This is not always the case. The Bureau's objective is to reduce the incidence and impact of fraudulent, negligent, and deceptive trade practices by California's auto repair industry against the consuming public.

Chapter 1282, Statutes of 1976, delayed the implementation of the change of ownership phase of the mandatory vehicle emission inspection program on January 1, 1979, and allowed contracting for the program operation. Toward this end, a contract with a private corporation has been negotiated and entered into for a six and one-half year period, which began June 30, 1977. The private corporation, under State supervision, constructed seventeen vehicle inspection facilities, and commenced testing vehicles on March 19, 1979. Excepting those which have been decreed exempt, all vehicles which undergo transfer of registration in the South Coast Air Basin will be required to pass an emissions inspection at one of the inspection facilities.

The 1980-81 fiscal year includes the addition of 3 clerical positions limited term to June 30, 1982 to implement a pilot program to detect unregistered automotive repair facilities, and an increase of \$13,630 to fund the Bureau of Automotive Repair Advisory Board.

## DEPARTMENT OF CONSUMER AFFAIRS—Continued

## Output

Achievement of the Bureau's objective will result in a shift in the pattern of alleged violations and in the eventual reduction in the number of automotive repair complaints.

## BOARD OF BARBER EXAMINERS

Persons receiving barber services are subject to physical injury, disease, mental distress and marring of physical appearance. The objectives of the Board are to: (1) ensure that shops, tools and equipment are safe and sanitary; (2) establish and enforce standards of skill and knowledge for licensees; (3) establish continuing education criteria for instructors; and (4) resolve consumer and industry complaints and eliminate their causes.

## Output

Workload statistics indicate the examination pass/fail ratio, violations issued against shops and practitioners, and complaint dispositions.

## BOARD OF COSMETOLOGY

The Board of Cosmetology helps to protect the public by licensing only those persons who meet prescribed minimum standards of proficiency and by enforcing compliance with the Cosmetology Act (Chapter 10 of Division 3 of the Business and Professions Code) and the rules and regulations of the Board.

The principal objectives of the Board of Cosmetology are as follows:

1. To identify to the consuming public, through licensure, those persons who have demonstrated the skill required to perform cosmetology services with safety.

2. To ensure (through the setting of standards, inspections, and investigations, and enforcement actions) that the various acts of cosmetology are practiced with the degree of skill, proficiency, and sanitation necessary to protect the public health, safety, and welfare.

The 1980-81 fiscal year includes a one year increase of 5 positions to process license renewals. In addition the 1980-81 budget reflects an increase in salary savings of 0.2 positions.

DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

## Output

Inspections and investigations have been effective in eliminating unsanitary conditions and reducing the incidence of unsafe and dishonest practices.

## BUREAU OF ELECTRONIC AND APPLIANCE REPAIR

With the continuing increase in complexity of electronic technology and the rapid changes in the repair industry (both home electronic entertainment equipment and major appliances), the consuming public is subjected to fraud and deceit in repair transactions. The objectives of the Bureau are to register and regulate all persons engaged in major home appliance and electronic equipment repair by imposing specific obligations of ethical conduct and honesty, providing certain safeguards to California consumers when they need repair services, and ridding the repair industry of unscrupulous repair dealers.

The 1980-81 fiscal year includes an increase of \$12,380 to fund the Electronic and Appliance Repair Advisory Board.

## DEPARTMENT OF CONSUMER AFFAIRS—Continued

## Output

Evidence that the Bureau is meeting its objectives includes the high number of resolved consumer complaints, the development of consumer/dealer educational material, the number of Notices of Violation resulting in compliance, and reduction of fraud and dishonest dealing in the marketplace.

## BUREAU OF EMPLOYMENT AGENCIES

Many persons who are seeking employment or re-employment will seek the service of a private employment agency. The utilization of private employment agency services may constitute a considerable expenditure of monies for the consuming public, especially for the unemployed and underemployed. The Bureau's objective is to ensure that only those possessing the necessary qualifications be licensed as employment agencies and to enforce standards of legal and ethical conduct established for such licensees.

The 1980-81 fiscal year includes an increase of \$52,343 to maintain an active enforcement program and an increase of \$5,600 to fund the California Advisory Board to the Bureau of Employment Agencies.

DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

## Output

The Bureau licenses only those who successfully complete an examination, and protects the consumer against unlicensed activity and violations of its rules and regulations.

## BOARD OF FUNERAL DIRECTORS AND EMBALMERS

Proper handling of human remains is necessary in the interest of public health. The public is also subject to financial loss through fraud or mismanagement of preneed trust accounts. In order to correct potentially hazardous conditions or unlawful practices, the Board licenses only those who demonstrate the necessary skills and knowledge. The Board also polices unlicensed activity, inspects premises and accounts, audits trust funds, approves schools, investigates complaints, and imposes sanctions on those violating code provisions and Board regulations.

The 1979-80 fiscal year includes a proposed deficiency bill of \$47,764 for enforcement costs. The 1980-81 fiscal year includes one position for the pre-need trust program.

## Output

The Board will be responsible for the recovery of preneed funeral trust moneys. It will secure convictions and hold disciplinary hearings. Corrections of hazardous and unsanitary conditions are made via the inspection process, and criminal and disciplinary actions are initiated in response to investigations of complaints.

## BUREAU OF HOME FURNISHINGS

The sale of upholstered furniture, bedding or waterbeds made with defective, substandard or highly flammable materials poses an unacceptable hazard to consumers. Consumers are also subject to fraud from misrepresentation, misleading product claims or false advertising in the merchandising of goods. The Bureau's objectives are to ensure that fair and reasonable standards are developed, and that those standards are enforced through on-site inspections and investigations and through laboratory testing.

Following instructions set forth by the Bureau, the Division of Investigation conducts periodic inspections of firms and individuals coming under the requirements of the Home Furnishings Act. These inspections include retail stores, warehouses, supply dealers, manufacturers of furniture and bedding and sterilizers. In addition to other inspectional duties, samples of filling materials or complete articles of furniture and bedding, as well as related labeling data, are forwarded to the Bureau's laboratory for testing and analysis to ensure that the products and materials are in conformance with the Act.

The 1980-81 fiscal year includes an increase of \$4,450 to fund the California Advisory Board of Home Furnishings.

## Output

Evidence that the Bureau is meeting its objectives includes the numbers of articles withheld from sale (2,935), articles returned to the manufacturers (157), articles seized and destroyed (75), and articles relabeled (1,454). The number of consumer complaints resolved (253), and the small number of complaints received (559) considering that the Bureau has some 21,000 licensees, demonstrate program effectiveness. Disciplinary or civil proceedings further reduce hazardous or unethical practices.

## NURSES REGISTRY

A segment of the consuming public either contract with an agency to locate nursing positions or contract with an agency to purchase nursing services. The Nurses Registry protects these segments of the consuming public from fraudulent and unethical practices. The objective of the Nurses Registry is to ensure that only those possessing the necessary qualifications be licensed as nurses registries, and to enforce standards of ethical and legal conduct for such licensees.

## Output

Evidence that the Registry is meeting its objectives includes the number of applicants rejected as unqualified or unfit for licensure, and the results of investigations and inspections of both licensed and unlicensed operations.

## DIVISION OF ADMINISTRATION

The Department could not function as a cohesive and effective unit without executive leadership and staff support. Decentralization of administrative specialties to the constituent agencies is not economically feasible. Therefore, a management and administrative program has been developed which is an integral feature of the total program activity and is designed to meet the overall goals of the Department.

The 1980-81 fiscal year includes:

1. The addition of 2 Auditors to audit examinations.
2. A duplicating machine operator to staff the central copy center.
3. Transfer of key data entry function and on-line E.D.P. licensee master file from Franchise Tax Board for an addition of 13 positions and an estimated savings of \$70,205.
4. The addition of 2 programmers, 0.6 positions of temporary help for increased workload within data processing unit.
5. A reduction of 2 positions because of completion of a federally funded pilot project to develop a statewide complaint data system.
6. An increase in salary savings of 0.8 positions.

## Output

The Executive Branch is actively pursuing the following courses:

1. Evaluating the examination processes of the licensing agencies as they relate to prohibitive qualification requirements and restrictive entry.
2. Interviewing prospective board and committee members to ensure greater public and industry representation.
3. Examining the constituent agencies to ensure that they are serving a useful purpose and are responsive to public need.
4. Reviewing and monitoring disciplinary processes deployed, to ensure that they meet the due process requirements of the 14th Amendment.
5. Coordinating and overseeing the Division of Consumer Services operation to effectively implement the mandates of the Consumer Affairs Act.

## DEPARTMENT OF CONSUMER AFFAIRS—Continued

## General Description

Approval by the State Personnel Board of the Department's affirmative action plan and its continued implementation to date have had a substantial impact on the ethnic composition of the Department. Continued management studies and audits of various agencies are improving operational effectiveness.

The costs of administration are distributed to all of the Department's constituent agencies by a pro rata formula based on a ratio of each agency's total expenditures to the total expended by all agencies.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$2,621,870	\$2,956,545	\$3,166,085
Personnel years .....	116.2	106.5	122.3

## DIVISION OF INVESTIGATION

Objective and independent investigations and inspections by skilled personnel are required to afford the public maximum protection from incompetent and unethical business practices. The Division provides impartial investigative and preventive inspection services and reduces the cost of these services by (1) proper staff training, (2) better use of manpower, and (3) utilization of sound management principles.

## Output

Competency and completeness of investigations are borne out by administrative action taken.

Investigations:	1978-79	1979-80	1980-81
Cases opened .....	4,118	4,200	4,200
Cases closed .....	4,566	4,600	4,600
Cases pending June 30 .....	2,331	2,350	2,350
District Attorney citation hearings (closed cases only) .....	13	20	20
Attorney General administrative hearings (closed cases only) .....	326	350	350
Statements of issues (closed cases only) .....	6	8	8
Criminal complaints filed .....	273	275	275
Found guilty (closed cases only) .....	96	100	100

Inspections .....	32,344	32,350	32,350
Notices of violation .....	7,228	7,230	7,230

## General Description

The Division conducts investigations and inspections in accordance with the laws, regulations and policies of the constituent agencies. Based on the Division's findings, agencies may request preparation of documents for administrative or criminal action. The Division is compensated by each using agency for its share of the total hours expended by means of an established rate which encompasses all of the Division's operational costs.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$2,271,326	\$3,168,965	\$3,140,836
Personnel years .....	80.6	88.9	88.9

## DIVISION OF CONSUMER SERVICES

California consumers are paying millions of dollars per year due to (1) shady and illegal business practices, (2) inadequate representation of consumer interests in administrative, legislative and judicial proceedings, and (3) lack of information necessary for protection in today's inflation plagued marketplace. The Division's objectives are:

1. Represent consumer interests at local, state and federal levels in administrative, legislative and judicial proceedings.
2. Institute consumer protection services at local and state levels.
3. Service consumer complaints and reduce complaints at the state level.
4. Educate consumers to protect themselves.
5. Research, analyze and develop systematic solutions to consumer problems.
6. Prevent fraudulent and misleading advertising.
7. Disseminate information to the public regarding departmental activities.
8. Cooperate with consumer groups.

The 1979-80 budget reflects the one-time addition of 5 positions for federally funded projects. The 1979-80 budget also reflects an increase of 1.6 positions for salary savings as part of the Section 27.2, Budget Act of 1979 reduction. Three positions for the Cooperative Consumer Protection Program have been reduced because the federally funded pilot program terminates December 31, 1979.

## Output

1. The Division has initiated extensive representation of consumer interests before legislative and judicial bodies, numerous state agencies, as well as the PUC, and Federal Trade Commission.

2. Relations with local, state and private consumer services and protection units were improved and furthered.

3. The Division supported local consumer groups throughout the State, sponsored public hearings, and established a consumer group legislative network.

## DEPARTMENT OF CONSUMER AFFAIRS—Continued

## General Description

In order to comply with a recent Attorney General opinion, General Fund support in an amount equal to 80 percent of the Division's appropriation will be provided for the current and budget years. The balance of the appropriation will be funded through a pro rata distribution to the Department's constituent agencies based on a ratio of each agency's total expenditures to the total expended by all agencies.

## Input

	1978-79	1979-80	1980-81
Expenditures .....	\$1,280,034	\$1,322,636	\$1,384,332
Personnel years .....	57.6	52.9	46.5

## Executive

The Executive Section is composed of the Chief and Deputy Chief of the Division and clerical support. This section has primary responsibility for the planning and control functions for the division.

	1978-79	1979-80	1980-81
Expenditures .....	(-)	(\$146,547)	(\$154,429)
Personnel years .....	(-)	(4)	(4)

## Cooperative Consumer Protection Program (CCPP)

As a result of a federal grant, this unit was established to develop and implement a cooperative state-wide consumer complaint data system. Data is being gathered and shared to assist in criminal and disciplinary proceedings, eliminate duplication of investigatory and prosecutory activity, and provide data for consumer education and policy planning. The program will terminate on December 31, 1979.

	1978-79	1979-80	1980-81
Expenditures .....	(-)	(\$135,995)	(-)
Personnel years .....	(-)	(3)	(-)

## Complaint Mediation

The Complaint Mediation Unit mediates consumer complaints which are not within the jurisdiction of other agencies and do not involve criminal violations. Complaints within the purview of another agency are referred to that agency. The Unit also assists other agencies, consumer groups and organizations in complaint handling.

The Unit has, in addition to its Sacramento Office, two district offices: one in Los Angeles and one in San Francisco. The district offices provide clerical services to the boards and bureaus in addition to processing consumer complaints. The three offices are staffed as follows: Sacramento, 5.6 personnel years; Los Angeles, four personnel years; San Francisco, three personnel years. Of the seven personnel years budgeted Los Angeles and San Francisco, 3.3 personnel years provide clerical services to boards and bureaus.

	1978-79	1979-80	1980-81

## Consumer Liaison

The Consumer Liaison Officer is responsible for overall management of the Education and Information Units; for developing news releases and maintaining communication within the news media; and for providing liaison with other State, local, and federal agencies and organizations, public and private.

	1978-79	1979-80	1980-81
Expenditures .....	(-)	(\$47,483)	(\$49,655)
Personnel years .....	(-)	(2)	(2)

## Education

The Education Unit develops consumer education programs and publications, assists the DCA boards and bureaus in their educational efforts, initiates or participates in consumer conferences and seminars, and coordinates consumer education activities with local and state entities.

	1978-79	1979-80	1980-81
Expenditures .....	(-)	(\$117,186)	(\$122,548)
Personnel years .....	(-)	(6.6)	(3.6)

## Information

This unit gives information to the media and general public through press releases, newsletters, public service announcements, distribution of pamphlets, and notices of meetings and disciplinary actions by boards and bureaus.

	1978-79	1979-80	1980-81
Expenditures .....	(-)	(\$117,715)	(\$123,101)
Personnel years .....	(-)	(3.3)	(3.3)

DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

## Solar/Insulation

Funded by the Energy Resources and Development Commission, this unit is responsible for a complaint mediation and education program in solar energy and insulation.

	1978-79	1979-80	1980-81
Expenditures .....	(-)	(\$107,395)	(\$100,000)
Personnel years .....	(-)	(3)	(3)

## Legal Services

Made up of attorneys and their support staff, this unit has a judicial and administrative advocacy function, and generally acts as a law reform group by initiating litigation, filing *amicus curiae* briefs, intervening in appropriate lawsuits, testifying in administrative and regulatory proceedings, and participating in Department task forces.

	1978-79	1979-80	1980-81
Expenditures .....	(-)	(\$377,215)	(\$394,476)
Personnel years .....	(-)	(10.9)	(8.9)

## Legislation

This unit proposes, analyzes, and actively advocates legislation which is determined to be in the consumer's interest.

	1978-79	1979-80	1980-81
Expenditures .....	(-)	(\$191,121)	(\$199,866)
Personnel years .....	(-)	(7.3)	(7.3)

## Research and Special Projects

Given the primary function of staff support, this unit gathers and analyzes data on and proposes solutions to consumer problems in priority issue-areas; provides research assistance to other units within the Department; and assists other State departments and consumer groups with consumer issues. The unit also develops and implements special projects as mandated.

	1978-79	1979-80	1980-81
Expenditures .....	(-)	(\$150,384)	(\$157,265)
Personnel years .....	(-)	(3.6)	(3.6)

## BUILDING MAINTENANCE AND OPERATION

The occupants of the department-owned Consumer Affairs Building are subject to serious injury should the 46-year-old structure be allowed to deteriorate. The purpose of the maintenance and operational program element is to ensure the safety and welfare of the building's occupants and the visiting public.

## Output

1. Offices and hallways are painted and renovated on an established schedule.
2. Repairs are made in a timely manner and preventive maintenance is a regular practice.

## General Description

The building is currently occupied by 26 of the Department's constituent agencies and by the State Board of Equalization. The costs of the program element are offset by rents collected from the occupants.

## Input

	1978-79	1979-80	1980-81
Expenditures .....	\$805,859	\$1,008,298	\$1,095,243

## Consumer Advisory Council

The Consumer Advisory Council was established pursuant to the Consumer Affairs Act which took effect in 1971. The necessity for a Council is to provide reasoned judgments about consumer issues facing the Department of Consumer Affairs, the Legislature and other public agencies.

The representation on the Council includes two legislative members, two business members, one labor member and four public members, two of which represent consumer groups.

The 1979-80 fiscal year includes \$9,386 to offset a proposed deficit. The 1980-81 budget year includes the addition of \$26,772 and one clerical position.

## Output

To recommend and propose the enactment of such legislation or regulations as necessary to protect and promote the interests of consumers.

## Input

	1978-79	1979-80	1980-81
Expenditures .....	\$31,153	\$45,026	\$62,733
Personnel years .....	0.9	1	2

## DEPARTMENT OF FAIR EMPLOYMENT AND HOUSING <sup>1</sup>

The Governor's Reorganization Plan No. 1 abolishes the Division of Fair Employment Practices within the Department of Industrial Relations and creates the Department of Fair Employment and Housing within the State and Consumer Services Agency and the Fair Employment and Housing Commission within the Department.

The employees whose functions are transferred, funds, and property of the former entities succeed to the Department of Fair Employment and Housing and the Fair Employment and Housing Commission.

The intent of the reorganization is to enable the Department of Fair Employment and Housing to focus attention equally on employment and nonemployment functions and provide adequate organizational stature to conduct its activities effectively.

Goals of the new Department of Fair Employment and Housing are:

1. Prevention and elimination of discrimination in employment and housing.
2. Identification and amelioration of social tensions.
3. Prevention and elimination of arbitrary discrimination.
4. Adjudication, policy development and implementation of F.E.P.A. law by the Fair Employment and Housing Commission.

Past year expenditures are reflected in the budget display of the Department of Industrial Relations.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81

### I. PREVENTION AND ELIMINATION OF DISCRIMINATION IN EMPLOYMENT AND HOUSING

#### Program Objectives and Description

The objective of the Prevention and Elimination of Discrimination in Employment and Housing program is to provide equal opportunity in employment and housing and ameliorate social tensions by preventing and eliminating discrimination based on race, religion, creed, national origin, sex, marital status, physical handicap, <sup>2</sup> medical condition, <sup>2</sup> and age over 40 <sup>2</sup>.

The Department is proposing to open four new field offices in the current and budget years to increase the accessibility of program services to the citizen of California. The new offices will be located in Oakland, Covina-Pomona, San Pedro-Long Beach, and North Los Angeles.

The 1980-81 budget reflects the termination, on June 30, 1980, of 15 limited-term positions. In addition, the budget reflects a reduction in salary savings of 0.5 person-years in Fiscal Year 1980-81. Also, the 1980-81 budget reflects an increase of three positions over the 1979-80 authorized level. The increase is reflective of one-time reductions pursuant to Section 27.2 of the Budget Act of 1979.

The Department is currently working with the Federal Department of Housing and Urban Development and anticipates additional Federal support for handling of housing discrimination complaints.

## II. FAIR EMPLOYMENT AND HOUSING COMMISSION

## Program Objectives and Description

The objective of the Fair Employment and Housing Commission is to provide equal opportunity in employment and housing and ameliorate social tensions by preventing and eliminating discrimination based on race, religion, creed, color, national origin, sex, marital status, physical handicap, medical condition, and age over 40 <sup>1</sup>.

## III. ADMINISTRATION

## Program Objectives and Description

Administration under the guidance of the Deputy Director, formulates departmental administrative policies and provides administrative services for the departmental programs through management analysis, fiscal management, personnel and training, reproduction services, and data processing. The budget year includes three positions in Fiscal Year 1980-81 to provide administrative support services.

## OFFICE OF THE STATE FIRE MARSHAL

The fundamental objectives of the State Fire Marshal are to prevent the loss of life and property by fire, and to foster, promote, and develop ways and means of protecting life and property against fire and panic.

To accomplish these objectives, the State Fire Marshal aids local authorities in the enforcement of all laws and ordinances; prepares, adopts, and enforces minimum statewide fire and panic safety standards applicable to statutorily designated occupancies; prepares, adopts and enforces standards for the use and control of hazardous materials; and disseminates information and material relative to new technological developments in the field of public fire safety.

I.	EDP scheduling/reporting system .....	—	138,884
I.	Hazardous materials training .....	3	317,316

### I. PUBLIC FIRE SAFETY

#### Program Objectives and Description

The primary responsibility of the State Fire Marshal is the protection of life and property from fire. This responsibility is met through the development, maintenance and enforcement of fire safety standards for all educational and institutional occupancies, public assembly facilities, organized camps, buildings over 75 feet in height and in all State-owned/occupied structures. Provisions relative to the control of portable fire extinguishers, explosives, fireworks, cargo tanks used in the transportation of flammable liquids, decorative materials and fabrics, and wearing apparel are also developed, maintained and enforced on a statewide basis.

The State Fire Marshal also conducts investigations to approve and list products found to be in compliance with the adopted standards; conducts arson investigations; and assembles, tabulates and analyzes reports of all fires occurring in the State. Training in fire prevention and fire suppression is provided to fire departments in California with special emphasis on training those departments that are volunteer and part-paid. Training in arson and bomb investigation is provided to fire departments and law enforcement agencies throughout the State.

Although most life and property losses attributable to fire involve singular and minor incidences respectively, the potential of a catastrophic occurrence is always present. It is the lack of these major occurrences which principally mark the effectiveness of the efforts expended. As provided in Chapter 1018/78, the State Fire Marshal inspects various local jails and holding facilities, should they not be inspected by a local agency.

During 1979-80 the State Fire Marshal was awarded an LEAA grant, through OCJP, to provide Arson Detection and Control Training under the Federal Omnibus Crime Control and Safe Streets Act. Six limited term positions have been approved for fiscal year 1980-81, to provide staffing for this program.

Two Deputy State Fire Marshal positions are proposed for fiscal year 1980-81, to provide inspection services in State buildings. Funding for this program will be made available through an interagency agreement with the Space Management Division of the Department of General Services.

Funds are included in fiscal year 1980-81 to contract with the Department of General Services to develop an EDP Batch system. This system will provide inspection scheduling, time reporting and will automate the licensing/certification program.

The 1980-81 fiscal year reflects an augmentation of \$317,316 and three positions, for the purpose of developing a comprehensive statewide training program for State and local emergency personnel who are required to respond to hazardous materials incidents.

OFFICE OF THE STATE FIRE MARSHAL—*Continued*

## a. Enforcement

Enforcement of adopted standards is conducted through plan reviews of new construction and field or on-site inspections. Basically, the prime responsibility for enforcement rests with local fire authorities. Where there are no such authorities, in all State-owned/occupied buildings, and with regard to cargo tanks used in the transportation of flammable liquids, the State Fire Marshal is charged with direct enforcement responsibilities. In addition, the Department of Health has contracted with the State Fire Marshal for special fire safety inspections and surveys of health care facilities which have entered into provider agreements in conjunction with Medicare/Medi-Cal Programs. The Fire Service Training and Education Program, established in January 1978, has conducted 296 FSTEP-facilitated local and regional courses, serving over 10,500 California firefighters since the program's existence.

Output	1978-79	1979-80	1980-81
Plan reviews .....	6,400	5,800	5,800
Field inspections .....	21,000	21,000	20,000
Arson and bomb investigation training .....	1,000	1,000	1,000
<b>FSTEP</b>			
Courses conducted .....	296	348	367
Students attendance .....	10,500	12,000	13,000

## b. Analysis and Development

This element is divided into these six components: approval and listing services, fireworks/explosives, fire extinguishers, flammable fabrics and flammable liquids/vapor recovery. These components provide the technical support to the enforcement element in the areas of interpretation, development, and review of regulations within the State Fire Marshal's authority. This technical assistance extends to consumer product review, approval and listing, and California fire incident reporting system.

## Output

Output consists mainly of evaluations, licensing, registrations and tests. In total, these activities numbered approximately 168,542 during fiscal year 1978-79. It is expected that these activities will total 185,000 in fiscal year 1979-80, decreasing to 165,000 in 1980-81. These changes are a result of biennial registrations of cargo tanks.

## II. ADMINISTRATION

## Program Objectives and Description

This program consists of executive and support services. These elements are structured and designed to provide executive leadership; to assure support services to Program I; and to assure that the planning, coordination and application of appropriate statistical, fiscal, budgetary, and technical information and data necessary to reach departmental objectives are defined and in effective operation.

## FRANCHISE TAX BOARD

The objectives of the Franchise Tax Board are to administer the Personal Income Tax Law and the Bank and Corporation Tax Law in a manner which will assure equity for the taxpayers and maximize the State's revenue potential within the framework of these laws; administer the Senior Citizens Property Tax Assistance Law as authorized by the statutes providing partial repayment for real property taxes and rent paid by qualified totally disabled individuals and senior citizens and property tax postponement claims filed by qualified senior citizens; administer the audits and field investigations with respect to campaign statements and lobbyist reports as authorized by the Political Reform Act of 1974.

## I. PERSONAL INCOME TAX

### Program Objectives and Description

To administer the income tax withholding law with particular attention toward encouraging voluntary and timely remittance of the taxes which are held in trust by employers; to accelerate the collection of individual income tax; to improve taxpayer compliance; to administer the Personal Income Tax Law in an equitable manner to encourage accurate self assessments, and maximize the State's revenue potential within the framework of the law and available resources.

The Personal Income Tax Law provides the second largest source of General Fund revenue to the State. The use of a withholding-at-source method of collections is equitable to taxpayers and provides revenue receipts to the State evenly distributed throughout the tax year as well as maximum interest to the State. Tax return requirements are imposed on approximately 10.9 million individuals, partnerships, trusts, and estates. Self-assessed taxes will be about \$5.5 billion. Audit, filing enforcement, and collection activities are designed to protect the tax base and to provide tax changes of approximately \$226 million.

### Authority

Government Code Sections 15700-15702.1; Revenue and Taxation Code Sections 17001-19500.

<sup>1</sup> Includes \$877,111 for the Employer Withholding Contract with the Employment Development Department

## FRANCHISE TAX BOARD—Continued

## a. Self-Assessment and Prepayment Activities

The Department designs, prepares and distributes personal income tax forms and provides advisory services to taxpayers regarding the tax laws in order to promote a high level of timely filed returns. As a result of this activity, approximately 10.9 million returns are received, categorized, processed and filed for subsequent reference. The Employment Development Department administers the employer-related aspects of the personal income tax withholding program.

The 1979–80 fiscal year reflects the transfer of 69.5 work years while the 1980–81 fiscal year reflects the transfer of 73.7 work years from the Senior Citizens' Property Tax Assistance program to the Personal Income Tax Return Self Assessment Activities. The baseline budget redirected 38.9 work years in 1979–80 and 1980–81. The workload adjustments for 1979–80 and 1980–81 includes a further redirection of 30.6 and 34.8 work years, respectively. The net change is an increase of 4.2 work years for 1980–81. The 1979–80 budget also proposes the addition of 27.9 work years for the restoration of the Wide Area Telecommunications System (WATS) from January 1980 through June 1980, and \$15,200 to administer the provisions of SB 93/Chapter 1182, Statutes of 1979. The 1979–80 budget reflects an increase of 0.7 work years, to be continued in 1980–81, for fixed administrative overhead redirected from the reduction of the Political Reform Audit Program. The 1980–81 fiscal year reflects 34.6 work years for the restoration of the WATS, and 7.8 work years for a realignment of the Section 27.2 reduction for the Budget Act of 1978, and an increase of \$877,111 for the employer withholding contract with the Employment Development Department.

## b. Audit Activities

The audit programs are carried out to assure equity for the taxpayer and to maximize the state's revenue potential within the provisions of the Personal Income Tax Law. The mathematical verification of the returns, various desk audit programs, and field audit of selected returns will generate approximately \$139 million in tax change each year.

The 1979–80 fiscal year reflects the transfer of 12.4 work years while the 1980–81 fiscal year reflects the transfer of 13 work years from the Senior Citizens Property Tax Assistance Program to the Personal Income Tax Mathematical Verification activity. The baseline budget redirected seven work years in 1979–80 and 1980–81. The workload adjustments for 1979–80 and 1980–81 includes a further redirection of 5.4 and 6 work years, respectively. The net change is an increase of 0.6 work years for 1980–81. The 1979–80 budget also proposes the addition of 2.4 work years for the restoration of WATS from January 1980 to June 1980. The 1979–80 budget reflects an increase of 0.4 work years, to be continued in 1980–81, for fixed administrative overhead redirected from the reduction of the Political Reform Audit Program. The 1980–81 fiscal year also reflects 3.6 work years for the restoration of WATS, 9.9 work years for audit workload growth, and 4.3 work years resulting from a realignment of the Section 27.2, Budget Act of 1978 reduction.

<sup>1</sup> Service provided by Volunteer Tax Assistance Program (VTAP) and Volunteer Income Tax Assistance (VITA) at no cost to the State.

## c. Filing Enforcement Activities

The filing enforcement programs are designed to identify and secure returns from all persons subject to the Personal Income Tax Law filing requirements. Information from various sources is used to identify the nonfiler. Field audits are performed to determine proper residency and special investigations are made when it appears that there has been fraud or other criminal violations of the Personal Income Tax Law. These programs will produce tax changes of approximately \$88 million.

The 1979-80 fiscal year reflects an increase of 0.6 work years while the 1980-81 fiscal year reflects an increase of 0.9 work years for the restoration of the WATS. The net change is an increase of 0.3 work years for 1980-81. The 1979-80 budget reflects an increase of 0.1 work years, to be continued in 1980-81, for fixed administrative overhead redirected from the reduction of the Political Reform Audit Program. The 1980-81 budget also proposes an increase of 0.6 work years for workload growth.

## FRANCHISE TAX BOARD—Continued

## d. Collections

The collection policy of the Franchise Tax Board is to pursue a reasonable course of action which will protect the revenue base of the State of California, encourage maximum self compliance of our income tax laws and accomplish this in a manner which will extend to each taxpayer due process of law, equitable treatment, and consideration for the individual's dignity.

The 1979-80 fiscal year reflects an increase of 0.9 work years while the 1980-81 fiscal year reflects an increase of 1.3 work years for the restoration of the WATS. The net change is an increase of 0.4 work years in 1980-81. The 1979-80 budget reflects an increase of 0.3 work years, to be continued in 1980-81, for fixed administrative overhead redirected from the reduction of the Political Reform Audit Program. The 1980-81 budget also proposes an increase of 4 work years for workload growth, and a reduction of 5.2 work years resulting from a realignment of the Section 27.2, Budget Act of 1978 reduction.

## II. BANK AND CORPORATION TAX

## Program Objectives and Descriptions

The objectives of the Bank and Corporation Tax Program is to administer the Bank and Corporation Tax Law in a manner which assures equity, encourages accurate self assessments, maximizes the State's revenue potential and protects the tax base.

The Bank and Corporation Tax Law provides the third largest source of General Fund revenue to the State. It imposes a franchise tax on businesses in California. An estimated 314,000 banks and corporations are subject to taxes in 1979-80, increasing to an estimated 333,000 in the 1980-81 fiscal year. Self assessed taxes of about \$2 billion are anticipated in each fiscal year. Audit, filing enforcement, and collection activities are conducted to enforce the provisions of the law and will generate tax changes of approximately \$151 million annually.

## a. Self-Assessment and Prepayment

The Department designs, prepares, and distributes corporation estimate and return forms and performs publicity and advisory services which are aimed toward a high level of timely filing and accurate assessment by corporate taxpayers. The Department receives, processes and accounts for about 371,000 tax estimates and 300,000 tax returns and associated remittances.

The 1979-80 fiscal year reflects an increase of 1.6 work years while the 1980-81 fiscal year reflects an increase of 6.1 work years for the restoration of the WATS. The net change is an increase of 4.5 work years in 1980-81. The 1979-80 budget reflects an increase of 0.1 work years, to be continued in 1980-81, for fixed administrative overhead redirected from the reduction of the Political Reform Audit Program. The 1979-80 budget also proposes an increase of \$15,200 to administer the provisions of SB 93/Chapter 1182, Statutes of 1979. The 1980-81 fiscal year reflects an increase of 12.5 work years for workload growth redirected from the Senior Citizens Property Tax Assistance Program, 7.3 work years to process additional workload resulting from passage of AB 66/Chapter 1150, Statutes of 1979, and 1.3 work years resulting from a realignment of the Section 27.2, Budget Act of 1978 reduction.

## b. Audit Activities

The audit programs are designed to assure equity for the taxpayers and to maximize the State's revenue potential within the provisions of the Bank and Corporation Tax Law. Mathematical verification of the returns, various desk audit programs and field audit programs generate tax changes in excess of \$141 million annually.

The field audit programs are administered by two Eastern Offices (New York City and Chicago) and seventeen California district offices.

The 1979-80 budget reflects an increase of 0.3 work years, to be continued in 1980-81, for fixed administrative overhead redirected from the reduction of the Political Reform Audit Program. The 1980-81 fiscal year reflects an increase of 1.3 work years for workload growth redirected from the Senior Citizens' Property Tax Assistance Program to Math Verification, and an increase of three work years for audit workload growth. The budget also proposes increases of 6.6 work years to process the additional workload resulting from the passage of AB 66/Chapter 1150, Statutes of 1979, and 3.4 work years resulting from a realignment of the Section 27.2, Budget Act of 1978 reduction.

## FRANCHISE TAX BOARD—Continued

## c. Exempt Corporations

Approximately 7,200 applications for exemption are received and processed annually to determine whether the exemption should be granted or denied. The majority of applications require correspondence to make a proper determination. About 4,000 exempt corporations are audited annually to make sure that they are not engaging in activities that may jeopardize their exempt status. In most of these audits, correspondence is required. *The 1980-81 fiscal year reflects an increase of 0.7 work years resulting from a realignment of the Section 27.2, Budget Act of 1978 reduction.*

Output	1978-79	1979-80	1980-81

## d. Filing Enforcement

The Filing Enforcement Program is designed to protect the revenue base of the State of California and encourage self-compliance to the tax laws through the identification of banks and corporations with tax liabilities which have not filed tax returns and, through a reasonable and equitable course of action, to secure the returns.

*The 1980-81 fiscal year reflects an increase of 1.0 work year for workload growth.*

## III. SENIOR CITIZENS PROPERTY TAX ASSISTANCE LAW

## Program Objectives and Description

The objective of the Senior Citizens' Property Tax Assistance Program is to administer the Senior Citizens Property Tax Assistance Law in such a manner as to assure proper payment of assistance and property tax postponement claims as authorized in Sections 20501 through 20646 of the Revenue and Taxation Code. The principal program activities are the processing and validating of claims for property tax and rent assistance and for property tax postponement. The law requires the submission of assistance claims after May 15 each year and before August 31 and postponement claims after May 15 each year and before September 30. The major portion of program activity is performed between May and October of each year. In addition, the law requires that assistance be granted to claimants filing incomplete claims. This results in substantial correspondence and telephone contacts with the claimants to obtain the missing data. The title of this law was changed to Senior Citizens Property Tax Assistance Law from Homeowners and Renters Property Tax Assistance Law (SB 117, Ch. 43, 1978 Statutes).

*The 1979-80 fiscal year reflects a redirection of 81.9 work years while the 1980-81 budget reflects a redirection of 111.9 work years from the Senior Citizens' Property Tax Assistance Program to the Personal Income Tax and Bank and Corporation Tax Programs. The baseline budget redirected 45.9 work years in 1979-80 and 1980-81. The workload adjustment for 1979-80 and 1980-81 includes a further redirection of 36 and 66 work years, respectively. The net change is a decrease of 30 work years in 1980-81. The 1979-80 budget also proposes the addition of 2.1 work years for the restoration of the WATS, from January 1980 to June 1980 and a reduction of 15.4 work year as part of the required Section 27.2 Budget Act of 1979 adjustment. The 1979-80 budget reflects an increase of 0.2 work years, to be continued in 1980-81, for fixed administrative overhead redirected from the reduction of the Political Reform Audit Program.*

<sup>1</sup> Program is not intended to be revenue producing, but is a check to see that exempt corporations are entitled to that status.

## IV. CONTRACT WORK

## Program Objectives and Description

To service all contracts entered into with other entities. The availability of sophisticated EDP equipment and skilled personnel is enabling the Department to meet the growing demand for services. All contractual costs relating to these services are entirely reimbursable to the Department. In addition, the increased work reduces the hourly charges for the computer time in all of the Department's programs.

The 1979–80 fiscal year reflects an increase of 66.7 work years while the 1980/81 fiscal year reflects an increase of 61.7 work years for the budgeting of two reimbursed contracts for data processing services received from the Department of Health Services. The net change is a decrease of five work years in 1980–81.

## FRANCHISE TAX BOARD—Continued

## V. POLITICAL REFORM AUDIT

## Program Objectives and Description

The objectives of the Political Reform Audit Program are to conduct the audits and field investigations required by Sections 90000 through 90006 of the Government Code in an unbiased objective manner and to report, in detail, the results to the Fair Political Practices Commission.

The Political Reform Act of 1974 requires the staff to make audits and field investigations of randomly selected campaign statements and lobbyist reports filed with the Secretary of State. The Department is not required to audit campaign statements for federal or local offices or statements by candidates for Controller and members of the Board of Equalization.

The Department must also audit statements filed by: committees supporting or opposing the above candidates; committees supporting or opposing statewide measures; and any state or county central committee or independent committee which spends \$10,000 or more.

The 1979-80 fiscal year reflects a reduction of 5.9 work years while the 1980-81 fiscal year reflects a reduction of 41.2 work years for decreased workloads resulting from legislative mandated random audits. The net change is a decrease of 35.3 work years in 1980-81. In accordance with the reduced program level 2.2 work years of fixed administrative overhead has been redirected to other continuing programs in 1979-80 and continued in 1980-81. The 1979-80 budget also reflects a reduction of 36.4 work years as part of the Section 27.2 Budget Act of 1979 reduction. The 1980-81 budget reflects a reduction of 10.7 work years resulting from a realignment of the Section 27.2 Budget Act of 1978 reduction.

## VI. LEGISLATIVE MANDATES

## Program Objectives and Description

Section 2231 of the Revenue and Taxation Code requires the State to pay local governmental units the cost of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. The Department has one legislative mandated program which requires local agencies to report owners of substandard rental dwellings to the Franchise Tax Board if violations have not been corrected within the allowed time. The Department will disallow certain expenses derived from rental of defined substandard housing, for purposes of determining the liability pursuant to the Personal Income Tax Law and the Bank and Corporation Tax Law.

Program Requirements	1978-79	1979-80	1980-81
Continuing program costs (General Fund) .....	\$9,974	\$25,000	\$25,000

## VII. ADMINISTRATION

## Program Objectives and Description

The objectives of the Administration Program is to assure that the Personal Income Tax Law, the Bank and Corporation Tax Law, the Senior Citizens Property Tax Assistance Law and the Political Reform Act of 1974 (Chapter 10), including recent statutory changes to these laws, are administered in an efficient, effective and equitable manner.

Management and staff services provide overall planning and administrative support to the programs in the form of executive management, fiscal and personnel administration, statistical research and reporting, program planning (management and technical analysis, training assistance, budget and cost information) and supply and maintenance services.

## DEPARTMENT OF GENERAL SERVICES

The objectives of the Department of General Services are to: (a) meet the varied responsibilities for management review, control and support assigned to it by the Governor and by statute; (b) provide supportive services to operating departments with greater efficiency and economy than they can individually provide for themselves; (c) increase effectiveness and economy in the administration of state government by establishing and improving statewide standards and guidelines and by innovating and implementing constructive changes in governmental policies and procedures.

The Governor's Reorganization Plan #2 proposes to consolidate various State personnel functions currently located in several State entities, including functions which are currently the responsibility of the Department of General Services. Because the Reorganization Plan is still undergoing legislative and administrative review, specific organizational changes have not been reflected in the Governor's Budget.

## I. PROPERTY MANAGEMENT SERVICES

## Program Objectives and Description

With a multimillion dollar investment in facilities for state offices and employees, centralized responsibilities for planning, acquisition, design, construction, maintenance and operation are needed to avoid duplication of effort and uncontrolled investment in office space. This is achieved in the following ways: (a) Providing adequate space for state operations at a cost below that which each agency could provide for itself; (b) Assuring protection of lives and property in public buildings and hospitals through design and construction supervision; (c) Insuring that facilities constructed with state funds are accessible to the physically handicapped; (d) Establishing uniform public health and safety regulations for building construction; (e) Providing impartial hearings for the general public and construction industry in their interactions with state agencies; (f) Acquiring, managing and disposing of real property (except leases) for state agencies, and providing public service facilities with economy of operations and uniform practices for protecting the public's interests and insuring equitable treatment of private property owners; (g) Preserving the state's capital investments in buildings, grounds, and equipment through an efficient and effective centralized maintenance and operation program.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

DEPARTMENT OF GENERAL SERVICES—*Continued*

## Authority

- a. Architectural consulting and construction: Government Code Sections 4454, 14250–14404, 14600, 14650, 14651, 14679–14682, 14950–14962, 15800; Education Code Sections 15002.1, 15451–15465, Health and Safety Code Sections 15000–15023.
- b. Buildings and grounds: Government Code Sections 14600, 14685–14687, 14700.
- c. Facilities planning and development: Government Code Sections 14678, 15800, 15862.
- d. Real estate services: Government Code Sections 11005, 11011, 14654, 14660–14670, 14820, 14821, 15800, 15850, 15862, 15863.
- e. Space management: Government Code Sections 14678, 15800, 15817, 15862.
- f. Building standards: Government Code Section 15800; Health and Safety Code Sections 18901–18915.
- g. Rented buildings: Government Code Sections 14660, 14670, 15850, 15862.

## a. Architectural Consulting and Construction Services

Architectural and Engineering Services are in support of the State Building Construction Program. Related services include advertising and administration of contracts, and supervision and inspection of construction projects. It also involves review of plans and specifications on all projects which utilize state funds to determine compliance with the Physically Handicapped Law and review of plans developed by local school districts for public school construction to assure compliance with the Field Act for safety of school children. Similar services are provided for hospital construction through contract with the Department of Health. Also included is field inspection to ensure compliance with the plans and specifications.

The Office of the State Architect will continue to use new concepts in the design of state office buildings. These concepts must be responsive to at least five concerns: human, environmental, cost, social and community.

To be humanly responsive, facilities will be smaller scale, less institutional, using softer and warmer materials and integrated with usable and inviting open spaces.

To be environmentally responsive, architects must recognize that the era of cheap energy is over and use common sense designs for local conditions and climate which would minimize the need for energy intensive, polluting systems. For example, designs should use recessed shaped and operable windows, sheltered arcades and breezeways, shaped courtyards and extensive landscaping.

To be cost responsive, careful architectural design can realize up to 80 percent reduction in energy operating costs by using less monolithic materials and avoiding glass and steel towers.

To be socially responsive, smaller increments of construction means more adaptability to future uses, greater participation by smaller contractors through unit bidding, and more state encouragement of affirmative action in the building process.

To be community responsive, state offices in downtown locations would intermix state and private uses in single buildings and promote diversity of use through time.

Design can be kept direct, personal, and small scale so it is responsive to change and correction, because now, both humanity and nature have become victims of institutionalized bigness. Many systems are best designed around the most coherent, smallest, and most independent components possible.

Applying these concerns, the design of state office buildings and facilities will reflect an emergence of an adaptive, small-scale technology, methods and equipment that are: (1) cheap enough to be accessible to nearly everyone, (2) simple enough to be easily maintained and repaired, (3) suitable for small-scale application, (4) compatible with individual needs for creativity, and (5) self educative in environmental awareness.

## b. Buildings and Grounds

The Buildings and Grounds Division maintains and operates state office buildings, grounds, and surplus property. The division also coordinates and inspects building alterations, utilizing private contractors.

*In the current and budget year, ten positions are proposed to provide janitorial services to a new California Highway Patrol annex in Los Angeles, full building maintenance services to a new Department of Motor Vehicles facility in Claremont and a new Department of Transportation building in San Diego. In the budget year, 46.3 positions are proposed to provide full building maintenance services to a new Department of Motor Vehicles facility in Oceanside, the new Site 1 building, the new Justice Computer Center in Sacramento, and the State Compensation Insurance Fund building in San Francisco. In the current and budget year, 14 apprenticeship positions are proposed with funding provided by increased salary savings. Also, special repairs to various state buildings totalling \$1,214,000 are proposed for the budget year.*

## c. Facilities Planning and Development

The Facilities Planning and Development Office formulates and maintains the development of office facilities in both major (over 100,000 population) and minor metropolitan areas within the State. In so doing it is necessary for this office to develop data and information which enables it to forecast future agency space requirements in these same areas. In response to these plans this office then initiates through the Department of General Services the first steps which lead to the construction, financing and/or purchasing of a facility. This is accomplished through the capital outlay and legislative processes.

An increasingly important function of this office is to perform environmental studies on behalf of the Department. The office also performs site feasibility and location studies, economic analyses and energy related studies.

Facilities Planning and Development also is responsible for the review of space requests to ensure their compliance with long range plans in effect in a given area. Other responsibilities include the review and maintenance of the Capitol Area Plan, performance of parking studies, and development of the five-year Capital Outlay Program. In addition, many special projects and studies on related subjects are undertaken for the legislative and executive branches of government. This office provides staff to the Departmental Environmental Review Committee, provides environmental review services to all departments and performs environmental studies and reports as required by the California Environmental Quality Act.

## d. Real Estate Services

The Real Estate Services Division performs three major real estate services for state government: acquisition, property management and sales. The acquisition function consists of the following specific activities: site selection, appraisal, appraisal review, negotiation and relocation services. Site selection involves providing real estate expertise to agencies in helping select the best site available. Appraisal involves collecting and analyzing data required to estimate market value. Appraisal reviews are made to ensure that the State pays, and the property owner receives, fair market value. Negotiations are conducted with property owners on the basis of the approved appraised value. Relocation services are provided to owners and tenants to ensure they receive the advice and/or funds to relocate as provided under law. Property management involves the management of state-owned properties acquired but not yet occupied by the purchasing agency, and evaluating the leasing of state-owned property not under the jurisdiction of the Department of General Services. Real estate sales is responsible for the disposal or transfer of state property no longer needed for state use.

## Output

## f. State Building Standards Commission

The State Building Standards Commission reviews building regulations promulgated by various state agencies for conflict, overlap, duplication, nomenclature and arrangement. It also assures conformance to nationally accepted performance standards, publishes and maintains such regulations in Title 24 of the California Administrative Code and interprets such regulations upon request.

*The responsibility and funding of the State Building Standards Commission is being transferred to the State and Consumer Services Agency effective July 1, 1980.*

## Input

\$41,149	\$69,195	-

DEPARTMENT OF GENERAL SERVICES—*Continued*

## g. Building Rental Account

This element provides funds for the operation of buildings under the jurisdiction of the Department of General Services and for subleasing to state agencies. The standard rental rate for 1980-81 is 63 cents per square foot for office space and 15 cents per square foot for storage space. Included in this element are funds for amortizing loans of Public Building Construction Fund buildings, building insurance premiums, and building maintenance services.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$21,080,864	\$24,273,010	\$24,745,417

## h. Property Acquisition Act

Government Code Sections 15850-15865 provide that the Department of General Services has jurisdiction over acquired property under the Property Acquisition Law and land declared surplus to the State's needs. It also provides that the proceeds from the sale and rentals of such properties shall be deposited in the General Fund for appropriation to the Department of General Services to provide maintenance and improvements to acquired property.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$1,172,576	\$1,150,000	\$1,225,000

## i. Physically Handicapped Plan Checking

All plans and specifications for any building or facility purchased by state funds are reviewed for the purpose of ensuring compliance with the American Standards Association Specifications A117.1-1961 minimum standards relating to the accessibility and functional use of such facilities by the physically handicapped. Funding is provided by a filing fee which is established by the Department of General Services, deposited in the General Fund and continuously appropriated (Government Code Section 4454) without regard to fiscal year.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$130,825	\$132,285	\$141,315

## j. State Historical Advisory Board

The State Historical Advisory Board which is located organizationally within the Office of the State Architect is responsible for the development of alternative building regulations for the rehabilitation, preservation, restoration or relocation of buildings, or structures designated as historic buildings. Such alternative building regulations are intended to facilitate restoration so as to preserve their original or restored architectural elements and features, to encourage energy conservation and a cost-effective approach to preservation, and to provide for the safety of the buildings' occupants.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$41,373	-	-

## II. STATEWIDE SUPPORT SERVICES

## Program Objectives and Description

To fulfill their program responsibilities, state agencies require support services for business transactions and activities which are basic to their organizational functions. These operational requirements include procurement of materials, data processing services, communication, transportation, printing, security, and related business and office services.

Other State agency support requirements, on a periodic basis, include consulting services for legal contracts and insurance management. Additionally, licensing agencies require services of hearing officers for alleged violations by license holders, and school districts and local government need assurance of adequate funding for public works projects.

These diverse services are more effectively and economically provided under a consolidated program which centralizes resources, capabilities, talents, and facilities for efficient response to support requirements of client state agencies.

## Authority

- a. Administrative hearings: Administrative Procedure Act, and Government Code Sections 11370-11370.5, 11371-11374, 11380, 11409, 11502, and 500-11528.
- b. Communications: Government Code Section 14931.
- c. Fleet administration: Government Code Sections 13950-13956, 14615, 14621, 14669, and 14675-14678; Board of Control Rules and Regulations, Articles 8 and 15; and State Administrative Manual Sections 4100-4300.
- d. Insurance services: Government Code Sections 11007.5, 11007.7, 11290, 14848, and 18310; State Administrative Manual Sections 2500-2520, 2530, 2541, 2560, 2581-2582.1, 8576, and 8776-77.
- e. Legal services: Government Code Sections 14610 and 14780.
- f. Local assistance: Government Code Section 15500; Education Code Sections 19551-19689.
- g. Management services office: Government Code Sections 11152, 14600, 14607, 14615.
- h. Office services: State Administrative Manual Sections 1252, 1253, 2121-2122.26 and 2880-2883.
- i. Procurement: Government Code Sections 14780-14814, 14860 and 14880-14922.
- j. Records management: Government Code Sections 14740-14755, 14760, 14765-14768, 14770-14774; State Administrative Manual Sections 1600-1653.
- k. Security and protection: Government Code Section 14613, Penal Code Sections 830.2 and 830.4, and State Administrative Manual Sections 2600-2677.
- l. State printing: Government Code Sections 9700-9768 and 14850-14877 and State Administrative Manual Sections 2802-2840 and 3122.2.
- m. Small business procurements and contracts: Government Code Sections 14835-14842.
- n. California office of minority business enterprise: Government Code Sections 14835-14842.
- o. Motor vehicle parking facility: Government Code Section 14678.
- p. State Motor Vehicle Insurance: Government Code 16378-16379.

## a. Administrative Hearings

The Office of Administrative Hearings conducts quasi-judicial hearings for various state or public agencies in connection with the issuance, renewal, suspension or revocation of licenses under the Administrative Procedure Act. Hearing reporters/monitors record verbatim accounts of proceedings conducted by the Hearing Officers, and when called upon provide for verbatim transcripts of the hearings. The office also compiles and publishes the California Administrative Code which consists of state agencies' rules and regulations, and conducts studies in administrative law and procedure.

One permanent position and two limited-term positions are proposed in the current and budget years to meet the demands for administrative hearings by the Division of Fair Employment Practices.

The budget proposes to continue 5 positions in the Electronic Reporting Program which are scheduled to terminate June 30, 1980.

Three positions which were authorized for one-time workload increased in the Office of Administrative Hearings will terminate June 30, 1980.

The reduction of three permanent positions and one-half temporary help position proposed in the budget year reflects the transfer of the Codification Unit in the Office of Administrative Hearings to the newly established Office of Administrative Law effective July 1, 1980.

Output	1978-79	1979-80	1980-81

## b. Communications

The Communications Division is responsible for providing telecommunications services to all state agencies to meet their operational requirements. Services are provided for radio, telephone, teletype, closed circuit TV, emergency (911) telephone, data transmission facilities, and any special telecommunications facilities. Service includes consulting, engineering, installation, maintenance, specifications, Federal Communications Commission license applications, equipment reviews, special studies and management of state telecommunications facilities and equipment.

The budget provides \$61,700 in the current year and \$694,795 in the budget year to purchase microwave equipment.

## DEPARTMENT OF GENERAL SERVICES—Continued

Personnel years .....	278.3	291.3	291.3

## c. Fleet Administration

The Fleet Administration Division establishes policies and procedures on all aspects of state-owned vehicles. Inspectors of automotive equipment are available for consultation to all agencies for determination of required repairs, periodic safety checks, replacement reviews, considerations of agency vehicle needs, proper utilization and other automotive management problems.

Garage operations at 10 locations provide some or all of the following services in support of state agencies: tripper pools for short-term assignment of passenger cars to state employees, long-term rental of vehicles to agencies, preventive maintenance, gas, oil and car wash, auction of used vehicles and air flight services. Parking services for state employees and the public in major urban areas are also administered by the division.

In addition, the 1980-81 budget reflects an increase of 9.4 positions over the 1979-80 authorized level. The increase is reflective of one-time reductions in fiscal year 1979-80 pursuant to Section 27.2 of the Budget Act of 1979.

## Output

## d. Insurance Services

The Insurance Office provides centralized management of State insurance and risk management requirements. Services include analyzing insurance needs of State and local agencies as well as negotiating for insurance procurement necessitated by such analysis. Services also include consulting and advising agencies on risk management problems, administering a comprehensive program for recovery of damages to state-owned vehicles and administering the Defensive Driver Training Program, the Deferred Compensation Plan for State employees and the Motor Vehicle Liability Self-Insurance Program.

Three positions are proposed in the current and budget years to meet workload requirements of the State Motor Vehicle Self-Insurance Program. Four positions are being transferred in the current and budget years to the Insurance Office from the Office of State Printing to implement the State Workers' Compensation and Safety Program.

DEPARTMENT OF GENERAL SERVICES—*Continued*

## e. Legal Services

The Legal Office provides legal services to the Department of General Services, the Department of Finance, and various boards and commissions. The function of the office is that of house counsel which includes giving legal advice on new and ongoing programs, the advocacy of the department's position in a wide variety of situations, the publishing of opinions, and the drafting and review of legal documents. The Legal Office also provides centralized review of a variety of transactions arising out of the operations of state agencies which by law are subject to the approval of the Department of General Services. The review is for the purpose of assuring legality, statewide uniformity, and compliance with the policies of the Department of General Services in regard to its business management of state affairs. A major objective in recommending appropriate courses of action is to avoid involving the State in unnecessary litigation.

Output	1978-79	1979-80	1980-81
Contracts .....	7,254	7,100	7,100

Personnel years .....	17.9	19.3	19.3

## f. Local Assistance

The Office of Local Assistance administers the State School Building Aid Law, under which financial assistance is made available to school districts for acquisition and development of school sites, construction or reconstruction of school buildings, and purchase of school furniture and equipment. This assistance is provided to districts experiencing significant growth as well as those having buildings which do not meet earthquake safety requirements.

Other activities include: (1) partial reimbursement to counties for expenditures made in providing legal counsel for indigents, (2) investigation of unused school sites to determine whether a district will make payments to the State for nonuse, (3) administration of other programs of financial assistance to local agencies as assigned, and (4) disposition of surplus properties.

*Chapter 282, Statutes of 1979, has necessitated the addition of 8.8 positions in the current year and 6 positions in the budget year to administer the Portable Classroom Program. This legislation has also resulted in the addition of 4 positions in the current year and 10 positions in the budget year for the State School Deferred Maintenance Program. In addition, the budget proposes 2 positions, on a limit term basis, to continue support services for the State School Building Aid Program. Currently such services are provided by 5.8 positions which are scheduled to terminate June 30, 1980.*

## g. Management Services

The Management Services Office provides a variety of support services as follows:

1. Accounting and financial services to the department, smaller state organizations, and various boards and commissions.
2. Data processing services including a full-range of personnel and data entry services related to electronic data processing support.
3. EDP education including courses for both EDP technical and 'user' operations and management personnel.

*Twenty-one, limited term positions are proposed in the current and budget years to meet data processing needs requested by various state agencies.*

## DEPARTMENT OF GENERAL SERVICES—Continued

## h. Office Services

The Office Services Division provides state agencies with supportive services, office machine repair, reproduction, and business equipment management services. Supportive services include: (a) Mail centers in Office Building Nos. 1 and 9 which distribute U.S. and interagency mail to the building tenants, provide for external building messenger service, prepare freight and mail for shipment, and also receive and deliver supplies, materials, and equipment; (b) The Interagency Mail and Messenger Unit which distributes mail between state agencies; and (c) Automatic typing and dialing dictation services provided by the Word Processing Center.

The Office Machine Repair Unit provides for the rental, maintenance, and repair of office machines and also advises and aids in evaluations provided by the Office of Procurement. The Reproduction Unit provides 'job-shop printing', addressograph and reproduction services to client agencies. It also advises agencies on reproduction equipment and methods.

The Business Equipment Management Unit is giving full time attention to the reduction of the State's total copying and business communication costs.

*Ten positions are proposed in the budget years to increase intermittent pool services.*

## Output

	1978-79	1979-80	1980-81

## i. Procurement

The procurement element includes three components: direct purchasing, material services, and traffic management.

Purchasing processes requisitions of state and local agencies including developing and circulating bid invitations, awarding bids, and issuing purchase orders. It also provides overall direction and review of purchasing methods and techniques, establishes product standards, tests for compliance with standards, coordinates consolidated purchase projects and programs, and conducts training programs for agency receiving personnel.

Material Services buys operating supplies in large quantities at maximum discounts for resale to state agencies, provides for sale and distribution of state publications, and reviews equipment disposed of by state agencies and selectively obtains, refurbishes, and resells such used equipment to other state agencies. In addition, this component provides for the centralized purchase, storage, and distribution of canned fruits and vegetables to support the institutional feeding programs of the Departments of Health, Corrections, and Youth Authority.

Traffic management provides traffic management services including the review of state shipping and freight receipt practices.

*Six positions are proposed to develop specifications and train staff in energy efficient procurement. Four of the proposed positions have been administratively established in the current year. Four positions are added in the current and budget years to input data into the Statewide Logistics and Material Management (SLAMM) Program.*

## Output

1. Direct Purchasing:			
Purchasing:	1978-79	1979-80	1980-81

Expenditures .....	\$1,483,263	\$1,841,843	\$1,895,865
Personnel years .....	37.3	30.6	30.6

## k. Security and Protection

The California State Police Division is assigned the responsibility to protect employees and members of the public while on State property and to safeguard State facilities and grounds. Maximum demands for police services arise during that period of the day when State government is providing services to the public. The greatest need for security services occurs at those times when occupancy of buildings or facilities is at a minimum. Protective services for constitutional officers and members of the Legislature is based on need but is usually on a continuous basis. A full range of police service is provided including criminal and background investigations; crowd control; air, motor, bicycle, and foot patrol; electronic countermeasures detection; and explosive ordinance disposal. The Division provides physical security surveys, facility inspection, protection of state and personal property, employee protection, technical planning assistance, and first aid, including CPR training through the Employee Protection and Crime Prevention Programs. Where special needs have been demonstrated, regular police or security is augmented by contractual service on an intermittent or full time basis.

## Output

	1978-79	1979-80	1980-81
Building square footage protected (pro rata) .....	—	\$11,385,488	\$11,385,488
Parking square footage protected (pro rata) .....	\$11,600,000	12,555,638	12,555,638
Reports (felonies, misdemeanors, non-criminal) .....	13,534	14,615	15,126
Felonies .....	1,329	1,480	2,118

Expenditures .....	\$7,258,971	\$8,272,840	\$8,498,877
Personnel years .....	275.5	296	296

## l. State Printing

The Office of State Printing provides printing services for the Legislature and for all state agencies except the University of California that include: 1) Legislative printing—printing of bills, records, documents and reports necessary to conduct the business of the Legislature; 2) Operation of the Legislative Bill Room which distributes legislative printed material to the Legislature and the general public; 3) State agency printing—printing of forms, records, reports and publications necessary to agency operations, including distribution of state materials printed under the Library Distribution Act; 4) Elementary school textbook printing—textbooks ordered by the Department of Education for distribution to local school districts; 5) Hand bound library and legislative publications. *The Office of State Printing Plant's budget reflects a reduction of fifteen positions in the current and budget years due to workload decreases in the Bindery Section.*

## DEPARTMENT OF GENERAL SERVICES—Continued

## Output

	1978-79	1979-80	1980-81
Legislative printing (number of measures and resolutions printed) .....	2,606	2,200	2,200
Publication printing (number of orders) .....	1,596	1,700	1,700
Job work printing (number of orders) .....	8,990	9,500	9,500
Textbook printing (number of books) .....	1,934,377	2,100,000	2,100,000
Hand binding (number of books) .....	55,136	50,000	50,000

Expenditures .....	\$27,862,903	\$30,944,019	\$32,716,397
Personnel years .....	575.9	564	564

## m. Small Business Procurements and Contracts

The Office of Small Business helps facilitate small business participation in State procurements, construction contracts, and service contracts. This goal is accomplished through seminars and workshops in prequalification and bidding; coordination with federal, state, and private organizations; and compilation of various small business listings.

## Output

	1978-79	1979-80	1980-81
Number of additional small business prequalifications .....	2,190	2,490	2,740
Dollar value of small business participations .....	\$101,791,233	\$110,200,000	\$115,000,000

## Input

Expenditures .....	\$342,467	\$424,079	\$444,040
Personnel years .....	11.7	12.7	12.7

## n. California Office of Minority Business Enterprise

CAL-OMBE facilitates the entry of minority and women-owned firms in the state procurement system by utilizing resources inherent in the state administrative structure and by developing outreach programs for minority/women business persons.

## Output

	1978-79	1979-80	1980-81
Minority and women-owned firms listed .....	3,700	4,100	4,100
Contract awards (dollar value)—commodities .....	\$19,917,933	\$25,330,000	\$25,330,000
Contract awards (dollar value)—construction .....	\$11,087,409	\$14,000,000	\$14,000,000
Contract awards (dollar value)—services .....	\$12,071,421	\$14,740,000	\$14,740,000

## Input

Expenditures .....	\$280,517	\$177,476	\$184,399
Personnel years .....	10.4	5.9	5.9

## o. Motor Vehicle Parking Facilities

Government Code Section 14678 provides for the acquisition by lease or other means of real property and the construction, operation and maintenance of motor vehicle parking facilities thereon for state officers and employees. This section provides that revenue received may be used to finance construction and maintenance of parking lots. This program covers over 5,000 spaces in lots throughout the State.

## Input

	1978-79	1979-80	1980-81
Expenditures .....	\$693,614	\$1,039,818	\$1,605,535

## p. State Motor Vehicle Insurance

Pursuant to Chapter 1079, Statutes of 1978, an account in the General Fund was authorized, effective January 1, 1979, to support implementation of the State's motor vehicle liability insurance program. Prior to January 1, 1979, an account in the Special Deposit Fund was utilized for this purpose.

## Input

	1978-79	1979-80	1980-81
Expenditures .....	\$851,373	\$1,602,701	\$2,366,332

## III. ADMINISTRATION

The department's administrative program consists of executive, staff support and program evaluation elements that include the Executive Office, Administrative Services Division and Program and Compliance Evaluation Division. Together these elements provide fiscal, personnel, training and management advice and services to the department's line programs. In addition, the administration is responsible for implementation of the department's Equal Employment Opportunity and Affirmative Action Programs.

The Consulting Services Unit within the Program and Compliance Evaluation Division provides consulting services to other state agencies on a reimbursable basis.

Four positions are proposed in the budget year to implement the Energy Assessment Program for state buildings.

## DEPARTMENT OF GENERAL SERVICES—Continued

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## IV. EMERGENCY TELEPHONE NUMBER—LOCAL ASSISTANCE

Chapter 443, Statutes of 1976, established an Emergency Telephone Number '911' response system throughout the state. To encourage local agencies to develop and improve emergency communications procedures and facilities so that any person calling the telephone number '911' can seek emergency services, financial assistance is offered. Each local agency participating in the program will be reimbursed from the Emergency Telephone Number Account.

## Authority

Chapter 443, Statutes of 1976.

# INTERGOVERNMENTAL PERSONNEL ACT ADVISORY COUNCIL

## Program Objectives and Description

The Intergovernmental Personnel Act Advisory Council was created June 16, 1975, by Executive Order B4-75. The administration for the 1970 federal act is assigned under the Secretary of the State and Consumer Services Agency. It is the successor to the Advisory Coordinating Council on Public Personnel Management formerly administered by the Office of Planning and Research.

The five-member council is appointed by the Governor. Current council members include the Director of the Department of Industrial Relations, the Executive Officer of the State Personnel Board, and representatives of a county, a city, and the educational community. The council members volunteer their time and serve without compensation. The council reviews and makes recommendations to the Secretary on proposed programs and projects to be included in the California statewide plan, which is composed of all approved grant applications. An administrative unit of the council performs the necessary activities to administer the federal grant funds as required under the Act, and carries out appropriate nongrant provisions. The basic intent of the Act is to improve the delivery of public services by strengthening personnel management systems and by developing public personnel resources and skills. Grantees include State departments, units of local governments, universities, and nonprofit organizations.

*One position was eliminated in Fiscal Year 1980-81 to reflect grant workload reductions.*

## STATE PERSONNEL BOARD

The State Personnel Board is responsible for serving the personnel needs of State agencies in the improvement of personnel practices and procedures. The Board's authority to conduct central personnel management functions for State Government derives from Article VII of the State Constitution and from provisions of the Government Code.

The State Personnel Board, within the framework of a merit system, maintains the civil service classification system, conducts the majority of the State's recruitment efforts, develops examining techniques to select and rank qualified applicants, sets compensation rates for nonrepresented employees and standards within funds authorized and guidelines set by the Legislature, provides leadership and evaluation to State departments on employee development and conducts training for State employees, receives and resolves appeals on grievances, medical claims, discrimination complaints, and punitive action; and provides leadership in personnel management, practices, and procedures. The Personnel Board also has the responsibility for coordination and evaluation of affirmative action/equal employment opportunity efforts within State departments and local agencies as required by State policy, Federal law and in conjunction with the Jobs Program. The Board also provides, under contract and on a fully reimbursable basis, technical personnel services to political subdivisions on request and administers a federally required merit system for some local governmental employees.

Through the Welfare Reform Act of 1971, the State Personnel Board was assigned the responsibility of the Career Opportunities Development Program including the development, implementation, and operation of the Jobs Program for welfare recipients, grants to cities and counties for local career opportunities development projects, and technical assistance to the State and local jurisdictions.

*The Governor's Reorganization Plan #2 proposes to consolidate various State personnel functions currently located in several State entities, including functions which are currently the responsibility of the State Personnel Board. Because the Reorganization Plan is still undergoing legislative and administrative review, specific organizational changes have not been reflected in the Governor's Budget.*

STATE PERSONNEL BOARD—Continued

I. DEPARTMENTAL SERVICES

Program Objectives and Description

Departmental Services Division provides a system of classification, pay and employee selection which will enable State departments to carry out their programs in an expeditious manner, while maintaining the integrity of the merit system and facilitating affirmative action. The Selection Program includes such civil service employment functions as program planning and development, list establishment, certification and placement, and employment information and recruitment. Classification and pay plan responsibilities include the establishment, revision, and abolishment of classes, allocation of positions to appropriate classifications and analysis of pay requests. The Departmental Services program units are organized primarily on a departmental basis and provide a single point of contact for State departments seeking personnel services.

Personnel Management Activities:

In 1977-78, the concept of performance contracting was implemented. The performance contract is a mutually documented agreement between Departmental Services and a department that identifies the specific work to be performed by the State Personnel Board for that department. The contracts specify priorities, allocate resources, specifies responsibilities of the department and the Board; and establishes agreed upon timetables for completion of the work.

Two positions were transferred in the 1979-80 fiscal year for one year only from the List Establishment Unit to work on the State Training Policy/Training Information System. These positions will be redirected in fiscal year 1980-81 to the Bilingual Services Program. The 1980-81 fiscal year budget also reflects an increase of 8.2 positions over the 1979-80 authorized level. This increase is reflective of one-time reductions made in 1979-80 pursuant to Section 27.2 of the Budget Act of 1979.

a. Program Planning and Development

This element concentrates on planning improvement for the Departmental Services Program. The work is accomplished through project assignments in the major areas of list establishment, certification and placement, and classification and pay. Planning and development activities must ensure that the program remains practical and feasible, that selection devices are job related and nondiscriminatory, and that the program meets legal requirements. An essential part of this element is the development of performance contracts, jointly agreed to by departmental and SPB staff, which set priorities and define responsibilities of each of the parties.

Output				1978-79	1979-80	1980-81
Departmental service contracts.....				—	140	140

Expenditures.....	8.3	8.3	8.5	\$190,735	\$216,265	\$233,353

b. List Establishment and Certification

List establishment includes all activities directly connected with placing persons on eligible lists for both regular civil service and career executive assignment positions. This begins with the contracting process and the agreement between the requesting department and the State Personnel Board staff that there is a need for an examination, and continues until the eligible list is actually established. This element provides for the planning of individual selection efforts to meet departmental needs and involves the application of selection techniques and research developments to specific examining situations. The major activities of this element are test planning and management, recruitment and publicity, test construction, test administration, conducting qualifications appraisal panels and employee development appraisals, and test appeal and review. Focused affirmative action recruitment projects are carried out in order to increase minority, female and disabled representation in State Government.

Output	1978-79	1979-80	1980-81
Applications received for centralized testing .....	104,331	104,331	125,000

Expenditures.....	216.2	215.4	221.7	\$4,956,549	\$5,619,961	\$6,064,021

## c. Classification and Pay

Activities included in this element are review of the classification plan, position allocation, classification and pay issues, and general consultation for classification and pay matters.

Review of the classification plan includes time devoted to surveys of the use of the State classification plan by departments.

Position allocation is the determination of the appropriate classification among the various occupational groups for a position within a described set of duties.

Classification and pay issues include establishment, revision and abolishment of classes and specifications, including development of allocation standards and establishment of salary ranges, title changes and preparation and presentation of Board memoranda.

General consultation in this area includes advice given to departments on the classification and pay aspects of organizational changes, negotiations with departments and employee groups, and analysis of requests for transfer, demotion and reinstatement determinations.

## Output

Classification and Pay Issues:	1978-79	1979-80	1980-81

Expenditures.....	56.6	56.3	58	\$1,296,487	\$1,470,016	\$1,586,169

## II. POLICY AND STANDARDS

## Program Objectives and Description

The Policy and Standards Program is responsible for planning, coordinating and implementing all policy, standards and research for the Personnel Board's classification, pay, selection and employment conditions programs; for monitoring conformance with the States classification and pay plan; conducting pay surveys; employer-employee relations transitional activities; policy documentation and communication; personnel transactions; test validation and construction; medical evaluations and policy; and technical examination support and training for staff in classification, pay and selection.

*This budget proposes to continue 13 positions in the Audit and Control Unit which were scheduled to terminate on June 30, 1980. Three positions are also being proposed in fiscal year 1980-81 to continue support services in the Office of Information Practices. Currently such services are provided by 5 positions which are scheduled to terminate June 30, 1980. An Intergovernmental Personnel Act grant was approved in fiscal year 1979-80 to develop a Management Performance Evaluation System. The budget includes 1.3 positions in fiscal year 1979-80 and one position in fiscal year 1980-81 to provide staff support for this project. In addition, the 1980-81 budget reflects an increase of 3.5 positions over the 1979-80 authorized level. The increase is reflective of the one-time reductions pursuant to Section 27.2 of the Budget Act of 1979 and other technical adjustments.*

## STATE PERSONNEL BOARD—Continued

## a. Selection Program Evaluation and Development

This element encompasses two separate activities: Selection Policy Development and Test Validation and Construction; both are directed toward increasing the credibility and effectiveness of the States examining program.

The Selection Policy Development activity consists of various studies and projects directed at determining the effectiveness of the State's selection program and/or developing improvements to the program. Policies are recommended and/or clarified; pilot studies of promising techniques initiated; and selection program legislation reviewed and/or evaluated. Some projects in this area include implementing major revisions to small examinations (those with fewer than 10 competitors); developing and implementing a pilot program for a supplemental applications testing technique; recommending improvements to the CEA selection process; and reviewing and simplifying the staff's examination manual.

Test Validation and Construction is responsible for reviewing the job relatedness of standards by which applicants are screened and ranked for State Civil Service employment. Activities include: (1) increasing the number of examinations that have been systematically made more valid and job related, more objective and/or reduce adverse effect; and (2) developing and designing new processes for establishing eligible lists which will improve employee selection; acceptance by applicants, employees, and management; timeliness; use of resources; and documentation of hiring decisions. This effort includes development and validation of physical agility performance tests; the review of medical standards for employment in selected classes; and the construction of new test items, materials, plans, and techniques.

Output	1978-79	1979-80	1980-81
Validation studies completed .....	35	20	20
FEPC complaints and appeals .....	55	50	50
Test validation projects .....	54	50	50
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>
Expenditures .....	32.3	30.9	31.7
	1978-79	1979-80	1980-81
	\$883,859	\$1,034,773	\$1,012,929

## b. Personnel Management Policy Development

This element includes those activities aimed at assuring the proper and uniform operations of the State's classification and pay plan and the day-to-day operational features of these activities. Responsibilities include: review and evaluation of the State's classification and pay program; development and implementation of classification and pay policies, standards and procedures; consultation given to staff, departments, employee groups and the general public; and implementation of the Information Practices Act of 1977.

Personnel Management Policy Development Projects include recommending improvements to the classification and pay portions of the CEA program; reviewing the policy of transfer between classes; reviewing employee status policy in the event of reorganization or reduction in force; and revising and improving the staff classification and pay manual. This activity also includes providing seniority computations and consultation on all classification, salary and personnel transactions matters, attendance and leave and employee status and rights.

Output	1978-79	1979-80	1980-81
Seniority computations .....	4,177	4,177	4,177
State service computations .....	1,404	1,404	1,404
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>
Expenditures .....	30	29.9	28.9
	1978-79	1979-80	1980-81
	\$820,951	\$963,021	\$914,618

## c. Classification Control

Classification control assures compliance by departments with the State's classification and pay plan and civil service employment Law and Rules. Activities include the conduct of pre-audit and post audit monitoring techniques of selected personnel transactions; review of delegated personnel management functions—including classification decisions, delegated testing, and the recommendation of corrective actions when necessary and appropriate.

Output	1978-79	1979-80	1980-81
Number of appointments reviewed .....	350	2,000	2,000
Number of delegated test site audits .....	24	50	50
Number of positions reviewed .....	1,828	1,500	1,500
Number of transactions reviewed .....	4,053	4,500	4,500
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>
Expenditures .....	22.7	21.6	22.2
	1978-79	1979-80	1980-81
	\$619,645	\$690,393	\$640,270

## d. Employee Compensation and Working Conditions

The Compensation Administration element includes the traditional compensation and employment condition activities required for managerial, supervisory, confidential and other non-represented employees. Functions include collecting, reviewing and analyzing salary survey information; conducting employee compensation research; and reviewing and analyzing compensation and working conditions related legislation.

This element also includes coordination with the Governor's Office of Employee Relations to provide a smooth transition to a collective bargaining system for State Civil Service employees; providing information and assistance to State departments, PERB, employee organizations and others interested and/or affected by the changes in the State's employer-employee relations program; and monitoring employer-employee relations developments within State Service and in other public jurisdictions.

Output	1978-79	1979-80	1980-81
Salary survey schedules .....	1,170	1,200	1,200
Salary projects .....	22	25	30
Benefit projects .....	21	21	21
Meet and confer sessions held .....	46	56	70
Number of collective bargaining contracts administered .....	-	-	9

## STATE PERSONNEL BOARD—Continued

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	26.8	25.6	26.3	\$732,880	\$816,556	\$840,379

## e. Medical Evaluation

This program element encompasses the review of medical evaluations and health questionnaires of applicants for State employment; consultation with departments regarding medical policy and standards and the medical background of both current and prospective employees; and consultation with State Personnel Board staff regarding medical appeals. Activities also include determining medically oriented characteristics of the State's work force and recommending medical policy and job related medical standards for State Service.

Output	1978-79	1979-80	1980-81
Medical evaluations reviewed.....	3,694	7,509	7,900
Medical appeals heard by SPB.....	18	29	35

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	3.2	3.1	3.2	\$88,071	\$98,127	\$102,251

## III. APPEALS

## Program Objectives and Description

The Appeals Division, established February 1, 1978, investigates appeals to the State Personnel Board relating to complaints of discrimination, grievances, examination appeals, Board of Control claims, Medical Officer decisions, and other appeals resulting from State Personnel Board staff or departmental action. It provides recommendations for the disposition of such cases to the State Personnel Board's Executive Officer, and provides staff assistance to the State Personnel Board when such cases are appealed to the Board.

It conducts hearings in accordance with the provisions of Government Code Section 11513 and recommends proposed decisions to the State Personnel Board in connection with appeals from punitive or disciplinary actions, layoffs, reports of performance, denial of sick leave, etc., or other matters as assigned by the Executive Officer.

The budget for fiscal year 1980-81 reflects an increase of one position over the 1979-80 authorized level. The increase is reflective of one-time reductions pursuant to Section 27.2 of the Budget Act of 1979 and other technical adjustments.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing Program Costs.....	41	40.9	41.9	\$1,094,506	\$1,255,946	\$1,352,593

b. Hearing Office.....	16.5	16.5	16.8	439,991	504,890	543,742

## a. Appeals Section

In accordance with Government Code Sections 18714 and 19700-19706 and Articles 24 and 25 of the State Personnel Board Law and Rules, the Appeals Section provides a means for State employees and job applicants to appeal a departmental or State Personnel Board action or decision against the employee or applicant in the areas of grievances, discrimination complaints, examination appeals, Medical Office appeals, or other areas appealable to the State Personnel Board.

Output	1978-79	1979-80	1980-81
Discrimination complaints.....	35	35	35
Grievance appeals.....	122	125	125
Examination appeals.....	795	800	800
Board of Control claims.....	245	250	250
Miscellaneous appeals (appeals on medical grounds, withholds, other appeals and correspondence).....	204	205	205

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	24.5	24.4	25.1	\$654,515	\$751,056	\$808,851

## b. Hearing Office

In accordance with Government Code Sections 18670-18682 and 19474-19488 and Article 4 of the State Personnel Board Law and Rules, the Hearing Office provides State employees a means of appealing departmental actions or decisions involving punitive or disciplinary action against the employee and other items referred to it by the State Personnel Board.

Output	1978-79	1979-80	1980-81
Punitive actions and rejections filed.....	1,525	1,785	1,785
Appeals from punitive actions and rejections.....	615	650	650
Appeals other than punitive actions and rejections.....	375	400	400

Expenditures.....	16.5	16.5	16.8	\$439,991	\$504,890	\$543,742

## STATE PERSONNEL BOARD—Continued

## IV. PERSONNEL DEVELOPMENT

## Program Objectives and Description

The Personnel Development Division provides statewide leadership and functional direction to the State's training and employee development programs; formulates State training and employee development policy; and manages centralized training and employee development consultation programs for State departments.

Two positions were added in fiscal year 1979-80, for one year only through a redirection from the List Establishment Unit to the State Training Policy/Training Information System.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	30.9	39.6	37.6	\$981,547	\$1,503,734	\$1,504,917
Workload adjustments.....	-	-	-	-	-	-
Totals, Personnel Development .....	30.9	39.6	37.6	\$981,547	\$1,503,734	\$1,504,917
General Fund .....				350,328	280,000	268,550
Reimbursements .....				631,219	1,223,734	1,236,367

Program Elements	78-79	79-80	80-81	1978-79	1979-80	1980-81
a. Departmental Services .....	8.6	11	9	\$271,889	\$416,534	\$360,219
b. Centralized Training.....	22.3	28.6	28.6	709,658	1,087,200	1,144,698

## a. Departmental Services

The Departmental Services program provides leadership to State government agencies in the development, implementation and evaluation of their training programs. This leadership is accomplished through the development and implementation of statewide policies, establishing statewide standards, providing assistance to help departments correct deficiencies and establish new programs.

Output	1978-79	1979-80	1980-81
Number of departmental training plans reviewed .....	5	30	80
Number of training courses evaluations .....	20	20	30
Number of departmental total program evaluations .....	-	-	5
Technical assistance contacts .....	400	300	300

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	8.6	11	9	\$271,889	\$416,534	\$360,219

## b. Centralized Training

Employee development programs are offered in response to needs expressed by departments and in response to needs expressed by the Administration, such as employee-employer relations, affirmative action and upward mobility programs. Programs are offered in the areas of Management Development, Supervisory Development, Staff Services Development, and Professional Development. In addition, the Division offers consultation services to departments in the areas of organizational development, employee development and the professional development of trainers.

Output	1978-79	1979-80	1980-81
Number of program hours .....	6,253	7,000	7,000
Number of participant hours .....	95,638	120,000	120,000
Number of executive development participants .....	159	200	200

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	22.3	28.6	28.6	\$709,658	\$1,087,200	\$1,144,698

## V. PUBLIC EMPLOYMENT AND AFFIRMATIVE ACTION

## Program Objectives and Description

This Division seeks to achieve, through leadership in the personnel management system, a State work force with ethnic minorities, women and the disabled represented (by level and occupation) in proportion to representation in the appropriate labor resource pool, and to monitor the affirmative action progress of each department in State service and report to the State Legislature on the successful implementation of all aspects of affirmative action in each California State Department. During the 1978-79 fiscal year, the Division continued to place increased emphasis on improving the representation of the Spanish speaking/surnamed in State service, to correct their continued underrepresentation; and to implement the newly developed policies and procedures for employing the disabled.

The Division also (1) develops and provides assistance and guidance to use manpower programs for the implementation of affirmative action efforts and provide employment to welfare recipients and other disadvantaged persons; and (2) provides strong leadership for the State departments which are equipped and willing to use manpower programs to facilitate redirection of departmental personnel systems for implementation of affirmative action goals and timetables.

Three positions, one new and two redirected, have been added in fiscal year 1980-81 to staff the Bilingual Services program. The two positions are being redirected from the List Establishment Unit. In addition, the budget for fiscal year 1980-81 reflects a net increase of 0.8 positions over the 1979-80 authorized level. The increase is reflective of one-time reductions pursuant to Section 27.2 of the Budget Act of 1979 and other technical adjustments.

## STATE PERSONNEL BOARD—Continued

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

Reimbursements .....				1,885,808	1,861,818	1,974,059

## Program Elements

a. Coordination and program development .....	2.1	2.2	2.2	\$729,599	\$758,544	\$811,396
b. Welfare recipients jobs .....	10.1	10.5	10.7	6,802,261	8,453,740	9,028,867
c. Affirmative action .....	34.5	35.8	39.4	925,780	1,126,372	1,269,463

## a. Coordination and Program Development

The Career Opportunities Development (COD) Program operates on the basis that primary responsibility for and capacity to achieve program objectives rests with the State or local agencies that make the organizational, staffing, and hiring decisions. To facilitate participation of departments, the COD Program provides: (1) consultative and technical assistance; and (2) direct grants for developmental projects and for intensive staff support as COD coordinators.

Output	1978-79	1979-80	1980-81
Number of local agency grants.....	8	10	10
Number of State agency grants .....	8	8	8
Total grants—cumulative .....	77	95	113

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	2.1	2.2	2.2	\$729,599	\$758,544	\$811,396

## b. Jobs Program

The jobs for welfare recipients, the disabled, and other disadvantaged persons program enables the full reimbursement of employer payroll cost during the training period. The program, authorized by the Welfare Reform Act of 1971 provides: (1) inducements to employing agencies and jurisdictions to hire program trainees who complete training; and (2) facilitates the amount and quality of training by hiring groups of trainees at one time.

Output	1978-79	1979-80	1980-81
Number of jobs contracted each year .....	1,200	1,500	1,500
Number of trainees placed into training each year .....	1,200	1,500	1,500
Number of prior trainees advanced into unsubsidized jobs .....	438	1,125	1,125
Number of local agency jobs programs.....	500	500	500
Number of State agency jobs programs.....	70	70	70

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	10.1	10.5	10.7	\$6,802,261	\$8,453,740	\$9,028,867

## c. Affirmative Action

A comprehensive affirmative action program was established by the State Personnel Board in order to achieve a fully balanced work force by ethnic, sex and disabled representation. Information developed by this program enables the staff to concentrate on removing the underlying causes of low representation of minorities, women, and the disabled in State and local work forces. The staff consults with departments in the preparation of affirmative action plans and policies, and reviews and approves those plans and policies. The program staff monitors the department's progress toward affirmative action goals; prepares annual report on each State agency's progress toward achieving a balanced work force.

While continuing affirmative action efforts to achieve a fully representative work force, specific focus is given to increasing the representation of Spanish speaking/surnamed persons, implementing affirmative action hiring programs for the disabled, achieving distributional representation of women, and providing career opportunities for all underutilized employees through upward mobility programs.

## STATE PERSONNEL BOARD—Continued

## VI. LOCAL GOVERNMENT SERVICES

## Program Objectives and Description

The Local Government Services Division provides two programs: Cooperative Personnel Services (CPS) and Merit System Services (MSS). This Division develops reliable, job-related selection processes, tests, and services which minimize or eliminate adverse effect, provides them on a timely basis, and administers or insures that local agencies administer them in accordance with SPB policy direction.

The Division provides training and consultation to local agencies, where needed, that improve the effectiveness of their personnel management programs.

Local Government Services Division also provides direction and assistance to grant-aided agencies to attain, at all occupational levels, a work force which reflects the proportion of ethnic groups and women in the appropriate labor market; and provides direction and assistance to grant-aided agencies to improve the representation of disabled persons in their work force; and maintains the capacity to provide these services to local agencies on their request.

e. Merit system services—affirmative action ....	4.4	5	5	116,544	147,371	182,172

## a. Contract Personnel Services—Selection Services

Complete recruitment and selection services are provided upon the request of local agencies for use in accordance with standards set by the State Personnel Board. Written and performance-type examinations are provided, interviews are conducted, and advice and assistance are given on any phase of recruitment and selection. Developmental projects are conducted to improve selection systems and techniques. Selection training is available to improve local agency technical expertise.

Continuing emphasis is being given to the improvement of written test materials, especially with regard to establishing validity and developing test methods to provide fairness to candidates from all cultural groups and backgrounds, and to the development of job-related alternatives to written tests.

Output	1978-79	1979-80	1980-81
Agencies .....	1,062	1,144	1,250
Number of exams .....	2,071	2,174	2,200

Expenditures.....	35.7	42.5	42.5	\$868,153	\$1,254,118	\$1,033,094

## b. Contract Personnel Services—Survey Services

At the request of local governmental agencies, a variety of technical personnel services are provided. These include the development, revision or review of position classification plans, pay plans, and employee benefit programs. Consultation and assistance is provided for the development of personnel ordinances, rules, and procedures. Consultation and training on a variety of personnel management subjects are also available.

Output	1978-79	1979-80	1980-81
Agencies served .....	46	48	55

Expenditures.....	8.9	10.6	10.6	\$217,038	\$313,529	\$258,273

## STATE PERSONNEL BOARD—Continued

## c. Merit System Services—Approved Local Merit Systems

The Approved Local Merit System Services Unit reviews and approves for compliance merit systems and personnel standards (including affirmative action) established by local agencies for their welfare, health and emergency services departments. Audits are conducted to ensure continuing compliance with Federal and State requirements. Consultation on a variety of personnel management subjects is available to assist local agencies to meet the established standards.

Output	1978-79			1979-80			1980-81		
Approved local merit systems (cities and counties) .....				54			52		58

## VII. MANAGEMENT SERVICES

## Program Objectives and Description

A Constitutional Board of five members is appointed by the Governor to ten-year terms. The Board provides direction to the State civil service system through its authority to adopt rules and promulgate policy in the area of Personnel Management. Public hearings are held by the Board for the purpose of maintaining an effective and responsive merit system which satisfies the need of State Government and serves the interests of the public.

Ongoing program management is provided through the Executive Officer who is appointed by the Board. Legislative liaison is also provided through the Executive Office.

A variety of administrative services are centralized in this Division to enable the Personnel Board to use its personnel and resources in the most cost-effective mode possible. Management Services monitors divisional operations and expenditures to assure that the Board properly discharges its duties and responsibilities and promotes an organizational climate whereby staff expertise is developed, communication channels are open, program objectives, policies, and procedures are understood, and deficiencies are identified and corrected on a timely basis.

These are accomplished through the following areas of support: Fiscal, Resource Allocation, Planning, Management Analysis, Organization Review and Administrative Assistance, Staff Selection and Affirmative Action, Training and Staff Development, Personnel Services and Transactions, Employer-Employee Relations, Internal Communications, Facilities Management, Business Services, Data Processing, Management Information Coordination, Mail and Duplicating Services, General Files, Word Processing, Graphic Arts, Forms Management, and Paperwork Management.

PUBLIC EMPLOYEES' RETIREMENT SYSTEM

The system administers a group of separate, but related, benefits for more than 820,000 past and present public employees within the State of California. This grouping consists of retirement and death benefits; the extension of social security coverage to public employees; and the development, negotiation and operation of a number of group hospital and medical insurance plans.

Participants in the system's programs include constitutional officers of the State, members of the Legislature, judges, State employees, most school employees who are not teachers, and any other public employees whose employer elects to contract for benefits offered by the system.

The Governor's Reorganization Plan #2 proposes to consolidate various State personnel functions currently located in several State entities, including functions which are currently the responsibility of the Public Employees' Retirement System. Because the Reorganization Plan is still undergoing legislative and administrative review, specific organizational changes have not been reflected in the Governor's Budget.

I. RETIREMENT

Program Objectives and Description

This program provides a retirement and death benefit program for public California employers and their employees which will provide for the orderly and systematic retirement of employees and encourage career employment in the public service.

Beginning in 1932, the State provided a series of retirement and death benefits for its employees, other than teachers. In 1939, coverage was extended to employees of those political subdivisions of the State who wished to contract with the State retirement system. Today the system offers benefits based on service or disability to all covered employees; death benefits for employees and annuitants; survivors' benefits to members not covered by social security; and, to members in certain occupations, special benefits based on death or disability incurred in the line of duty.

The unfunded liability of the State's portion of the system as of June 30, 1977 was \$4,057,604,006. Based on current actuarial assumptions and State contribution rates, this will be reduced to \$961,356,006 by June 30, 2000. If the State contribution rates remain in effect beyond June 30, 2000, the unfunded liability would be eliminated by June 30, 2007.

The unfunded liabilities for public agencies are funded in accordance with the terms of each agency's contract.

The Legislators' and Judges' Retirement Systems are also administered by the Public Employees' Retirement System.

Continuing program requirements are reduced by the termination of three positions on June 30, 1980 because of workload reductions. Other changes in 1980-81 include an increase of 9.5 positions allocated from the Administration Program, a decrease of 0.5 positions in salary savings and the addition of 0.4 positions that were reduced per Section 27.2 of the 1979 Budget Act. Seventeen positions have been added in the budget year to meet workload increases. Seven positions have been added in the budget year to form a Special Benefits Division Task Force in order to begin a program of eliminating the backlogged work that exists throughout the system. This will be a multi-year effort. One position has been added in the budget year to handle an increase in deposits because of more frequent social security payments mandated by the Federal Government. One-half of a position has been added in the budget year to gather information for the valuation of the Judges' and Legislators' Retirement Systems and \$100,000 has been added for consulting actuaries to perform these valuations. Two positions have been added in the current year and three positions in the budget year to establish the volunteer firefighters service award system in compliance with Chapter 1145, Statutes of 1979 (SB 273). One position has been added in the budget year to meet workload resulting from Chapter 1200, Statutes of 1979 (AB 1721). One position has been added in the budget year to maintain accounts and records related to the new PERS administration building. Salary savings has been reduced by 21.7 personnel-years in the budget year to reflect the System's attempt at lowering the vacancy rate to meet increasing workloads.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## II. SOCIAL SECURITY

## Program Objectives and Description

To provide a means whereby employees of public agencies may obtain coverage under the Old-Age, Survivors, Disability and Health Insurance provisions of the federal Social Security Act. The function administers the coverage and reporting phases of the Social Security Program for California public agencies.

The continuing increase in the costs of social security coverage to public agencies and their employees has resulted in requests for termination of coverage by the agencies. In Fiscal Year 1978-79, 33 public agencies terminated coverage and 55 agencies are in the process of termination.

One position has been added in the 1980-81 fiscal year to process an increase in deposit workload because of more frequent social security payments mandated by the Federal Government.

## III. HEALTH BENEFITS

## Program Objectives and Description

This program provides medical and hospital insurance plans with private carriers for State and other public agency employees, annuitants and their families. Primary activities are to negotiate contracts and to provide standards for basic, major medical, and supplemental to Medicare health plans; to conduct open enrollment periods, providing information to employees and annuitants; and to mediate service and claim disputes.

Total premium costs for the 1978-79 fiscal year were \$153.8 million.

Continuing program requirements are reduced by the termination of seven positions on June 30, 1980 because of reduced workload. Other changes in 1980-81 include a decrease of 0.2 position allocated from the Administration Program and a decrease of 0.4 position in salary savings. Seven positions have been added in the budget year to meet workload increases. \$132,000 has been added in the current and budget years to contract with the State Controller for the processing of health premium deductions. Salary savings have been reduced by 1.1 personnel-years in the budget year to reflect the System's attempt at lowering the vacancy rate to meet increasing workloads.

## IV. PERS SYSTEM REDESIGN PROJECT

## Program Objectives and Description

Present systems and operations used in active/inactive member, retired member, investments, health benefits and actuarial activities have not been changed substantially since development, although they have been modified for numerous legislative changes, system growth, and hardware/software upgrades.

As a result of a budget augmentation in January 1976, PERS added a Redesign Project team for the development of a Redesign Master Plan. This plan was published on April 12, 1976 and has been approved by the State Data Processing Management Office of the Department of Finance.

Systems that will undergo redesign in the current and budget year include retirement roster, public agency membership reporting and determination, employer roster, benefits, retirement history, contribution reporting, accounting, member service adjustment, and social security.

One position has been reduced in the 1979-80 and 1980-81 fiscal years as a result of the installation of a programmer work station and a technical adjustment to salary savings has been made for a reduction of 0.1 position.

## V. ADMINISTRATION

## Program Objectives and Description

This program provides the leadership and support services required to achieve the objectives of the system's programs.

Activities include the actuarial investigation into mortality and experience factors to establish appropriate benefit discounts, premiums and rates of contribution; determination of costs of proposed benefit changes; development of legislation desired by the System or other interested parties; analysis of all legislation affecting the System; prediction of future market trends; purchase and/or sale of securities resulting from analysis and comparison of current offerings; and provision of data processing, legal, personnel and fiscal services.

Two and one-half positions have been added in the budget year to meet workload increases. Four positions have been added in the budget year to meet workload resulting from Chapter 1200, Statutes of 1979 (AB 1721). One position has been added in the budget year to coordinate activities related to a new PERS administration building.

Additionally, \$200,000 has been provided to develop a more sophisticated actuarial system to meet the actuarial demands arising through collective bargaining and legislation, and two positions are added for workload. A salary savings adjustment in 1980-81 increases the personnel-year count by 0.2.

## PUBLIC EMPLOYEES' RETIREMENT SYSTEM—Continued

## VI. LEGISLATIVE MANDATE (Local Assistance)

## Program Objectives and Description

Section 2231(a) of the Revenue and Taxation Code requires the State to pay local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Public Employees' Retirement System there are several legislative mandates. The first is Chapter 1322, Statutes of 1974 (SB 1775). This mandate provides that the definition of dependent children, for purposes of special death benefits for safety members, includes full-time students under the age of 22.

Chapter 1170, Statutes of 1978 (AB 2545) provides that certain school members will receive increases in their retirement allowances.

Chapter 1398, Statutes of 1974 (AB 2926) authorizes credit for unused sick leave for retirement credits for school district employees.

Chapter 1036, Statutes of 1979 (SB 629) provides cost-of-living adjustments to retired school members of PERS equal to those received by retired state members.

## Authority

Chapter 1322, Statutes of 1974, Chapter 1398, Statutes of 1974, Chapter 1170, Statutes of 1978, and Chapter 1036, Statutes of 1979.

## STATE TEACHERS' RETIREMENT SYSTEM

The system was established in 1913 as the Public School Teachers' Retirement Salary Fund and Permanent Fund. It became the State Teachers' Retirement System in 1944. The Teachers' Retirement Board was formed in 1963 when the system was made independent of the Department of Education.

The Board manages the system and has exclusive control over the moneys of the system, makes the rules, sets policies, controls investments, and has the power and authority to hear and determine all facts pertaining to application for benefits under the retirement system. The staff and the Teachers' Retirement Board manage the largest teachers' retirement system in the United States, having 315,546 members on June 30, 1979, and 76,019 members on the retirement roll for a total membership of 391,565.

Increase field audit capability .....	2	55,433
Provide for increased investment counsel fees .....	-	15,000
Add staff for support of the tax sheltered annuity program .....	2	91,825
Convert seven temporary help positions to permanent positions in various work units .....	-	-

#### a. Service to Members and Employers

##### Program Objectives and Description

The objectives of the Teachers' Retirement Program are as follows:

1. To provide a financially sound plan for the funding of all approved benefits.
2. To provide adequate benefits on a timely basis for members of the State Teachers' Retirement System and their beneficiaries.
3. To develop and maintain a system, structured to aid in the maintenance of a qualified body of career teachers in the California public schools who intend to retire from the system.
4. To develop and maintain a comprehensive information program that will fully inform members, retirants, beneficiaries, the Administration, the Legislature and employers about the plan and meet Federal standards.
5. Provide progressive leadership, management, program development and support to insure that the other objectives are reached at the lowest possible cost at the approved level of service.

Historically, the system had operated on a pay-as-you-go basis. Chapter 1304, Statutes of 1971, for the first time placed the system on a reserve funding program. Currently all teachers, regardless of age or sex, contribute a uniform percentage (8 percent) of compensation to the fund. The local school districts contribute 8.307 percent of payroll to pay for the employers' share of the cost of current retirement service credit and funding for a special post-retirement increase provided by Chapter 1036, Statutes of 1979. The State is currently contributing 144.3 million dollars annually in direct payment to the system. In Fiscal Year 1980-81 this will increase to \$171,616,000 million and will change annually in accordance with the provisions of Chapter 282, Statutes of 1974. This contribution is reflected in the budget "Contributions to Teachers' Retirement Fund" which is located in the Education section.

The actuarial valuation of the Teachers' Retirement System as of June 30, 1977, determined that a normal cost rate needed to fund current benefits is 17.13 percent of payroll. This rate is greater than the current employee/employer contribution rate. This valuation also determined that an infinite funding rate of 21.26 percent of payroll is required to fund the normal costs plus interest on the unfunded obligation. Under the infinite funding approach, the unfunded obligation would continue to grow, but only at the same rate as the growth of the covered payroll. That valuation also determined that 24.69 percent of payroll was required at June 30, 1977, to fund the unfunded obligation in 40 years—the standard imposed on private industry by the Employee Retirement Income Security Act (ERISA). As of June 30, 1978, the projected unfunded obligation was \$9.3 billion.

The system is responsible for the determination and computation of benefits to members and beneficiaries, and for the distribution of information to all members, employers and other interested groups. Generally, payment of an estimated service retirement allowance is made 45 days after date of retirement or receipt of application, whichever is later. Every effort is made to pay refunds 45 days following receipt of application. Family and death benefits are paid within 75 days after report of death. Disability benefits are paid approximately 45 days after proof of disability is established.

The 1980-81 fiscal year reflects a decrease of 11.5 positions which terminate June 30, 1980. This decrease reflects the planned phase down of the verification project workload and the biennial actuarial valuation and experience analysis workload. In the Division of Records and Statistics, Member Services and Management Services, 11 temporary help positions are proposed for conversion to 11 permanent positions for the 1980-81 fiscal year. The workload supports this conversion of temporary help to permanent. The increased workload projected for disability benefits requires three additional positions. An additional position is provided for the increasing workload in the claims refund activity. A position is provided for 1980-81 only, in order to process the increased work estimated for the current retirement verification program. It is estimated that the continued qualification work will require four positions until June 30, 1981. In order to audit the records and data in the county school offices two permanent field audit positions are included in the 1980-81 budget. The new tax sheltered annuity plan for members will require two additional positions.

## DEPARTMENT OF VETERANS AFFAIRS

The Department of Veterans Affairs has a threefold overall objective: (1) provide comprehensive assistance to veterans and dependents of veterans in obtaining benefits and rights to which they may be entitled under State and federal laws; (2) afford California veterans the opportunity of becoming homeowners through the medium of long-term low-interest loans available to them under the Cal-Vet farm and home loan program; and (3) provide support for the Veterans Home of California where eligible veterans may live in a retirement community and where complete nursing care and hospitalization are provided.

## SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Farm and Home Loans to Veterans .....	\$569,826,829	\$853,930,458	\$875,238,714

III. Implement financial management information system .....		3.5	366,545
III. Add funding to establish an employee health care program .....		-	131,236
III. Increase funding for preventive and special maintenance.....		-	138,592
IV. Add staff position for California Veterans Board .....		1	30,686

## I. FARM AND HOME LOANS TO VETERANS

## Program Objectives and Description

Since 1921, the Cal-Vet loan program has successfully served the needs of over 310,000 World War I, World War II, Korean, and Vietnam veterans for long-term housing and farm loans at low interest rates. Veterans bonds voted on and approved by the people have been sold at intervals to provide funding for the program.

California veterans, except those who were wounded or are disabled from war service or were prisoners of war, have 25 years following their release from active military service to qualify and apply for loan benefits. This 25 year limitation was suspended by Ch. 89/78 until December 1980 by action of the Legislature. Then, lending will again be directed to the Korean and Vietnam veterans. Maximum home loans are \$55,000. Maximum loans for farms are \$180,000.

Veteran purchasers are charged interest on their loans at the lowest rate which will cover all costs of the program. The interest rates charged have provided for redemption of the bonds, debt service, and all program administrative charges, without any cost to the California taxpayer.

Legislation was enacted in 1979 to (1) increase the \$120,000 maximum farm loan to \$180,000; (2) authorize deferment of the principal amount of the loan payment for up to five years. Continuing program requirements are reduced by an increase of 0.2 positions in salary savings and a decrease of 0.1 is a technical administrative adjustment.

An additional 8.5 positions are added to staff the Financial Management Information System Project that was started in 1978-79 and continued into 1979-80. An additional 0.5 positions is allocated from an increase in General Administration.

\* These figures represent the total number of accounts showing a delinquent balance for any three-month period during entire fiscal year and for which a "Notice of Intent to Cancel Contract" is issued.

† These figures represent the number of properties actually repossessed or estimated to be repossessed during the fiscal year.

## DEPARTMENT OF VETERANS AFFAIRS—Continued

## a. Property Acquisition

This element encompasses the collection and evaluation of data regarding the applicant and his property selection. Loan decisions must protect the interest of both the veteran and the Cal-Vet loan program.

The military service documents of veterans, the records of veterans' widows, wives of prisoners of war, or persons missing in action, are inspected to determine the applicant's qualifications for a loan under the statute. This examination is integrated into the application process.

Output	1978-79	1979-80	1980-81
Number of applications .....	15,433	19,000	19,000
Number of appraisals .....	13,500	15,500	15,500

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (Veterans Farm and Home Building Fund of 1943) .....	88.8	110.6	113.8	\$347,773,781	\$604,286,105	\$604,137,966

## b. Loan Service

Four interrelated task efforts combine to assure fulfillment of the obligations of the contracting parties: mortgage loan accounting, insurance and property damage claims adjustment and services, loan contract alterations, and contract performance services.

Mortgage loan accounting consists of routine billing, cashing, account computation, and recording of each borrower's payments.

Insurance services consist of determination and application of minimum coverages required for fire and hazard insurance and adjustment of disaster indemnity claims. When damage occurs, rapid repair and restoration of the contract property is arranged to assure satisfaction of the borrower and to protect the Department's interest.

The contract enumerates certain contract alterations to which the Department may consent. Among these are assignment of contract interest, rental, permission for secondary financing, change in legal description of property, and installment changes.

Contract performance services are those functions which logically occur in the course of the contract. Loans are paid in full by installments or are prepaid in advance. On fulfillment of the contract, the property is deeded and the account record is closed. During the life of the contract certain breaches of terms or conditions may occur. There is an element of risk in any loan and not all borrowers perform as agreed. Should a borrower become unwilling or unable to comply with the contract terms, it may be necessary to cancel the contract and either force a sale of the property or to repossess it. Repossessed properties are rehabilitated and sold or rented, depending upon the housing market.

Output	1978-79	1979-80	1980-81
Number of delinquent accounts <sup>1</sup> .....	6,156	6,000	6,000
Number of properties repossessed <sup>2</sup> .....	5	5	5
Number of contracts in force .....	109,400	115,000	120,000

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (Veterans Farm and Home Building Fund of 1943) .....	117.6	135.3	140.8	\$54,265,962	\$59,727,162	\$64,866,272

## c. Loan Funding

Funds for Cal-Vet loans are derived from the sale of bonds authorized by the Legislature and approved by the electorate. Activities related to loan funding include sale, payment of interest, and redemption of Veterans Bonds. They are performed by the Veterans Finance Committee and the State Treasurer's Office in accordance with statutory provisions. All costs of such services are paid by the program. Proceeds from bond sales accrue to the Farm and Home Building Fund. These funds, together with prepayment of outstanding loans, are invested until required for authorized purposes. The differential between the interest earned on outstanding Cal-Vet loans and the average net interest cost on all outstanding bonds provides the total operating costs of the program. Work involved is in projecting the program's financial status at points in time to enable economic fund management to meet four annual bond redemption payments and to schedule one or more bond sales annually at the most favorable interest rates.

Output	1978-79	1979-80	1980-81
Bond sales .....	3	3	3
Debt service payments .....	4	4	4
Bond funds produced .....	\$350,000,000	\$450,000,000	\$450,000,000

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

DEPARTMENT OF VETERANS AFFAIRS—*Continued*

## II. VETERANS CLAIMS AND RIGHTS

## Program Objectives and Description

Over three million veterans now live in California; 800,000 of these are Vietnam war veterans. Federal and State laws relative to the well-being of veterans and their dependents are varied and complex and many new laws are enacted each year. The primary objectives of this program are to provide information to veterans and their dependents concerning the availability of these benefits and to assist eligible individuals in obtaining the benefits.

Types of benefits include hospital and out-patient medical and dental care, wheelchair homes, prosthetic devices, compensation, pensions, insurance, educational assistance, burial benefits, employment preference, and others.

An additional 1.3 positions are a restoration of the Section 27.2 reductions, 1979 Budget Act.

## Authority

Military and Veterans Code, Sections 699.5, 970-973; and California State civil service laws and rules, Article 4, paragraphs 18971-18976.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

d. Educational assistance .....	4.9	4.6	4.7	1,322,524	1,418,370	1,454,009

## a. Claims Representation

Veterans seeking benefits from the Federal Veterans Administration file claims with the Veterans Administration Regional Offices in San Francisco, Los Angeles, and San Diego. Claims representatives from the department appear before the Veterans Administration Rating Boards on behalf of veterans and review Veterans Administration decisions on claims to insure that maximum benefits are obtained. The claims involve initial ratings of service-connected disabilities, increases in existing disabilities, pensions, burial expenses, and the full range of other federal benefits.

The number of veterans returning to civilian life is still increasing. Increased workload is also attributable to the increasing age of World War II veterans, whose needs for medical care and pensions are increasing.

Output	1978-79	1979-80	1980-81

Expenditures (General Fund) .....	34.3	32.1	33.1	\$734,053	\$812,837	\$843,395

## b. Employment Preference

Honorably discharged veterans meeting length of service requirements and widows of eligible veterans receive a 10-point preference on State civil service examinations. Veterans with a service-connected disability receive a 15-point preference. The Department processes applications for veterans' preference, verifies eligibility, and certifies eligible veterans to the State Personnel Board.

Output				1978-79	1979-80	1980-81
Applications received.....				4,007	4,200	4,200

Expenditures.....	4.9	4.6	4.7	\$104,864	\$116,120	\$120,759

DEPARTMENT OF VETERANS AFFAIRS—*Continued*

## c. County Subvention

Fifty-three counties have established Veteran Service Offices to assist veterans and their dependents at the local level. This element includes reimbursement to the counties of a portion of the cost of operating Veteran Service Offices. These local offices provide information and assistance to veterans and dependents which they would be otherwise unable to obtain.

Many welfare applicants who are veterans or are veteran related are not aware of State or federal benefits to which they may be entitled. A system has been developed whereby welfare applicants identified as veterans or related to veterans are referred to County Veteran Service Offices for determination of veteran benefit eligibility. This program, developed jointly with the Department of Social Services, is designed to obtain federal benefits for veterans in lieu of additional State welfare benefits.

Output	1978-79	1979-80	1980-81
Counties under contract .....	53	53	53
Welfare referrals .....	43,475	45,000	45,000
Claims opened .....	25,559	25,000	25,000

Expenditures .....	4.9	4.6	4.7	\$1,104,864	\$956,120	\$960,759
Support .....	4.9	4.6	4.7	104,864	116,120	120,759
Local assistance .....	—	—	—	1,000,000	840,000	840,000

## d. Educational Assistance

Dependents of veterans killed or totally disabled as a result of active military service are eligible for counseling and financial assistance. Children of servicemen currently prisoners of war or missing in action are also eligible. Full-time college students receive \$50 per month and high school students receive \$20 per month. Above high school level, additional payments are made for tuition and fees. Assistance is also provided to veterans and dependents seeking federal educational benefits.

The Department accepts only those applicants who are most urgently in need of further education, taking into account both scholastic achievement and financial needs.

The increased number of dependents resulting from Vietnam casualties is balanced by a decline in enrollments stemming from World War II and the Korean conflict, keeping enrollment in the dependents' program fairly constant.

Output	1978-79	1979-80	1980-81
Dependents' applications approved .....	716	800	700
Dependents' enrollment reports processed .....	7,714	7,500	7,000

Payments to dependents .....	—	—	—	1,217,660	1,302,250	1,333,250

## III. CARE OF SICK AND DISABLED VETERANS

## Program Objectives and Description

The Veterans Home maintains an 844-bed medical and nursing facility (including 66 acute and intensive care beds, 249 skilled nursing beds, and 529 intermediate care nursing beds) and domiciliary structures with a bed capacity of 1,489. It is one of the largest geriatric facilities in the country and has full support facilities, including consultation services of medical experts and of a number of Veterans Administration hospitals in northern California.

The purpose of the Veterans Home has been defined as, "... to provide a community of services for disabled California veterans that will improve overall health, reduce the incidence and severity of disabilities, and increase social interaction in an environment which promotes self-reliance and self-worth. . . ." The hospital and nursing units are licensed by the State Department of Health under Title 22, California Administrative Code, and are accredited by the Joint Commission on Accreditation of Hospitals.

The programs and services for residents of the Veterans Home are developed in cooperation with the Veterans Administration, other state agencies, local government, private organizations, and educational facilities.

*Continuing program requirements are reduced by the termination of three positions financed from PWEA Title II funds which were allocated from General Administration, seven limited term activity leader positions and an administrative adjustment increase of 4 positions in salary savings. An additional 4.7 positions are a restoration of Section 27.2 reductions, 1979 Budget Act, and an additional 0.1 positions is a technical administrative adjustment.*

*An additional 3.5 positions are added to staff the Financial Management Information System Project that was started in 1979-80.*

*In order to meet the health care needs of the home, licensure, certification, and U.S. Veterans Administration requirements, 15 positions have been added.*

*To establish an employee health program, \$131,236 is provided in fiscal year 1980-81 and \$138,592 for preventive and special maintenance.*

DEPARTMENT OF VETERANS AFFAIRS—*Continued***Veterans Home Post Fund**

The Veterans Home Post Fund, authorized by Section 1047, Military and Veterans Code, provides for the operation of the Veterans Home Exchange, motion picture theater, library, and other recreational and entertainment facilities for the benefit of the Veterans Home and its resident members. Primary sources of income are derived from interest on investments and from estates of deceased resident members. Expenditures in excess of current income are funded from prior years' income surplus.

b. Medical care and services.....	586.7	659.4	665	13,778,951	17,032,910	17,727,019
c. Social and vocational services.....	34	38.2	38.9	796,290	986,621	1,073,915

**a. Residential Care and Services**

Residential services at the Veterans Home are provided in six domiciliaries for male residents, one domiciliary building for women residents, and another building recently opened for women residents and quarters for four couples. Part of one of the male domiciliary buildings is used to provide State licensed residential care which requires a slightly higher level of supervision and care than that provided for domiciliary residents. An 840-seat main dining room currently provides food service for domiciliary and residential care members. The equivalent of out-patient medical care is provided at the medical treatment center by the ambulatory care service, and in-patient medical care is provided in the hospital and nursing units.

Output				1978-79	1979-80	1980-81
Average residential membership.....				610	635	635

<i>Reimbursements</i> .....				561,506	577,981	564,284

**b. Medical Care and Services**

Medical care and services are provided in a fully accredited hospital and nursing care unit. The complex includes medical wards, surgery, pharmacy, radiology, clinical laboratory, dental clinic, social services, and the service of professional consultants. For those specialties not available, resident members are temporarily transferred to one of the several Veterans Administration hospitals in northern California.

The Veterans Home, in addition to conducting its own in-service training programs for nursing personnel, also participates in providing clinical experience for students from local colleges who are studying to become psychiatric technicians, nurses, and licensed vocational nurses. Such participation provides an additional source of trained personnel from which vacancies can be filled.

**c. Social and Vocational Services**

Social and vocational services provide a wide range of activities to enhance social interaction, promote self-worth, and encourage more self-reliance. Activities include sheltered workshops, arts and craft areas, volunteer services, recreational activities, and a variety of planned work assignments to provide income and maintain active member participation in home and community affairs.

## IV. GENERAL ADMINISTRATION

## Program Objectives and Description

The general administration program provides for implementation of policies by the California Veterans Board and the director for all departmental operations. Fiscal, legal, personnel, and other administrative functions not specifically assigned to the basic programs are included under this program to provide specialized staff services to management. Included in 1978-79 and continued for 1979-80 are three positions financed from PWEA Title II funds for the development of a cost accounting system at the Veterans Home as part of an overall financial management information system. *Continuing program requirements are reduced by the termination of three positions financed from PWEA Title II funds. An additional 0.8 position is a restoration of a Section 27.2, Budget Act of 1979 reduction. One additional position is provided to assist the California Veterans Board.*

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	28.5	30.6	28.4	\$732,672	\$945,877	\$900,445

# **BUSINESS AND TRANSPORTATION**

## DEPARTMENT OF ALCOHOLIC BEVERAGE CONTROL

The principal objective of the Department of Alcoholic Beverage Control is to administer the provisions of the Alcoholic Beverage Control Act, which vests in the department the exclusive right and power to license and regulate the manufacture, sale, purchase, possession and transportation of alcoholic beverages within the State, and subject to certain laws of the United States, to regulate the importation and exportation of alcoholic beverages into and from the State.

The workload is divided into the three elements: licensing, compliance, and administration.

#### a. Licensing

There are three objectives of the licensing function. One is to license only qualified persons who apply to sell, produce or distribute alcoholic beverages. The qualifications are set forth in the Constitution and statutes and are interpreted by regulations and policy statements. The second objective is to issue licenses at appropriate locations. The third objective is to allow legitimate community protests (by public agencies and/or private parties) against the issuance of a license to be heard by an administrative law judge. Based on the validity of the evidence presented, a license will be issued or denied.

Annual fees vary with the type of license and range from \$26.40 a year for an off-sale beer and wine license to \$638 a year for an on-sale general license. These fees are deposited in the Alcohol Beverage Control Fund, 90 percent of the annual fees collected in the various cities and counties being returned to local jurisdictions. There are also original fees for new licenses or transfer fees for moving from one location to another or for transferring from one entity to another. Original fees are placed in the State General Fund. General licenses are limited in number, one on-sale for each 2,000 inhabitants of a county and one off-sale for each 2,500 inhabitants.

#### Authority

Article XX, Section 22 of the California Constitution, and Division 9 of the Business and Professions Code.

<sup>1</sup> Includes 178 seasonal conversions (Statutes of 1978).

<sup>2</sup> Does not include duplicate licenses, temporary or daily licenses, caterers permits or licenses issued under Section 23824 for premises by State, city, etc.

DEPARTMENT OF ALCOHOLIC BEVERAGE CONTROL—*Continued*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	249.5	236.6	243.4	\$6,405,243	\$7,742,699	\$7,670,199

## b. Compliance

## Objectives and Description

The objective of the compliance element is to require adherence to the laws and regulations by persons licensed to sell, manufacture or otherwise deal in alcoholic beverages. The department focuses its attention on those violations which have an adverse effect on the community, such as serving obviously intoxicated patrons, minors, or those premises which foster or permit conditions of drug trafficking, prostitution, gambling, etc. Following original issuance or transfer of a license, other investigations are necessary to make certain that unqualified persons do not obtain control of the business through unreported changes in the ownership of licensed businesses.

Department investigations also involve the violation of business practices such as commercial bribery, illegal importation, tied-house restrictions, advertising limitations, and prohibitions against the giving of free goods in connection with sales of alcoholic beverages. Additional fees are assessed off-sale general wholesale and manufacturing licensees for support of these investigations by the Department. *To improve field communications and to provide for the safety of departmental investigators it is proposed to equip one vehicle per office with a mobile radio at a total cost of \$62,000.*

## Output

Following are actual and estimated compliance activities which constitute the workload of this element:

	Actual			Estimated	
	1976-77	1977-78	1978-79	1979-80	1980-81

Expenditures.....	124.5	95.6	98.3	\$3,697,429	\$3,217,055	\$3,247,544

## c. Administration

General administration of the Department's program is carried out through a line organization consisting of the director, chief deputy director, assistant directors and district administrators. A staff organization, principally located in Sacramento, performs administrative and legal duties for the Department. For administrative purposes, the State is divided into two divisions with assistant directors in charge. The State is further subdivided into eighteen districts with five districts maintaining branch offices. A district administrator directs the work of the Department in each district.

The administrative staff at headquarters is responsible for the final review of license transactions, issuance and annual renewal of licenses, maintaining the official files of the Department and for performing the major part of financial management, personnel, training, support services and business practices activities for the Department.

The legal staff advises the Director on legal matters, drafts legislation believed necessary to more effectively regulate the alcohol beverage industries, submits requests for departmental regulations, represents the Department at disciplinary hearings, represents the Department before legislative committees and answers inquiries from the public and from members of the Legislature.

Decisions of the Department concerning licensing or compliance matters may be appealed by means of a procedure that begins with an administrative hearing and which may be carried to the Alcoholic Beverage Control Appeals Board (a constitutionally separate body) and on through the appellate court system.

During Fiscal Year 1980-81, the Department will be automated for various manual licensing and fee accounting functions. This system will increase departmental efficiency, reduce staff, and provide management information. *As a result of a significant reduction in authorized positions the last several years the salary savings requirement has been reduced by \$197,000. To improve personnel allocation procedures and to evaluate appropriate levels of service, \$64,350 is proposed for a work measurement study.*

# ALCOHOLIC BEVERAGE CONTROL APPEALS BOARD

## Program Objectives and Description

The objective of the Alcoholic Beverage Control Appeals Board is to provide an inexpensive and expeditious remedy of appeal to people who are dissatisfied with a decision of the Department of Alcoholic Beverage Control ordering any penalty or issuing, denying, transferring, suspending or revoking any alcoholic beverage license. Following the filing of an appeal the receipt of the record on appeal and submission of written briefs, the Board hears oral argument on the appropriateness of the Department's decision. After this hearing, the Board prepares, publishes and distributes a formal written opinion on all cases. Parties seeking review of Appeals Board decisions must go to the Courts of Appeal by filing a Petition for Writ of Review (Business and Professions Code, Sections 23090-23090.7).

## Authority

Authority for the Alcoholic Beverage Control Appeals Board, which consists of three members appointed by the Governor, stems from Article XX, Section 22, of the California Constitution and Division 9, Business and Professions Code.

## ADMINISTRATIVE REVIEW

### Workload Factors

During the Fiscal Year 1978-79 the Department of Alcoholic Beverage Control received 20,741 applications for liquor licenses and conducted 5,334 investigations on complaints and referrals. As a result of enforcement and investigatory actions taken by the Department and other policing agencies, 2,253 accusations were filed. 657 administrative hearings were held. The Department issued 496 decisions from which 119 appeals were filed with the Alcoholic Beverage Control Appeals Board. Of the 174 decisions (includes 70 cases remanded to Department due to reversal of Fair Trade Statutes) issued by the Appeals Board, judicial review was requested 35 times. Of these, only three Petitions for Writ of Review were granted by the Courts of Appeal.

## STATE BANKING DEPARTMENT

The State Banking Department is primarily concerned with protecting the public from economic loss resulting from bank and trust company failures. In addition to encouraging observance of sound banking practices, the Department regulates transmitters of money abroad and certifies securities for the State of California and municipalities and other government agencies within the State of California as legal investments. Also, the Superintendent of Banks functions as the administrator of local agency securities. The programs of the State Banking Department are supported by the State Banking Fund which is replenished annually by assessment of banks and issuers of money orders and travelers checks, trust companies, license and application fees, and charges for specific services. *As a result of the passage of the International Banking Act, which should be implemented during the first quarter of 1980 and the number of foreign agencies accepting public deposits, the department may be required to perform more detailed examinations of agencies.*

## SUMMARY OF PROGRAM REQUIREMENTS

Program	Description	Personnel years	Dollars
I.	Increase licensing and supervision of banks and trust companies .....	10.3	\$191,837
II.	Increase Administration—Legal .....	2	47,927

## I. LICENSING AND SUPERVISION OF BANKS AND TRUST COMPANIES

## Program Objectives and Description

To protect the public from widespread economic losses that often result from failure of banks and trust companies, without depriving the public of reasonably priced, convenient banking and trust services and to guard against the damaging ripple effect on the smaller financial institutions that is often associated with the failure of a bank or trust company.

## Authority

California Financial Code, Division 1, Chapters 3, 4, 12, 14, 16, 17, and 19 (Banking Laws).

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Licensing and Supervision of Banks and Trust Companies .....	132.8	135.3	144.6	\$4,227,015	\$5,015,375	\$5,341,489
Banking Fund .....				3,939,534	4,952,375	5,279,489

## Program Elements

a. Investigation of applications for new facilities .....	6.5	7.5	8	\$206,894	\$278,014	\$294,412
b. Continuing supervision of existing banking facilities .....	121.4	122.8	131.3	3,864,150	4,552,019	4,852,030
c. Continuing supervision of trust activities.....	4.9	5	5.3	155,971	185,342	195,047

## a. Investigation of Applications for New Facilities

Since the establishment of new banks, new trust companies, branches of existing banks, branches of foreign banks, trust departments of existing banks and title companies and other new facilities increases the potential risk of loss for the organization involved and therefore the public, the prior approval of the Superintendent of Banks is required. In each case, the application requesting the approval is investigated to determine whether statutory and administrative requirements are satisfied. The intensity of the investigation depends in large part on the degree of exposure to loss involved. The report and recommendations of an experienced bank examiner are analyzed by the executive staff prior to submission to the Superintendent of Banks. Other types of investigations generally are less detailed and therefore are less costly.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## STATE BANKING DEPARTMENT—Continued

## b. Continuing Supervision of Existing Banking Facilities

Periodic examinations of all banking institutions are necessary to protect depositors and assure the maintenance of a sound banking system. Each bank under State jurisdiction is required by statute to be examined at least once every two years; with problem institutions subject to more frequent examination. The Department overseer program utilizes examination results as well as additional data derived from ongoing monitoring of the banks to achieve early solutions to problems that might escalate if left unattended. An expanded electronic data processing and statistical analysis capability has been implemented in support of both the overseer and examination functions. Unsafe practices or statutory violations are brought to the attention of the bank for corrective action and assets of questionable value are written down or charged off from the assets of the bank.

An important part of the supervisory function is the investigation of complaints received from the general public and cooperation with law enforcement agencies in connection with crimes affecting banks. Confidential investigations are a necessary part of this supervision.

*It is proposed to add 8.3 examiner and 2 clerical support positions to meet increased examination workload.*

Expenditures .....	121.4	122.8	131.3	\$3,864,150	\$4,552,019	\$4,852,030

## c. Continuing Supervision of Trust Facilities

Annual examinations of trust companies and trust departments of banks and title insurance companies form the basis of supervision of the trust business. Trust examining is highly specialized and includes verification of trust assets, the reconciliation of accounts, a review of the legal aspects of transactions, a study of the administration of trust accounts, and an evaluation of the ability and capacity of the senior trust officers. Reports are rendered to the trust company or trust department with recommendations for corrective action.

## II. PAYMENT INSTRUMENTS

## Program Objectives and Description

To protect the public from economic loss resulting from the failure of a Company engaging in the business of selling money orders and travelers checks either for domestic use or for purposes of transmitting money abroad. Periodic reports and examinations are utilized to ensure that these businesses are conducted in a financially sound manner.

## Authority

California Financial Code, Division 1, Chapter 15 (Banking Law).

## STATE BANKING DEPARTMENT—Continued

## III. CERTIFICATION OF SECURITIES

## Program Objectives and Description

Due to recent changes in legislation, the Department now only issues certificates of eligibility for obligations of the State of California and its political subdivisions. The program also includes determination of the legality of bank investments and overseeing the pledging of securities for faithful performance of fiduciary and other activities of banks and foreign agencies.

## Authority

California Financial Code, Division 1, Chapter 11 (Banking Law).

## IV. ADMINISTRATION OF LOCAL AGENCY SECURITY

## Program Objectives and Description

The Superintendent of Banks is designated as administrator of local agency security, who, utilizing a pool concept acts as an agent for approximately sixteen hundred local treasurers in verifying the amount and quality of collateral pledged to secure deposits of public funds made by local agencies. The Superintendent also has the responsibility of administering local agency security for savings and loans.

## Authority

California Government Code, Title 5, Division 2, Part 1, Chapter 4, Article 2.

## V. SUPERVISION OF CALIFORNIA BUSINESS AND INDUSTRIAL DEVELOPMENT CORPORATIONS

## Program Objectives and Description

Certain Federal agencies, most notably, the Small Business Administration's Section 7A Loan Guarantee Program, requires a lender to be a "Licensed and regulated financial institution", to qualify for guarantees. The statute authorizes the Department to regulate non fiduciary BIDCO's to accomplish the goal of enabling better utilization of Federal guarantee programs in California.

## Authority

Corporations Code, Division 3 of Title 1, Part 6.

STATE BANKING DEPARTMENT—*Continued*

## VI. TERM LOAN PROGRAM

## Program Objectives and Description

The California Term Loan Program was designed to increase the volume of bank loans to small businesses in an effort to create new jobs. Due to a variety of funding problems the program has not been implemented.

## Authority

California Financial Code, Division 1, Chapter 22, Section 3800.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## Program Elements

a. Executive and administrative services .....	9.5	10	10	\$190,570	\$253,130	\$265,000
b. Legal and legislative services .....	11.3	12	14	247,121	295,000	352,927
c. Research and information services .....	6.5	8.5	10	152,497	183,150	224,000

## a. Executive and Administrative Services

The cost of administrative services is reflected in this category. It includes support for the executive staff, staff personnel, and fiscal and clerical services.

## b. Legal and Legislative Services

Proposed legislation, both at the State and federal level, on matters affecting the functions of the State Banking Department and financial institutions are analyzed to assist the Superintendent and the Governor in making recommendations to legislative bodies. The drafting of proposed legislation, regulations, interpretive communications, and legal support for line personnel, supported by legal research, is conducted to respond to changing circumstances and public need. *It is proposed to add two legal counsel positions to assist with the heavy legal workload.*

## c. Information Services

This element includes preparation and publication of the weekly bulletin and the annual report and the development of statistics and information regarding banking for dissemination to licensees and for the internal use of the State Banking Department. Additionally the department has recently begun implementing an Automated Linesheet Program (ALP) to independently access computer records of automated banks. ALP will automate the selection and formatting of linesheets containing information essential for the loan analysis performed during bank examinations. The department currently has three programmer-trained examiners who are developing these programs. The department is also undertaking a project to centralize a statistical bank analysis function. The function will support the examination function and will be a useful tool in determining whether a reduced scope examination can be performed on a given bank. The department currently plans to fully implement the above two functions in this fiscal year, and in support, will transfer, as necessary, examiners into the information services division.

## DEPARTMENT OF CORPORATIONS

### Program Objectives

The principal objectives of the Department of Corporations are:

To provide, through the Investment Program, appropriate controls over the solicitation, marketing and sale of securities and franchises to California residents; to install and maintain adequate deterrents and safeguards against unfair or unscrupulous promotional schemes; to take suitable enforcement action when dishonest and questionable practices occur in such sales.

To fulfill, through the Lender-Fiduciary Program, statutory demands to provide regulatory surveillance over companies engaged in the business of lending money or receiving funds from the public in a fiduciary capacity.

To fulfill, through the Health Care Service Plan Program, statutory requirements to provide regulatory surveillance over companies engaged in the business of providing health care to plan enrollees.

To provide, through the Administration Program, service functions essential to the operation of the department and to furnish leadership and guidance to the staff and general public concerning matters under the jurisdiction of the Department of Corporations.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Investment Program .....	\$4,291,677	\$5,548,669	\$5,769,064

III	Additional health care personnel .....	2	57,077
III	Additional General Fund appropriation in lieu of reimbursements .....	0	210,300

### I. INVESTMENT PROGRAM

Securities worth billions of dollars are sold and issued to residents of the State of California annually. The Corporate Securities Law requires that the commissioner find that the sale of securities is not unfair, unjust or inequitable. As an adjunct, full disclosure of relevant financial and legal information is generally considered essential in public offerings in order that all investors, especially those who are less sophisticated, may be apprised of the risks inherent in investments of this type. The Franchise Investment Law requires the franchisor to give full disclosure to the would-be purchaser.

Over 30,000 broker-dealers, agents, and investment advisors are authorized to recommend securities transactions to, and to deal in securities with, the general public. This department is the agency through which the public may address and pursue its grievances against those whom it feels have made improper sales and issuance of securities, or have otherwise violated the corporate securities law. *Three additional legal counsels and an office assistant are proposed to review an increasing number of applications for qualification under the corporate securities law and the franchise investment law. A legal counsel and a stenographer are proposed to restore the staffing at the San Diego office to its previously authorized level.*

## DEPARTMENT OF CORPORATIONS—Continued

## a. Qualifications

The sale and issuance of nonexempt securities in the State of California must be qualified pursuant to the Corporate Securities Law through the filing of an application, including current financial statements and other relevant exhibits.

Specific conditions may be imposed on the qualification if it is found that otherwise the sale of securities could be unfair, unjust and inequitable. Qualification can be by coordination, notification or permit.

Output	1978-79	1979-80	1980-81
Permit .....	4,484	4,700	4,700
Coordination .....	1,485	1,500	1,600

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	74.1	77.6	81.8	\$1,875,382	\$2,438,240	\$2,524,768

## b. Franchises

No franchise may be offered or sold in the State of California unless the offer has been registered or exempted from registration. In order to register, an application must be filed disclosing certain relevant information. Under certain circumstances defined in the Franchise Investment Law, the commissioner may summarily issue a stop order denying the effectiveness of or suspending or revoking the effectiveness of any registration.

Output	1978-79	1979-80	1980-81
Franchise registration .....	270	300	300

Expenditures .....	8.3	8.9	10.6	\$228,192	\$294,870	\$346,507

## c. Regulation and Enforcement

Prospective broker-dealers, and investment advisers must file applications for certificates to operate in California. A review of the pertinent documents containing information concerning the applicant's background, business experience, reputation and financial condition enables a knowledgeable decision to be made as to whether or not the certificate should be issued.

Complaints filed by the general public, as well as possible and potential infractions of the Corporate Securities and Franchise Investment Laws noted by the staff or members of other regulatory agencies are thoroughly investigated. As a result of the department's findings, one of the following steps is taken: no further action may be deemed necessary; punitive action including suspension or revocation of a certificate, license, or permit may be taken; and/or criminal proceedings may be instituted by other enforcement agencies. *Effective January 1, 1980, as a result of AB 1321 (Ch. 665, Stats. 1979) the licensing of security agents has been discontinued and, in certain situations, broker-dealers registered under the Securities Exchange Act of 1934 who are members of the New York, American or Pacific Stock Exchanges or the National Association of Securities Dealers may be licensed by notification.*

Output	1978-79	1979-80	1980-81

## DEPARTMENT OF CORPORATIONS—Continued

## d. Commodities

The California Commodity Law requires that certain commodity exchanges, commodity option issuers, floor brokers, commodity advisers, and commodity solicitors be licensed to operate in California. *Effective January 1, 1980, as a result of AB 373 (Ch. 452, Stats. 1979) the California commodity law has been repealed.*

## II. LENDER-FIDUCIARY PROGRAM

## Program Objectives and Description

Check sellers and cashers, credit unions, escrow agents, industrial loan companies, personal property brokers, small loan companies, and trading stamp companies render services to California residents, providing them with assistance in financial and fiduciary matters. Over 4,000 licensees serve Californians in this manner under the several laws covered by this program.

Many individuals dealing with these entities are persons whose financial situation is such that they can least afford to suffer losses. In regulating these classes of licensees, it is desirable to correct mismanagement and misrepresentation and to minimize the possibilities and probabilities of manipulative, deceptive, or other fraudulent schemes.

Periodic regulatory examinations of the books and records of licensees are conducted for the purpose of discovering and correcting errors of interpretation and procedure; determining and evaluating the financial condition of certain licensees; and detecting breaches of financial trust and other violations of the various laws and regulations.

Complaints filed by the public and potential violations of the law under this program are thoroughly investigated. If warranted by the department's findings, punitive action including suspension or revocation of a license or permit may be taken; and/or the matter may be referred for criminal and/or civil proceedings. *Three auditors and an office assistant are proposed to review and investigate the increasing number of consumer complaints filed against the various types of lender-fiduciary licensee. An examiner is also proposed to review and process an increasing number of applications filed for licensure, and two positions are proposed to increase the departments EDP auditing capabilities.*

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Lender-Fiduciary Program .....	103.3	104.2	111.8	\$2,834,090	\$3,468,979	\$3,739,157

f. Trading Stamp Law .....	0.1	0.1	0.1	749	1,951	2,061

## a. Check Sellers and Cashers Law

Check sellers and cashers' major functions are to sell money orders and to accept money to be transmitted to others in payment of utility bills. Such services are utilized primarily by those unable or unwilling, for financial reasons, to maintain a checking account at a bank.

Proraters receive money from their debtor-clients and distribute it, according to a predetermined plan, to the creditors of the debtor-clients. Those individuals who find themselves seriously financially overextended may engage a prorater in an attempt to rectify their situation.

## DEPARTMENT OF CORPORATIONS—Continued

## b. Credit Union Law

Credit unions are cooperative organizations composed of people sharing a common bond of association who save their money together and make loans to each other from the accumulated funds at legal rates of interest. State-chartered credit unions provide services to approximately 1,700,000 members.

## Authority

Expenditures .....	35.4	43	44.1	\$962,253	\$1,468,574	\$1,545,159

## c. Escrow Law

Escrow agents act as disinterested third parties to a transaction between two parties generally involving real property. They maintain possession of documents and money to be transferred in such a transaction until it is consummated or cancelled. All money received must be segregated and deposited into a trust fund; disbursements from this fund may be made only upon written instructions of the parties to the escrow.

## Authority

Financial Code: Section 17000 et seq.; California Administrative Code, Title 10: Sections 1700–1753.

## Output

	1978-79	1979-80	1980-81

Expenditures .....	21.7	26.1	28.1	\$589,511	\$878,934	\$947,932

## d. Industrial Loan Law

Industrial loan companies make loans to individuals and other entities, normally taking as security real or personal property; they may also lend on an unsecured basis. A portion of their financing is normally derived from the public through the sale of thrift certificates.

The Industrial Loan Law imposes restrictions on the type of receivables that may be contained in the portfolio of such companies; this necessitates a diversification of risk among borrowers and among types of collateral. *In the current year the examination cycle for industrial loan company branch offices was extended from 24 to 48 months.*

## Authority

Financial Code: Section 18000 et seq.; California Administrative Code, Title 10: Sections 1100–1299.

## DEPARTMENT OF CORPORATIONS—Continued

## e. Personal Property Brokers Law and California Small Loan Law

Personal property brokers and small loan companies are commonly referred to as finance companies. These companies lend money to members of the public with personal property such as automobiles and household goods as collateral, at a rate of charge not exceeding that set forth in the law.

The Personal Property Brokers Law and California Small Loan Law require full disclosure of the terms of the loan to the borrower including: the date of the loan; the amount and maturity of the loan contract; how and when repayable; the nature of the security for the loan; and the agreed rate of charge. *In the current year field examinations of personal property brokers have been discontinued.*

## III. HEALTH CARE SERVICE PLAN PROGRAM

## Program Objectives and Description

With the enactment of Chapter 941, Statutes of 1975, the regulatory responsibility for health care service plans was transferred to the Commissioner of Corporations from the Attorney General. The scope of the regulatory function has been significantly expanded to insure the delivery of medical and health care services to the people of the State of California who subscribe for services rendered by a health care service plan. This program is supported entirely by reimbursements and revenues collected pursuant to Chapter 941, Statutes of 1975. *A total of five positions are proposed to perform audits of prepaid health plan cost and utilization reports. All costs incurred by the department in the performance of these audits will be reimbursed by the Department of Health Services. Also two positions are proposed to process new license applications, regulate previously licensed plans, and administer the charitable trust statutes as they relate to Health Care Services Plans. An increased General Fund appropriation is requested to replace \$210,300 of reimbursements lost as a result of AB 1128 (Ch. 1061, Stats. 1979).*

## Authority

Health & Safety Code, Sections 1340–1399.64 inclusive.

## DEPARTMENT OF CORPORATIONS—Continued

## a. Licensing

The Commissioner has the responsibility of licensing Health Care Service Plans, solicitor firms and solicitors. The applicants must file license applications which include information concerning the applicants' background, experience, method of proposed operation, financial statements, and other pertinent documents which will enable the commissioner to make a knowledgeable decision on whether or not the license should be issued. *Effective January 1, 1980 the licensing of solicitors and solicitor firms has been discontinued based on Ch. 1083, Statutes of 1979.*

## Output

	1978-79	1979-80	1980-81
License Issued:			
Health Care Service Plans.....	35	24	20
Solicitors firms.....	106	179	-
Solicitor.....	535	336	-
Material modification filed.....	9	120	120
Plan contracts reviewed.....	587	720	590

Expenditures.....	16.4	13.7	15	\$440,318	\$443,337	\$496,576

## b. Financial and Administrative Examinations

Each plan shall have the organizational and administrative capacity to provide marketed health care services to enrollees. The commissioner must determine that each plan is financially stable and that medical decisions are made unhindered by fiscal and management constraints. This element will monitor the plans' financial solvency through periodic examinations and review of required financial and statistical reports.

Output	1978-79	1979-80	1980-81
Plan examinations.....	27	48	30
Financial reports analyzed.....	248	647	464

## c. Medical Survey

The commissioner is required to conduct onsite medical surveys of the health delivery system of each plan at least once every five years. Surveys conducted by this element will review internal procedures for assuring quality of care, and the overall performance of the plan in providing health care benefits and meeting the health needs of the subscribers and enrollees.

Output	1978-79	1979-80	1980-81
Plans surveyed.....	20	20	12
Resurveys.....	1	20	12

## IV. LEGISLATIVE MANDATES

Section 2231(a) of the Revenue and Taxation Code requires the state to pay local government units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Department of Corporations there is one legislative mandate. Chapter 941/75 Knox-Keene Health Care Service Plan Act of 1975.

Program Requirements	1978-79	1979-80	1980-81
Continuing Program Requirements (General Fund).....	-\$4,009	\$3,780	\$3,780

DEPARTMENT OF CORPORATIONS—*Continued*

## V. ADMINISTRATION

Central leadership is provided by the Commissioner of Corporations, as the chief executive of the Department. The Commissioner of Corporations provides direction, determines operating policy and suggests needed legislation or amendments to current laws and regulations for the improved protection of the residents of California.

The Administrative Services Division is charged with preparing the budget and supportive materials, negotiating leases and contracts, maintaining financial records, and providing central personnel services.

## DEPARTMENT OF ECONOMIC AND BUSINESS DEVELOPMENT

The Department of Economic and Business Development was established in January 1978 to serve as the primary State agency for encouraging and assisting economic development and job creation efforts in California. Under the provisions of the "Holmdahl-Rains-Lockyer Economic Development Act of 1977", the Department carries out a wide range of activities designed to stimulate the State's economy. These activities include: (1) assisting business and industry in locating or expanding in California; (2) stimulating the export of California products; (3) encouraging the growth of the tourist and visitor industries; (4) providing assistance and advocacy services for small and minority business operations; (5) assisting local agencies in formulating economic development programs; and (6) assisting in the analysis of the impact of various programs and policies that affect the economy of the State.

The Department receives counsel and guidance in accomplishing the above responsibilities from a 21-member advisory council which is representative of the many socioeconomic groups comprising the California economy.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Office of Business and Industrial Development.....	\$242,428	\$357,466	\$371,922
II. Office of International Trade .....	213,980	333,835	359,685

### I. OFFICE OF BUSINESS AND INDUSTRIAL DEVELOPMENT

#### Program Objective and Description

The principal responsibility of the Office is to attract new business and industry to California and to assist and encourage businesses presently located within the State to grow and expand. Major activities of the Office of Business and Industrial Development include: (1) providing market services and economic data to assist businesses seeking to expand or establish new facilities; (2) identifying types of industries with greatest potential for growth; (3) identifying obstacles to business and industrial growth and recommending solutions; (4) developing a statewide strategy and promotional program for industry location based on regional needs and resources; (5) serving as a liaison between the business community and all levels of government; and (6) providing assistance to businesses in expediting necessary permits and approvals.

#### Authority

Part 6.7, Chapter 1, Article 3, Section 15333 of the Government Code.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

### II. OFFICE OF INTERNATIONAL TRADE

#### Program Objective and Description

The primary responsibility of the Office is to stimulate increases in the export of California products by making California manufacturers, processors and growers aware of the opportunities of, and assisting them in entering international business. Major activities of the Office of International Trade include: (1) bringing California producers into contact with foreign buyers; (2) assisting California manufacturers and growers with export procedures; (3) identifying obstacles to exporting and assisting in their removal; (4) conducting seminars to encourage California producers to export their products; (5) publishing a directory of prominent businesses and organizations in California's foreign trade, including a product and process guide; and (6) serving as a clearinghouse for inquiries from persons seeking information about international trade. *The budget year reflects the addition of 0.5 personnel years to meet increased clerical workload.*

## III. OFFICE OF VISITOR SERVICES

## Program Objective and Description

The major responsibility of the Office is to increase the number of tourists and visitors to California in order to expand job opportunities and generate additional revenue for the State and local governments. Principal activities of the Office of Visitor Services include: (1) conducting research on the number of visitors to California, expenditures by visitors, points of origin and destination, and other relevant information that will facilitate decision-making affecting the expansion of visitor services; (2) providing technical assistance and referrals to regional, county and city tourism development organizations and similar private organizations that are engaged in programs to attract visitors to California; (3) in conjunction with other public and private tourism organizations, developing programs to attract foreign and business travelers to California; (4) responding to inquiries from prospective visitors to California; and (5) sponsoring conferences to encourage the cooperative support of private industry for programs designed to enhance California's potential as a tourist attraction. *The budget year includes the addition of 1.5 permanent clerical positions to respond to travel inquiries, currently handled by temporary staff.*

## Authority

Part 6.7, Chapter 1, Article 3, Section 15334 of the Government Code.

## IV. OFFICE OF LOCAL ECONOMIC DEVELOPMENT

## Program Objective and Description

The principal responsibility of the Office is to stimulate economic development as an ongoing function of local government and to stimulate permanent jobs in the private sector through a system of grants and loans. Major activities of the Office of Local Economic Development include: (1) providing technical assistance to local government to help assess local economic needs, develop strategies and implement economic plans; and (2) administering a grant and loan program sponsored by the Economic Development Administration (EDA) to help restore the economic health of areas burdened with high unemployment and low family incomes through the development of facilities and needed infrastructure to attract new industry and encourage business expansion. *The 1980-81 budget reflects the termination of PWEA Title II funding. The budget year includes an increase of 4 positions to continue the 304 grant and loan program. The 1979-80 and 1980-81 budgets each include \$500,000 of Federal funding for economic development strategy and implementation activities within the Century Freeway corridor and two administratively established positions to continue the grant and loan program. An additional \$1,075,000 is proposed for the grant and loan program in the budget year to provide for projects relating to the Century Freeway.*

## Authority

Part 6.7, Chapter 1, Article 3, Section 15332 of the Government Code.

## V. OFFICE OF SMALL BUSINESS DEVELOPMENT

## Program Objective and Description

The primary responsibility of the Office is to promote the economic development of small businesses by making available capital, management assistance and other resources, including loan services, personnel and business education to small business entrepreneurs. The Office assists in the creation of employment opportunities for the economically disadvantaged, youth and the handicapped through the establishment and expansion of small business and through the provision of financial assistance to small businesses, with priority to those of economically disadvantaged ownership or those seeking to locate in economically disadvantaged areas. Major activities include: (1) administering the State Loan Guarantee Program which permits banks and other financial institutions to make loans to businesses which are unable to obtain loans through traditional channels; (2) providing technical assistance and business advice to small business firms through the assistance of subcontractors; and (3) encouraging the development of new programs in the private sector to expand opportunities for minority-owned businesses. *The budget year reflects the addition of one position for a Deputy Executive Director pursuant to the provisions of AB 1656 (Chapter 875, Statutes of 1979).*

*The 1980-81 budget includes an augmentation of \$2,500,000 for the small business loan guarantee fund. A portion of this augmentation, \$1,200,000, is earmarked for loans in the Century Freeway corridor area. The remaining \$1,300,000 is added to increase loan reserves as required by AB 1656 (Chapter 875, Statutes of 1979).*

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## VI. OFFICE OF ECONOMIC PLANNING, POLICY AND RESEARCH DEVELOPMENT

## Program Objective and Description

The primary responsibility of the Office is to provide centralized planning, analysis, research, and other support activities that are necessary to achieve the overall economic roadmap for the department. Major activities include: (1) gathering, analyzing, interpreting, and publishing information on the economy; (2) preparing studies on the economic potential of various types of business, commercial, or industrial development in improving the economy of the State, the creation of job opportunities and the effect on resources and environment of the State; (3) advising the Governor and the Legislature on the economic impact of government policies and regulations; (4) providing technical assistance to other state agencies in the development of economic data; and (5) responding to inquiries from the public concerning California's economy. These activities will supplement the work of existing State agencies.

## Authority

Part 6.7, Chapter 1, Article 3, Section 15331 of the Government Code.

# DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT

## Program Objectives

To promote, provide and assist in the provision of affordable housing in suitable living environments for California residents.  
To seek solutions to California's housing and community development problems through research, recommendations for State policies and programs, technical and other assistance to Governmental entities, citizens, and private businesses.

## a. State Housing Law and Earthquake Protection Law

The State Housing Law and departmental regulations establish minimum standards for the design and construction, maintenance, use and occupancy of buildings used for human habitation. The Earthquake Protection Law and regulations establish minimum requirements for the design and construction of buildings to resist lateral forces such as earthquakes.

Both laws designate local authorities as the enforcement agencies. The Department is the enforcement agency in the event of nonenforcement by local authorities. Local jurisdictions may also contract with the Department for enforcement.

*Two positions have been added to this program to implement recent legislation strengthening the Department's role in the State Housing Law.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures	6.5	5.6	8	\$209,896	\$192,591	\$279,435

## b. Employee Housing Act

Current statutes require the establishment and enforcement of construction, maintenance, use, and occupancy standards for labor camps, labor supply camps, and employee housing.

The Department is the designated enforcement agency except where a city or county has assumed responsibility for enforcement. The Department is mandated to evaluate annually the performance of a local enforcement agency and to determine the qualifications of the local agency's inspection personnel.

Operators of labor camps are required to obtain annual permits to operate from the enforcement agency or receive a five-year permit or exemption. Prior to issuance of a permit to operate, labor camps are required to have preoccupancy inspection and to comply with maintenance, use, and occupancy requirements.

Output	1978-79	1979-80	1980-81
Registered camps under state jurisdiction	900	1,179	1,179
Occupancies under state jurisdiction	20,275	26,560	26,560

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures	16.6	21.7	21.4	\$449,709	\$715,338	\$734,401

## c. Mobilehome Parks and Accessory Structures

The Department has responsibility for administration and enforcement of the Mobilehome Parks Act, except where a city or county has assumed responsibility for enforcement. Uniform standards are necessary to permit moving mobilehomes and their accessory structures from one locality to another.

There are approximately 6,650 mobilehome parks in California and approximately 26% are under State jurisdiction. The Department provides statewide regulation and assistance to local jurisdictions, mobilehome owners, park owners, and monitors local enforcement activities to assure uniform interpretation and compliance with State law.

Output	1978-79	1979-80	1980-81
Parks under state jurisdiction	1,661	980	980
Spaces in parks under state jurisdiction	90,378	53,324	53,324

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures	68.2	40	40	\$1,925,361	\$1,320,624	\$1,371,544

## DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT—Continued

## d. Mobilehomes

Federal regulations have preempted the state requirements for construction of new mobilehomes. The state is the exclusive enforcement and inspection agency for the mobilehome industry. The state retains the responsibility for developing regulations regarding commercial coaches and recreational vehicles, as well as for discharging enforcement and inspection responsibilities.

*The functions of licensing and regulating mobilehome manufacturers, dealers and salespersons are to be transferred from the Department of Motor Vehicles. Twenty positions are added for this function.*

Output				1978-79	1979-80	1980-81
Number of units manufactured .....				96,564	124,567	124,567
Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	59.8	77	99.7	\$1,563,339	\$2,579,440	\$3,322,836

## e. Factory-Built Housing Law

The California Factory-Built Housing Law required the Department to regulate the design, manufacture, and inspection of factory-built housing units. Upon departmental approval an insignia is affixed which allows those units to be installed in any locality subject to local use, zoning and other site requirements.

Output				1978-79	1979-80	1980-81
Dwellings manufactured .....				2,746	5,025	5,025
Building components .....				73,450	134,413	134,413
Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	3.3	6.3	6.3	\$119,921	\$220,104	\$224,666

## f. Special Projects

Special project activities of the Department are varying and generally of limited duration; they include:

1. Membership in the National Conference of States on Building Codes and Standards.
2. Membership on the Coordinating Council consisting of state agencies concerned with building standards relating to all building occupancies.
3. State disaster response activities.
4. Participation in development of national standards with the National Fire Protection Association.
5. Participation in model code development through national and regional organizations.
6. Consultative assistance to the State Energy Commission.
7. Provide technical assistance and plan checking service to local government in the areas of Energy Conservation and Solar programs. *Six positions are proposed for this purpose to be reimbursed by the State Energy Commission.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	11.8	8.8	15.7	\$311,131	\$302,642	\$565,887

## II. COMMUNITY AFFAIRS PROGRAM

## Program Objectives and Description

To provide an opportunity for every citizen of California to obtain access to safe, sanitary, and affordable housing, with all the necessary amenities. The Division provides grants, deferred loans, conventional loans, technical assistance, and planning and review to support the legislative mandate of a decent home and suitable living environment for every Californian.

## DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT—Continued

## a. Housing Development and Technical Assistance

The Housing Development and Technical Assistance Element administers a variety of programs which include technical assistance, predevelopment loan funds and grant programs which respond to the housing needs of California households. Included are:

The California Indian Assistance project which uses resources available through federal and state government to meet the housing and community needs of California Indians. The project concentrates on rehabilitating existing housing and facilities, and encourages new construction through the formation and support of Indian Housing Authorities.

The Housing Assistance Payments project administers a statewide program which provides federal housing subsidies to developmentally disabled, mentally disordered or physically disabled adults. Subsidized assistance is also provided to a limited number of rural low-income families in northern California. This section also provides related technical assistance to local housing authorities and health agencies.

The predevelopment loan project finances the preliminary costs of selected housing developments in urban and rural areas. The solar loan fund provides hot water and space heating loans for damaged or destroyed housing units in disaster areas. This unit provides technical assistance to organizations involved with housing development.

Chapter 1043, Statutes of 1979, appropriates \$100,000,000 for two new programs and augmentation of a third. The legislation creates a Rental Housing Construction Program, with an appropriation of \$82,000,000, to alleviate the serious shortage of adequate rental units; and a Homeownership Assistance Program with an appropriation of \$7,500,000, which will assist renters to become homeowners and mobilehome residents to cooperatively own their own park. This legislation also expands the Housing Rehabilitation Deferred Payment Loan Program by an additional \$10,000,000. These loans or grants concentrate on the construction of new housing units or providing housing to persons via rental assistance. During the current fiscal year the department will be preparing regulations and proposals for these programs. Therefore, the majority of the funds will be spent during the budget year. 15 positions are requested to meet the workload requirements of the program. 3 additional positions are proposed to support the increased predevelopment loan, development loan and OPR-701 grant programs level of activity. An architect and a clerical position are proposed to review plans for structures or developments to assure the plans are energy efficient and climate responsive in design. Further, this proposal will serve as a direct link to other agencies and organizations interested in building for energy economy. One position is proposed for the Indian assistance program.

## b. Rehabilitation Loans, Grants and Assistance

The housing and rehabilitation training element administers the Deferred Payment Rehabilitation Loan Program; conducts rehabilitation training workshops and related training; administers the California Housing Advisory Service which provides grants to assist with self-help construction and rehabilitation, and the Low-Income Management Training Program which provides grants linked to increased housing production and rehabilitation.

Loans or grants foster the rehabilitation of existing housing units. This function is achieved by providing information to the occupant on how to rehabilitate their house in a safe and economical manner. Loans are also provided through local Agencies to fund rehabilitation projects.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	6.3	14.7	15.8	\$631,841	\$7,662,575	\$6,101,897

## c. The Farmworker Housing Development Services

This element administers and operates the Office of Migrant Services which provides decent, safe, and affordable housing and supportive services to migrant farmworkers and their families during the agricultural season.

The Farmworker Housing Grant Fund is combined with federal or other matching funds to provide permanent housing opportunities for California farmworkers. Technical assistance is provided to sponsors of farmworker housing.

The Farmers Home Administration (FmHA) Intern Program operates through an interagency agreement with the federal government and provides employment opportunities with local FmHA offices.

The Department of Labor/Rural America provides Comprehensive Employment and Training Administration (CETA) funds for a farmworker trainee work force to rehabilitate individual and rental housing projects.

\$500,000 is requested for the Office of Migrant Services to meet the current costs of building maintenance. The additional funds will enable the State to protect its investment and prolong the use of the facilities at the Migrant Centers. \$610,000 is proposed to supplement or replace conventional electric water heating systems with solar heaters. The Department will contract with local housing authorities to install the heaters in thirty migrant center laundries to conserve energy.

## DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT—Continued

Listed below are the activities and expenditures of the Office of Migrant Services.

## Maintenance and Management

	1978-79	1979-80	1980-81

## d. Planning, Review and Local Assistance

The Planning, Review and Local Assistance Element assists in the preparation and review of local plans and programs, particularly the housing components of general and coastal plans, neighborhood improvement programs and housing elements.

This Element provides reviews of documents submitted to the State Clearinghouse. Relocation plans and Environmental Impact Reports are also reviewed. The Element is responsible for the administration of the U. S. Department of Housing and Urban Development's Comprehensive Planning Assistance Grant Program (701), and the State's Surplus Land Program that inventories State surplus real estate to be used to develop affordable housing. The Federal Assistance Program Retrieval System (FAPRS) information is available by request.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	13.2	20.1	21.5	\$601,924	\$1,349,434	\$1,370,211
Support .....				601,924	1,349,434	1,370,211

## e. Housing Replacement, Relocation and Demonstration

Two offices, one in Los Angeles and the other in Oakland, administer and operate housing relocation and replacement programs in highway rescinded or proposed corridors. These offices also provide general assistance to local governments and housing organizations in housing development activities.

The California Remote Rural Demonstration provides technical assistance in order to provide expanded housing opportunities and community services in local communities that had previously lacked federal and state resources. A major emphasis of this program is to allow the development of a plan which can be replicated in other remote rural areas of the State. It also administers a FmHA planning grant to survey the housing and community services in the rural areas of the State.

A Federal Court consent decree requires the Department of Transportation and State CalTrans to fund relocation and rehabilitation or replacement of over 4,200 living units due to the construction of the Century Freeway. The decree and Chapter 1073, Statutes of 1979 requires the Department of Housing and Community Development to administer this project. Twenty-four positions are requested to implement and operate this housing replacement program in Los Angeles County and eleven incorporated cities. This program will be funded by the California Department of Transportation.

Five positions, funded by California Department of Transportation, are proposed to implement the surplus lands disposition/housing development program in the Route 2 Corridor of Los Angeles. This program will prevent the displacement of households in the rescinded freeway corridor. One architect is proposed to review plans for structures or developments in the Century Freeway corridor in order to assure energy efficiency and climate responsive design. This position will also serve as a direct link to other agencies and organizations, in the Los Angeles area, interested in building for energy economy. The Federally Funded Rural Demonstration project will be completed in the 1979-80 fiscal year.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	21.3	67.6	72.5	\$1,212,165	\$2,640,944	\$2,538,271

<b>TOTAL</b> .....	<b>\$748,314</b>	<b>\$625,000</b>	<b>—</b>

<sup>1</sup> These are grant programs.

## III. RESEARCH AND POLICY DEVELOPMENT PROGRAM

## Program Objectives and Description

To identify housing and community development needs and problems and to develop recommendations for ways in which to meet those needs. The objectives of this program are carried out through the evaluation of housing market conditions; research into specific issues; the fulfillment of statutory mandates, such as the preparation and updating of the California Statewide Housing Plan; evaluation of public and private sector programs designed to increase the availability of affordable housing; the development of legislation to meet housing needs and the maintenance of data resources.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Research and Policy Development Program .....	20.4	23.1	23.4	\$586,970	\$748,885	\$1,360,420
General Fund .....				573,723	748,885	1,360,420
Reimbursements .....				13,247	—	—

## Program Elements

a. Policy and program development .....	11.4	12.7	13.4	\$311,010	\$471,669	\$1,013,263
b. Research and statistics .....	9	10.4	10	275,960	277,216	347,157

## a. Policy and Program Development

Policy activities are carried out in cooperation with other state departments, regional and local government, private housing industry, and private organizations. It is proposed that funds in the amount of \$50,000 be added to this program element to undertake a study of manufactured housing. Such a study would include an identification of the constraints to the use of mobilehomes and recommendations for ways to lift barriers to the availability of mobilehomes as affordable housing. It is also proposed that one position be added to meet increased research and legislative analysis workload. That increased workload is a result of new statutory requirements and increased public recognition of the housing crisis.

It is also proposed that funds in the amount of \$500,000 and two positions be added to this program element to sponsor a competition among home builders who will design and construct houses that demonstrate energy efficiency and that are priced within reach of low and moderate income households.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	11.4	12.7	13.4	\$311,010	\$471,669	\$1,013,263

## b. Research and Statistics

The Research and Statistics Element is responsible for the development, collection and maintenance of statistics and reference materials on housing and community development needs. It prepares data on housing costs; market conditions; construction trends; and the impact of such trends and conditions on California citizens. It establishes statewide goals for new construction, rehabilitation, and housing assistance deemed necessary to meet California's housing needs.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	9	10.4	10	\$275,960	\$277,216	\$347,157

## IV. EMERGENCY SERVICES PROGRAM

## Program Objectives and Description

The Department has been delegated by the Office of Emergency Services the responsibility of providing temporary housing to disaster victims to help mitigate their housing needs in federally-declared disasters. The Department's Division of Codes and Standards provides the expertise in inspecting and assessing housing damages. To date, the Department has had the responsibility for three disaster housing programs which are fully federally funded: the Malibu brush fire disaster of October 29, 1978, the Palm Desert flash floods of July 19, 1979, and the El Centro earthquake of October 15, 1979.

Output	1978-79	1979-80	1980-81
Number of victims housed .....	147	379	400
Number of applications .....	208	849	850
Input	1978-79	1979-80	1980-81
Continuing Program Cost .....	\$563,392	\$1,235,000	\$1,309,100
Reimbursements .....	\$563,392	\$1,235,000	\$1,309,100

## V. ADMINISTRATION PROGRAM

## Program Objectives and Description

This program provides policy and management direction, and administrative support to the Department. This program includes the Directorate, Commission, Legal Office, and Administrative Services. The Commission provides policy input, and the Directorate provides policy and management direction to the Department. The Legal Office provides the legal expertise and support needed to carry out programs. Administrative Services provides centralized fiscal and administrative support, i.e. accounting, budgeting, personnel, data processing, business services, etc.

In order to strengthen the Department's administrative capacity and meet the increased workload imposed by additional responsibilities for housing production and development proposed are, a CEA II position as Deputy Director for Administration; one attorney position as a result of the transfer of the Mobile Home program and 2.5 positions for Chapter 1043/79; two positions to manage contract processing, two positions for workload created for the transfer of the office of Migrant Services to the Department; one position to audit loans and grants; two clerical positions for increased workload in the Legal Office and the Business Services Section; and two positions for workload related to the Century Freeway program are proposed.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## CALIFORNIA HOUSING FINANCE AGENCY

### Program Objectives and Description

Legislation establishing the California Housing Finance Agency became effective on September 26, 1975, with the enactment of Chapter 1, Statutes of 1975, First Extraordinary Session. The Agency's primary purpose is to meet the housing needs of persons and families of low and moderate income. The primary function of the Agency is to sell tax-exempt bonds and use the proceeds to finance housing at below market interest rates by:

(1) making construction loans and mortgage loans to qualified borrowers to finance housing developments, or purchasing such loans from qualified mortgage lenders; and

(2) purchasing loans in neighborhood preservation areas on mortgages originated and serviced by qualified mortgage lenders.

Specific priority considerations for the Agency's programs include: providing housing for very low, low and moderate income individuals and families, including elderly and handicapped; stimulating the reinvestment of capital into mortgage deficient areas; encouraging rehabilitation of substandard housing; and achieving high design and quality standards.

As of the end of Fiscal Year 1978-79, the Agency had made or purchased loans for over 10,000 housing units for low and moderate income families and elderly persons. Another 6,200 units are planned for financing in Fiscal Year 1979-80.

Effective January 1, 1980, the Agency will be authorized to have \$1,500,000,000 of bonds or notes outstanding at any one time. It is estimated that by June 30, 1980, the Agency will have issued approximately \$800,000,000 of authorized revenue bonds or notes.

The Agency is authorized to insure mortgage loans made by the Agency and others, and to insure bonds issued by local public bodies that will provide financing for low and moderate income housing. A Housing Insurance Fund has been established to provide loan and bond insurance, and has been funded by a \$10,000,000 General Fund appropriation.

Additionally, the State has appropriated General Fund in the amount of \$20,000,000 to the Agency for the Supplementary Bond Security Account, which may be utilized to secure the Agency's bonds and notes.

The Agency may also provide technical services in connection with the financing of housing developments; may act as a State representative in receiving and allocating federal housing subsidies; and may under certain circumstances make grants to housing sponsors, provided that grants are not made with the proceeds of the sale of bonds or notes.

The Agency does not receive annual operating appropriations from the General Fund. It operates like a bank, meeting its operating expenses by marking up interest rates on loans and charging fees for specific services. In Fiscal Year 1978-79, the Agency made its first \$100,000 installment payment on the original \$750,000 start-up advance from the General Fund. The remaining \$650,000 is to be repaid by 1985.

The Agency is administered by an eleven-person Board of Directors representing various segments of the housing industry and State government officials. Ex-officio members include the State Treasurer, the Secretary of Business and Transportation, and the Director of the Department of Housing and Community Development. The Board of Directors adopts an annual budget in accordance with the procedure spelled out below.

Pursuant to Chapter 1007, Statutes of 1977, a preliminary budget for the ensuing fiscal year is presented for review by December 1 of each year to the Secretary of the Business and Transportation Agency, the Director of Finance, and the Joint Legislative Budget Committee. An analysis of the Agency's proposed budget prepared by the Joint Legislative Budget Committee, together with any comments of the Committee, are transmitted to the Chairpersons of the fiscal committee of each house of the Legislature and to the Chairperson of the Agency Board of Directors prior to the Board's adoption of the Agency's budget.

As a public service enterprise fund, no budget detail is presented.

I.a.	Replace word processing equipment.....	-	101,000
III.	Increase Training .....	-	54,000

## I. REGULATION OF INSURANCE COMPANIES

## Program Objectives and Description

The objective of this program is to prevent losses to policyholders, beneficiaries, or the public due to the insolvency of insurers and to prevent unlawful or unfair practices by insurers as defined in the Insurance Code. To accomplish the objectives of this program, the Department conducts field examinations, regulates rates, maintains solvency surveillance, collects and audits taxes, regulates proxy solicitations, manages financially distressed companies, admits qualified companies, maintains surveillance of admitted companies, reviews policy forms, and investigates consumer complaints.

## DEPARTMENT OF INSURANCE—Continued

## Authority

The Insurance Code.

## Program Requirements

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	237.5	239.6	240	\$7,060,139	\$8,384,804	\$8,470,123
Workload adjustments.....	—	—	3	—	—	253,446

Reimbursements .....				3,301,488	3,384,141	3,386,437

## Program Elements

a. Company consumer services .....	70.3	74.8	78.1	\$1,946,487	\$2,310,881	\$2,575,838
b. Tax collection .....	5.4	6	6	165,755	187,560	191,409
c. General regulation .....	161.8	158.8	158.9	4,947,897	5,886,363	5,956,322

## a. Company Consumer Services

A staff of insurance officers and rate analysts process inquiries and complaints about insurance rates and the treatment of their claims. This service is a source of information for the Department about insurance company rating practices and claims management. It also assists policyholders and beneficiaries to obtain a fair and equitable treatment in connection with disputed premium charges and claims. A staff of investigators conduct investigations involving insurance fraud.

*In order to meet additional workload the Bureau of Fraudulent Claims proposes the addition of three new positions.*

*The current word processing equipment is worn out. It is proposed to replace it with a newer more sophisticated system that will provide personnel savings in future years.*

## Output

	1978-79	1979-80	1980-81
Rating complaints investigated and adjusted .....	1,182	1,300	1,450

## b. Producer Compliance

The Department maintains a staff of insurance officers in Sacramento, San Francisco, Los Angeles and San Diego to receive complaints from the public concerning alleged misconduct of insurance agents or brokers. Complaints are investigated and, if there has been a violation of law, prompt corrective action is undertaken by a staff of attorneys in San Francisco and Los Angeles.

## DEPARTMENT OF REAL ESTATE

## Program Objectives and Description

The Department of Real Estate's objective is to protect the public in offerings of subdivided property, real property securities, and in real estate transactions handled through agents. To accomplish this, a minimum level of competence is established for the licensing of real estate agents, and disclosure and affirmative standards are set for subdivision offerings.

Prevention of fraud, deceit and misrepresentation in the real estate marketplace is a departmental responsibility. The Department of Real Estate takes disciplinary, civil and criminal action against licensees and others who have violated the real estate law and the Subdivided Lands Act.

In addition, the Department assists in the advancement of education and research to aid the consumer in understanding real estate and to encourage a professional orientation of those in the real estate business. Nonlicensees constitute over 50 percent of those currently enrolled in college-level real estate courses. All activities of the Department are supported by fees from licensees, subdividers and applicants for license or permit.

## SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Transaction Activities .....	\$7,224,176	\$7,226,546	\$7,144,836

11a.	Subdivision filings workload increase .....	31	641,030
11a.	Eliminate subdivision filings backlogs (Limited to December 1, 1980) .....	32	399,682

## I. TRANSACTION ACTIVITIES

## Program Objectives and Description

The consumer is relatively uninformed of the technicalities associated with real estate transactions. Since dealing in real property is often a once-in-a-lifetime activity for a large segment of the public, it is in the public interest that the State should license and regulate only qualified persons to competently and honestly transact real estate business between buyers, sellers and renters of real estate and business opportunities.

## Authority

Business and Professions Code, Division 4, Part 1.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

b. Regulatory and recovery .....	164.4	164.3	159.6	4,825,637	4,643,727	4,738,348

## a. Licensing

The examination section prepares and submits suggested questions to a committee for review. The approved questions are placed in a questions library which contains approximately 2,800 questions and requires continual updating. The examination section draws on these questions to prepare examination booklets which are supplied to all offices where examinations are given throughout the State. All examinations are scored and notices of test results are sent to applicants.

During the 1979-80 fiscal year, the Department anticipates completion of the automation of the licensing program. This would include examination scheduling and scoring, issuance of original and renewal sales and broker licensees, and other related license services.

## Output

	1978-79	1979-80	1980-81
Total licenses .....	380,405	389,915	399,663

## DEPARTMENT OF REAL ESTATE—Continued

## b. Regulatory and Recovery

Complaints received from the public and inquiries initiated by the Department itself are the basis for investigations. If the investigation proves a violation of the Real Estate Law, formal proceedings usually result, leading to disciplining of licensees following administrative hearings or criminal proceedings. Stop orders may be issued or injunctive proceedings initiated to protect the public from further illegal operations and to require compliance with the Real Estate Law.

Whenever a person obtains a fraud judgment based upon a loss suffered because of fraud committed by a licensee while performing licensed acts and the licensee named in the judgment is unable fully to satisfy the judgment, the victim may claim against the Real Estate Recovery Fund up to the maximum allowed by law. Such claims are investigated by Department staff, a hearing on the claim is held in Superior Court, and the court finds for or against the claimant. When claims are paid out of the Fund, the licenses of the real estate agents involved are suspended until they have repaid the Fund in full plus interest. *The cost of these claims have increased substantially over the past several years. The Department is proposing an augmentation of \$284,000 for anticipated Recovery Act claims in accordance with the provisions of the Business and Professions Code.*

## II. OFFERINGS AND SECURITIES

## Program Objectives and Description

The purchase of real property is the largest investment made by most families. The subdivision laws are designed to assure that developers will do what they promise and that purchasers will get that for which they bargained. Completion of projects or adequate financial arrangements to assure completion is required before the developer can offer his property for sale. Since condominiums and planned development subdivisions involve the complexities of common ownership of land, a "reasonableness" test is applied in qualifying such offerings. Because sales of out-of-state land are often made sight unseen, a regulatory test of fairness is applied to such offerings.

The sale of notes and trust deeds often constitutes a real property security. To prevent fraud in these sales the "fair, just and equitable test" is applied.

## Authority

Business and Professions Code, Division 4, Parts 1 and 2.

b. Real property securities .....	2.4	2.6	2.6	65,628	68,785	74,261

## a. Subdivisions

Subdividers of in-state lands are required to obtain a public report before the subdivided land may be offered for sale. The public report discloses facts concerning each subdivision which are of fundamental interest to a prospective buyer. Before a public report is issued, the subdivider must file an application and documentation in proof of statements made therein, and in some cases, he must demonstrate that adequate financial arrangements have been made for the completion of improvements. The application and documents are reviewed, the subdivision is inspected, and a determination is made that the offering is not fraudulent before a final public report is issued. In subdivisions which have a common facility, a determination is made that the offering is reasonable. Common facility subdivisions, such as condominiums, are increasing on an accelerated basis and in Southern California constitute approximately one-half of all such filings. In land projects advertising is screened and purchasers have rescission rights for 14 days. Subdivision filings during the fiscal year of 1978-79 were up 7 percent over 1977-78 level and 22 percent over 1976-77. *The present and projected increase in filings requires an augmentation of 31 positions to process subdivision public reports in a timely manner. In addition, persistent backlogs in the processing of subdivision applications has resulted in lengthy delays. For this reason, an additional 32 positions are requested on a limited term basis through November 30, 1980 to make current the applications.*

*Pursuant to the Budget Act of 1979, the Department of Real Estate has established the Subdivision Systems Project to identify ways to simplify processing of subdivision applications and to coordinate implementation of improvements. The Department requests an extension of this project and five positions to June 30, 1981.*

Output	1978-79	1979-80	1980-81

	\$2,208,902	\$4,476,591	\$4,967,409

## DEPARTMENT OF REAL ESTATE—Continued

## b. Real Property Securities

The regulation of subdivisions of land located outside of California is rigorous. In addition to the in-state requirements, a determination must be made that the offering of the subdivided land is fair, just and equitable. To assist in this determination, an appraisal of the property is required before a public report and permit can be issued. The cost of appraisal, report and permit is paid by the subdivider.

Public reports and permits expire at the end of one year and generally are renewed for at least one more year. The file and public report and permit are brought up-to-date. Approximately nine renewal permits are now issued each year for each original permit that has been issued, reflecting the continuing work generated by old but still active subdivisions that were first issued permits up to ten years earlier.

Anyone who sells notes secured by trust deeds to the public must make application for a permit when the notes are classed as real property securities. Applications are screened, appraisals are required, and a determination is made that the sale of the securities will be fair, just and equitable.

## III. POLICY AND PLANNING

## Program Objectives and Description

This Division reviews and evaluates Department policies and programs to determine effectiveness; proposes new policy and programs for the Department; develops the Department's legislative proposals and analyzes alternatives; tracks legislation of concern to the Commissioner; implements the Department's education and research activities with institutions of higher learning and the Community College and State University and College systems, and is responsible for the continuing education program which involves all active real estate licensees. The Division Chief is also responsible for relationships with other states in connection with reciprocal matters and with the Department's relationships, from time to time, with the Federal Government.

## Authority

Business and Professions Code, Division 4, Part 1.

## a. Education and Research

The education, research and continuing education activities are directed toward developing, reviewing, coordinating and overseeing public and private offering entities to maintain uniformity of study programs, curricula, seminars, conference and workshop offerings in real estate subjects required by law. The research portion is directed to all phases of real estate activity, including study of the needs of real estate education, marketing, financing and land use, urban problems and other factors of real estate economics that benefit the general public as well as real estate licensees.

## b. Legislative Liaison

The Legislative unit analyzes and monitors legislative proposals and hearings. The Department is frequently called upon to participate in the development of legislative proposals by members of the legislature and in connection with its own activities. These functions include participation in the development of legislation dealing with the Real Estate Law, the Subdivided Lands Act, the Subdivision Map Act, landlord/tenant legislation, and other subjects related to the activities of the real estate market and most particularly with regard to the activities of real estate licensees.

## IV. ADMINISTRATION

## Program Objectives and Description

Central leadership and nontechnical support is provided by the Real Estate Commissioner, chief executive of the Department. The Commissioner is charged with conducting the affairs of the Department, interpreting and applying the policies of the Governor, making policy, controlling the operations of the Department's offices, and the activities of the staff and acting as official spokesperson for the Department. In carrying out these responsibilities, the Commissioner must rely on his staff for legal and administrative assistance.

The central services provided include central personnel, business, administrative and accounting. The Sacramento headquarters office processes all mail received by the Department in Sacramento, maintains the public counter, provides the central statewide personnel function, maintains accounting records, and prepares financial reports and annual closing statements. This section prepares service contracts and the annual budget and maintains inventories of equipment, forms, supplies and publications.

## Authority

Business and Professions Code, Division 4, Part 1 and 2.

## DEPARTMENT OF SAVINGS AND LOAN

The principal objectives of the Department of Savings and Loan are to protect the funds of the savings and investing public held by State-licensed associations, to assure compliance by associations with laws and regulations including those involving consumer protection and antidiscrimination, and to assure the continued financial growth of these associations consistent with public need and convenience.

The department's program titled Supervision and Regulation consists of these elements: examination, appraisal, facilities licensing and legal assistance, economic and financial information, management information systems and administration.

### PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
Supervision and Regulation.....	\$5,340,660	\$6,544,371	\$6,585,295

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel years	Dollars
c.	Expansion—Facilities Licensing and Legal Assistance.....	2	\$125,336
e.	Redesign and reprogram Management Information System.....	—	135,000

### SUPERVISION AND REGULATION

#### Program Objectives and Description

There are in excess of 8.25 million savings and share accounts in State-licensed associations which represents an increase of almost 3 percent in the number of these holdings over the prior year. The average amount in these accounts is \$5,678 which represents a 4.8 percent increase over the prior year's average. Associations channel these public funds into loans for residential and commercial building development and construction. To protect these funds and to assure that the saving and borrowing public are properly and legally served, supervision and regulation activities are directed at the prevention of conditions or practices which would threaten the safety and solvency of associations or would be detrimental to public need and convenience.

#### Authority

California Financial Code, Sections 5000 through 11650.

#### Program Elements

	78-79	79-80	80-81	1978-79	1979-80	1980-81
a. Examination.....	72.4	62	62	\$2,079,522	\$2,717,705	\$2,573,181
b. Appraisal .....	33.3	34	34	1,036,180	1,404,911	1,455,262

f. Administration .....	37.3	44	40	1,271,413	1,172,519	1,236,952

#### a. Examination

The purpose of this element is to provide information to the Commissioner that verifies compliance with law, regulations and directives, evaluates the soundness of operating policies and procedures, and ascertains the financial condition and solvency of the association. The information is obtained from examination of assets and activities as reflected in books, records, securities and papers of the association, its holding company, service corporations, and other related entities. By law, associations must be examined at least once in a two-year period. Usually, the holding company, service corporation and related entities are examined concurrently. This element is also responsible for consumer complaints and inquiries.

#### Output

Expenditures.....	72.4	62	62	\$2,079,522	\$2,717,705	\$2,573,181

## DEPARTMENT OF SAVINGS AND LOAN—Continued

## b. Appraisal

The purpose of this element is to provide the Commissioner with information to determine whether statutory limits on loan to value ratios have been exceeded, whether assets have been precisely valued and whether imprudent or unsafe appraisal practices exist. The information is obtained by revaluation of property or investments of an association and of any property which constitutes security for a loan held by an association. Property is also appraised to assure association compliance with the Housing Financial Discrimination Act. The test appraisal is the principal method of revaluation. This element is also responsible for ascertaining whether association appraisers are classified properly and perform in conformance with class requirements. For the appraisal element, the number and types of loans recorded is the chief workload determinant.

Output	1978-79	1979-80	1980-81
Appraisal examinations .....	98	111	146
Appraisal reports and security reviews .....	5,998	6,500	7,160
Fair lending appraisal reviews .....	626	655	785

Expenditures .....	33.3	34	34	\$1,036,180	\$1,404,911	\$1,455,262

## c. Facilities Licensing and Legal Assistance

The purpose of this element is to enable the Commissioner to certify corporations to conduct a savings and loan business in California, to license association branches and service offices, to approve mergers and acquisitions of existing associations, to approve change of locations of association branches and association name changes. It also is responsible for legal assistance in promulgating, amending, and revising administrative regulations, in proposing and drafting new legislation, in analyzing other proposed legislation and in providing interpretation of existing laws and regulations.

*This program will be augmented by two positions, thus enabling the department to provide mandated legal services. In addition these positions will assist consultants in the recodification and updating of the law relating to savings and loan associations.*

Output	1978-79	1979-80	1980-81
Branch licensing hearings .....	125	20	10
New associations and other hearings .....	41	50	60
Decisions without hearings .....	230	335	345

Expenditures .....	6.5	4	6	\$272,949	\$356,791	\$346,383

## d. Economic and Financial Information

The purpose of this element is to provide the Commissioner and others with statistical and analytical studies about the financial condition and performance of individual associations, and about State mortgage lending patterns. It assists in the analysis of merger, branch, and new association applications.

Output	1978-79	1979-80	1980-81
Facilities applications reviewed .....	141	150	160

Expenditures .....	7.1	6	6	\$216,842	\$382,061	\$307,999

DEPARTMENT OF SAVINGS AND LOAN—*Continued*

## e. Management Information Systems

The purpose of this element is to provide electronic data processing services entailed in producing information about the financial condition and performance of individual associations and about State mortgage lending patterns.

This element is augmented by \$135,000 for reprogramming and redesigning the financial evaluation system, to introduce economic variables not found in the existing system, and to implement a better early warning model.

Output	1978-79	1979-80	1980-81

## CALIFORNIA TRANSPORTATION COMMISSION

The California Transportation Commission was established in 1978 by Assembly Bill 402 (Chapter 1106, 1977) out of a growing concern for a single, unified California transportation policy. The Commission replaced and assumed the responsibilities of four independent bodies: the California Highway Commission, the State Transportation Board, the State Aeronautics Board, and the California Toll Bridge Authority. The Commission consists of nine members appointed by the Governor and two ex officio legislative members.

The California Transportation Commission is responsible for:

- adopting a *State Transportation Improvement Program*, including an estimate of State funds available to regional and local entities over a five-year period for transportation projects and a ranking of projects to be developed with these funds in keeping with statewide interests;
  - preparing a *Biennial Report to the Legislature*, evaluating significant transportation issues, making an overview of necessary future investments, and recommending legislative and administrative actions to meet California's emerging transportation needs;
  - evaluating the proposed budget of the California Department of Transportation and commenting upon that budget before the California Legislature.
- More generally, the Commission is responsible for advising and assisting the Secretary of the Business and Transportation Agency and the Legislature in formulating and evaluating State policies and plans for California's transportation programs.

Personnel years.....	8.6	11.5	11.5

### Program Objectives and Description

In its first year, the Commission has made two substantial contributions toward providing more balanced transportation policies and programs in California: five-year State Transportation Improvement Program, and the 1978 Biennial Report.

The adopted 1979 State Transportation Improvement Program (STIP) is a five-year expenditure program for all State-funded transportation projects. The STIP was developed using a fund estimating methodology agreed upon by State, regional and local governments; Caltrans' proposed STIP; and regional transportation improvement programs. In adopting the STIP, the Commission sought to match transportation needs against available funds, in keeping with statewide interests.

The California Transportation Commission's 1978 Biennial Report to the Legislature examines and makes legislative recommendations on future financial investments for transportation in California and allocation formulas for State highway funds.

Other accomplishments during the Commission's first year include a report to the Legislature on Caltrans' proposed budget, conditional approval of Los Angeles Downtown People Mover, San Diego light rail, and initiating several important recycling studies of freeway routes throughout the State.

During Fiscal Year 1980-81, the Commission will continue to build upon its experience with the 1979 and 1980 STIPs to enhance this process. The STIP's development will be computerized and standardized for all participating agencies; and project selection will respond to the problems of continuing inflation, revenue reductions, and increasing needs for highway rehabilitation and transit development.

The 1980 Biennial Report will continue to examine the adequacy and allocation of transportation revenues throughout the State as well as explore other issues, including energy conservation and fuel dependability, commodity movement, and transit labor.

In addition to the ongoing functions of the STIP, the Biennial Report and the report on Caltrans' proposed budget, the Commission will also be pursuing the following activities during 1980-81:

#### Aeronautics

The California Transportation Commission, with assistance from its Aeronautics Technical Advisory Committee, Caltrans, and regional planning agencies, will further refine the STIP aeronautics methodology and will continue development of a statewide aeronautics program.

#### Transit Needs

Interacting with the Administration and the Legislature, the Commission will explore transit needs in the "post-Proposition 13 era". General funds, property tax, and other local revenues have been used to subsidize transit because of the restrictions on using Urban Mass Transportation Act (UMTA) and Transportation Development Act sales tax monies for operating expenses. With the advent of Proposition 13 and the corresponding reduction of property tax funds available as a local funding source, the Commission will review transit needs and recommend necessary legislative changes.

The Commission will also review the impact of changes in transit financing resulting from the passage of SB 620, Chapter 161, Statutes of 1979; and play an active role in its implementation.

#### Transportation Financing Needs

In conjunction with the administration and the Legislature, the Commission will be exploring a more equitable distribution of the cost of transportation financing needs.

#### Transportation Legislation

The Commission will be taking a more active role in the legislative process, both for legislation directly affecting and indirectly affecting transportation.

## DEPARTMENT OF TRANSPORTATION

This 1980-81 fiscal year budget continues to carry out the mission of the Department of Transportation, which is to implement or coordinate the development and operation of the various transportation modes and facilities in California. The goal of the Department of Transportation (Caltrans) is to develop a balanced transportation system that considers all transportation modes within realistic funding levels and supports the social, economic and environmental well-being of the citizens of the State. Departmental policy and program emphasis are toward the attainment of that goal and are reflected in the programs presented in the budget.

Four main programs are shown: (1) Aeronautics, (2) Highway Transportation, (3) Mass Transportation, and, (4) Transportation Planning. The four programs represent within legal limits a balance of alternative transportation modes, taking into consideration energy supplies and demand as well as matters of energy efficiency.

A major concern of the Aeronautics Program is that airport development, particularly in large urban areas, goes hand-in-hand with the development of ground transportation facilities. The program is also working to reduce air congestion by promoting more efficient use of airports and funding the acquisition and development of new facilities. Safety inspections of airports and heliports is continued but on a more selective basis.

Highway transportation, the largest program administered by the Department, sets priorities on maintenance and rehabilitation of existing road and highway systems, but also applies approximately 30 percent of available program resources to construction of new facilities. The proposed Highways Budget contains a major commitment of resources for the early stages of developing the Century Freeway and redirects staffing from administration and other nonproject activities to project development activities to accelerate the delivery of capital projects. The program continues to maximize the use of available federal funds, both in state construction and in aid to local governments and other entities.

The Mass Transportation Program provides, as a part of the State's total transportation system, increasing emphasis on the expansion and better utilization of our transit and rail systems, and on integrating public transit systems with each other. The commitment of the Legislature and Administration to improving California's public transit systems is demonstrated by the additional funds provided by Chapter 161, Statutes of 1979 (SB 620) for Local Bus and Guideway Transit Systems, Intercity bus and rail services and intermodal passenger transfer terminal facilities.

The Transportation Planning Program provides the Department and all transportation programs with analyses and studies of transportation problems, proposals and recommendations, coordination of federal and State funding grant sources, and coordination and evaluation of regional transportation plans.

## I. AERONAUTICS

## Program Objectives and Description

California's aeronautical activity is among the highest in the United States. The air transportation corridor between San Francisco and Los Angeles is the country's most heavily used. Six of the nation's ten busiest airports are located here. More passengers board air carrier flights in this state than in any other. One out of every six airplanes and pilots is based in California. Such aviation activity creates problems of airborne traffic congestion, aircraft noise, and airport terminal congestion, affecting pilots, passengers, and the general public. These problems are complicated by the fact that in urban areas, where the problems are most acute, new airport construction often is not feasible. The Aeronautics Program supports California's aviation activities by promoting the maximum use of existing airports, consistent with a strong concern for safety and preservation of the environment. This is done through a program which develops and maintains a statewide system of safe and environmentally compatible airports and which establishes improved airport access by effectively integrating the air and surface transportation systems.

Various personnel year adjustments within elements were made to reflect departmental priorities.

Personnel years .....	19.6	—	16.6	—	20.7	—

## a.1 Safety

The safety component is responsible for ensuring that airports and heliports have clear zones of approach, safe air traffic patterns, are environmentally compatible, and meet minimum safety standards. The Department conducts safety and permit inspections of airport facilities, issues airport and heliport permits, maintains the California Airport Inventory, and reviews air-space utilization and obstruction case studies.

	1978-79		1979-80		1980-81

## a.2 Local Assistance

The Local Assistance component assists local governments by consulting and advising in the acquisition and development of safe environmentally compatible airports, providing grants and loans, and aiding in evaluating aviation needs including airspace. This component also includes maximizing the use of existing facilities by establishing joint civilian and military use of military airports, improving airport access, and by promoting improved airport intermodal capability.

	1978-79		1979-80		1980-81

## b. Administration

This element provides the management, legal, administrative and technical services required to support the entire Aeronautics Program. Included are: Program Administration, General Administration, Professional and Technical Services, and External Costs. The fluctuation of input levels in the components of this element are due to rearrangement of line items between the components during 1979-80 and 1980-81.

The reduction in Program Administration in 1979-80 and 1980-81 brings the component in line with program definitions. In 1980-81 there is a revised proration to the Modal Programs to reflect equalizing of service levels in General Administration.

## b.4 Administrative Prorata

This component represents the division's share of Administrative Prorata for all departments.

## Input

	1978-79		1979-80		1980-81	
	State Operations	Subventions	State Operations	Subventions	State Operations	Subventions
Expenditures .....	—	—	\$1,418	—	\$1,559	—

## c. Planning and Noise

This element develops the California Aviation System Plan and provides aviation planning information to the Department's Division of Transportation Planning, County and Regional Transportation agencies, the Civil Aeronautics Board and others. It is also responsible for administering the California Airport Noise standards.

## Output

	1978-79	1979-80	1980-81
Airport noise variance hearings held .....	3	4	3
Environmental document airport noise element reviews .....	10	10	10
Airport noise monitoring reports evaluated .....	21	28	28

## Input

Expenditures .....	\$204,310	—	\$649,757	—	\$460,463	—
Personnel years .....	6.5	—	11	—	9.3	—

## d. Work for Others

This element provides assistance at the request of other public agencies that have agreed to reimburse Caltrans for the full cost of the effort when the provision of such assistance fulfills an essential public purpose which will be impaired without Caltrans' participation. Under contract, the Department performs airport inspections related to safety and physical conditions on selected airports for the Federal Aviation Administration. This is additional work not already being done as part of the State's airport safety inspection program.

## DEPARTMENT OF TRANSPORTATION—Continued

## II. HIGHWAY TRANSPORTATION

## Program Objectives and Descriptions

At the present time, California's road network serves the vast majority of all travel in the state, including both person and commodity travel. In the passenger area, roads provide not only for the movement of people in private automobiles, but also in buses, vans, motorcycles and bicycles. Trucks also carry the bulk of freight moved. The State Highway system, which comprises one-tenth of total roadway mileage, handles more than one-half of the miles traveled.

Recognizing that a high proportion of all travel in California will continue to depend on an adequate state highway network, the Department of Transportation proposes a budget of \$1.4 billion for the Highway Program in 1980-81.

The 1980-81 budget places high priority on: maintenance, rehabilitation and reconstruction of the existing systems, operational improvements to the existing system for safety, maximum service and efficiency, and for providing new highway facilities. Seventy-four percent of the total budget is for these four priority activities. Approximately thirty percent will go into construction of new facilities. Other spending categories included in the budget are subventions to local entities for local road projects (seventeen percent of the total), and program development, operations and administration (nine percent). Staffing from administration and other nonproject activities is being redirected in the 1979-80 year and the 1980-81 year to project development in order to intensify efforts to accelerate the delivery of the construction program. A major amount of the staffing in new construction is committed to the early stages of developing the Century Freeway. Resources are also included for the Department of Housing and Community Development to provide replacement housing and for the corridor advocate required by the final agreement on the century freeway-transitway.

As in the past, a major portion of the Department's construction activities will be funded from federal sources with state money used to match available federal aid, and to carry out projects not suitable for federal highway participation. The 1980-81 budget continues to utilize the carry-over funds accumulated from previous years, at a rate that maximizes federal air. The STIP will utilize all surpluses, and be in balance with all legislative constraints by the end of the five year STIP period.

## Authority

- California Constitution, Article XIX.
- Government Code, Title 2, Division 3, Part 5.
- Streets and Highways Code, Divisions 1, 3 and 17.
- Vehicle Code, Division 11, Chapters 2, 3, 13 and 14.
- Public Utilities Code, Division 1, Part 1, Chapters 6 and 6.5.
- Public Resources Code, Division 15, Chapter 5.8.
- Business and Professions Code, Division 3, Chapter 2.

DEPARTMENT OF TRANSPORTATION—*Continued*

## a. Rehabilitation

Highway facilities which have deteriorated through usage or weathering are returned to a safe, usable and maintainable condition through this element. Included are: Lands, buildings and facilities improvements, reconstruction and restoration of highway facilities, resurfacing of roadways, and improvements that protect existing highway facilities from identified potential deterioration and damage.

*This program element includes increased support for: the State Transportation Improvement Program, acceleration of the Interstate Program, and effort related to Item 164.1 of the Budget Act of 1979 and to Chapter 1060, Statutes of 1979.*

	1,636.9	1,721	1,989.8

## b.1 Safety Improvements

Projects in this component reduce the number and severity of highway accidents. Improvements may be at spots of accident concentrations and include such things as signals, warning signs, lighting or curve corrections. They may be systemwide improvements and include such projects as adding median barriers, crash cushions, breakway signs, raised pavement markers and removal of roadside obstacles.

## b.2 Compatibility Improvements

Projects in this component provide improvements for an appropriately pleasing and environmentally compatible highway transportation system. Projects include: noise attenuation near communities and schools, highway planting, roadside rests and vista points, historical markers, junkyard screening, billboard removal, scenic easements, fish and wild life preservation, information centers and ecological viewing areas.

Output	1978-79 Actual	1979-80 Estimated	1980-81 Proposed

## c. Local Assistance

This element provides for the administration, coordination and control required by federal and State law for implementing transportation projects and furnishing financial assistance to city and county transportation programs. The purpose is to ensure that the expenditures of all apportioned funds is consistent with federal and State guidelines and is administered at the lowest possible Departmental expense. These programs support the Highway Transportation Program by providing a response to the public need for safe, serviceable and comprehensive city and county transportation service. It also includes highways related Reimbursed Work for Others.

## DEPARTMENT OF TRANSPORTATION—Continued

## c.1 Local Assistance

This component provides support services when city and county transportation projects are constructed with Federal and/or State funds. It is divided into four basic categories: (1) Local roads and highways, (2) Railroad Crossings, (3) Local nonmotorized transportation, and (4) Miscellaneous services.

	1978-79 Actual	1979-80 Estimated	1980-81 Proposed

## c.2 Highways Reimbursed Work for Others

This component accounts for Highway Program related assistance which does not benefit CALTRANS. It is provided at the request of an entity outside of CALTRANS that has agreed to reimburse CALTRANS for the full cost of the effort when the provision of such assistance fulfills an essential public purpose which will be impaired without CALTRANS participation. Reimbursed work which is of mutual benefit to both CALTRANS and the external entity (i.e., on-State system projects), is no longer included in this component, but is reimbursed to the appropriate Highway Program component which identifies the type of work performed.

	1978-79 Actual	1979-80 Estimated	1980-81 Proposed
<b>Output</b>

Personnel Years.....	171.2	115.5	156

## d. Program Development

Activities in this element determine the public need for Highway transportation facilities and services and develop programs and provide the knowledge to enable an effective response to that public need in California.

	1978-79	1979-80	1980-81
	State Operations	State Operations	State Operations
<b>Input</b>			
Expenditures .....	\$11,463,490	\$13,584,595	\$12,325,080

Personnel Years.....	264.2	280.4	331.8

## d.1 Research

Research provides a more effective response to the need for safe, efficient and environmentally compatible highway transportation service. It includes theoretical and applied research, development, testing and evaluation, and demonstration projects. Facility research is conducted that will contribute to greater safety, improvement of traffic flow, and increased efficiency in planning, design, construction and maintenance of highways. Environmental research helps avoid negative impacts on the physical and social environment. It focuses on such issues as air, water, noise, landscape quality preservation, natural and socio-economic environment. Beginning in 1979-80, this component will include: resource conservation (which seeks the most efficient utilization of nonrenewable resources) and value engineering (which consists of studies that identify methods of accomplishing required functions at the lowest life-cycle cost).

## DEPARTMENT OF TRANSPORTATION—Continued

## d.2 System Planning

This component provides for the collection and analysis of factual data as a basis for recommendations and reports to top management, the California Transportation Commission and the legislature. Specific activities include mapping and inventorying road systems, monitoring performance and monitoring construction progress in order to prepare the various reports required by State statute. Other activities required by federal law include Interstate estimates, public road statistics, public road expenditure reports, monitoring the 55 mph speed limit, analytical and feasibility studies, accident records and traffic census. These activities make it possible for the Department to recommend a cost effective State Transportation Improvement Program to the California Transportation Commission, to recommend district minimum expenditures to the legislature, and to submit data to the federal government for apportioning federal highway funds to California.

Output	1978-79		1979-80		1980-81

## DEPARTMENT OF TRANSPORTATION—Continued

## e. New Facilities

This element will furnish new or improved service on the State Highway System where rehabilitation or operational improvements are determined to be inadequate or inappropriate to meet Highway Transportation needs. It will also construct qualifying bicycle facilities used in conjunction with the State Highway System, and provide for the addition of new toll bridges or toll bridge replacements.

This program element includes increased support for: the State Transportation Improvement Program, acceleration of the Interstate Program, LA 105 (Century Freeway) and effort related to Item 164.1 of the Budget Act of 1979 and to Chapter 1060, Statutes of 1979.

	1978-79		1979-80		1980-81

## e.1 New Highway Construction

Projects in this component provide: new or improved access to the State highway system or provide separations that improve cross traffic serving new development. It will also upgrade width, improve alignment or grade on existing facilities, add new through lanes to existing facilities to accommodate increasing volumes of traffic, and new highways that serve new areas and assist in the appropriate regional development of the State will be constructed.

	1978-79 Actual	1979-80 Estimated	1980-81 Proposed
<b>Output<sup>1</sup></b>

## e.3 New Bicycle Facilities

Projects in this component provide for the bicycle alternative by developing a statewide bicycle transportation system within State Highway corridors. This system is to encourage increased use of the bicycle for commute and other short trip purposes. Projects also improve safety of bicyclists and motorists on the highway system. Projects include shoulder widening of existing roadways and development of bikeways.

	1978-79 Actual	1979-80 Estimated	1980-81 Proposed
<b>Output</b>			
Bikeway miles constructed .....	95	79	85

Personnel years .....	43.9	-	54.1	-	59.9	-

<sup>1</sup> Output indicators were redefined for the 1979-80 and 1980-81 fiscal years.

## DEPARTMENT OF TRANSPORTATION—Continued

## f. Administration

This element provides the management, legal, administrative and technical services required to support the entire Highway Program. Included are: Program Administration, General Administration, Professional and Technical Services, and External Costs. The fluctuation of input levels in the components of this element are due to rearrangement of line items between the components during 1979-80 and 1980-81.

The reduction in Program Administration in 1979-80 and 1980-81 brings the component in line with program definitions. In 1980-81 there is a revised proration to the Modal Programs to reflect equalizing of service levels in General Administration. The reduction in professional and technical services for 1980-81 reflects a new procedure for budgeting technical services throughout the program structure.

	1978-79		1979-80		1980-81	
	State Operations	Capital Outlay	State Operations	Capital Outlay	State Operations	Capital Outlay

## f.3 Professional and Technical Services

This component includes Legal Services, Business Services, Computer Services, Laboratory Services and Equipment Services. These services are an integral part of Highway development and operation and vary directly with the Highway Program. A few examples are: purchase, modification and maintenance of snow removal equipment; use of the computer for engineering design calculations; procurement and distribution of signs, guardrails, and asphalt.

DEPARTMENT OF TRANSPORTATION—*Continued*

## g. Operations

This element operates the highway system by: providing a ridesharing program, improving the traffic flow to maximize traffic efficiency while minimizing inconvenience and congestion, operating a toll collection system and managing the real property owned by the State which is not actively being used for highway purposes.

	1978-79		1979-80		1980-81	
	State Operations	Capital Outlay	State Operations	Capital Outlay	State Operations	Capital Outlay

Toll Bridge Funds <sup>e</sup> .....	9,534,382	—	10,542,665	—	10,448,193	—
Personnel years .....	956.2	—	1,039.7	—	1,117.8	—

## g.1 Ridesharing

This component increases trip-carrying capacity making more effective use of existing highways, lowers user costs, conserves fuel, improves air quality, and alleviates parking problems by encouraging use of multi-occupancy vehicles. Activities include assisting the public in forming car, bus, and van pools, furnishing information on transit schedules, providing incentives to encourage ride sharing, establishing ridesharing staging areas and encouraging work schedules which are conducive to group transportation.

*In an attempt to mitigate consequences of reduced fuel availability, resources in this component have been increased.*

	1978-79 Actual	1979-80 Estimated	1980-81 Proposed
<b>Output</b>			
Persons placed in ride pools .....	25,000	25,000	30,000

Personnel years .....	245.8	—	289.9	—	332.5	—

## g.3 Toll Collection

This component is for collection and security of toll revenues to retire bonds, operate toll bridges, make improvements, and furnish other services as specified by State law.

*This component is being expanded to provide personnel for toll collection on the new Antioch Bridge; and for increased traffic volume.*

	1978-79 Actual	1979-80 Estimated	1980-81 Proposed
<b>Output</b>			
Annual traffic crossing toll bridges (Toll Direc- tion only) .....	90	92	95

## DEPARTMENT OF TRANSPORTATION—Continued

## g.4 Real Property Services

This component is for management of real property in highway right of way owned by the State. Included are airspace leases, rental or lease, and rehabilitation of property being held for future construction and disposal of surplus property.

*This component is being increased for a three year period for statewide rehabilitation of residential rental units not immediately subject to demolition for freeway construction.*

	1978-79	1979-80	1980-81
	Actual	Estimated	Proposed
<b>Output</b>

## h. Maintenance

This element contributes to preserving the qualities of aesthetic and ecological compatibility, comfort and convenience, traffic service, functional capacity and safety, and the structural integrity of the existing roadways and toll bridges of the State Highway System. This will be done through appropriate maintenance of traveled-way surfaces, shoulders, roadsides, drainage facilities, bridges, tunnels, ferries, landscape planting, signs, pavement markings, roadside rest areas, lights and signals, as well as snow and ice control.

	1978-79	1979-80	1980-81

## h.3 Structures

This component provides the maintenance to preserve the riding qualities, safety characteristics, functional serviceability, and structural integrity of structures which comprise portions of the State Highway System. These structures include highway bridges and toll bridges, overhead sign structures, tunnels, tubes, ferries, slips, docks, vista points, weigh stations, loadometer pits and bicycle paths.

	1978-79 Actual	1979-80 Estimated	1980-81 Proposed

Personnel years .....	1,074.3	1,007.1	1,187.1

## h.5 Maintenance Auxiliary Services

This component is the direct management, support and overhead for maintenance activities and facilities. It includes maintenance staff and clerical functions in Headquarters, Districts, and Superintendent offices. Training, maintenance and repair of maintenance stations and superintendent offices, groundskeeping around toll plazas are also included. Maintenance and repair of toll recording devices, toll booths, canopies, axle counters and static wires, toll lane washing, booth cleaning and painting are part of this component. It also includes physical damage insurance on bridges.

DEPARTMENT OF TRANSPORTATION—*Continued*

## III. MASS TRANSPORTATION

## Program Objectives

The enactment of Chapter 161, Statutes of 1979 (SB 620), which provides increased funding for local bus and guideway transit systems, intercity bus and rail services and intermodal passenger transfer terminal facilities, demonstrated the Legislature's and the Administration's commitment to improving California's public transit systems. Efficient and effective public transit services are becoming increasingly important in our changing transportation environment because they not only can provide mobility to the transit dependent, but can ease the impact gas shortages have on local and intercity mobility, reduce energy over the long term, mitigate air pollution and aid in relieving congestion on our streets and highways by providing an attractive and reasonable alternative to the automobile.

The Mass Transportation Program's budget has been adjusted to implement the provisions of Chapter 161, Statutes of 1979 (SB 620).

The State's role in public transportation is structured to achieve the following objectives:

- (a) Improve public transportation services for low-mobility groups.
- (b) Provide technical and financial assistance to public transportation operators.
- (c) Improve intercity and commuter rail and bus services.
- (d) Improve intermodal passenger transfer facilities and services.
- (e) Implement public transportation development and demonstration projects.

*In response to a request contained in the Legislature's Budget Committee Report on Item 161, Budget Act of 1979, the Department prepared and presented the Legislature with a report on the existing authority of the Department in mass transportation including draft legislation consolidating the Department's existing authority for reenactment.*

DEPARTMENT OF TRANSPORTATION—*Continued*

## Output

During the Fiscal Year 1980-81, the Mass Transportation Program will:

- Evaluate, approve and process requests for federal operating and capital assistance funds used to maintain and expand transit services in urbanized and nonurbanized areas of the State.
- Evaluate, approve and process requests for federal capital assistance funds for the acquisition of specialized transit vehicles and related equipment for private, nonprofit organizations providing transportation to elderly and handicapped people.
- Administer Transportation Development Act funds and State Transit Assistance Funds to ensure that local transit operators receive their appropriate share of funds in conformance with State laws and rules.
- Evaluate and process requests for Article XIX Funds for transit guideways and administer contracts for approved requests.
- Under the provisions of Chapter 1139, Statutes of 1975 (SB 580), review and approve project financial plans, schedules of development, policies, procedures, performance standards and management control systems for transit guideway proposals.
- Initiate improved coordination and consolidation of local transportation services to low-mobility people to reduce duplication of services.
- Complete research projects developing and testing specialized transit equipment for low mobility transit users.
- Administer new federal programs providing operating assistance funds for intercity bus and commuter rail services.
- Administer grants and contracts for State supported commuter rail services.
- Continue improvement of Amtrak service.
- Initiate implementation of projects identified in the State Rail Plan for freight services.
- Update the priority listing for acquisition of abandoned railroad property for alternative transportation users.
- Administer the abandoned railway rights of way program as established by Chapter 1349, Statutes of 1976 and subsequent legislation.
- Administer the passenger railroad grade separation program established by Section 57 of Chapter 161, Statutes of 1979.
- Complete development of the State program of projects for intercity public ground transportation commute rail services and intermodal passenger transfer terminal facilities.
- Implement the provisions of Chapter 460, Statutes of 1978 and Chapter 161, Statutes of 1979 for intermodal passenger transfer terminal facilities, and administer the new federal terminal development and transportation centers program.
- Provide smaller transit operators with system design, planning, grant application, marketing, service implementation and technical assistance and provide transit management and training assistance.
- Complete federally funded studies on transit needs in nonurbanized areas, transit equipment brokering, transit connectivity in urban areas, and transit performance measures.
- Evaluate completed demonstration projects initiated under the provisions of Chapter 1130, Statutes of 1975.
- Administer the transit funding program established under provisions of Section 34.5 of Chapter 161, Statutes of 1979 and the fixed guideway funding program established by Section 46 of the same legislation.

## DEPARTMENT OF TRANSPORTATION—Continued

## a. Full Mobility Transportation

This element includes activities to provide low mobility groups with transportation facilities and services which meet their needs and are essentially equivalent to those provided to the general public.

## Output

—Improve coordination and consolidation of transportation services to low mobility groups to eliminate duplication of services and develop added services where necessary.

—Acquire, modify and deliver specialized transit vehicles and related equipment to private nonprofit organizations providing transportation to elderly and handicapped people under the UMTA Section 16(b) (2) program.

—Develop, test and prepare reports on wheelchair securement devices, wheelchair crashworthiness, and bus passive wheelchair lifts.

	1978-79		1979-80		1980-81	
	State Operations	Subventions	State Operations	Subventions	State Operations	Subventions
Expenditures .....	\$725,987	—	\$761,233	—	\$636,355	—
Personnel years .....	17	—	17.8	—	18.8	—

## a.1 Full Mobility Specialized Services

Initiate development of specialized transit services for transit dependent people and coordinate and consolidate transportation programs for elderly, handicapped, and other low mobility persons.

	1978-79		1979-80		1980-81	
	State Operations	Subventions	State Operations	Subventions	State Operations	Subventions
Expenditures .....	\$205,137	—	\$232,984	—	\$239,518	—
Personnel years .....	7.9	—	7.6	—	8	—

## a.2 Provision of Specialized Equipment

Provide specialized transportation equipment for low mobility transit users through acquisition of specialized vehicles and related equipment.

	1978-79		1979-80		1980-81	
	State Operations	Subventions	State Operations	Subventions	State Operations	Subventions
Expenditures .....	\$331,620	—	\$375,659	—	\$233,501	—

## a.3 Specialized Equipment Research and Development

Development and testing of wheelchair securement devices, wheelchair crashworthiness, and bus passive wheelchair lifts.

	1978-79		1979-80		1980-81	
	State Operations	Subventions	State Operations	Subventions	State Operations	Subventions
Expenditures .....	\$189,230	—	\$152,590	—	\$163,336	—
Personnel years .....	2.2	—	3.1	—	3.3	—

## b. Transit Operator Assistance

This element includes activities to provide technical, planning and management assistance to transit operators to ensure efficient services and effective utilization of available State, federal and local funds.

## Output

—Administer federal capital and operating assistance funds used to maintain or expand transit services in urbanized areas less than 200,000 population and nonurbanized areas under UMTA Section 5 and 18 programs.

—Evaluate requests for and administer State financial assistance for Article XIX transit guideway projects.

—Review and approve project financial plans, development schedules, development policies, procedures, performance standards and management control systems for transit guideway proposals as required under the provisions of Chapter 1139, Statutes of 1975.

—Assist transit operators in qualifying for and receiving funding for transit related projects under the FAU program.

—Update priority listing for acquisition of abandoned railroad property for alternative transportation uses.

—Administer the Transportation Development Act including evaluating and making recommendations on appeals and budget waiver requests, coordinating financial and performance audits, proposing Administrative Code revisions, and monitoring expenditures relative to the Transportation Development Act to ensure that local transit operators receive their appropriate share of funds in conformance with State laws and rules.

—Administer State Transit Assistance program established under Chapter 161, Statutes of 1979.

—Provide smaller transit operators with technical and management assistance in such areas as planning, grant application system design, marketing, and system delivery.

—Ensure public transportation needs are adequately addressed in local, regional, and State planning documents.

—Provide a consistent, coordinated process and plan for the development of public transportation in non-urbanized areas.

—Assist in the development and analysis of the new transit guideway facilities and administer the guideway program established under Section 34.5 of Chapter 161, Statutes of 1979.

—Administer the abandoned railway rights of way program as established by Chapter 1349, Statutes of 1976 and subsequent legislation.

—Administer the passenger railroad grade separation program established by Section 57 of Chapter 161, Statutes of 1979.

—Administer transit program established under provisions of Section 34.5 of Chapter 161, Statutes of 1979 and fixed guideway program established by Section 46 of the same legislation.

**c. Interregional and Intercity Public Transportation**

This element includes activities to improve interregional and intercity public ground transportation throughout the State.

**Output**

—Provide expanded intercity and commuter passenger rail and bus service in and between the Los Angeles-San Diego and Sacramento-Bay Area corridors.

—Provide improved rail and bus passenger facilities.

—Initiate implementation of identified commuter rail service needs and opportunities in the greater Los Angeles area.

—Maintain and improve commuter rail service on the San Francisco Peninsula.

—Develop and implement marketing plans for commute, interregional and intercity transit services.

—Implement projects identified in the State Rail Plan for freight services and update the State Rail Plan with State rail freight policies.

—Identify State bus policies and develop statewide intercity bus plan to aid in obtaining discretionary UMTA grants and utilizing available State resources for funding operation costs of intercity bus services.

—Develop legislation to permit regulatory reform of bus and paratransit industry.

## d. Transfer Facilities and Services

This element includes activities to improve facilities and services for transferring passengers between modes of transportation.

## Output

—Initiate construction of intermodal passenger transfer facility projects established by Chapter 1349, Statutes of 1976 and funded under Chapter 460, Statutes of 1978 and subsequent legislation.

—Complete the development of the statewide plan for intermodal passenger transfer facilities to aid in obtaining the State's fair share of discretionary UMTA grants and effective utilization of available State resources.

## e. Transportation Demonstration Projects

This element includes activities to undertake and evaluate legislatively established demonstration projects, as well as demonstration projects and technical studies performed under contract with the federal government. These projects are undertaken to investigate and demonstrate improvements in the state-of-the-art of transit service delivery, management and planning techniques which have the potential for statewide application and will improve transit efficiency and effectiveness.

## Output

—Complete sixty demonstration project evaluations of projects undertaken pursuant to Chapter 1130, Statutes of 1975 and Chapter 1349, Statutes of 1976.

—Complete projects, studies and prepare reports on the following:

- performance guide to small and medium sized buses
- improvements in bus interiors to reduce accidents and improve passenger safety
- transit needs and patronage forecasting in rural and small urban areas
- transit performance measures
- transit connectivity in urban areas
- demand responsive service
- transit equipment brokering

## f. Administration

This element provides the management, legal, administrative and technical services required to support the entire Mass Transportation Program. Included are: Program Administration, General Administration, Professional and Technical Services, and External Costs. The fluctuation of input levels in the components of this element are due to rearrangement of line items between the components during 1979-80 and 1980-81.

The reduction in Program Administration in 1979-80 and 1980-81 brings the component in line with program definitions. In 1980-81 there is a revised proration to the Modal Programs to reflect equalizing of service levels in General Administration. The reduction in professional/technical services for 1980-81 reflects a new procedure for budgeting technical services throughout the program structure.

## Output

- Provide management and administrative services.
- Administer contracts and agreements.
- Coordinate training courses for Mass Transportation employees.
- Complete program evaluation and monitoring system.
- Analyze and make recommendations on legislative bills.
- Develop the Division/Department legislative proposal package.

	1978-79		1979-80		1980-81	
Input	State Operations	Subventions	State Operations	Subventions	State Operations	Subventions

## IV. TRANSPORTATION PLANNING

## Program Objectives and Description

The Transportation Planning Program is designed to ensure the timely preparation of reports required by the Ingalls-Alquist Act (AB 402) and the California Transportation Commission Guidelines. Regional transportation plans are monitored, coordinated and evaluated and transportation improvement programs are reviewed. Analyses are conducted on the STIP cumulative impact as well as on State, federal and departmental plans and policies for which energy efficiency and contingency analysis and recommendations are emphasized. District planning, division plans, programs and legislative proposals are coordinated. In addition, A95/CEQA review of non-transportation plans and programs that may impact state transportation systems is provided, along with technical assistance and data for CALTRANS' districts, modal divisions, regional agencies and others. Further, federal, State and discretionary grant sources, applications and funding for the Department are coordinated. *In 1980-81, reductions are proposed primarily in corridor studies and administrative activities.*

## Authority

Chapter 1253, Statutes of 1972.  
Chapter 1106, Statutes of 1977.

## Summary of Major Products

## Regional

- Forty-three Regional Transportation Plan updates responsive to State policies.
- Thirty air quality non-attainment area plans.
- Transportation Improvement Programs and Transportation Systems Management Elements by ten metropolitan planning organizations.

## State

- Transportation/Land Use Model
- Statewide travel surveys and forecasts
- Transportation Systems Management Plans and Reviews
- Federal, State and discretionary grant awards
- S.T.I.P. Cumulative Impact Analysis
- Eleven Annual District Planning guides
- Approved requests for project development
- RTP/STIP Comparison report
- RTIP/STIP Comparison report

## a.2 Program Analysis

The Program Analysis component includes resources to prepare evaluations of: 1) Transportation Improvement Programs as required by the Alquist-Ingalls Act of 1977, 2) The cumulative environmental impact analysis of the State Transportation Improvement Program required by the California Transportation Commission and the Federal A-95 Clearinghouse Review. Statistical analysis and data management activities to support the Department's programs are also funded by this item.

## DEPARTMENT OF TRANSPORTATION—Continued

## Output

- State and Regional TIP Evaluations
- Regional Plan and Transportation Improvements Program evaluations
- Cumulative Impact Analysis
- A95/CEQA Review
- Interactive Transportation Land Use Model demonstration project
- Statewide Travel Survey analysis
- Statewide Travel Forecast update

	1978-79		1979-80		1980-81

## b. Regional Planning

The regional planning element provides resources for the technical support, development and evaluation of regional plans and transportation improvement programs to insure an orderly process and products that comply with federal and State requirements. A level program is planned for the 1980-81 budget year.

## Output

- Regional Transportation Plans
- Forty-three overall work programs
- Ten Transportation Improvement Programs
- Ten Transportation Systems Management elements
- Thirty air quality non-attainment area plans

	1978-79		1979-80		1980-81

## c. Administration

This element provides the management, legal, administrative and technical services required to support the entire Planning Program. Included are: Program Administration, General Administration, Professional and Technical Services, and External Costs. The fluctuation of input levels in the components of this element are due to rearrangement of line items between the components during 1979-80 and 1980-81.

The reduction in Program Administration in 1979-80 and 1980-81 brings the component in line with program definitions. In 1980-81 there is a revised proration to the Modal Programs to reflect equalizing of service levels in General Administration.

## Output

- Management of the planning effort in CALTRANS.
- Clerical and administrative services.

Expenditures .....	—	—	\$95,810	—	\$97,768	—

## d. Reimbursed Services

This element provides the staff to assist regional planning agencies and to ensure coordination of regional and State planning activities. It also provides Caltrans' planning expertise to other State agencies. A level program is planned for the 1980-81 budget year.

## Output

- Prepare rural plans for Local Transportation Commissions as required by the Government Code.
- Prepare technical reports for the Census Data Center.
- Perform detailed transportation planning analyses for regional agencies.

## OFFICE OF TRAFFIC SAFETY

The principal objective of this office is to coordinate an effective attack on the problem of traffic safety, and to assist in assuring that the limited resources available are used most efficiently. This is accomplished through an annually updated California Traffic Safety Program which implements a comprehensive statewide plan to assist the activities of the approximately 3,100 public agencies and private organizations, now spending over \$1 billion per year on traffic safety.

Participating traffic safety grants to State agencies and local governmental entities approximating \$15 million per year are reviewed, approved and monitored by this office. The administrative costs of the Office of Traffic Safety are reimbursed from federal funds using the applicable "Sliding Scale Rate" developed and published annually by the Federal Government. The remainder is to be funded from the State Transportation Fund, Motor Vehicle Account.

<sup>1</sup> The total for current year represents the current federal apportionment and unexpended apportionments from previous years. Federal funds are available for a period of three years following the year of apportionment. (Funds included in the apportionment effective October 1, 1979 are subject to lapse on September 30, 1983.) The total for budget year represents only the new apportionment expected for Fiscal Year 1981.

<sup>2</sup> These totals include federal and State share of office support.

### I. TRAFFIC MANAGEMENT

#### Program Objectives and Description

The objectives of the Traffic Management Program are to minimize deaths, injuries, and property losses due to traffic accidents; to minimize traffic delays to the motoring public; and to provide protection and assistance to the motoring public.

The Department is proposing the following budget adjustments for the 1980-81 fiscal year.

1. Implementation of a Physical Performance Program in which annual testing of every uniformed employee will be conducted to determine compliance with the Departments' job-related physical fitness standards.

2. Communication System Equipment to enhance, add and establish rapid communications statewide for enforcement purposes.

3. Completion of the implementation of the Management Information System.

4. Communications Center staffing to expand the existing dispatching coverage and capability.

5. Additional funds for overtime payment to uniformed employees for increased road patrol during holiday seasons and special events.

6. Funds for emergency medical training and to provide a trauma kit and associated medical equipment to each officer and sergeant trained as an Emergency Medical Technician.

7. Funds for a communication study to research advanced communications technologies which will more readily adapt to the departments' operations.

## DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—Continued

## a. Accident Control

The California Highway Patrol patrols 14,295 miles of State highway and 83,704 miles of county roads on which personnel are deployed based upon analysis of traffic accident report data.

The major activities which contribute to accident control are arresting violators, issuing written and verbal warnings to motorists, officer training, following up on accident investigations, booking suspects, attending criminal court and verifying that mechanical problems have been corrected. Enforcement activity in this element is primarily for violations of the California Vehicle Code and ranges from in-custody arrests for felony driving under the influence (DUI) to speeding citations.

	Effectiveness Levels			
	Actual 77-78	78-79	Estimated 79-80	80-81
<b>Measures of Effectiveness—Program</b>				
1. Traffic collision accident rate per 100 million motor vehicle miles of travel (CHP jurisdiction)				
a. Fatal accident rate	2.3	2.3	2.2	2.3
b. Injury accident rate	61.2	59.2	58	60
c. Noninjury accident rate	107.8	97.7	95	100
2. Injury rate per million motor vehicle miles of travel (CHP jurisdiction)				
a. Mileage death rate	2.7	2.7	2.6	2.7
b. Mileage injury rate	94	91.4	90	93
<b>Program Size Indicators</b>				
1. Number of traffic collisions:				
a. Fatal	2,652	2,827	2,600	2,800
b. Injury	69,486	71,245	68,400	73,200
c. Property damage	122,454	117,656	112,000	122,000
2. Number of persons injured:				
a. Fatal injuries	3,054	3,269	3,070	3,300
b. Nonfatal injuries	106,788	110,093	106,200	113,500
3. Annual dollar value (in millions) on:				
a. Fatal accidents	\$810	\$865	\$795	\$855
b. Injury accidents	1,010	1,035	995	1,065
c. Noninjury accidents	80	75	75	80
4. Number of motor vehicle miles traveled (in millions)	113,600	120,400	118,000	122,000
5. Number of hours of visible unit enforcement	2,541,833	2,500,000	2,350,000	2,350,000
6. Number of hazardous arrests	1,808,663	1,861,000	1,800,000	1,800,000

	1978-79	1979-80	1980-81
<b>Input</b>			
Expenditures	\$104,458,851	\$135,358,172	\$134,631,952

## DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—Continued

## c. Protection and Assistance to Highway Users

The purpose of this element is to provide aid to disabled vehicles, information and assistance to motorists, check registration or license violations, attend civil court, assist other government agencies, arrest non-vehicle code violators, administer first aid, provide emergency transportation of people and medical supplies, and check incidents and abandoned vehicles.

	Effectiveness Levels			
	Actual 77-78	78-79	Estimated 79-80	80-81
<b>Measures of Effectiveness—Program</b>				
1. Ratio of services rendered to services needed .....	1:4.0	1:4.0	1:4.0	1:4.0
2. Percent change in unit patrol hours per 100 million motor vehicle miles of travel .....	-18.3	-7.4	-3	-1
<b>Program Size Indicators</b>				
1. Number of patrol vehicle miles traveled .....	95,741,220	93,000,000	92,000,000	92,000,000
2. Number of motor vehicle miles traveled (in millions) .....	113,600	120,400	118,000	122,000
3. Number of patrol time hours .....	2,541,833	2,500,000	2,250,000	2,250,000
4. Number of arrests for highway crimes other than Vehicle Code ....	31,212	19,358	20,000	20,000
5. Number of services provided:				
a. Information provided .....	689,866	587,000	566,000	671,000
b. Transporting lifesaving emergency provisions .....	1,243	1,280	1,250	1,275
c. Disabled vehicles aided .....	753,416	752,000	760,000	770,000

		193.8	228.1	229.7

## d. Flight Operations

The California Highway Patrol operates four light turbine helicopters and four single-engine airplanes. These aircraft are used to supplement and augment ground unit coverage, provide air support to other public service agencies, and provide rapid transportation of critically injured persons from remote and/or inaccessible areas to adequate medical facilities. Two (2) additional helicopters have been approved for the 1979/80 fiscal year bringing the total to six (6).

	Effectiveness Levels			
	Actual 77-78	78-79	Estimated 79-80	80-81
<b>Measures of Effectiveness—Program</b>				
1. Services provided per patrol hour .....	6.2	7.7	8	8.5
2. Assists to CHP ground units .....	14,246	24,600	25,000	25,500
3. Assists to other agencies .....	5,242	8,023	8,200	8,500
4. Medical transportation incidents including transport of blood, tissue, equipment and persons .....	130	224	250	300

## DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—Continued

## II. REGULATION AND INSPECTION

## Program Objectives and Description

The major objectives of the program are to protect the public by establishing conditions for the safe operation of specified vehicles and securement of loads, to protect the highways by control of vehicle weight; and to abate abandoned/public nuisance vehicles from public and private property.

The budget proposes the addition of nine positions to establish a pilot program of inspecting truck terminals for violations related to the transportation of hazardous materials.

## Authority

The multiple mandates for the program are stated within the elements.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## a. School Pupil Transportation Safety

The objectives of this element are to reduce schoolbus accidents by ensuring that schoolbus drivers meet and maintain certification requirements and that all schoolbuses are free of mechanical defects. Chapter 496, Statutes of 1977, placed the administration of the schoolbus safety program with the Department. Senate Bill 399, Chapter 1039, Statutes of 1979, amended Vehicle Code Section 42201, effective September 26, 1979, to phase the Department of the California Highway Patrol out of administering school crossing guard service by July 1, 1980.

## Authority

Vehicle Code, Sections 2807, 2807.1, and 12522; Education Code, Section 39831; Administrative Code, Section 14204.

## DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—Continued

## Measures of Effectiveness—Program

	Effectiveness Levels			
	Actual 77-78	78-79	Estimated 79-80	80-81
1. Schoolbus injury accident rate per million school bus miles .....	1.3	1.2	1.2	1.2
2. Pupil pedestrians injured at crossings manned by CHP contract personnel .....	1	2	2	2

## Program Size Indicators

1. Number of schoolbuses:				
a. Inspected .....	19,958	18,100	18,500	18,500
b. Subject to inspection .....	16,800	17,376	17,300	17,300
2. Number of reinspections .....	12,756	10,000	9,000	9,000
3. Number of schoolbus terminals:				
a. Inspected .....	5,342	4,375	4,100	4,500
b. Subject to inspection .....	1,552	1,552	1,552	1,552
4. Number of schoolbus driver applications processed .....	15,500	25,070	27,000	30,000
5. Number of schoolbus driver certificates issued .....	14,500	14,687	15,500	15,500
6. Number of schoolbus accidents:				
a. Total .....	1,720	1,816	1,820	1,820
b. Injury .....	330	388	340	340
c. Fatal .....	2	0	2	1
7. Number of schoolbus miles traveled (in millions) .....	215.6	231.3	240	250.1
8. Number of counties contracting with CHP to provide school crossing guards .....	14	14	-	-
9. Number of school crossings manned by CHP contract employees ..	292	290	-	-
10. Number of school crossing guards .....	412	412	-	-

## Input

	1978-79	1979-80	1980-81

Nonuniformed .....	396.1	36.6	36

## b. Regulated Special Purpose Vehicles

The purpose of this element is to protect the public health and safety by adopting and enforcing reasonable regulations regarding the operation, equipment, and certification of drivers of emergency ambulances, by licensing the operation of armored cars and privately owned emergency ambulances, and by issuing permits for certain specified vehicles to be equipped and operated as authorized emergency vehicles.

## Authority

Vehicle Code, Sections 2416, 2417, 2501, 2510, and 2512.

## Measures of Effectiveness—Program

	Effectiveness Levels			
	Actual 77-78	78-79	Estimated 79-80	80-81
1. Percent of armored cars, ambulances, and other authorized vehicles found in compliance at the time of the periodic inspection .....	85%	83%	85%	85%

## Program Size Indicators

1. Number of:				
a. Ambulance licensees .....	265	272	270	275
b. Armored car licensees .....	10	10	12	12
c. Authorized emergency vehicle permittees .....	252	259	264	270
d. Public agencies operating ambulances .....	167	171	160	160
2. Number of ambulance and armored car licenses and authorized emergency vehicle permits:				
a. Issued .....	460	363	442	397
b. Denied .....	16	25	25	15
c. Cancelled .....	112	58	60	60
d. Outstanding .....	527	541	547	552
3. Number of ambulance and armored car identification cards:				
a. Issued .....	579	574	600	625
b. Cancelled .....	319	247	250	250
c. Outstanding .....	1,506	1,563	1,575	1,600
4. Number of vehicle inspections:				
a. Ambulances .....	2,736	2,848	3,000	3,100
b. Armored cars .....	420	438	430	430
c. Authorized emergency vehicles .....	145	104	160	110
5. Number of vehicles in compliance when first inspected:				
a. Ambulances .....	2,284	2,375	2,550	2,635
b. Armored cars .....	366	348	372	365
c. Authorized emergency vehicles .....	144	101	136	136
6. Number of vehicles approved after correction of defects:				
a. Ambulances .....	252	473	450	465
b. Armored cars .....	54	91	65	70
c. Authorized emergency vehicles .....	1	3	12	8
7. Number of ambulance services granted exemptions from the regulations .....	15	7	14	6

Expenditures .....	\$222,294	\$263,188	\$263,583
Personnel years .....	7.2	7.3	7.3
Uniformed .....	1.1	1.1	1.1
Nonuniformed .....	6.1	6.2	6.2

## e. Commercial Vehicle Inspection and Enforcement

The objectives of the commercial vehicle enforcement and inspection program are to protect the public from the potential hazards of trucks and truck-trailer combinations which are unsafe to operate due to hazardous loads or faulty equipment, protect the public investment in highways by ensuring that truck overloads are reduced to a minimum or eliminated, and to ensure that proper registration fees are paid in order to provide funds for highway maintenance and construction.

## Authority

Vehicle Code, Sections 2802, 2804, 2805, and 2813.

## Measures of Effectiveness—Program

	Effectiveness Levels			
	Actual 77-78	78-79	Estimated 79-80	80-81
1. Commercial vehicle accidents per 100 million miles resulting from mechanical defects:				
a. Injury accident rate .....	5.2	5.2	5.2	5.2
b. Fatality accident rate .....	0.08	0.08	0.08	0.08
c. Noninjury accident rate .....	13.2	13.2	13.2	13.2
2. Annual dollar value of property damage (in millions) .....	\$68	\$69	\$70	\$74.9

## Program Size Indicators

1. Commercial vehicle population:				
a. Domestic .....	1,442,387	1,534,251	1,650,000	1,667,000
b. Foreign .....	145,238	166,140	180,000	182,000
2. Total commercial vehicle miles driven (in millions) .....	4,550	4,700	4,900	5,400
3. Number of commercial vehicle accidents caused by mechanical defects or failure to comply with vehicle size, weight, loading, commodity transportation, or other requirements:				
a. Injury .....	235	260	270	280
b. Fatal .....	4	4	4	5
c. Noninjury .....	594	625	650	700
4. Number of commercial vehicle inspections .....	246,426	297,482	300,000	300,000
5. Number of commercial vehicle reinspections .....	118,298	113,583	115,000	115,000
6. Number of enforcement documents issued .....	305,499	300,000	300,000	300,000
7. Number of vehicles weighed .....	4,529,906	4,472,000	4,500,000	4,500,000
8. Number of commercial vehicles having mechanical defects or in violation of requirements relating to vehicle registration, size, weight, loading, or commodity transportation .....	185,000	141,933	142,000	143,000
9. Number of commercial vehicle inspection facilities operated .....	9	9	9	9
10. Number of platform scales operated .....	40	40	40	40
11. Number of portable scales in use .....	288	288	288	288

## Input

	1978-79	1979-80	1980-81
Expenditures .....	\$8,801,777	\$11,040,973	\$10,905,877

## j. Vehicle Abatement

Vehicle Abatement is a statewide program to provide for removal of abandoned vehicles from public and private property, excluding streets and highways, for the beautification of the state, protection of public health, and reclamation of valuable recyclable metals.

The Abandoned Vehicle Trust Fund, which funds the Abandoned Vehicle Abatement Program, was created in 1973 with the one-time, one dollar service fee paid in addition to the 1973 vehicle registration fees. Surplus money investments have provided the only additional revenue to the fund.

## Authority

Vehicle Code, Section 22710.

## Measures of Effectiveness—Program

	Effectiveness Levels			
	Actual 77-78	78-79	Estimated 79-80	80-81

1. Total number of derelict vehicles dismantled.....	13,181	12,000	12,000	12,000
2. Dollar value of recycled metal.....	\$369,068	\$348,000	\$348,000	\$348,000

## Program Size Indicators

1. Number of abandoned vehicles dismantled .....	13,181	12,000	12,000	12,000
2. Number of cities and counties participating in the program .....	135	123	130	130
3. Number of cities and counties which requested CHP abatement service .....	14	15	15	15

## Input

## DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—Continued

## a. Vehicle Theft Control

The objectives of this element are: (1) to protect the public from economic loss as a result of vehicle theft through the support of local law enforcement; and (2) to motivate the public to protect their vehicles from theft which costs citizens of California an estimated \$100 million annually.

	Effectiveness Levels		
	Actual 78-79	Estimated 79-80	Proposed 80-81
<b>Measures of Effectiveness—Program III</b>			
1. Number of investigative and prosecution assists provided to allied agencies .....	38,405	41,170	43,022
2. Number of stolen vehicle recoveries and recovery assists .....	1,875	1,968	2,066
3. Number of vehicle theft training programs conducted .....	590	797	836
4. Number of arrests and arrest assists for vehicle theft .....	1,078	1,140	1,174

## Program Size Indicators

1. Population of California .....	22,368,000	22,659,000	23,114,445
2. Number of vehicles registered in California .....	16,409,040	16,573,130	16,594,675
3. Number of stolen vehicles statewide .....	161,735	181,143	201,068
4. Total number of recoveries statewide .....	137,127	146,725	155,528
5. Statewide recovery rate for stolen vehicles .....	85%	86%	87%
6. Total number of CHP recoveries .....	15,549	16,792	18,135
7. Total number of CHP arrests for vehicle thefts .....	4,461	4,684	4,918

## Input

	1978-79	1979-80	1980-81

## a. Management and Command

This element contains those functions and activities directly concerned with determining the purpose, establishing the methods, and controlling the execution of the department's role in state government. The following organizational units, together with directly related staff services, are included:

1. Office of the Commissioner;
2. Office of the Assistant Commissioner—field;
3. Office of the Assistant Commissioner—staff;
4. Offices of Division Commanders;
5. Offices of the Area Commanders.

The functions performed by this element are policy formulation, direction, and coordination.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$8,533,642	\$10,114,031	\$10,114,147
Personnel years.....	267.5	265.3	263.3
Uniformed.....	157.1	151.3	152.4
Nonuniformed.....	110.4	114	110.9

## b. Budget and Fiscal Management

The various operations involved in fiscal management are divided between two organizational units—the Accounting Section and the Budget Section.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$1,017,069	\$1,219,361	\$1,223,197
Personnel years.....	51.8	53.5	52
Nonuniformed.....	51.8	53.5	52

## DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—Continued

## c. Planning and Analysis

This element contains the necessary resources for analysis of the traffic environment and the preparation of plans for the use of uniformed personnel, equipment, and facilities.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$1,365,802	\$1,703,153	\$1,655,521
Personnel years .....	56.3	62.2	58.2
Uniform .....	17	17.3	16.9
Nonuniform .....	39.3	44.9	41.3

## d. Training

The various types of training given to personnel enable them to provide protection of property and life, traffic enforcement, and services to the motoring public.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$3,704,803	\$8,521,991	\$8,132,878
Personnel years .....	123.8	283.6	277.4
Uniform .....	41.8	48.2	48.5
Nonuniform .....	82	235.4	228.9

## e. Administrative Services

This element contains auxiliary and specialized services essential to the administration and operation of the Department, including automotive management; electronic communications; public information; material and supply management; facilities development and maintenance; records management; central files; and duplicating, mail, and messenger services.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$14,398,444	\$17,819,766	\$18,041,483
Personnel years .....	364.2	387.5	347.8
Uniform .....	52.9	52.7	53.1
Nonuniform .....	311.3	334.8	294.7

## f. Statewide Integrated Traffic Records System (SWITRS)

This system is the record keeping network for departmental operations and is the only source of certain operational data for the California Department of Transportation and the Department of Motor Vehicles.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$1,089,548	\$1,170,626	\$1,224,741
Personnel years .....	54.1	47.4	46.1
Uniform .....	1	1	1
Nonuniform .....	53.1	46.4	45.1

## DEPARTMENT OF MOTOR VEHICLES

The Department of Motor Vehicles' objectives are:

- To protect public interest by identifying ownership through the process of vehicle registration.
- To promote safety on highways by licensing and controlling drivers.
- To provide public protection by licensing and regulating occupations and businesses related to manufacture, transporting, sale, and disposal of vehicles and occupations and businesses related to the instruction of drivers in safe operation on the highways.
- To encourage California motorists to maintain financial responsibility.
- To provide services, not directly related to motor vehicles or drivers' licensing, to the public, and to other state agencies as required by statute.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Vehicle Licensing and Titling .....	\$75,731,710	\$86,469,915	\$87,031,884
II. Driver Licensing and Control .....	53,072,714	60,143,162	60,081,195

Personnel years .....	7,266.1	7,049.5	7,113

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel Years	Dollars
I. a.	International Registration Plan Study .....	-	\$100,000
I. b.	DMV Automation: Phase I Revenue Accounting .....	-5.2	\$850,224
I. b.	South Coast Air Basin Mandatory Emission Inspection Program .....	19.4	359,136
II., V. a.	Drivers' Licenses Micrographics System .....	-29.6	89,655
I. a.	Zip Code Pre-Sort and Bulk Mailing of License Plates .....	4.2	-507,833
II. a.	Driver License Renewal Extensions .....	-181.8	-3,193,743

### I. VEHICLE LICENSING AND TITLING

#### Program Objectives and Description

The Department, through the Vehicle Licensing and Titling Program, identifies and issues identifying indicia to approximately 19,000,000 vehicles in California, determines and issues evidence of ownership, collects fees and revenue, maintains vehicle records and provides vehicle information, records and statistics.

The Department is proposing the following significant budget adjustments:

- The budget proposes a reduction of 5.2 personnel years and an addition of \$850,224 to continue the automation of revenue accounting in field offices. The Department is expected to realize a reduced expenditure of over \$500,000 per year starting with the 1981-82 fiscal year.
- The budget proposes the addition of 19.4 personnel years at a cost of \$359,136 to handle registration items subject to the South Coast Air Basin Mandatory Emission Inspection Program.
- The budget proposes the addition of 4.2 personnel years to pre-sort and bulk mail license plates in order to take advantage of reduced postal rates. The net effect of this activity will be a reduction of \$507,833 in 1980-81.
- The budget proposes the addition of \$100,000 to conduct a study of the costs and benefits of California entering into the International Registration Plan.

#### Authority

The Vehicle Code, Division 2, Chapter 1, Articles 1, 2, and 3, and Division 3, Chapters 1 through 6.  
The Revenue and Taxation Code, Division 2, Part 5.

## DEPARTMENT OF MOTOR VEHICLES—Continued

Program Elements	78-79	79-80	80-81	1978-79	1979-80	1980-81
a. Vehicle ownership, registration documentation, and certificate issuance .....	1,596.4	1,511.4	1,526.8	\$34,013,116	\$38,584,664	\$38,988,357
b. Vehicle fee collection and accounting .....	1,146.1	1,081.8	1,090.6	22,823,587	25,934,288	26,056,429
c. Vehicle record and file maintenance .....	315.5	327.4	327.9	8,170,986	9,537,005	9,678,663
d. Vehicle information and sale of records .....	153	152.6	154.3	3,724,520	4,283,104	4,383,771
Administrative distribution .....	354.2	364.9	358.4	6,999,501	8,130,854	7,924,664

## a. Vehicle Ownership, Registration Documentation, and Certificate Issuance

Documentation is the act of gathering together a group of forms and legal documents which (1) prove degrees of ownership, determine the right of ownership, and record interest in vehicles; (2) provide for collection and evaluation of data to insure that vehicles are lawfully entitled to be registered; (3) provide a basis for fee computation, statistical reports, and reconciliation of bank deposits; and (4) provide the basis for assignment and issuance of registration and ownership certificates, license plates and validating devices.

## Output

Vehicle Registrations Processed:	1978-79	1979-80	1980-81
New vehicles .....	1,653,600	1,607,400	1,669,600

Expenditures .....	1,596.4	1,511.4	1,526.8	\$34,013,116	\$38,584,664	\$38,988,357

## b. Vehicle Fee Collection and Accounting

Revenue is collected to support the Department of Motor Vehicles, California Highway Patrol, and vehicle-related programs of other departments as well as producing income for the State Highway Account. Vehicle license fees, which are essentially an in lieu property tax on vehicles, are collected for apportionment to cities and counties. The basic fees collected are registration, weight, service, and vehicle license fees. The registration, weight, and vehicle license fees are collected yearly when due.

## Output

Expenditures .....	1,146.1	1,081.8	1,090.6	\$22,823,587	\$25,934,288	\$26,056,429

## c. Vehicle Record and File Maintenance

To help process applications for vehicle registration and titling, and to meet the demands of the public, private companies, and law enforcement for vehicle registration and ownership information, records of registrations, and title transactions are maintained in the Department's Sacramento headquarters.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	315.5	327.4	327.9	\$8,170,986	\$9,537,005	\$9,678,663

## d. Vehicle Information and Sale of Records

The Department supplies information or copies of records of vehicle information concerning vehicles or their owners on two bases: (1) to governmental agencies without charge, and (2) to private citizens and companies for a charge equivalent to the cost for producing the information.

## Output

Vehicle Information Services:	1978-79	1979-80	1980-81
Fee requests—item count .....	975,000	1,043,400	1,139,400
Fee requests (income) .....	\$691,004	\$739,500	\$807,500
No fee requests—item count .....	14,813,500	15,942,800	17,230,100
Records produced for private companies (EDP)—item count .....	17,718,828	16,517,000	17,049,000
Records produced for private companies (EDP) (income) .....	\$442,971	\$412,900	\$426,200

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	153	152.6	154.3	\$3,724,520	\$4,283,104	\$4,383,771

## DEPARTMENT OF MOTOR VEHICLES—Continued

## II. DRIVER LICENSING AND CONTROL

## Program Objectives and Description

The Department, through the Driver Licensing and Control Program, promotes highway safety by limiting or withholding the privilege to drive upon streets and highways from motorists who cannot demonstrate an ability to drive within reasonably safe standards.

The Department is proposing the following significant budget adjustments:

1. The budget proposes a reduction of 29.6 personnel years and an addition of \$89,655 to implement an automated system for retention of driver license and identification card hard copy records. The Department is expected to realize a reduced expenditure of \$590,000 per year starting with the 1985-86 fiscal year. The pro rata share of this proposal is reflected in Program V. a.

2. In accordance with Chapter 625, Statutes of 1979, the budget proposes a reduction of 181.8 personnel years and \$3,193,743 to implement four year extensions of driver license renewals for good drivers.

## Authority

The Vehicle Code, Division 2, Chapter 1; Division 6.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

c. Certificate issuance .....	15.1	14.7	14.5	330,838	382,377	376,561
d. Information services.....	191.3	192.2	188.2	4,268,607	5,024,839	4,870,290
Administration distribution .....	218.8	221.8	218.3	4,376,009	5,126,346	5,068,903

## a. Driver's License Issuance

Applications for drivers' licenses are processed at local departmental offices or travel service locations. Renewal applications are produced at Sacramento and mailed to the driver prior to expiration. Examination consists of each applicant being required to demonstrate fitness to drive. This is accomplished via a series of law, vision, and, when required, driving tests.

Output	1978-79	1979-80	1980-81
Drivers' licenses issued .....	5,184,000	4,811,000	5,276,000
Driver's license fees .....	\$16,555,123	\$16,750,000	\$17,250,000
Input	78-79	79-80	80-81
Expenditures.....	1,557.4	1,417.2	1,435.4
	\$30,409,107	\$33,865,971	\$34,095,061

## b. Post-Licensing Control

The Department's post-licensing control program element, together with law enforcement and the courts, constitutes the primary effort of California to insure safety on our highways.

The statutes require withdrawal actions against drivers convicted of driving under the influence of intoxicating liquors and/or drugs, felonies involving use of a motor vehicle, failure to comply with the implied consent law, and judgment debtors in unsatisfied civil processes. Following licensing, physical or mental deterioration may occur which affects a person's ability to drive safely. Through rigid adherence to due process, appropriate control actions are instituted. Negligent operators are treated through a series of warning letters, group educational meetings, and face-to-face exchanges with a driver improvement analyst. Appropriate control actions are instituted if deemed necessary. The Department is continually evaluating its post-licensing control methods to insure optimum cost benefits.

Output	1978-79	1979-80	1980-81
Warning letters sent (negligent operator).....	118,000	122,000	126,000
Group Education Meetings (GEM) held .....	3,000	3,200	3,700
Hearings and reexaminations .....	84,280	78,600	73,400
Input	78-79	79-80	80-81
Expenditures.....	619.8	597.9	593.5
	\$13,688,153	\$15,743,629	\$15,670,380

## c. Certificate Issuance

Operators of schoolbuses, ambulances, farm labor vehicles, and heavy equipment require special testing and proof of acceptable medical standards. Schoolbus and farm labor certificate examinations are conducted by the California Highway Patrol with the processing and issuance accomplished by the Department of Motor Vehicles.

Output	1978-79	1979-80	1980-81
Certificates issued .....	19,520	19,950	20,090
Input	78-79	79-80	80-81
Expenditures.....	15.1	14.7	14.5
	\$330,838	\$382,377	\$376,561

## DEPARTMENT OF MOTOR VEHICLES—Continued

## d. Information Services

Driver record information, as permitted by law, is provided to governmental agencies through the California Law Enforcement Telecommunications System, teletype, telegram, microwave radio, telephone, remote inquiry devices, and mail. The general public may secure allowable information at the department headquarters, any of its field offices, or by mail.

## Output

## Driver's License Information Services:

	1978-79	1979-80	1980-81
Fee requests—item count .....	9,360,000	9,832,000	10,178,000
Fee requests (income) .....	\$4,960,355	\$5,211,000	\$5,394,000
No fee requests—item count .....	6,717,000	7,423,000	8,077,000

## III. OCCUPATIONAL LICENSING AND REGULATION

## Program Objectives and Description

The Occupational Licensing and Regulation Program is designed, structured, and administered to provide protection to the consumer—motorist through the licensing and regulation of the automotive industry, including vehicle dealers, manufacturers, distributors, lessors, lessor-retailers, transporters, dismantlers, verifiers, salespersons and representatives, and driving schools and instructors.

The objectives of this program are to minimize and, where possible, prevent public injury through maximum enforcement, education, and preventive efforts; to provide methods of recovery action for victims of financial losses; and to initiate appropriate actions against persons engaged in fraudulent, deceptive or otherwise unlawful practices.

## Authority

The Vehicle Code, Division 5.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

Administration distribution .....	46.3	46.7	47	1,042,590	1,234,217	1,267,037

## a. Occupational Licensing (Licensing of Vehicle Dealers, Manufacturers, Lessor-Retailers, Transporters, Dismantlers, Verifiers, Salespersons and Representatives, Driving Schools and Instructors)

Through the Department's licensing and related investigative processes, persons who are declared to be unqualified, financially irresponsible, or morally unfit are denied the opportunity of engaging in a business or occupation in which the public would otherwise remain unprotected.

Public needs within this element can only be served by developing and presenting evidence through legal processes to deny licenses to unsatisfactory applicants.

## Output

	1978-79	1979-80	1980-81
Business licenses issued .....	24,125	24,268	24,895

DEPARTMENT OF MOTOR VEHICLES—*Continued*

## b. Occupational Regulation (Regulation of Vehicle Dealers, Manufacturers, Distributors, Lessors, Lessor-Retailers, Transporters, Dismantlers, Salespersons and Representatives, Driving Schools and Instructors)

The Department initiates appropriate actions to suppress illegal activity by unlicensed persons; investigates the business practices of licensees for the purpose of preventing monetary loss to the public by determining if the licensee is complying with applicable laws, rules, and regulations; initiates actions against licensees not in compliance; responds to and disposes of valid consumer complaints to either prevent or recover loss of title to or financial investment in vehicles; and provides assistance to State and local consumer fraud units, including active field investigations, developing evidence, providing records and expert witness testimony in legal actions, both civil and criminal.

Output	1978-79	1979-80	1980-81

## DEPARTMENT OF MOTOR VEHICLES—Continued

## V. DEPARTMENT OF MOTOR VEHICLES ASSOCIATED SERVICES

## Program Objectives and Description

As directed by the Legislature, the Department of Motor Vehicles provides certain services not directly related to motor vehicles or driver licensing through its headquarters operation and network of field offices. Those services include: (1) California identification card issuance; (2) undocumented vessel registration, titling, and fee collection; (3) environmental license plate registration and fee collection; (4) use tax computation and collection; (5) off-highway vehicle registration, titling and fee collection, and (6) bicycle licensing.

## Authority

The Vehicle Code, Sections 13000–13007, 14902, and 14903; Division 3.5; Division 3, Article 8.5; Division 16.5; Section 4750.5; and Division 16.7. The Revenue and Taxation Code Sections 6248 and 6249, and Chapter 3.5.

DEPARTMENT OF MOTOR VEHICLES—*Continued*

## c. Environmental License Plate Registration and Fee Collection

The 1970 Legislature initiated a program of personalized license plates in response to public demand. Fees collected provide funds for the support of the California Environmental Protection Program.

Output	1978-79	1979-80	1980-81
Original registrations .....	175,000	210,000	225,000
Renewal registrations .....	334,000	468,000	623,000
Interchanges .....	49,100	65,400	81,800
Revenue .....	\$7,570,527	\$10,714,800	\$12,836,600

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	107	176.1	201.2	\$1,997,307	\$3,054,327	\$3,480,176

## d. Use Tax Computation and Collection

In 1963, the Legislature determined that revenue should be raised by the collection of a use tax on the retail sale of vehicles between individuals. The Department of Motor Vehicles collects the use tax, when due, on application for registration or transfer of registration. As of November 4, 1976, use tax is collected at the rate of 6 percent of the purchase price. An additional one-half percent use tax is collected in certain counties for the Bay Area Rapid Transit system, the Santa Cruz Metropolitan Transit District, and Santa Clara County.

Output	1978-79	1979-80	1980-81
Use tax collected for Board of Equalization .....	\$149,600,150	\$155,520,000	\$159,284,000

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	180	191.7	196.3	\$2,747,899	\$3,410,099	\$3,561,828

## e. Off-Highway Vehicle Registration, Titling, and Fee Collection

The Off-Highway Vehicle Law of 1971 requires the registration (identification) of most vehicles used exclusively off the highway for recreational purposes. The primary purpose of the fees collected is to establish and maintain recreational areas for the use of off-highway vehicles by the public.

Output	1978-79	1979-80	1980-81
Off-Highway Vehicle Registration:			
Original registrations .....	48,100	48,700	48,700
Renewal registrations .....	60,400	65,200	68,200
Off-Highway Vehicle Revenue:			
Motor Vehicle Account, State Transportation Fund, Service fees (\$5) and miscellaneous fees (\$3) .....	\$740,467	\$765,000	\$771,000
Off-Highway Vehicle Fund, recreational fees (\$6) .....	\$633,464	\$665,000	\$682,000
Off-Highway License Fee Fund, in-lieu tax (\$4) .....	\$422,545	\$444,000	\$455,000

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	58.7	55	55.9	\$1,218,591	\$1,369,787	\$1,400,838

## f. Bicycle Licensing

Bicycle licensing is the responsibility of those cities and counties which have adopted a bicycle licensing ordinance or resolution. The Department of Motor Vehicles is required by law to procure and distribute bicycle licensing indicia and registration forms to the cities and counties. It is also required to collect from those cities and counties a specified fee not to exceed departmental cost for such indicia issued.

Output	1978-79	1979-80	1980-81
Indicia issued .....	289,900	289,900	289,900

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	0.5	0.5	0.5	\$64,646	\$72,789	\$81,833

## VI. ADMINISTRATION

## Program Objectives and Description

The California Vehicle Code provides that the Department of Motor Vehicles will be under the control of a civil executive officer known as the Director of Motor Vehicles. The Director has the responsibility for administering and enforcing the provisions of the Vehicle Code, Revenue and Taxation Code, and other codes relating to the Department. The Director has the authority to adopt and enforce rules and regulations as may be necessary to carry out the provisions of these codes. The Director's immediate executive staff includes two deputy directors who coordinate the various line and staff functions through six division chiefs, research and development section, and internal audits. The division chiefs have the responsibility of carrying out the Department's program policies. The Director's staff includes Legislative Liaison Section, Press Liaison Office, Equal Employment Opportunity Office, multilingual programs office, employee relations officer, and the Legal Section. The Division of Administration provides the staff support for effecting the Director's administrative programs and the maintenance of the Department's program policies in terms of personnel management; fiscal and business management; and facilities planning. The Division of EDP Services provides and coordinates the overall electronic data processing functions within the department.

## TRAFFIC ADJUDICATION BOARD

### Program Description and Objectives

The Traffic Adjudication Board (TAB) was established January 1, 1979 to test the feasibility of processing and adjudicating traffic safety violations (infractions) administratively, rather than in the courts. Traffic safety oriented sanctions will be applied by traffic hearing officers. The program will be undertaken on a pilot basis in the municipal court districts of Sacramento and Yolo counties. From January 1, 1979 to June 30, 1980, program activities will focus on planning and development. The program will be operational from July 1, 1980 to July 1, 1984.

The objectives of the pilot program are to provide uniformity and consistency in the adjudication and sanctioning process, to be more economical and expeditious than the current judicial system, to improve the safe-driving characteristics of motorists, and be favorably received by both the motorists and law enforcement agencies.

Key elements of the pilot program include:

- a. The adjudication process will be handled by civil service hearing officers, rather than by judges or other judicial staff.
- b. The emphasis of the sanctioning process will be on traffic safety, rather than violator punishment.
- c. Monetary and driver improvement sanctions will be imposed according to a uniform sanction guide, taking into consideration the driver's prior statewide driving record.
- d. Any hearing officer decision may be appealed to the Traffic Adjudication Board and, thereafter, to the Superior Court.
- e. The program will be independently evaluated, with reports from the Traffic Adjudication Board delivered to the Governor and Legislature on January 1 of each year.
- f. The program may expand to other counties if authorized by the TAB and funding is available.

*The additional positions proposed for 1980-81 reflects the ongoing operational staffing required for Sacramento and Yolo counties.*

## STEPHEN P. TEALE CONSOLIDATED DATA CENTER

The principal objective of the Teale Data Center is the responsive and cost-effective operation of a large-scale computer center. Continued emphasis will be placed on:

1. Improving the average level of the Teale Data Center resource utilization.
2. Making EDP managers and non-technical staff of user departments aware of EDP products available from the Teale Data Center.
3. Security and confidentiality of data and facilities.

The Teale Data Center budget is based only on known costs and excludes provisions for future growth or program expansion. This allows the establishment of charging rates which reflect the cost of providing the specific Teale Data Center services at the time of budget submission. Since its formation, the Teale Data Center has experienced a continual growth in both the overall demand for data processing services and the number of customers the Center serves. As an indicator of this growth, the average number of monthly batch jobs processed at the Center in 1976, 1977, and 1978 were 60,170, 79,174, and 98,290 respectively. In the current year, the Center is processing an average of 106,654 batch jobs per month. Coupled with this growth in batch jobs is the fact that today's jobs are more complex and, therefore, demand more computing resources than those jobs of previous years. As further indicators of the Center's growth, the users' projection for increased on-line, real-time services is currently at 32% annually and the increased demand for timesharing services is currently at 30% annually. The number of customers the Center serves has increased from the original group of 34 to today's total of 75 separate State entities.

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel years	Dollars
Ia.	Implementation of Mass Storage System .....	4	\$750,109
Ib.	Implementation of State Controller's Office Computer System .....	22	389,250

### I. FACILITIES OPERATIONS

#### Program Objectives and Description

The goal of this program is the operation and support of a major, large-scale computing facility in a manner which will:

1. Ensure efficient utilization of Teale Data Center resources within the confines of current and proposed user workload characteristics.
2. Economically and effectively process the data and applications currently necessary to provide effective EDP support to user organizations.
3. Expand the level of service so that Teale Data Center EDP products are more accessible to the managers and non-technical staff of user departments.

Three major elements of the Facilities Operations Program are required to fulfill the objectives of this program:

1. Machine Operations—The functions performed by this element are concerned with operating the Teale Data Center central computers to ensure that work is accomplished in a timely and efficient manner. This equipment is operated to meet the users' schedules. Normal operations are 24-hours a day, 5-days a week, Day and Swing Shifts on Saturday, Day shift on Sunday, with the Swing shift on Sunday devoted to system software and hardware maintenance. If users require it, the computers are operated on holidays by prior arrangements.

2. Systems Support—This element is primarily concerned with maintaining the software operating system for the computers, maintaining the tele-communications system, maintaining the on-line inquiry systems, and installing and implementing vendor-supplied proprietary software packages. In addition, this element compiles and analyzes workload and resource utilization data as well as providing consultation and advice to both current and new users on the use of the above.

3. Customer Services—This element's primary function is to represent the Teale Data Center to the user and represent the users' needs to the Teale Data Center. In addition, this element is responsible for the scheduling of work flow and miscellaneous user support functions, including keeping the Teale Data Center management aware of user requirements, problems and financial status.

To reflect the anticipated efficiencies of the Statewide Timesharing System and the transfer of personnel to the Secretary of State's Office, two positions in the current year and 17 positions in the budget year are proposed for reduction.

In order to meet personnel requirements for the implementation of the Mass Storage System and the State Controller's Office Computer System, 26 positions in the current and budget year are proposed. In addition, 12 positions in the current year and 18 positions in the budget year are proposed to meet increased workload demands of the user departments.

### II. ADMINISTRATION

The objective of this program is to provide administrative support to the programs administered by the Teale Data Center, such as providing staff support to line functions including personnel, fiscal, billing, budget, planning, contract administration, and general administrative services.

General Fund .....	1,144,301	1,100,281	1,266,119

## I. TAHOE REGIONAL PLANNING COMPACT

## Program Objectives and Description

The Tahoe Regional Planning Compact was established as a bi-state agreement between Nevada and California as approved by the State of Nevada and the Congress.

Funding for this activity has been discontinued since both California and Nevada have regional planning agencies that have been enhanced to better carry out comprehensive planning and environmental protection in the Tahoe basin.

## Authority

Chapter 1589, Statutes of 1967 as amended by Chapter 988, Statutes of 1968 and Chapter 1064, Statutes of 1973.

## Program Requirements

	1978-79	1979-80	1980-81
Continuing program costs .....	\$37,500	-	-

## II. WATERWAYS MANAGEMENT PLANNING

## Program Objectives and Description

The program involves development of management plans for the rivers and portions of rivers in the California Wild and Scenic Rivers System and administration of the program as required by the Wild and Scenic Rivers Act. In addition, waterway management plans are prepared for the rivers contained in the Protected Waterways Program (Chapter 761, Statutes of 1971). These plans are prepared in close cooperation with and assisted by local government. Grants are made to local governments on a reimbursable basis for their assistance in plan development. Another aspect of the program involves the classification of rivers or segments of rivers as to wild, scenic, or recreational status as required by the Wild and Scenic Rivers Act.

The program is administered by the Resources Agency through the Department of Fish and Game which provides staff for the program. Collection of data and preparation of preliminary management plan information are handled through contracts with private consulting firms who provide the broad range of technical skills required on an interim basis.

Activities in 1979-80 included revision of plans for the Salmon, Scott, and Van Duzen rivers and completion of a plan for the Smith River.

Preliminary data collection was continued on the Klamath River and preparation of a management plan for the South Fork Eel River was initiated.

Applications to divert water from components of the Wild and Scenic Rivers System were reviewed and recommendations prepared for the Secretary for Resources. Projects and programs affecting various component rivers were reviewed and comments provided to the project sponsor and local governments. Program coordination was continued with local governments and other State as well as federal agencies.

Work in 1980-81 will include continuation of plan preparation for the South Fork Eel River and initiation of plan preparation for the Klamath River. Preliminary data collection for the Trinity River will be initiated. Data collection and coordination activities on the Kings River under the Protected Waterways Program will be initiated and work on other rivers under the Protected Waterways Planning Program will be done on a cooperative basis with local government.

Coordination will be maintained with various local, State, and federal agencies, as well as interested organizations and individuals. Cooperative efforts with local governments will continue, with reimbursable grants being made to the involved counties. Program personnel will continue to participate in studies under way on the Trinity River.

Staff support will be provided to the Secretary for Resources for administration of the program. These activities include project review, agency coordination, and review of applications for water diversion.

Contacts and coordination will be maintained with local, State, and federal agencies and project sponsors to assure that proposed projects are in concurrence with the requirements of the Wild and Scenic Rivers Act.

## Authority

Chapter 761, Statutes of 1971 and Chapter 1259, Statutes of 1972.

## Program Requirements

	1978-79	1979-80	1980-81
Continuing program costs .....	\$276,701	\$270,181	\$350,469

## III. SEA GRANT PROGRAM

## Program Objectives and Description

This program provides state assistance to California institutions of higher education in helping to provide the necessary matching funds for selected projects under the Federal Sea Grant Program. Authority for this program was extended through the 1983-84 fiscal year through legislation enacted in 1978 (Chapter 1255, Statutes of 1978).

## Authority

Chapter 1115, Statutes of 1973 and Chapter 1255, Statutes of 1978.

## Program Requirements

	1978-79	1979-80	1980-81
Continuing program costs .....	\$500,000	\$500,000	\$500,000

## IV. LOCAL ASSISTANCE

## California Tahoe Regional Planning Agency

## Program Objectives and Description

The California Tahoe Regional Planning Agency is a special body created by the Legislature as a political subdivision of the State. It is neither a city nor a county; rather, it is a regional agency. The interests of the State of California in negotiations with the Tahoe Regional Planning Agency are the primary concern of this body. Chapter 1064, Statutes of 1973, revised the membership of the agency, and provided for state funding of the body deleting provisions of the earlier legislation calling for assessment of counties within the Tahoe region to support the agency.

## HUMBOLDT BAY FUND

## Program Objectives and Description

The purpose of the Humboldt Bay Fund is to provide assistance for partial expenses attributable to litigation involving title to or boundaries of lands in the City of Eureka.

Chapter 1095, Statutes of 1978 (AB 925), provided for the transfer of \$750,000 during 1978-79 from the oil and dry gas revenues payable to the State under Chapter 138, Statutes 1964 pursuant to Section 6217 of the Public Resources Code, to be appropriated to the State Controller for the purpose of allocating the funds.

## ENVIRONMENTAL PROTECTION PROGRAM

The Marks-Badham Environmental Protection and Research Act of 1970 established the California Environmental Protection Program. The source of revenue for this program is the sale of personalized motor vehicle license plates by the Department of Motor Vehicles. Revenues are deposited in the Environmental License Plate Fund. By authority of Chapter 1105, Statutes of 1979, the program is administered by the Secretary for Resources. Funds expended pursuant to the Division 13.5 of the Public Resources Code shall have one or more of the following purposes:

- The control and abatement of air pollution, including all phases of research into the sources, dynamics, and effects of environmental pollutants.
- The acquisition, preservation, restoration, or any combination thereof, of natural areas or ecological reserves.
- Purchase of real property for park purposes on an opportunity basis or the acquisition of public accessways to coastal areas.
- Environmental education, including formal school programs and informal public education programs.
- Enhancement of renewable and nonrenewable resources.
- Protection of nongame species and rare and endangered plants and animals.
- Protection of wildlife habitat, including review of the potential impact of development projects and land use changes on such habitat.

The appropriations and expenditures for programs and projects funded from the California Environmental License Plate Fund are contained in the budgets of the various State Boards, Commissions and Departments identified in the narrative provided below.

### PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
Environmental Protection Program ( <i>California Environmental License Plate Fund</i> )	(\$6,761,865)	(\$12,074,554)	(\$12,587,551)
Environmental Protection Program ( <i>California Environmental License Plate Fund</i> )	\$280,000	\$63,000	-

### I. AIR RESOURCES BOARD

#### Authority

- Chapter 779, Statutes of 1970.
- Chapter 1105, Statutes of 1979.

#### Air Pollution Research Program

California continues to be faced with a multiplicity of critical air pollution problems. To adequately address these problems, the Board needs sound scientific and technical information on which to base its decisions. The research studies undertaken in this program are designed to provide the Board with the technical and scientific information necessary to effectively deal with the continuing and new air pollution problems that are critical and unique to California.

#### Input

	1978-79	1979-80	1980-81
Expenditures .....	(\$1,519,333)	(\$2,071,475)	(\$2,216,478)

### II. CALIFORNIA COASTAL COMMISSION

#### Coastal Access Program

Pursuant to Section 30001.5(c) of the Coastal Act of 1976, the stated intent is to promote maximum public access to California's scenic coastal areas. The Commission is also charged, under authority of Chapter 868, Statutes of 1979, with responsibility to inventory existing, dedicated, proposed and pending coastal accessways; to develop standards for locating and developing accessways; to identify public agencies appropriate for maintaining and accepting liability for accessways; and to report to the Legislature and Governor on the costs and proposed financing methods for maintaining such accessways. The Commission proposes to develop a unified and comprehensive program to identify, locate, develop, and manage accessways to coastal areas and to prepare a coastal atlas for distribution to the public and serve as lead agency in an ongoing coastal access program.

#### Input

	1978-79	1979-80	1980-81
Expenditures .....	-	(\$12,000)	(\$173,100)

### III. CALIFORNIA COASTAL CONSERVANCY

#### (a) San Dieguito Lagoon Restoration

The State Coastal Conservancy, authorized by Public Resources Code Sections 31251 and 31265 to undertake coastal resource enhancement projects, proposes to restore the San Dieguito Lagoon to a self-sustaining tidal system.

The project will include:

- Rehabilitation of a dry oxidation pond as a freshwater marsh. As the only freshwater wetland element of the enhancement project, the proposed marsh would greatly increase habitat diversity in the lagoon system, being particularly advantageous to waterfowl and shorebirds.
- Restoration of a diked-off parcel of land into a tidal marsh as a means of increasing the tidal prism of the lagoon and returning it to regular tidal action.
- Protection and enhancement of a Least Tern nesting area adjacent to the lagoon.

#### Input

	1978-79	1979-80	1980-81
Expenditures .....	-	-	(\$94,600)

#### (b) Aliso Greenbelt Trail System

To provide funds for construction of a 49-mile system of hiking, riding and bicycling trails in a habitat area/natural park which is to be a part of a greenbelt proposed to surround a major new residential development in Southern Orange County. The trail system will provide maximum public access and use consistent with carefully managed protection of the natural parks wide range of habitat, scientific and cultural resources. The trails will also provide access from an inland community to a public ocean beach.

#### Input

	1978-79	1979-80	1980-81
Expenditures .....	-	-	(\$170,750)

ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

## IV. DEPARTMENT OF CONSERVATION

## Digitized Mapping

The Department of Conservation proposes to establish a one-year program to convert existing maps of California's agricultural lands to a digitized base. This program will produce basic information on the extent, location, and classification of agricultural lands; and assist local agencies in land use planning.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	-	(\$310,637)

## V. DEPARTMENT OF EDUCATION

## Environmental Education

In 1980-81, the Department of Education will conduct a minigrant program which will result in the funding of environmental education programs throughout the State.

Grants will be made available to school and governmental agencies, museums, and non-profit educational associations as set forth in Education Code Section 8734. The Department of Education will (1) develop application procedures, (2) screen applications and select projects for funding, (3) monitor projects once underway, (4) collect and disseminate information gained through the program as appropriate.

Input	1978-79	1979-80	1980-81
Expenditures .....	(\$328,702)	(\$482,797)	(\$500,000)

## VI. DEPARTMENT OF FISH AND GAME

## a. Environmental Review and Evaluation

The Environmental Review and Evaluation Program is designed to prevent adverse impacts on fish and wildlife from projects affecting the land, water, and water quality of California.

The Federal Fish and Wildlife Coordination Act, Water Projects Recreation Act, and National Environmental Policy Act require review by the department of projects proposed by or permitted by federal agencies. The California Environmental Quality Act requires review by the department of many local and state projects. Chapter 543, Statutes of 1979 appropriated \$80,500 for additional support for this program and the proposed 1980-81 budget continues this legislative increase.

Input	1978-79	1979-80	1980-81
Expenditures .....	(\$1,452,096)	(\$1,385,121)	(\$1,406,133)

## b. Land Acquisition/Ecological Reserve Program

The purpose of this program is to acquire lands for the protection of rare or endangered species, their habitats and other unique habitat types. The program provides for the acquisition and development of lands that would not normally qualify under other existing funding sources.

Input	1978-79	1979-80	1980-81
Expenditures .....	(\$204,495)	(\$1,337,723)	(\$750,000)

## c. Instream Flow Analysis

The Department of Fish and Game proposes to prepare a master flow plan for each of the 425 streams in which stream flow studies are necessary to determine the flow requirements needed to protect fish and wildlife resources.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	-	(\$151,623)

## d. San Elijo Lagoon Project

The purpose of the program is to restore San Elijo Lagoon to ecological balance and enhance habitats for 32 threatened/declining species, preserve open space, and abate vectors associated with degraded wetlands.

The project would be implemented by the County of San Diego in consonance with plans of the California Department of Fish and Game (both agencies control adjacent portions of the lagoon) and in cooperation with the San Elijo Foundation. Modern wetland management techniques will be implemented in the program which emphasizes endangered species' habitat protection and open space preservation.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	-	(\$225,000)

## e. Natural Areas Office

California is ecologically one of the most diverse states in the union. This diversity of natural heritage is an asset to the state. It is in the public interest that representative samples of this natural heritage be protected and managed for the enjoyment of future generations. Such areas include critical habitats for rare and endangered species, habitats of vulnerable and threatened plants and animals, unique geologic and pedologic features, ecosystems of high species diversity, and representative examples of California's plant and animal communities.

The Natural Areas Office assists in the preservation of natural diversity through a statewide identification and inventory program of the significant natural areas in California.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$105,000)	(\$117,810)

## f. Riparian Habitat Study

Chapter 1340, Statutes of 1978 appropriated funds for the purpose of studying habitat in the great central valley and the California desert as a supplement to the Department's update of the 1965 Fish and Wildlife Plan.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$75,000)	-

ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

## g. Klamath River Salmon Enhancement

The salmon resource of the Klamath River has traditionally provided a primary food and economic resource for people throughout the four northeastern-most counties of California. The Klamath salmon have recently been subjected to increasing harvest pressure by a variety of interests, including ocean sport and commercial fisheries, inland sport fisheries, and Indian fisheries on reservation lands in the Klamath basin. In addition, over the years the Klamath-Trinity watershed, which provides habitat to the salmon resource, has been severely degraded by adverse timber harvest practices and major dam construction. This has resulted in blockage of salmon spawning runs, silting-over of spawning gravels, decreased water flows, and increased water temperatures.

In order to maintain an adequate spawning population in the face of declining salmon runs, government entities have had to reduce the allowable annual harvest. The declining salmon runs and the necessary curtailment of the harvest have caused increasing economic hardship to sport fishermen, local businesses, and native American fishermen.

This program provides for a two-part salmon enhancement and management plan, encompassing artificial production and habitat restoration, and provides for grants to local communities.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$250,000)	(\$250,000)

## h. Mono Lake Gull Rookery

Chapter 670, Statutes of 1979 appropriated funds for expenditure for the best available temporary measures for protecting and maintaining the Negit Island gull rookery. This action became necessary as a result of a lowered water level that allowed predators to invade the rookery.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$250,000)	-

## i. Aquaculture Development Study

Chapter 187, Statutes of 1979 appropriated funds to provide for a study to determine the legal and regulative problems restricting aquacultural development in the state and develop a plan of action to eliminate any such problems while protecting the interests of the state and industry.

The study, which will be conducted by private contract, will encompass freshwater as well as the marine aspects of aquaculture. A plan of action, including recommendations for legislation, will be developed by the department, based on the study findings, to improve and provide for the growth of the industry within California.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$50,000)	-

## VII. DEPARTMENT OF FOOD AND AGRICULTURE

## a. Integrated Pest Management Program (IPM)

The Department of Food and Agriculture proposes to:

1. Deliver pest management information to urban environmental residents upon request.
2. Properly identify pest problems using trained persons with the support of the California Department of Food and Agriculture (CDFA) laboratory services.
3. Provide information about planting, care, and maintenance of trees and shrubs (as directed by the Department of Forestry, Urban Forestry Program).
4. Provide information about safe storage and proper use of pesticides.
5. Determine the type of information that is implemented by homeowners.
6. Coordinate various state and local agencies and programs that relate to this program in delivering IPM.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	-	(\$128,298)

## VIII. DEPARTMENT OF FORESTRY

## a. Forest Resource Assessment

Chapter 1163, Statutes of 1977 (AB 452) requires the Department of Forestry to provide a forest resource assessment by July 1, 1979 and to present periodic updated assessments thereafter. As a means of providing such assessments and a sound data base for future decisions affecting all forest land resources (including the fisheries, range, recreation, watershed, wilderness and wildlife) a comprehensive aerial photography program of all state forest lands is proposed. Low level stereoscopic color infrared photographs covering 42 million acres were obtained in fiscal year 1978-79. This effort will allow photographic interpretation of the geographic and geomorphic features of these lands. It will provide the base for the location of the statistical ground sample points for the expanded forest resource assessment, quantification and analysis as required by (AB 452). It will also facilitate the integration of this data with satellite and other remotely sensed digital data for sequential updates in the future.

Through subsequent development and by use of digital mapping the inventory could be incorporated with resource data currently being collected by other state agencies such as soil types, mineral resources, rare and endangered plants, crop types and other land use information. This information will be helpful to state and local government in making future land use and resource management decisions.

ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$362,500)	-

## b. Timber Harvest Plan Review Program

These funds provide staff assistance from the Departments of Fish & Game and Conservation to assist in the review and approval of environmentally acceptable timber harvesting plans. Without this multi-disciplinary review process, excessive soil erosion from logging is likely to result in damage to soils, water, fish and game, and the regeneration of future timber resources.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$177,670)	(\$195,651)

## c. Soil Erosion Study

The 1980-81 budget will provide funds for a fifth year of the data collection and analysis of practices on preventing soil erosion. A five-year project is the minimum necessary to draw conclusions involving weather, harvesting and planting impacts.

Input	1978-79	1979-80	1980-81
Expenditures .....	(\$104,837)	(\$137,874)	(\$143,906)

## IX. DEPARTMENT OF PARKS AND RECREATION

## a. Coyote Point Museum, San Mateo County

This appropriation for the 1979-80 fiscal year provided funds to construct a permanent environmental education exhibit at the Coyote Point Museum in San Mateo County. The exhibit will instruct the public in the complex biological interrelationships of the environment.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$360,000)	-

## b. Heritage Corridor

Chapter 844, Statutes of 1979 appropriated funds for the development and printing of a map and interpretive guide for the Great Overland Heritage Corridor.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$20,000)	-

## X. SANTA MONICA MOUNTAINS COMPREHENSIVE PLANNING COMMISSION

Funding was provided in the 1979-80 fiscal year for completion of a study on land capabilities and the private and public short- and long-term costs and benefits related to possible and probable changes in density or intensity of land use.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$37,461)	-

## XI. STATE LANDS COMMISSION

## Lake Tahoe Shorezone Study

The staff of the State Lands Commission, in conjunction with USC and UCB, have developed a research study to develop original data which will enable staff to address the cumulative impacts associated with additional boating, recreation and other facilities in the shorezone of Lake Tahoe. At completion of the study, the staff of the Commission will define: (1) the data base for the lake's littoral system; (2) threshold levels for shorezone development; (3) study application to other lakes; and (4) future management options for the Tahoe shorezone.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	-	(\$175,000)

## XII. CALIFORNIA DEPARTMENT OF TRANSPORTATION

## Vista Point Projects

1980-81 funding will provide for development of a resting site for motorists on a scenic highway which will enable the general public to enjoy the natural beauty of coastal and valley areas. The completed vista points will include easy and safe exits from highways to parking areas. There will be trails and/or walks for nature observations of flora and fauna. Informal public education materials are to be provided to help the general public to become better aware of their environment, and trash receptacles are provided for refuse.

Input	1978-79	1979-80	1980-81
Expenditures .....	(\$87,164)	(\$204,187)	(\$197,500)

ENVIRONMENTAL PROTECTION PROGRAM—*Continued*

## XIII. DEPARTMENT OF WATER RESOURCES

## a. Water Conservation Education

The Water Awareness Program is a cooperative effort involving the Departments of Water Resources and Education, county school superintendents, local water suppliers, and school districts.

The program makes high-quality water conservation materials available to local water agencies and schools at low cost. The Department of Water Resources serves as lead agency in informing water agencies and schools about the program, in distributing the curriculum materials, and in training people to use the materials.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$162,030)	(\$191,400)

## b. Integrated Pest Management Program

This program evaluates existing plant and animal pest management practices on project levees, with the objective to reduce costs and adverse environmental impacts by implementing new methods of managing pest problems. Levee maintenance practices which employ ecological controls are being developed to help replace the existing environmentally and economically costly practices.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$28,476)	(\$33,000)

## c. Outdoor Urban Water Conservation

The Department of Water Resources urban water conservation program promotes conservation by developing information on water conserving plants, irrigation systems, alternative small scale water supplies and the design of the cities for conservation. The most effective way of reaching people with this information in addition to conferences, fairs, workshops, is by promoting demonstration landscapes. The Department of Water Resources staff provides consulting services to those interested in developing demonstration landscapes.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	(\$27,194)	(\$35,300)

## XIV. ENVIRONMENTAL PROTECTION PROGRAM

## a. Community Garden Programs

The 1979-80 program provided funding for a coordinator for the community garden programs in San Joaquin County.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	\$14,000	-

## b. Santa Monica Mountains

The 1979-80 budget provided funding to assist in the implementation of the Santa Monica Comprehensive Plan prepared pursuant to Section 67480 of the Government Code. The Resources Agency has contracted with the Southern California Association of Governments to assist in this effort.

Input	1978-79	1979-80	1980-81
Expenditures .....	-	\$49,000	-

## c. Association of Bay Area Governments

Chapter 934, Statutes of 1978, appropriated \$280,000 for the Association of Bay Area Governments to use as matching funds for Federal grants for continuing environmental planning and to update its Environmental Management Plan.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$280,000	-	-

## XV. DEPARTMENT OF MOTOR VEHICLES

## Environmental License Plate Program

As authorized by Chapter 779, Statutes of 1970, the Department of Motor Vehicles conducts the environmental license plate program by performing the issuance, renewal, accounting, filing and associated processing tasks related to the program. The Department's expenditures include the cost of printing license plates, processing original applications, processing renewal applications, processing the changing of plates from one vehicle to another, and completing the miscellaneous work associated with duplicate license plates and surrendering environmental license plates.

Input	1978-79	1979-80	1980-81
Expenditures .....	(\$2,915,238)	(\$4,475,046)	(\$5,121,365)

## XVI. LEGISLATURE

The 1978-79 Budget Act appropriated funds to the California Legislature for updating 1974 study of the California Environmental Quality Act (CEQA).

Input	1978-79	1979-80	1980-81
Expenditures .....	(\$25,000)	-	-

## ENVIRONMENTAL PROTECTION PROGRAM—Continued

## XVII. OFFICE OF PLANNING AND RESEARCH

## Environmental Data Inventory

Chapter 1343, Statutes of 1978 provided funds to the Office of Planning and Research which funded grant contracts with the Counties of Ventura, Mariposa, Nevada-Placer, and Riverside.

Each County project, scheduled for completion on March 31, 1980, will develop an inventory of environmental data needs of county agencies, develop an inventory of data requirements associated with state and federal permits, and conduct a pilot program to develop an environmental needs system to speed the environmental decision making process.

Input	1978-79	1979-80	1980-81
Expenditures .....	(\$125,000)	-	-

## CALIFORNIA POLLUTION CONTROL FINANCING AUTHORITY

### Program Objectives and Description

The issuance of pollution control revenue bonds was approved by a vote of the people November 7, 1972. Enabling legislation is contained in the California Pollution Control Financing Act (Division 27, Chapter 1 of the Health and Safety Code, commencing with Section 44500 as amended by Chapter 277, Statutes of 1973; Chapter 1473, Statutes of 1974; Chapters 1165 and 957, Statutes of 1975; Chapters 1381 and 1384, Statutes of 1976; Chapters 650 and 1082, Statutes of 1977; and Chapter 839, Statutes of 1979). The bonds carry interest which is exempt from income taxes, as provided for in Section 103 of the Internal Revenue Service Regulations.

*In 1979, legislation was enacted (Chapter 839, Statutes of 1979) which revises the membership, powers and duties of the Authority. Chapter 839 also specifies timeframes within which the Authority must act on applications for financing and removes the ceiling on the amount of bonds that may be issued.*

The program provides an opportunity for industrial firms and agricultural producers to utilize this method of financing to acquire, construct, or install pollution control facilities to meet the air and water quality standards mandated by federal, State and local governments. The interest tax exemption has resulted in annual financing rates of from 2 percent to 5 percent below comparable conventional methods.

An initial statutory authorization of \$200,000,000 was augmented by \$200,000,000 on June 9, 1977 authorized for air and water projects and \$200,000,000 authorized for solid waste disposal projects. The Authority also has a special program of financing for pollution control facilities for electrical generating facilities of public utilities in the State for \$160,000,000 of bonds. As of June 30, 1979, \$267,582,000 of bonds had been sold by the Authority. \$116,000,000 of the net authorization balance was reserved for small business.

Companies which received financing through the program have included food processors, cooperatives, manufacturers, recreational facilities, waste disposal firms, petroleum producers, refiners and marketers, and public utilities. The Authority has consulted with lenders and investors to tailor programs for specific needs. There is no minimum size, and individual projects costing \$75,000 to \$23,000,000 have been funded. The average interest cost has been less than 7 percent. Companies using this financing are also eligible for rapid amortization, depreciation and investment tax credit incentives for pollution control installations.

The Authority estimates that over \$2 billion will be needed by California industries to meet air and water quality standards, and to reduce the volume of solid wastes by 1983. A substantial portion of this capital investment would be eligible for financing through the Authority.

Companies with public markets for their securities or with well-known public names have been able to get public distribution for their issues through underwriters for projects costing more than \$2,500,000. Companies of this size with projects costing less than \$2,500,000 have generally been financed with banks or other sources that are familiar with the company. For small businesses the Authority employs 100 percent guarantees of their credit by the U.S. Small Business Administration to assure that long-term tax-exempt financing is available on an equivalent basis.

On June 9, 1977, the Authority and the Small Business Administration concluded a pilot program which confirmed the effective use of guarantees of an agency of the federal government in these financings and enabled seven firms to be funded with a bond offering of \$4,620,000 at a net interest cost of 5.27 percent, repayable over 20 years. A second series of bonds in this program was issued in the amount of \$5,735,000 in the first calendar quarter of 1978 for an additional seven companies at an interest rate of 5.36 percent repayable over 20 years.

The California Pollution Control Financing Authority Act specifically provides that any incurred indebtedness shall not be secured by the taxing power of the State, nor any of its political subdivisions. Under no circumstances shall the Authority create any debt, liability, or obligation on the part of the State payable from any source whatsoever other than project revenues or other moneys received by the Authority. *This is a trust activity and involves no State revenues or expenditures.*

The Authority is self-supporting from fees which it charges for its services. It provides funding to the Air Resources Board, Water Resources Control Board, and the Solid Waste Management Board which in turn provide certification of its projects. It employs the State Treasurer as the Trustee on certain of its bond issues, and the Attorney General as its counsel and reimburses them for their costs incurred on behalf of the Authority.

## CALIFORNIA CONSERVATION CORPS

The California Conservation Corps was established by Chapter 342, Statutes of 1976, to accomplish two important and interrelated goals:

(1) To further the development and maintenance of the natural resources and environment of the State and (2) to provide to the young men and women of the State meaningful, productive employment, training in employable skills and educational opportunities. The Legislature established the following specific objectives upon which the Corps shall focus: (1) accomplish useful and needed public service conservation work projects that will protect the natural environment; (2) develop the natural environment to provide opportunities for greater public use; (3) maintain fire prevention and fire suppression capability in rural areas; (4) instill in the corpsmembers an understanding and an appreciation of the natural environment; (5) provide an opportunity for the personal growth and development of the corpsmembers; and (6) provide on-the-job training to corpsmembers so that they may acquire employable skills, experience, and sound work habits.

Fire prevention and suppression, and natural disaster relief are an integral part of the program. The Secretary for Resources has designated certain centers whose major emphasis shall be fire prevention and suppression. The operation of these centers is the joint responsibility of the Conservation Corps and the Department of Forestry. These centers operate under the policy guidance of the Conservation Corps.

Chapter 342, Statutes of 1976, provides that the Corps "shall remain in effect only until January 1, 1981, and as of such date is repealed, unless a later enacted statute, which is chaptered before January 1, 1981, deletes or extends such date." Legislation reauthorizing the Corps is presently being developed and will be supported by the Administration for continuation of the Corps beyond the sunset provision. It is therefore proposed, that the 1980-81 budget reflect full year funding in anticipation of the passage of legislative reauthorization of the California Conservation Corps.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Training and Work Program .....	\$19,299,828	\$23,266,138	\$28,062,104

9. Position transfer from Department of Forestry (fire centers) .....	6	73,358	6	76,770

### I. TRAINING AND WORK PROGRAM

#### Program Objectives and Description

In keeping with intent of the Legislature "that young men and women be selected for the program authorized by this Division (Chapter 342, Statutes of 1976) on the basis of motivation for hard work, personal development, and public service and without regard to their prior employment or educational background", the youths selected to enter the California Conservation Corps have varied backgrounds and experiences.

The Corps' program is based upon the completion of conservation projects and participation in disaster relief throughout California. Corpsmembers obtain job skills and State, county, and local governments obtain work on conservation projects and assistance in the event of disaster. By-products of this effort include improved ability by corpsmembers to live and work with persons of diverse backgrounds, as well as the development of positive attitudes toward responsible adulthood. The corps also develops leadership among the youth and offers specific specialty training in cooking, timbermill-ing, vehicle maintenance, carpentry, welding, nursery operation, and other subjects. Special emphasis has been given to tree planting (over three million were planted in 1978 and 1979). Also, a program has been established for the training of selected corpsmembers in the construction and installation of solar water heating systems. Corpsmembers are also taught how to approach the private job market and are assisted in finding employment. Corpsmembers are encouraged to leave the Corps when an opportunity for a better job is presented. To achieve the program objectives, the Corps presently operates a training academy, 21 residential (live-in) base centers, and one nonresidential base center and will employ 1,480 corpsmembers during the 1979-80 fiscal year.

In the budget year, \$692,640 in General Funds are included for an increase in corpsmember salaries. This provides additional funding to meet Federal minimum wages standards in 1980-81 for 1,480 corpsmembers. Minimum wage increases will be \$3.10 per hour effective January 1980, and \$3.35 per hour in January 1981. The \$692,640 would fund six months of \$3.10 per hour and six months of \$3.35 per hour in 1980-81. In addition, \$20,160 in General Funds is proposed to fund "leadership grades" for those corpsmembers demonstrating specialized skills and leadership abilities. This would provide for an additional 20 leadership grades with a 15 percent premium over the base stipend (minimum wage).

For 1980-81, \$858,000 general fund and 9.2 personnel years are proposed to establish a nonresidential-urban center. This center will provide 60 young Californians employment in their community and an opportunity to perform a variety of urban conservation projects.

In addition, a new Fire Fighter Training Program is proposed in conjunction with the Department of Forestry. This new training program will employ 240 new corpsmembers (see b. Base Centers) in fire suppression activities.

With the addition of the nonresidential center and the Fire Fighter Trainee Program, the corpsmember enrollment level will total 1,780 corpsmembers for the 1980-81 fiscal year.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs .....	178.8	231.8	253.3	\$19,299,828	\$23,047,152	\$23,274,221
Workload Adjustments .....	-	16	34.8	-	218,986	4,787,883
Totals, Training and Work .....	178.8	247.8	288.1	\$19,299,828	\$23,266,138	\$28,062,104
General Fund .....	-	-	-	8,944,821	14,256,083	19,055,888
State Energy Resources Conservation and Development Account .....	-	-	-	-	-	335,016
Reimbursements .....	-	-	-	10,355,007	9,010,055	8,671,200

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## CALIFORNIA CONSERVATION CORPS—Continued

## Program Elements

a. Orientation and training center.....	15.6	27.4	27.3	\$2,097,928	\$2,290,078	\$2,265,671
b. Base centers.....	163.2	220.4	260.8	17,201,900	20,976,060	25,796,433

## a. CCC Academy

The California Conservation Corps (CCC) Academy conducts orientation and training. The objectives of this program are to orient corpsmembers toward the goals of the program, develop group cohesiveness, establish the living schedule and provide basic skill training to prepare for public service conservation work projects and disaster relief.

The corps members will be engaged in: (1) preparing meals, and cleaning and maintaining sleeping quarters and common areas; (2) training in tool safety and use and basic first aid; (3) taking courses in environmental studies, social awareness and group responsibility in the camp community; (4) physical conditioning through calisthenics and sports; and (5) training in the basics of survival and camping skills to enable them to perform back country projects. The Academy will provide an environment in which the social, physical, and avocational skills of all corpsmembers can be shared. Base center staff will also attend training at the Academy.

Candidates chosen to participate in the Corps will stay at the Academy for the first three weeks of the program. The center operates 24 hours a day, seven days a week in order that the goals of the Academy may be accomplished. When corpsmembers successfully complete the Academy training program they are assigned to a base center. *An adjustment of 0.1 personnel years is reflected for additional salary savings in 1980-81.*

## Output

1. Provide initial training and orientation for new base center staff and corpsmembers.
2. Provide advanced training for staff and selected corpsmembers.
3. Undertake conservation projects.

<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Expenditures.....	15.6	27.4	27.3	\$2,097,928	\$2,290,078	\$2,265,671

## b. Base Centers

The major objectives of the California Conservation Corps program are accomplished through the public service conservation work projects undertaken at the base center. Conservation projects are selected that develop or protect the natural environment of the State and concurrently offer training, leadership opportunities and skill development to the corpsmembers.

As directed by statute, the projects are undertaken by agreements with State agencies, with other governmental bodies, and with environmentally oriented private organizations. The base centers also have responsibility to prepare corpsmembers to participate in fire prevention/suppression and disaster relief operations.

The residential base centers are self-contained units that provide for the total needs of the members. Each has a permanent, professional staff and is operated on 24-hour a day, seven days a week basis. Base centers also operate temporary "spike" camps that are established as needed to handle project work. The Central Los Angeles Center is presently the only nonresidential center. Corpsmembers live at home and report to the center from which they are taken to urban conservation projects. Average corpsmember strength at a base center is sixty. *A second nonresidential center is proposed for 1980-81 and will operate similarly to the Hope Street Armory Center. The tentative site scheduled for the new center is the San Francisco area. 9.2 personnel years are reflected in 1980-81 to staff this center.*

For 1980-81, the Corps proposes to implement a Disabled Corpsmember Program. Under this program, 60 disabled individuals will be recruited and selected as part of the traditional corpsmember enrollment, and will participate in the same activities as other corpsmembers. This will not require additional funding to the training and work program.

The Corps during the 1980-81 proposes to expand its Training and Work Program with the addition of a Solar and Energy Conservation Program, and a Fire Fighter Trainee Program. The Solar Program includes 9.6 personnel years and \$335,016 from the State Energy Resources Conservation and Development Account and \$151,200 in reimbursements to train 50 corpsmembers in the design, fabrication, installation, and maintenance of solar water heating systems for various State agencies. The program will be located at Growlersburg Conservation Camp, El Dorado County.

In addition, 240 new corpsmembers are proposed to establish a Fire Fighter Trainee Program in conjunction with the Department of Forestry. These trainees will be assigned to 40 selected fire stations and utilized in fuel control, fuel management, and fire engine support activities. The cost to the Corps for the 240 corpsmembers will be \$2,442,720 general fund for salaries and benefits. This will not require additional base centers, as the corpsmembers will be located at Forestry fire stations. Along with this program, 36 corpsmembers will be utilized for three Forestry Helitack crews for fuel management and fire suppression activities. The Corps will require no additional funds for the Helitack crews, as the selection of the corpsmembers will be from existing corpsmember strength.

For fiscal year 1979-80, the Corps' contribution for the statewide reduction plan pursuant to Section 27.2, Budget Act of 1979 is \$359,444, which represents a reduction of 21.6 personnel years.

The base center budget also includes various workload and administrative adjustments for 1979-80 and 1980-81 fiscal years. In 1979-80, six positions were transferred from the Department of Forestry, previously on contract for clerical and cook services at the base centers. Additionally, 10 positions were deleted in 1979-80 pursuant to Section 20, Budget Act of 1979. These positions are proposed for reestablishment during the current and budget years.

## Output

1. Provide in-depth training for corps members.
2. Undertake conservation projects.

<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Expenditures.....	163.2	220.4	260.8	\$17,201,900	\$20,976,060	\$25,796,433

## II. PROGRAM SUPPORT

## Program Objectives and Description

The objective of this program is to provide the executive leadership, policy direction, administrative services, program evaluation, facilities selection, development and management required for the successful completion of the California Conservation Corps objectives; to assure coordination at the policy level with other State, federal and local governmental entities; and to provide uniform department wide staff services.

For 1980-81, 6.5 personnel years and \$94,068 are proposed for various support services associated with the new training programs. Support staff include 0.5 clerical staff for the Solar Program, three staff for the Disabled Corpsmember Program, and three staff for accounting and personnel services for the 240 corpsmembers in the Fire Fighter Trainee Program. Additionally, one position was deleted in 1979-80 pursuant to Section 20, Budget Act of 1979 and is proposed for reestablishment during the current and budget years. One limited term position in personnel will expire June 30, 1980 and will not continue in 1980-81.

Adjustment to the salary savings for program support includes a reduction of 0.3 personnel years for 1980-81.

## ENERGY RESOURCES CONSERVATION AND DEVELOPMENT COMMISSION

The objective of the Energy Resources Conservation and Development Commission is to insure the continuance of a reliable supply of energy at a level consistent with the State's needs for protection of the public health and safety and for promotion of the general welfare. The Commission's programs are directed toward processing utility applications for siting additional thermal power plants; establishing measures to reduce waste and inefficient use of energy, and developing new and/or alternative means of conserving, generating, and supplying energy, while complying with statewide environmental, public safety, and land use goals.

### SUMMARY OF PROGRAM REQUIREMENTS

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel years	Dollars
I	Reduce staff and increase funds for power plant certification .....	-8	+\$779,044
I	Reduce staff for energy analysis .....	-6.2	-754,411
II	Reduce staff and funds for implementation and enforcement of building standards .....	-4.3	-1,325,066
II	Increase current and budget year by \$9,500,000 each for energy conservation loans .....	-	9,500,000
II	Increase staff for appliances and equipment standards improvement and enforcement .....	+10.5	+555,380
II	Increase staff and funds for Transportation Conservation .....	+2.1	+298,767
II	Reduce funds for utility systems .....	-	-152,749
III	Reduce staff and increase contract funds for solar .....	-0.8	+316,248
III	Increase contract funds for geothermal development .....	-	+100,446
III	Increase staff and contract funds for alternative fuels .....	+5.7	+468,172
III	Increase current year by \$14,000,000 for residue conversion projects (SB 771) .....	-	-
III	Increase contract funds for wind electric demonstrations .....	-	+319,079
III	Increase contract funds to remove institutional barrier to methods of using conventional and non-conventional energy sources .....	-	+191,078
IV	Increase funds for Administration element .....	-	+296,091
IV	Increase staff for fuels allocation activity .....	+17.7	+401,887

### I. REGULATORY AND PLANNING PROGRAM

#### Program Objectives and Description

The primary objectives of the regulatory and planning program are to: (1) assess the need for new electric power facilities and the relative desirability of alternate ways of meeting or substituting for that need; and (2) to certify sites and related facilities for thermal electric power plants that are determined by the commission to be needed in the best interests of the State.

In accomplishing these objectives, work effort is focused on processing Notices of Intent to File for Site Certification (NOI) and Applications for Certification of Generating Facilities (AFC). Applications will be reviewed to ensure that needed power plants are sited, constructed and operated in a manner consistent with the site-specific, regional-and-statewide environmental, economic, social, and health-and-safety criteria. Methods for planning and forecasting electricity demand and supply assessment will be developed and refined; electricity demand and supply assessments will be provided to include the full range of relevant electric facility alternatives. General findings, guidelines and policies will be developed wherever possible.

For the 1980-81 fiscal year, decreases of eight person years in the Power Plant Certification element are made to recognize a reduction in the number of utility filings expected in 1980-81 and elimination of the staff engaged in regulation development. A reduction of 6.2 person years is proposed in the Energy Analysis element in accordance with a shift from an analytical to implemental focus on the Biennial Report; and a 0.4 of a person year staff reduction in Management and Support reflect workload adjustments.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## II. ENERGY RESOURCES CONSERVATION PROGRAM

## Program Objectives and Description

The Energy Resources Conservation Program develops a compatible and consistent set of policies and implementation actions designed to: (1) eliminate energy waste; (2) improve efficiency; (3) reduce the level and rate of growth in energy usage; (4) manage electrical load patterns; and (5) assist other State and local governmental agencies involved in transportation and land-use planning to present current and future energy demand.

Conservation opportunities in all sectors of the economy will continue to be addressed; the emphasis will be placed on those sectors with the highest levels of use, the largest potential for cost-effective conservation, and where the most direct opportunities exist for the Energy Commission to influence efficiency and usage. All forms of energy and types of fuel will be considered, but priority will be given to the conservation of electrical energy, its fuel inputs, and its direct substitutes. Improved efficiency of energy-using equipment and processes, and the reduced level of use or shifts in timing will be encouraged. In addition, conservation programs underway by utilities, government, businesses and communities will be monitored and improved.

In 1980-81, the Building Element is being reduced by 4.3 person years due to the decrease in implementation and enforcement activities of building standards; 10.5 person years are being added to the Appliance and Equipment Element for improvement and enforcement of the Appliance Efficiency Standards; 2.1 person years and funds are being added for a mandated workload increase in the Transportation sector; Contract funding for Utility Systems is being reduced to reflect the lower priority given to this element. \$9.5 million for energy conservation loans (AB 900) is included in both the current and budget years.

## III. DEVELOPMENT PROGRAM

## Program Objectives and Description

This program involves the aggressive pursuit of the analysis of alternative energy system potentials in California and the earliest possible major implementation of these new systems in the State. New resources and technologies include: solar energy, geothermal energy, wind energy, clean fuels from biomass, cogeneration and small hydroelectric plants as realistic and practical options to the major energy technologies currently in use in California. Actions required to achieve the full potential for desirable alternatives include: resource assessments and new technology assessments and demonstrations. The results of this work will serve as partial input to the commission's biennial reports, to regulatory proceedings, and to policy deliberations of the Commission, the Governor, and the Legislature.

In 1980-81 fiscal year, there will be a decrease of 0.8 of a person year in the Solar Element due to a workload adjustment; geothermal development activities are increased by \$100,446; the Fuels Element will increase by 5.7 person years to implement the mandated activities of SB 771; the Wind Element will increase due to increased activity for wind electric demonstrations; the Special Projects Element will increase activity to remove institutional barriers toward methods of using conventional and non-conventional energy source; and an increase of 0.1 of a person year in Management and Support due to a workload adjustment.

## IV. POLICY, MANAGEMENT AND ADMINISTRATION PROGRAM

## Program Objectives and Description

The primary objectives of the Policy, Management and Administration Program are to provide regulatory and administrative support to the line programs by: (1) setting policies and priorities which recognize and meet the changing energy needs and demands of the State of California and their impacts on consumers, producers and the environment; (2) ensuring the full and adequate participation by all interested groups and the public at large in commission activities; (3) providing liaison between local, federal, and State government entities; (4) maintaining and disseminating information to the public about mandated commission functions; and (5) providing centralized support and management services which include fiscal management, personnel management, training, business and central office services, data processing, library and publication services.

In fiscal 1980-81, an increase of 3.1 person years is proposed in the Regulatory Element to meet increased workload in the General Counsel's and Public Advisor's Offices and 17.7 person years are added to staff the functions of the Fuels Allocation Office.

## RENEWABLE RESOURCES INVESTMENT PROGRAM

Chapter 1104, Statutes of 1979 established the Renewable Resources Investment Program and created the Renewable Resources Investment Fund. The bill also transferred \$10 million (\$10,000,000) from the General Fund to the Renewable Resources Investment Fund. Renewable Resources Investment Funds shall be expended only for the following purposes:

- For salmon and steelhead hatchery expansion and fish habitat improvement.
- For forest resource improvement projects pursuant to the California Forest Improvement Act of 1978.
- For urban forestry projects pursuant to the California Urban Forestry Act of 1978.
- For agricultural soil drainage programs which will stop land from becoming a desert area and protect agricultural productivity.
- For support of technical assistance programs which will prevent soil erosion.
- For agricultural, industrial, and urban water conservation programs.

Specific project and program expenditures for the Renewable Resources Investment Program are included in the budgets for the Department of Fish and Game, the Department of Forestry, the Department of Water Resources, and the Water Resources Control Board.

## SOLID WASTE MANAGEMENT BOARD

The mission of the Solid Waste Management Board is to protect California from environmental degradation of the land due to improper disposal of wastes and to investigate and promote more effective methods of recovering waste materials, resources, and energy from waste. In carrying out this mission, the Board works with local government and private industry in the operation and maintenance of solid waste management programs.

The Board is responsible for the statewide development, implementation, and enforcement of minimum standards and policies for solid waste management. Technical on-site assistance is provided to local enforcement agencies in this area. Statewide meetings and training sessions acquaint local agencies with their responsibilities under the law emphasizing the process for issuing solid waste facility permits.

Other responsibilities of the Board include: (1) encouraging the increased use of secondary materials and recovered energy through resource recovery; (2) achieving stability in the quantity and quality of secondary material supplies by promoting and encouraging recycling; (3) insuring integration of the activities of all agencies and entities, public and private, having any missions and objectives that are related; (4) reducing littering and clean up litter; and (5) continuously monitoring and correcting deficiencies of existing and proposed waste disposal facilities in order to insure minimum environmental degradation and nuisance, provide protection from the hazards associated with waste disposal, and promote beneficial future site uses.

The Board is designated the lead agency for solid waste under the Federal Government Resources Conservation and Recovery Act (RCRA). The RCRA requirements include upgrading solid waste disposal facilities to meet the federal/State environmental standards through an open dump inventory and subsequent compliance actions. A state plan is also required to develop appropriate plans for coordination of all solid waste management activities.

Chapter 1161/77, (SB 650), enacted a comprehensive statewide litter control, recycling, and resource recovery program under the direction of the Solid Waste Management Board and established a State Litter Control, Recycling, and Resource Recovery Fund. Grants are administered by the Board from the Fund.

This budget has been developed based on Chapter 1150, Statutes of 1979 (AB 66) which eliminated the Litter Control, Recycling, and Resource Recovery Tax Assessment and replaced lost revenues with a General Fund Transfer determined by a specified percentage of the reimbursement for business inventories. This bill serves only to modify the source of revenue and does not alter the original intent of the SB 650 program.

The expenditure levels reflect repayment of long-term General Fund Loans (\$2,824,937 in 1979-80 and \$2,500,000 in 1980-81).

### Program Requirements

c. Staff and related costs to establish and maintain paper recycling programs in local governments .....	- -	0.7 43,000
c. Staff and related costs to raise public consciousness of the litter problem and the need for recycling .....	- -	0.5 117,000
c. Contract funds to study conversion of tires into useful energy .....	- -	- 241,000

## SOLID WASTE MANAGEMENT

### Program Objectives and Descriptions

The purposes of the Solid Waste Management Program are to upgrade disposal operations, protect the public and reduce the need for new natural resources by promoting recovery, recycling and reuse of waste materials.

Conventional solid waste management operations include storage, collection, transportation and ultimate disposal. The objectives of this activity within solid waste management are to work with the local officials who administer solid waste management programs within their jurisdictions to maintain those programs within the county plans and the established state policies and enforcement of the minimum standards. Technical assistance is also provided on improved methods of collection and disposal, and on techniques for the reduction of solid wastes within a community.

Resource recovery and energy conversion involve new approaches to solid waste management which will reduce our dependence on new or imported natural resources. The technology involves equipment and institutional arrangements for the collection, transportation, and separation of usable materials such as metals, paper, and glass, with the remainder going to energy conversion or other uses or to landfill for disposal.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## SOLID WASTE MANAGEMENT BOARD—Continued

The Board must take the lead in providing technical assistance to both government and private entities to encourage development of resource recovery facilities. The tracking of markets, prices, and dissemination of this information, and constant monitoring of new approaches and technology is vital to success of this activity.

The ultimate objective of the above activities is environmental enhancement and preservation to be achieved through the development of a new federally mandated state solid waste management plan designed for land protection; and a comprehensive assessment of existing projects to discern their impact upon environmental quality and to formulate a schedule of compliance to correct inadequacies.

## Authority

Government Code Section 66700 et seq. and Health and Safety Code Section 4500 as amended by Chapter 342, Statutes of 1972.

e. Executive and board support.....	9.6	9.3	9	969,707	1,581,267	1,606,673

## a. Planning

The major activities of this branch are to:

1. Assist local agencies in developing, updating, and implementing county solid waste management plans.
2. Write a statewide Solid Waste Management Plan and obtain, manage, and coordinate Environmental Protection Agency grant for implementation of the Resource Conservation and Recovery Act (RCRA). *Additional federal funding is reflected for one position and \$125,712 in 1979-80 and \$134,000 for continuance in 1980-81 to update resource recovery programs.*
3. Perform the required review and coordination to develop and implement a statewide solid waste management plan.
4. Conduct special studies to investigate solid waste management issues or programs.
5. Review and revise the state policy for solid waste management as necessary.
6. Manage contract with Department of Health Services for the hazardous waste program.

Output	1978-79	1979-80	1980-81
State Plan .....	—	1	1
Conduct special studies .....	1	2	2
Obtain and manage grant .....	1	1	1

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	10.1	12.2	12.2	\$1,464,813	\$1,962,180	\$1,874,549

## b. Enforcement and Technical Assistance

The major activities in the enforcement of the state minimum standards for solid waste handling and disposal and in the inventory of dump sites under the federal landfill criteria are:

1. Review and evaluate 140 local enforcement agency programs to assure that the State minimum standards are consistently enforced.
2. Enforce the State minimum standards when local enforcement agencies fail to act, when no local enforcement agency is designated, or when revocation of a designation is determined necessary.
3. Provide support services to local enforcement agencies such as engineering expertise, field lab analyses, technical assistance, and regulatory strategies for defining relationships between environmental factors, public health, and solid waste disposal.
4. Conduct training seminars which outline practices and procedures designed to operate waste management facilities within the State minimum standards.
5. Perform environmental assessments and concur or object to issuance of solid waste facility permits.
6. Assess and make recommendations concerning granting of waiver requests for permits and variances from applying the State minimum standards for solid waste handling and disposal.
7. Provide information and assistance to local agencies preparing environmental assessments relating to solid waste management and review and comment on environmental impact reports.
8. Inventory disposal sites throughout the State according to criteria set by EPA concerning the open dump inventory mandated by the Resource Conservation and Recovery Act of 1976 (RCRA). *Additional federal funding is included for seven positions and \$294,393 in 1979-80, and \$366,000 for continuance in 1980-81.*
9. Assess the existing State regulatory authority needed to impose closure of compliance proceedings involved with RCRA.
10. Review and revise as necessary the State minimum standards for solid waste handling and disposal.
11. Investigate improved waste management techniques and present findings to Board.

*0.5 position is included in 1980-81 to assist existing staff in responding to the California Environmental Quality Act. 0.5 personnel years were administratively included in 1979-80 pursuant to Chapter 1007, Statutes of 1978, to conduct a study on the feasibility of recovering methane gas from landfills.*

*The 1979-80 fiscal year only includes the reduction of one personnel year pursuant to Section 27.2, Budget Act of 1979. The 1980-81 budget also reflects an increase of 0.3 personnel years salary savings.*

SOLID WASTE MANAGEMENT BOARD—*Continued*

## Output

	1978-79	1979-80	1980-81
Review and evaluate local enforcement agency programs .....	0	30	80
State enforcement .....	4	3	6
Provide technical assistance to local enforcement agencies .....	20	35	25
Conduct training seminars .....	0	25	25
Solid waste facilities permits concurrence procedures .....	85	430	70
Waiver request assessments .....	3	7	11
Review, prepare, EIR's and negative decisions as related to Board actions .....	140	150	240
Investigate disposal sites per open dump criteria .....	0	0	350
Analyze open dump inventory data for site classification .....	0	0	350
Publish major technical reports related to solid waste disposal .....	3	4	6
Perform special Board assignments on improved waste management techniques .....	4	4	5

## Input

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	28.1	32.6	33.3	764,369	1,403,957	1,499,931

## c. Resource Conservation and Recovery

Resource conservation and recovery includes:

- Reducing the waste generated.
  - Separating reusable/recyclable items from the waste stream.
  - Encouraging recycling.
  - Utilizing technological systems which can convert the organic fraction of the waste stream to fossil fuel substitutes.
  - Increasing the public's awareness of solid waste problems and the solutions to those problems.
- Overall resource conservation and recovery can conserve fossil fuels and other valuable resources, and enhance environmental quality through reducing the rate of landfill consumption and litter.

The major activities in this element are:

1. Implementation of the Litter Control Recycling and Resource Recovery Act of 1977:
  - a. Develop program direction for the various grant programs. Update criteria for recycling, resource recovery and litter control grants.
  - b. Select projects for recycling, resource recovery and litter control grants.
  - c. Develop grant project contracts
  - d. Monitor and audit grant projects, and
  - e. Establish statewide anti-littering/resource recovery public education campaign.
2. Administration of grants awarded under SB 1855 for six major high-technology resource recovery projects.
3. Administration of the AB 2636 white paper recycling program.
4. Administration of the statewide used oil recycling program.
5. Monitor and evaluate resource recovery technologies; identify alternatives for resource recovery projects.
6. Technical assistance:
  - a. Provide engineering, environmental and financial consultation to federal, State and local governments and private industry regarding resource recovery and recycling.
  - b. Assist local government entities in development and implementation of litter control programs.
  - c. Assist local government and private entities in development and implementation of recycling programs.
7. Develop and implement programs to:
  - a. Encourage source separation
  - b. Promote use of secondary materials in California industry and identify markets for recovered materials. *One position is included in 1980-81 to provide technical assistance in marketing for recycling centers and resource recovery facilities.*
  - c. *One limited term position is included in 1980-81 to develop and implement a solid waste reduction program.*

*In addition, a 0.5 personnel year was administratively established in 1979-80 to implement a school paper recycling a program pursuant to Chapter 855, Statutes of 1978. This adjustment will not continue into the 1980-81 fiscal year. Further adjustments include 0.5 personnel year increase to salary savings in 1980-81.*

*A total of \$765,821 in funds is proposed to field test a prototype mobile pyrolyzer for conversion of agriculture and forestry waste into synthetic fuel.*

*Projects proposed in 1980-81 from the Energy and Resources Fund include:*

- (a) *Demonstration of resource conservation through recycling at (3) state parks. (0.1 personnel years);*
- (b) *Paper recycling programs in the state's school districts (0.7 personnel years);*
- (c) *Solid Waste Environmental Education Program (SWEEP), aimed at increasing public participation in resource conservation;*
- (d) *Paper recycling programs in local governments (0.7 personnel years);*
- (e) *A statewide "Untrash California Day" which would raise public consciousness of the litter problem and the need for recycling; and*
- (f) *Studies to determine the feasibility of converting tires into useful energy (0.5 personnel years).*

## SOLID WASTE MANAGEMENT BOARD—Continued

## Output

	1978-79	1979-80	1980-81
Review of technical papers .....	230	250	250
Review of major reports relating to solid waste recovery and conversion .....	63	82	50
Production of major reports dealing with recovery and site specific solid waste conditions and the feasibility of utilization .....	12	12	12
Review request for technical assistance from local governments, community groups, the agricultural community, and private industry .....	600	900	1,500
Technical submittals to other State agencies .....	18	30	30
Used oil recycling centers, Chapter 1158, Statutes of 1977 .....	2,200	2,500	2,500
Marketing assistance to bulk oil holders .....	51	300	150
Toll-free telephone calls .....	1,700	2,500	3,000
High-technology resource recovery projects assistance .....	6	7	7
Recycling grant applications reviewed .....	105	120	130
Recycling grants awarded .....	39	40	40
Recycling contracts managed .....	—	80	120
Resource recovery grant applications reviewed .....	43	60	60
Resource recovery grants awarded .....	14	20	20
Resource recovery contracts managed .....	—	14	25
Litter grant applications reviewed .....	267	292	335
Litter grants awarded .....	222	292	312
Litter contracts managed .....	110	292	312

## Input

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	39.3	31.5	34.5	\$8,188,548	\$10,715,451	\$12,076,962

## d. Administrative Services

The administrative services activities include:

1. Provide administrative and consultative services in the areas of personnel and training.
2. Provide accounting budgeting and contract preparation and processing services to assist in the accomplishment of the Board's program objectives.
3. Provide assistance in office management functions such as duplication, graphic arts, procurement, space and facilities management, communications systems, supply and property. *The 1980-81 budget reflects an increase of 0.2 personnel years in salary savings and an increase of 0.3 personnel years related to resource conservation activities.*

## Input

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	13.6	10.2	10.3	\$314,740	\$291,093	\$558,076

## e. Executive and Board Support

The objectives are to provide executive direction and support to the program functions of the Board. The Executive Office provides essential management, policy and program direction, as well as public information, legislative liaison, and program evaluation. *Additional legal workload required the addition of 0.2 personnel years in 1979-80 on a limited term basis. The 1980-81 budget reflects an increase of 0.1 salary savings.*

## AIR RESOURCES BOARD

The Air Resources Board has primary responsibility for protecting air quality in California. This responsibility includes establishment of ambient air quality standards for specific pollutants, evaluation of standards adopted by the U.S. Environmental Protection Agency and development and implementation of the State Implementation Plan for the attainment and the maintenance of these standards. The plan includes emission limitations for vehicular and industrial sources established by the Board and local air pollution control districts.

### AIR POLLUTION CONTROL PROGRAM

#### Program Objectives and Description

Air pollution harms the health of California's citizens; it impairs productivity; it damages crops and reduces their yields; it lessens our enjoyment of our surroundings; and it lowers property values. Control of air pollution, while ensuring that growth and needed development may occur, is the objective of the Air Resources Board. In order to meet that objective, the Board develops and implements a variety of control strategies.

The Regional Programs element works closely with local governmental and private agencies in developing comprehensive air quality maintenance and air conservation planning programs and reviews environmental impact reports for anticipated effects on air quality of proposed private, commercial and industrial development.

The Stationary Source Control element focuses on developing and evaluating procedures and strategies to monitor and control emissions from nonvehicular air pollution sources, and works with local air pollution control districts to promote the adoption and implementation of effective control measures.

The Mobile Source Control element develops, implements, and enforces laws and regulations controlling emissions from new and in-use vehicles.

The Legal Affairs and Enforcement element investigates complaints against polluters, assists local districts in enforcing emission requirements against major sources of pollution and prepares documentation on chronic and flagrant violations for referral to local or State prosecutors.

The Vehicle Inspection element provides for the inspection of vehicles operating in California upon change in ownership, and also for the monitoring and certification of "smog stations" which certify whether in-use vehicles comply with emission control standards. These activities are carried out by contracts with the Department of Consumer Affairs and the private sector.

The Research element conducts and sponsors research on the composition, the chemical process and the distribution trends of pollution in the atmosphere; on the effects of air pollution on human health, vegetation, and on the economy of the State; and on measures for the control of such pollution.

The Technical Services element collects and analyzes data on meteorology and air quality, maintains an inventory of pollution sources and emissions and provides data processing services to other Board elements.

The Haagen-Smit Laboratory element provides sampling and analysis to other elements of the Air Pollution Control Program.

The General Support element provides executive leadership, policy guidance and administrative services.

For 1980-81, the Air Resources Board, as a policy direction, proposes to establish a Toxic Substance Control Program to limit community exposure to carcinogens, teratogens, and other toxic substances.

The Board proposes to add 18.5 personnel years and \$692,851 for the development of standards, regulations, and emission controls of toxic chemicals in California's air environment. (See program elements b, d, f, h, and i.) The objectives of the program include the establishment of acceptable levels of community exposure to carcinogens, teratogens, and other toxic substances present in the air, development of air quality standards for these substances, measurement of ambient concentrations in the vicinity of facilities emitting toxic substances, design of emission regulations that do not exceed acceptable limits, and assistance to local districts for the implementation and enforcement of these regulations.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## a. Regional Programs

This element works with Air Pollution Control Districts and general purpose local government to develop and coordinate local air quality programs with State and Federal-related programs and activities. This element represents ARB's major effort to assure that present and future air quality will be enhanced and protected by coordination of Federal, State, regional, and local air quality programs. The Regional Programs Element has responsibility for seven key functions.

1. Participation in the development and liaison for ongoing non-attainment and air quality maintenance programs for all areas of the State.
2. Subvention of State funds to local Air Pollution Control District's air quality programs pursuant to the California Health and Safety Code.
3. Support local Air Pollution Control Districts in the adoption of new rules and regulations.
4. Update the State Implementation Plan (SIP) for achieving and maintaining national ambient air quality standards pursuant to the Federal Clean Air Act in such a manner as to avoid the Federal imposition of sanctions on California.
5. Develop an Air Conservation/Prevention of Significant Deterioration Program to provide the appropriate mandated protection of air quality in areas that have air quality better than the health-based standards.
6. Coordinate air programs with areawide wastewater programs, transportation programs, and coastal programs.
7. Review and comment on environmental impact reports as required by the Public Resources Code, the Government Code, and the National Environmental Policy Act.

During 1979-80, 3.4 personnel years were added to temporary help for guidance on coastal development and prevention of significant deterioration as it relates to air quality. These activities are reimbursed by other state agencies. In 1980-81, a reduction of 0.3 personnel is reflected as an adjustment to salary savings and administrative overhead.

In 1980-81, an additional \$606,420 is proposed for local assistance to allow for a 9 percent cost of living adjustment.

## Output

1. Development of workable and approvable air quality maintenance, nonattainment, and prevention of significant deterioration programs.
2. Subvene State funds in a way to improve local air quality.
3. Update the State Implementation Plan (SIP).
4. Annual State report on Reasonable Further Progress toward attainment and maintenance of air quality standards in accordance with Federal requirements.
5. Assist local agencies in the development of general and transportation programs which improve air quality and are consistent with Federal and State requirements.
6. Develop an effective SIP Retrieval System to provide easy access to the most current SIP rules, regulations, and policies.

## b. Stationary Source Control

This element is responsible for developing measures for controlling emissions from industrial and energy-related stationary sources, for effecting the implementation of such measures by air pollution control districts, and for evaluating potential air quality impacts of proposed new stationary sources of pollution. The element is also responsible for developing standard test procedures and for testing and certifying new stationary source control systems. In addition, the element coordinates with the U.S. Environmental Protection Agency and with local districts in matters related to the control of emissions from stationary sources. The element also provides technical assistance, such as source testing and engineering support, to districts which request such assistance.

In 1979-80, work will be started to implement Chapter 922, Statutes of 1979, which requires the Board to establish inventories of potential cogeneration and resource recovery projects which could be completed by 1987, and to adopt, by January 1, 1981, rules for districts to provide emission offsets for these projects. The appropriation of \$30,000 in Chapter 922 and 0.9 temporary help will be used in 1979-80 for this purpose. In 1980-81, the addition of five personnel years and \$162,506 is proposed to develop emission measures and standards, and provide technical assistance, and promote cogeneration projects. Funding for these positions will come from the Energy Resources Conservation and Development Account.

In 1980-81, an additional five personnel years and \$127,659 are proposed to limit community exposure to carcinogens, teratogens, and other toxic substances in the ambient air to acceptable levels. An increase of 0.7 personnel years in administrative overhead is reflected in the budget year.

## c. Mobile Source Control

Motor vehicles and the many other uses of the internal combustion engine are the major sources of carbon monoxide emissions as well as very significant sources of the photochemically reactive pollutants: oxides of nitrogen and hydrocarbons. Violations of the air quality standards for mobile-source related pollutants occur throughout California. The worst example continues to be the South Coast Air Basin (generally, the Los Angeles Metropolitan area but including the San Bernardino-Riverside areas as well) where the worst photochemically-generated air pollution in the United States exists. This element is directed at controlling emissions from internal combustion engines. Activities of this element include the following items.

1. Developing, implementing, and enforcing laws and regulations limiting emissions from new and in-use vehicles. Surveillance of both new and in-use vehicles is performed to assess the efficacy of established procedures. In addition, the effects of replacement parts, retrofitted emission control devices, and fuel additives on emission are also studied.

2. Developing test and evaluation procedures for vehicles, engines, emission control components, fuel additives, and test equipment to assure emission standards are met for the useful life of required emissions control components.

3. Coordinating with Federal, State, and local agencies and the regulated industries in the control of emissions from internal combustion engines.

4. Conducting information and training seminars for vehicle dealers, mechanics, and members of the public on vehicle emissions and the resulting air pollution.

5. Developing inspection standards, performing effectiveness evaluations, and providing analytical capabilities for unplanned projects and for California's motor vehicle inspection program.

6. Developing regulations for presently unregulated modes of internal combustion engine use.

During 1979-80, 2.9 personnel years were added to temporary help from Federal funds for vehicle emission testing.

In 1980-81, four personnel years and \$113,503 is proposed for expanded field investigation activities.

A reduction of 0.4 personnel years is reflected in temporary help in the budget year.

## 1. New Vehicles

## Output

As a result of ARB's regulations governing new motor vehicles and engines the California motoring public operates the least polluting vehicle in America. ARB's efforts in this area include new vehicle/engine certification for exhaust and evaporative emissions, monitoring of manufacturing quality control, inspection of dealerships for proper sale and service of new vehicles, and emission control system warranty regulations.

	1978-79	1979-80	1980-81
New vehicle surveillance actions .....	180	180	180
Used vehicle surveillance tests and evaluations .....	600	600	600
Assembly plant inspections/tests .....	88	15	15
Dealership inspections tests.....	1,107	2,700	2,700
Exhaust systems evaluations and certification .....	180	250	250
Evaporative systems evaluations and certification .....	50	50	50
Quality audit evaluations.....	140	150	150
Complaint investigations .....	200	200	200
Special surveys .....	20	25	30
Warranty arbitration .....	200	300	300

## 2. In-Use Vehicles

Once correctly certified and prepared vehicles have been sold, they must be maintained properly if they are to continue to meet standards. Replacement as well as original parts must be durable and compatible if emissions control is to be maintained at a reasonable cost. Surveillance of in-use vehicles allows the evaluation of long-term control program effectiveness and also provides information for emissions inventory compilation and future control strategy planning. The Motor Vehicle Inspection Program will increase demands upon manufacturers and dealers to honor their emissions control warranty obligations, and the warranty regulations will increase the benefits from the Motor Vehicle Inspection Program.

	1978-79	1979-80	1980-81
Surveillance tests .....	4,278	4,000	4,000
Special emissions tests .....	1,069	1,000	1,000
Aftermarket parts emissions test .....	25	50	50
Aftermarket parts evaluations.....	25	50	50

Federal funds.....				—	59,657	—

## d. Legal Affairs and Enforcement

The objectives of this element are four-fold:

1. Provide timely and professional legal advice to Board members and ARB staff on substantive and procedural issues for planning, regulatory, and enforcement functions of the Board, as well as to local districts as requested;
  2. Identify, document, and take action on stationary source and vehicular emission control violations;
  3. Assure effective enforcement of laws and regulations controlling emissions from stationary sources of air pollution by local districts, and provide assistance to local districts for the same purpose;
  4. Assure adequate training for state and local air pollution investigators.
- Activities include providing legal counsel to the State board and staff, and local districts as requested, development and referral of violations to local prosecutors or the State Attorney General for prosecution, and responding to requests for information under the Public Records Act. Enforcement activities include review of districts' enforcement programs for compliance with Federal and State requirements and the inspection and monitoring of major emitting facilities subject to local emission limitations, New Source Review permit requirements, New Source Performance Standards, and standards for hazardous pollutants, including carcinogens. The staff of this element also monitors agricultural burning and works with local districts and growers to encourage compliance with regulations. It enforces regulations on the volatility of gasoline and on the vapor recovery systems required for gasoline marketing and distribution and conducts field inspections of major stationary sources by means of two mobile source-test vans. The staff also compiles quarterly and annual reports for the U.S. Environmental Protection Agency's national compliance data system.
- In 1979-80, two personnel years and \$92,500 will be expended to implement new administrative hearing procedures in accordance with Chapter 810, Statutes of 1979. For 1980-81, an increase of \$187,922 is proposed to fund three positions to continue these activities.*
- Additionally, one personnel year and \$32,489 is proposed as part of the new Toxic Substance Control Program to limit community exposure to carcinogens, teratogens, and other toxic substances in the ambient air to acceptable levels.*

Output	1978-79	1979-80	1980-81

## e. Vehicle Inspection

This element will identify, and cause to be corrected, those vehicles with substantial emissions resulting from failed components, improper adjustment or poor maintenance, in order to realize the full potential of emission control systems on in-use vehicles. In addition to improved air quality, improved vehicle performance and improved fuel economy will result from these activities.

The element consists of two complementary components, namely, the Motor Vehicle Inspection Program (MVIP) and the Smog Station Program. The MVIP enacted by SB 479 and modified by AB 4161 is now in phase three of a four-phase effort, having completed the design and pilot test phases. Phase 3, change-of-ownership, was implemented on March 19, 1979 and requires vehicles, upon transfer registration, to be inspected by one of 17 state inspection stations forming a network in the South Coast Air Shed (SCAS) or by a certified fleet operator. Vehicles that exceed emission standards and criteria established by the Board are required to be repaired. To ensure repair in a cost-effective manner, the MVIP test provides diagnostic information to pin-point the maintenance/repair problem. Phase 4, if enacted, would require periodic inspection and maintenance/repair, when necessary, of all vehicles in the SCAS as a condition of annual registration.

The smog station program complements the MVIP in that licensed, Class A mechanics are authorized to perform low emission tune-ups and issue Certificates of Compliance, which are required for re-registration of vehicles upon change of ownership in all areas of California outside of the SCAS. As part of the Smog Station Program, mechanics are tested and licensed, and stations are licensed and inspected.

This entire element is centralized in the Air Resources Board. Under an interagency agreement, the Board contracts with the Department of Consumer Affairs, Bureau of Automotive Repair (BAR), to implement the smog station program. In addition to BAR, the Board has contracted with a private corporation to conduct the actual emissions testing in the MVIP. The cost of this activity is fully supported by inspection fees paid into the Vehicle Inspection Fund.

## f. Research

As a basis for its regulatory and standards-setting decisions, the Air Resources Board requires the fullest and most accurate scientific and technical information on air pollution and its control. Access to the knowledge and skills of a broad range of disciplines is required to assemble this information. The Research element provides the Board with the scientific and technical information necessary to formulate regulations and standards by maintaining several activities:

1. Sponsoring extramural research in various aspects of air pollution, including its effect and its control.
2. Monitoring air pollution research conducted by Federal agencies and other organizations.
3. Establishing appropriate air quality standards for California and coordinating the review of Federal and State ambient air quality standards.
4. Evaluating the socioeconomic impacts of air pollution control programs.
5. Developing and applying air quality simulation models.
6. Developing and operating the Board's reference library, which disseminates technical information to the ARB staff and others.

For 1980-81, continued funding from the California Environmental License Plate Fund is proposed for the Board's extramural research program into the sources, dynamics, and effects of air pollutants. In addition, \$200,000 in MVA funds is proposed for additional research capability which would address toxic and hazardous materials.

As part of the new Toxic Substance Control Program, six personnel years and \$226,678 is proposed to provide the initial research capability for development of acceptable levels of community exposure to toxic air pollutants.

In 1980-81 an additional two personnel years and \$68,281 is proposed to provide more timely and thorough review of the State's ambient air quality standards. The Board also proposes to establish one permanent econometrician position to analyze economic impacts of air quality programs. Funding for this adjustment will be taken from within existing resources. An increase of 0.1 personnel years is reflected for administrative overhead in 1980-81.

Output	1978-79	1979-80	1980-81

## g. Technical Services

A cost-effective air pollution program requires timely and accurate measurements of the air pollution problem. This element supports the State board by gathering and inventorying emission and aerometric data; analyzing and publishing data which are needed to develop and evaluate air pollution control strategies; making daily agricultural burning announcements; and predicting severe air pollution episodes. This element continuously supports the Air Pollution Control Program through the following activities:

1. Maintaining an up-to-date inventory of air pollution sources in California, including the kinds and amounts of air pollutants discharged by each source.
2. Monitoring ambient air pollutant concentrations and assuring the accuracy and precision of the air quality data.
3. Cooperating with local agencies to improve the accuracy of spatial and temporal representations of air quality and emissions data through special studies, quality assurance measures, and interlaboratory comparisons.
4. Providing electronic data processing services and support to other Board elements, and computer processing of statewide emissions, meteorological, and air-quality data.
5. Issuing daily agricultural burning notices based on an evaluation of real-time aerometric data and established meteorological criteria of all California air basins.
6. Making daily predictions of air quality in critical air basins during seasons of potentially severe air pollution episodes.

During 1979-80, 0.7 personnel years were added to temporary help from Federal funds for emergency episode activity and field deployment of monitoring and quality assurance equipment.

In 1980-81, 0.5 personnel years and \$11,991 is included to provide assistance in implementing a change in the Emission Data System.

An additional reduction of 0.5 personnel years is reflected in temporary help in the budget year.

<sup>1</sup> Inspection personnel are shown in the budget of the Department of Consumer Affairs (Bureau of Automotive Repair).

## AIR RESOURCES BOARD—Continued

## h. Haagen-Smit Laboratory

The Haagen-Smit Laboratory, located in El Monte, provides sampling and analysis services to other elements of the air pollution control program. A major function is to support the regulatory activities of the Mobile Source Control element through a wide variety of vehicle emissions related tests and services. The Atmospheric Testing branch provides nonroutine atmospheric sampling and testing services to the Executive Office and to other elements of the air pollution control program. During 1979-80, 1.9 personnel years were added to temporary help from federal funds for vehicle emission testing. In 1980-81, five personnel years and \$276,958 is proposed as part of the new Toxic Substances Control Program. Installation of an automated emission test system is also proposed and will require \$280,000 for test cell equipment. The 1980-81 budget also reflects a reduction of 0.1 personnel years in temporary help.

## Output

## 1. Vehicle Testing

This service is essential to the laboratory support of the vehicle emissions regulatory program described in the Mobile Source Control element.

## i. General Support

The objective of the General Support element is to provide executive direction and administrative support to the program functions of the Board. The executive office provides essential management, policy and program direction as well as public information, legislative liaison, and program evaluation. The administrative services component provides fiscal, personnel and business services to the Air Pollution Control program. During 1979-80, 1.3 personnel years were added to temporary help from state agency reimbursements for contractual services.

An additional 2.2 personnel years and \$41,643 is included for administrative support to the Toxic Substance Control Program (1.5) and word processing services (0.7).
